QUIET MONEY

THE QUIET MONEY DAILY PLANNER

365 days of basic money lessons.
One picture. One lesson. One small action.

365 PAGES | LETTER + A4 | UNDATED

THE MONEY RULES NOBODY TAUGHT YOU.

WELCOME

365 days. One picture, one short lesson, one small action. About ten minutes a day.

HOW THE WEEK WORKS

Monday: Learn. Tuesday: By the numbers. Wednesday: Do it. Thursday: Mindset. Friday: Action. Saturday: weekly check-in. Sunday: reflect and reset.

START ANYWHERE

The book is undated. Open to Day 1 whenever you begin. If you miss days, skip ahead to today's page. Never restart: a missed day is only a missed day.

DO THE FRONT PAGES FIRST

Fill in the Net Worth Snapshot (page 3) and your Debt Map (page 4) before Day 1. You will come back to both.

PRINT IT YOUR WAY

Print single-sided for a binder, double-sided for a book. Black-and-white or colour both work. The art pages are the heaviest ink, so print them in draft mode if you like.

WHAT THE NUMBERS ARE

Every figure in this book is a worked example computed with the same math the Quiet Money channel uses, with its assumptions stated. Investment returns are never guaranteed. Your own numbers are the ones that matter.

WHAT THIS IS NOT

This planner is education, not financial, tax or legal advice. It will never tell you to buy a particular stock, coin or product. Rules differ by country: where a lesson is specific to one, it says so.

WHY I AM DOING THIS

Designed by Quiet Money with AI assistance. Illustrations are drawn in code or made with AI image tools. Personal use for you and your household. Please do not resell, share or redistribute the files.

NET WORTH SNAPSHOT

What you own minus what you owe. Fill in a column on Days 1, 91, 182, 273 and 365. Round to the nearest $10.

WHAT YOU OWN	DAY 1	DAY 91	DAY 182	DAY 273	DAY 365
Checking					
Savings					
Emergency fund					
Retirement / investments					
Home or car value (if sold)					
Other					
TOTAL OWNED					

WHAT YOU OWE	DAY 1	DAY 91	DAY 182	DAY 273	DAY 365
Credit cards					
Student loans					
Car loan					
Mortgage					
Other debts					
TOTAL OWED					

NET WORTH	DAY 1	DAY 91	DAY 182	DAY 273	DAY 365
OWNED minus OWED					
Change since Day 1					

A negative number is a starting line, not a verdict. The direction of the line matters more than where it starts.

DEBT MAP

Every debt on one page. Rank them 1 for the highest APR. You will use this in weeks 14 to 16.

LENDER OR CARD	BALANCE $	APR %	MINIMUM $	DUE DAY	RANK

Total owed: $_____ Total monthly minimums: $_____ Highest APR: _____ %

Avalanche: extra money to the highest APR first (usually cheapest). Snowball: extra money to the smallest balance first (quicker wins). Both pay every minimum. Pick one and keep going.

THE YEAR AT A GLANCE

52 weeks, four quarters. Tick each week when you finish it.

QUARTER 1: FOUNDATIONS

☐	Wk 1	Where you stand	Day 1
☐	Wk 2	Where it goes	Day 8
☐	Wk 3	The paycheck split	Day 15
☐	Wk 4	Needs and wants	Day 22
☐	Wk 5	Spending leaks	Day 29
☐	Wk 6	Make it automatic	Day 36
☐	Wk 7	Pay yourself first	Day 43
☐	Wk 8	The first $1,000	Day 50
☐	Wk 9	The full emergency fund	Day 57
☐	Wk 10	Sinking funds	Day 64
☐	Wk 11	Money psychology	Day 71
☐	Wk 12	Lifestyle creep	Day 78
☐	Wk 13	Quarter review	Day 85

QUARTER 2: DEBT, CREDIT AND COMPOUNDING

☐	Wk 14	The debt map	Day 92
☐	Wk 15	Interest math	Day 99
☐	Wk 16	Snowball or avalanche	Day 106
☐	Wk 17	Credit cards	Day 113
☐	Wk 18	Credit scores	Day 120
☐	Wk 19	Student loans and car loans	Day 127
☐	Wk 20	Negotiating bills	Day 134
☐	Wk 21	Meet the fee gremlin	Day 141
☐	Wk 22	Compound interest	Day 148
☐	Wk 23	The rule of 72	Day 155
☐	Wk 24	Time beats timing	Day 162
☐	Wk 25	Inflation	Day 169
☐	Wk 26	Half-year review	Day 176

QUARTER 3: INVESTING AND INCOME

☐	Wk 27	Investing basics	Day 183
☐	Wk 28	Funds and costs	Day 190
☐	Wk 29	Retirement accounts	Day 197
☐	Wk 30	Risk and ups and downs	Day 204
☐	Wk 31	Active and passive income	Day 211
☐	Wk 32	Raises and negotiation	Day 218
☐	Wk 33	Side income	Day 225
☐	Wk 34	The value equation	Day 232
☐	Wk 35	Assets and liabilities	Day 239
☐	Wk 36	The rule of 100	Day 246
☐	Wk 37	Leverage cuts both ways	Day 253
☐	Wk 38	Taxes, in brief	Day 260
☐	Wk 39	Quarter review	Day 267

QUARTER 4: LIFE, PROTECTION AND FREEDOM

☐	Wk 40	Housing: rent or buy	Day 274
☐	Wk 41	Insurance and protection	Day 281
☐	Wk 42	Planning big purchases	Day 288
☐	Wk 43	Holidays and gifts	Day 295
☐	Wk 44	Money and other people	Day 302
☐	Wk 45	Teaching and giving	Day 309
☐	Wk 46	Scams and fraud	Day 316
☐	Wk 47	Goals and your freedom number	Day 323
☐	Wk 48	Build the system	Day 330
☐	Wk 49	Money myths	Day 337
☐	Wk 50	Quiet wealth	Day 344
☐	Wk 51	Year review	Day 351
☐	Wk 52	The next year	Day 358

LEARN

START WITH THE TRUTH

Net worth is what you own minus what you owe. It can be negative, and that is a starting line, not a verdict. Most people have never written it down, so doing it once already puts you ahead of yesterday.

TRY THIS

Fill in the Net Worth Snapshot at the front of this book. Round every number to the nearest $10 and do not judge any of it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE $5 ROUNDING ERROR

A $5 a day habit is $1,825 a year. Put the same money into an investment every month for 30 years at a hypothetical 8% a year and it becomes $226,659. Small and daily is how both costs and savings grow.

TRY THIS

Write down one small thing you buy almost every day. Multiply its price by 365. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

FIND EVERY ACCOUNT

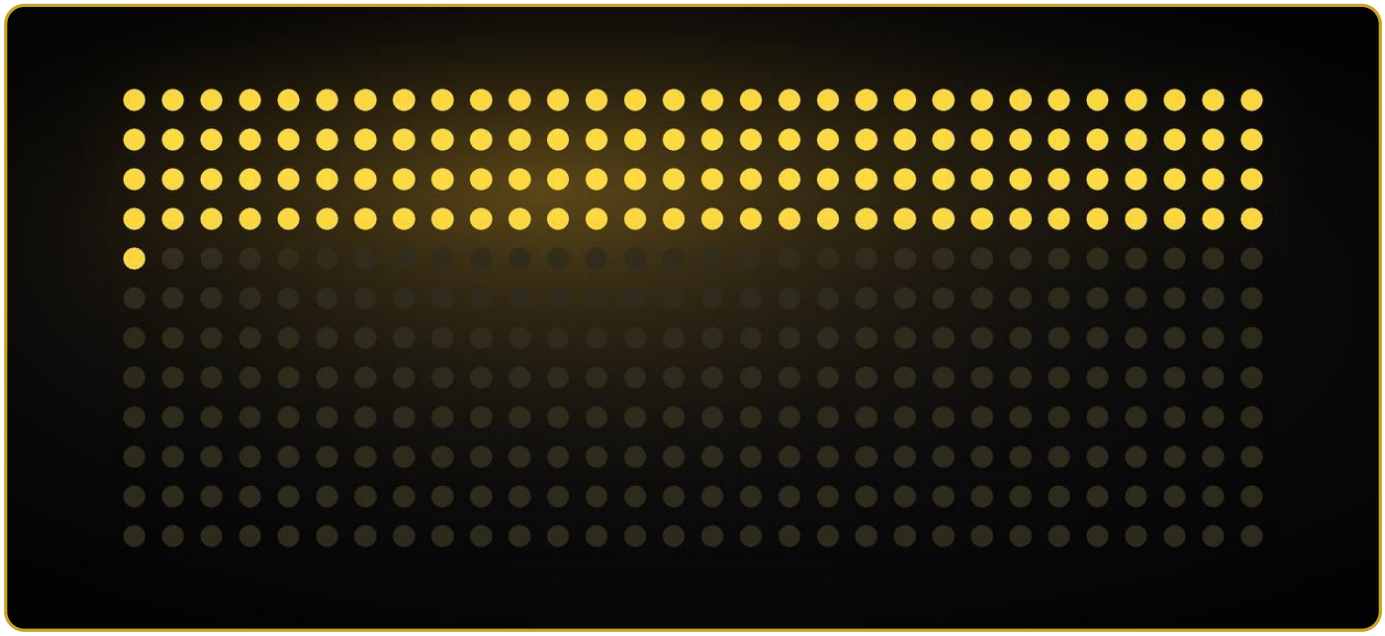

Money hides in places you forgot: an old savings account, a work retirement plan, a prepaid card, a refund you never claimed. You cannot manage what you cannot see.

TRY THIS

Log into every account you have. Write each name and balance on one page so nothing hides from you. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE OSTRICH EFFECT

Researchers use the name ostrich effect for the habit of not checking your accounts when you fear the news. Avoiding the number does not change the number. It only removes your chance to change it.

TRY THIS

Check one balance you have been avoiding. Write the number here, then take one slow breath. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PICK YOUR TRACKING DAY

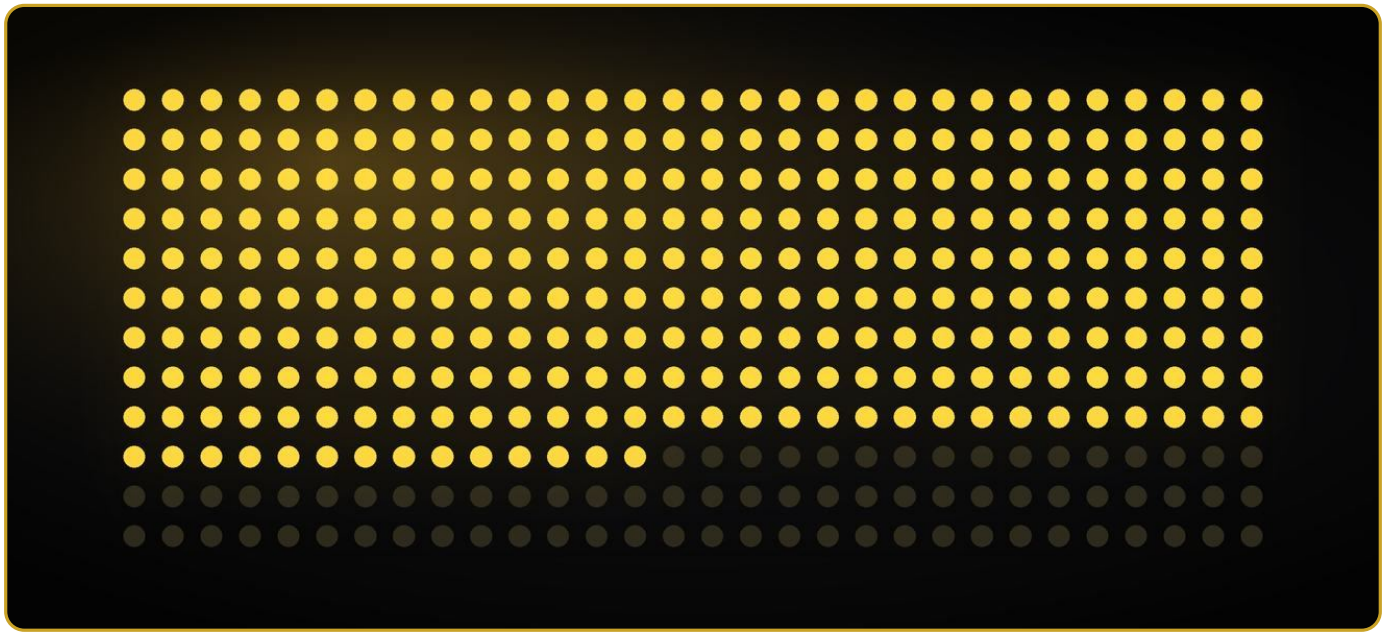

Money work sticks when it has a time. Pick one weekday and a time, such as Sunday at 6 pm, and treat it like a standing appointment with yourself.

TRY THIS

Choose your weekly money hour. Put it in your calendar with a repeating reminder. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

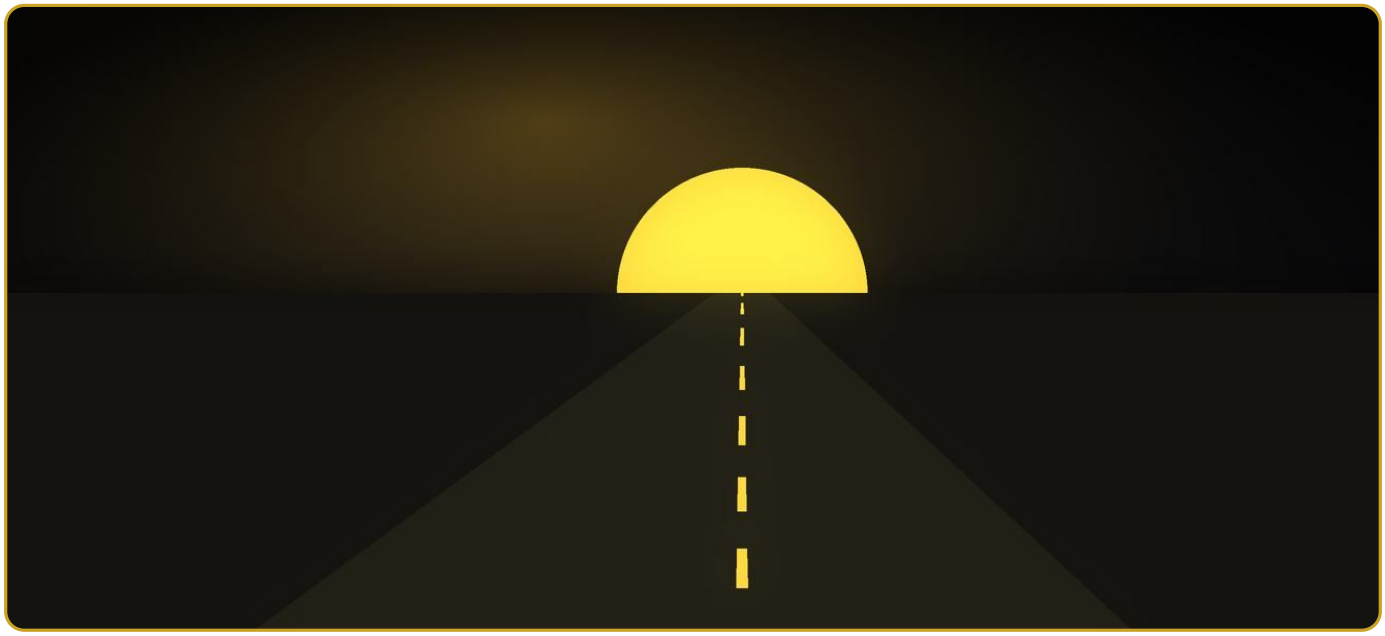

WEEKLY CHECK-IN

How did looking at the real numbers feel, and which number surprised you most?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

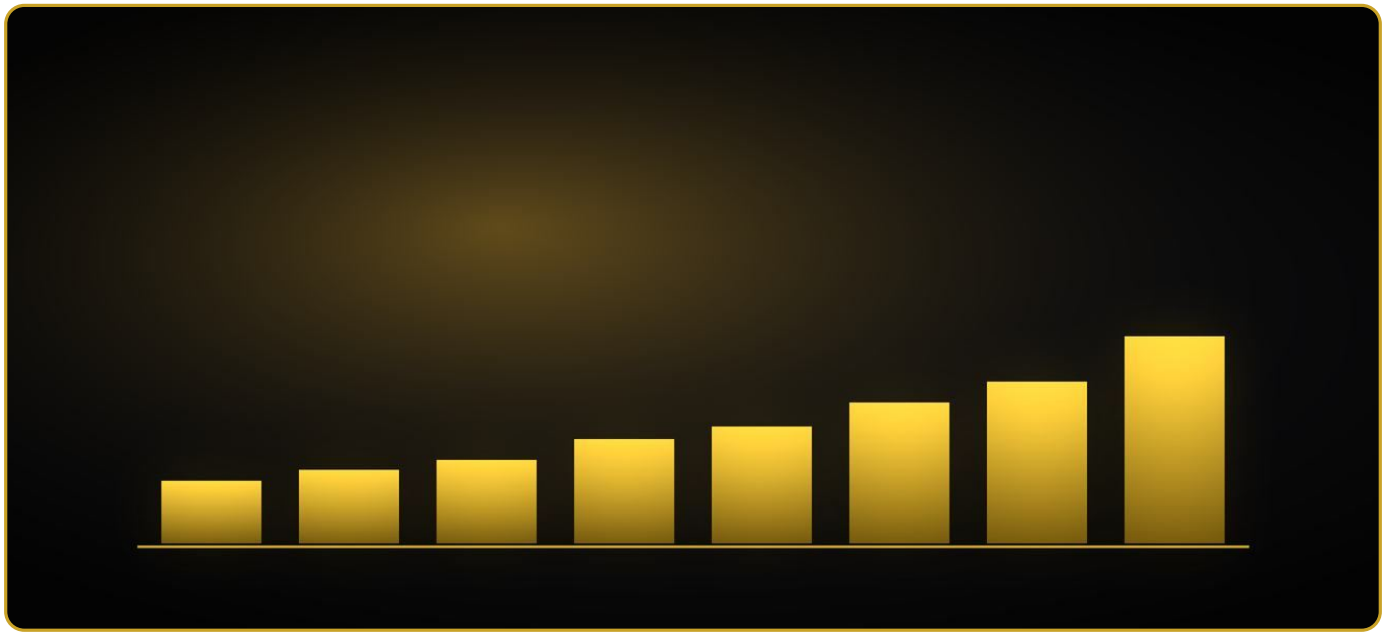

REFLECT AND RESET

What is one thing you now know about your money that you did not know seven days ago?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

INCOME MINUS EVERYTHING

Spending tracking is not budgeting. It is a camera, not a cage. For a few weeks you only watch where the money goes, because you cannot design a plan around a guess.

TRY THIS

Pull your last 30 days of bank and card statements. Put each purchase in one of five boxes: housing, food, transport, bills, everything else. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE LATTE IS A DISTRACTION

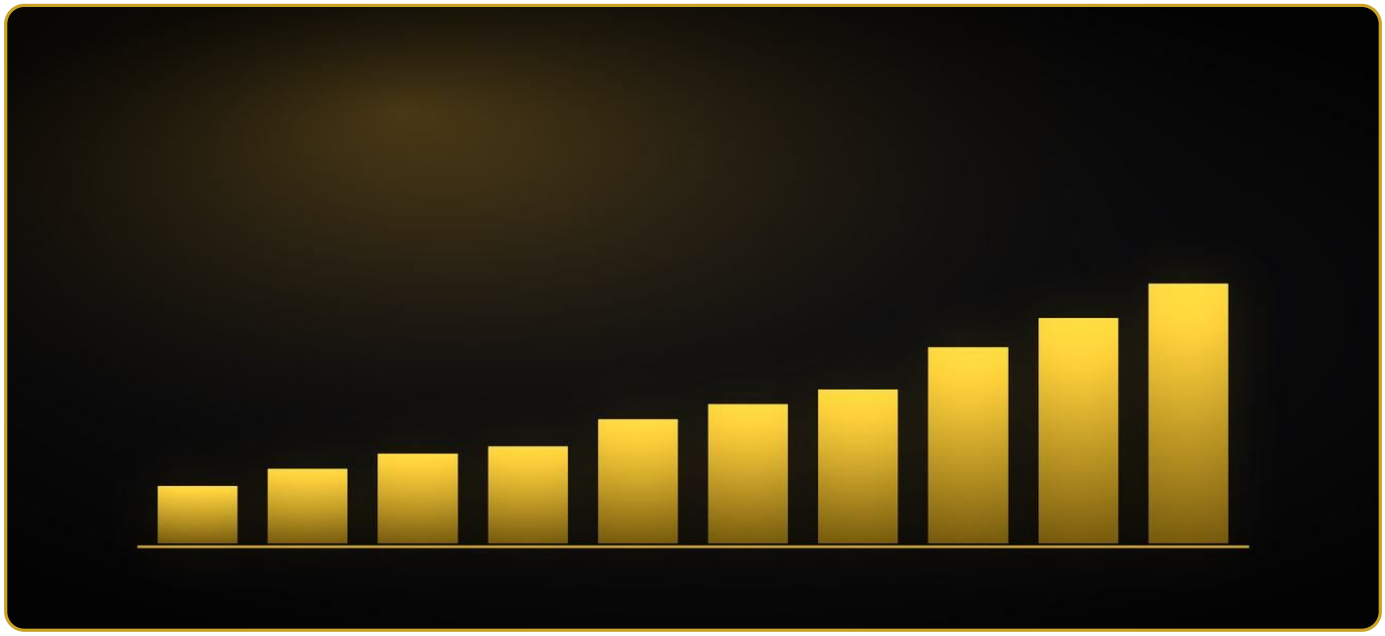

A $4 coffee every workday is about $1,040 a year. The big levers are housing, transport and food, which for many households make up most of their spending. Check the large lines before the small ones.

TRY THIS

Find your three biggest spending categories. Write each as a percentage of your take-home pay. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

THREE NUMBERS

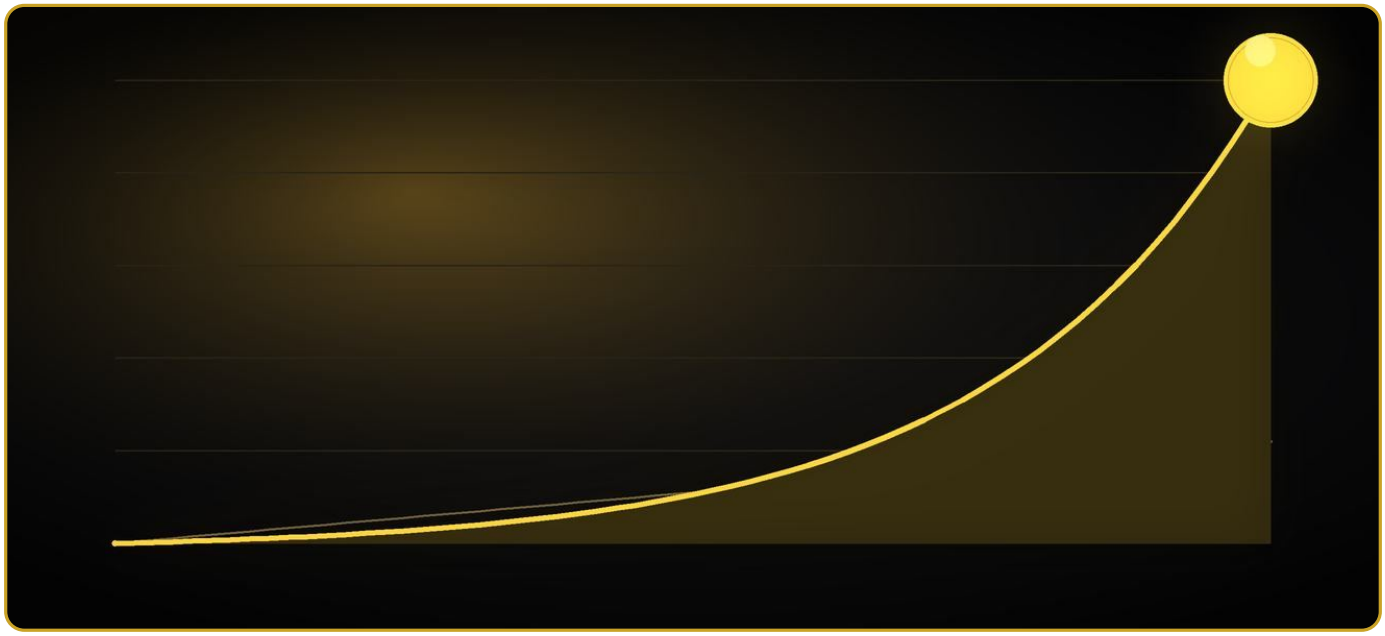

Every budget starts from three numbers: what comes in after tax, what is already committed (rent, loans, insurance) and what is left. The third one is the only number you can steer.

TRY THIS

Write your monthly take-home pay, your fixed bills and the difference between them. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

CASH FEELS DIFFERENT

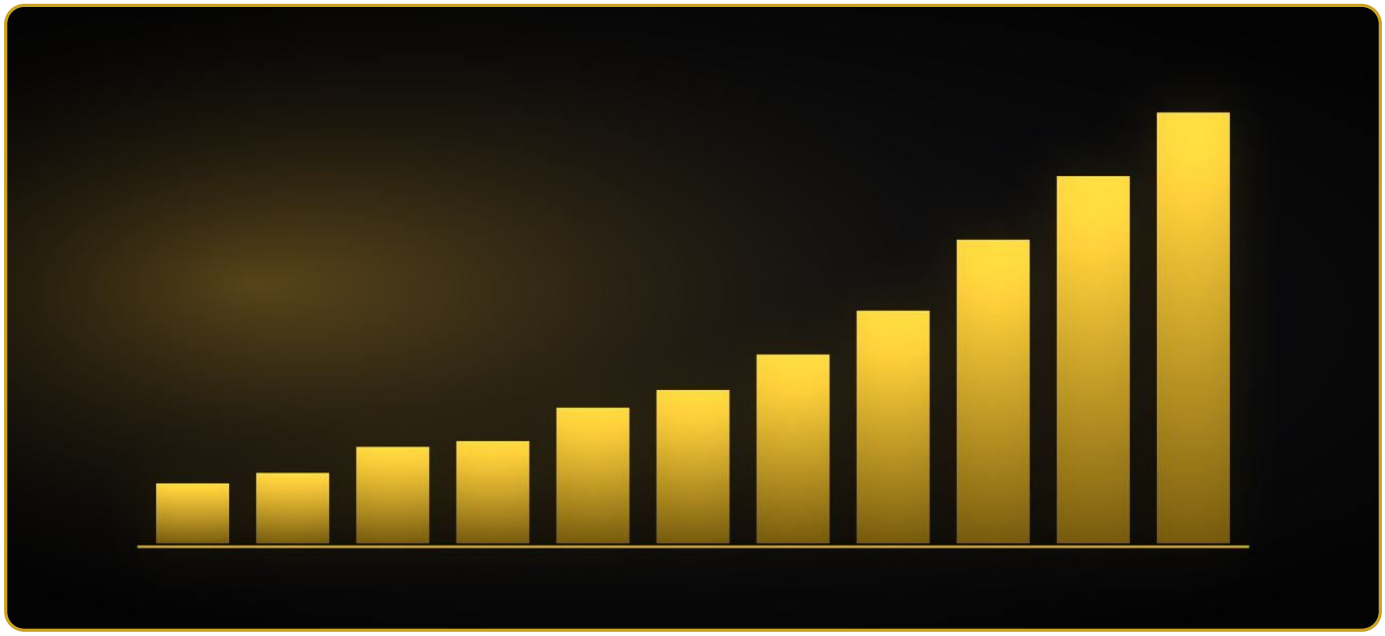

Studies of how people spend show that paying with cash feels more painful than paying with a card. A tap hides the cost. Knowing this lets you add friction on purpose.

TRY THIS

Check how many of your purchases this week were taps or one-click orders. Count them. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

NAME THE LEAK

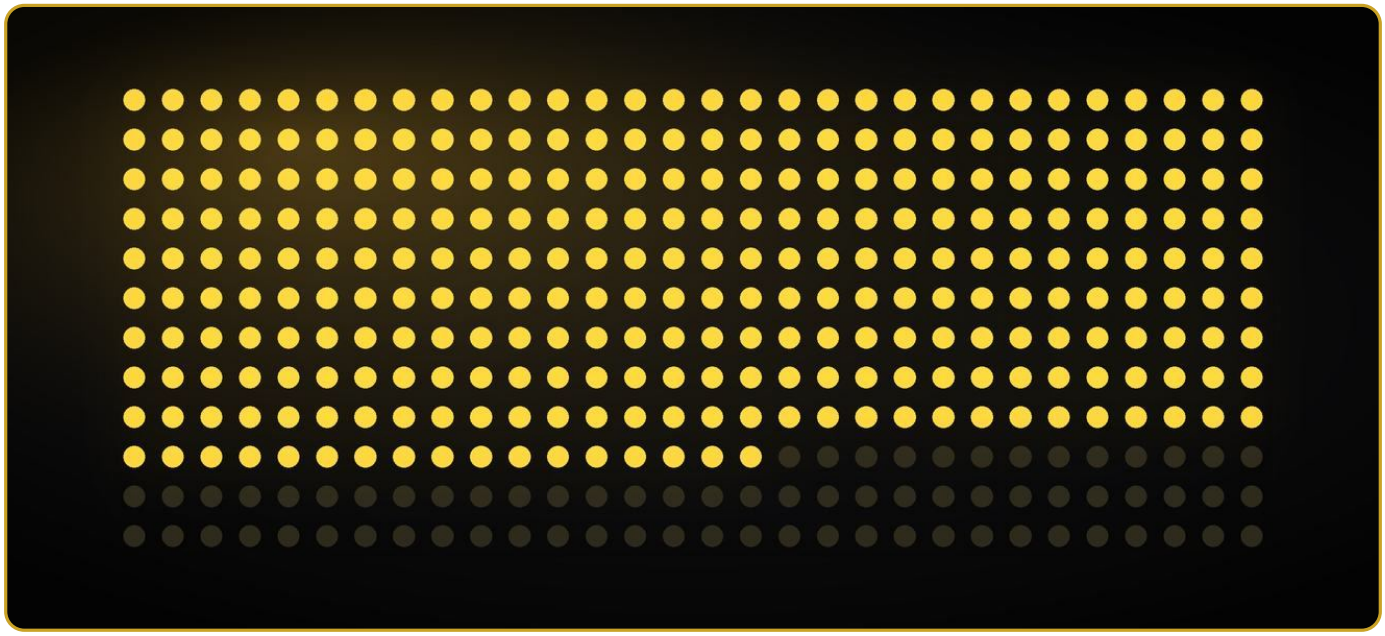

A leak is a small recurring cost that gives you little in return. You do not need to cut it today. You only need to see it.

TRY THIS ☐

Circle three charges from your statements that you would not choose again.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

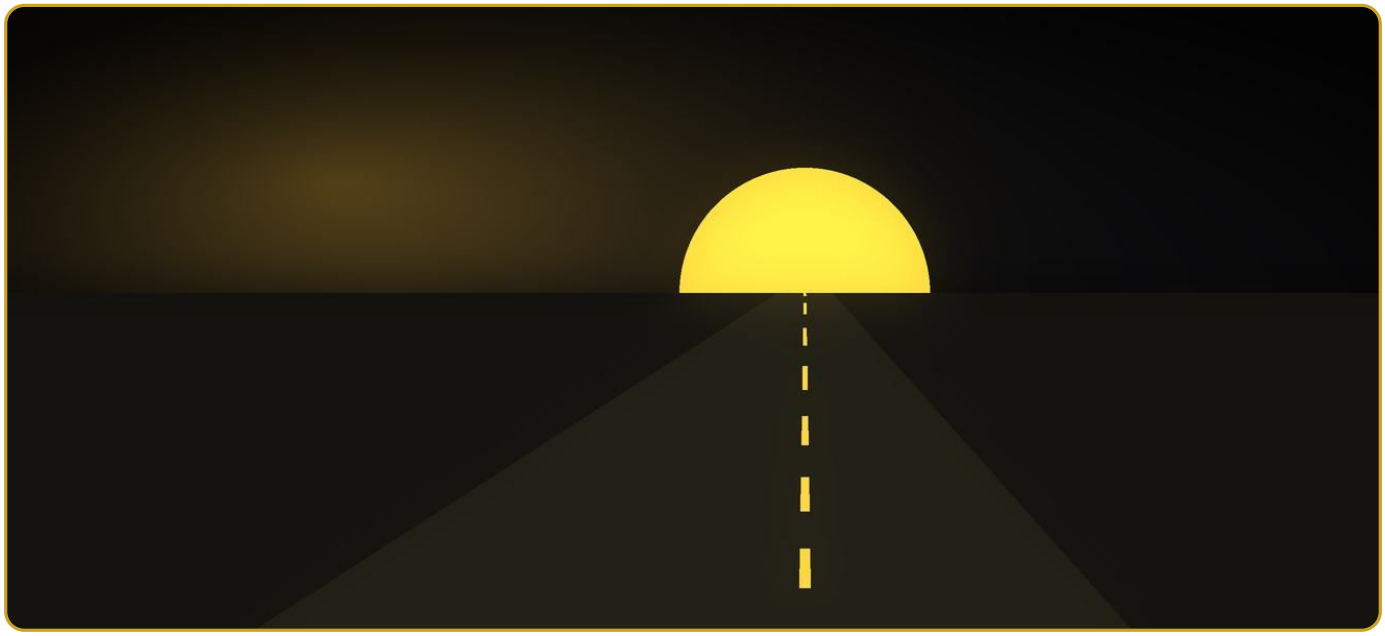

WEEKLY CHECK-IN

What did you spend in each of your five boxes this week? Write the biggest surprise.

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

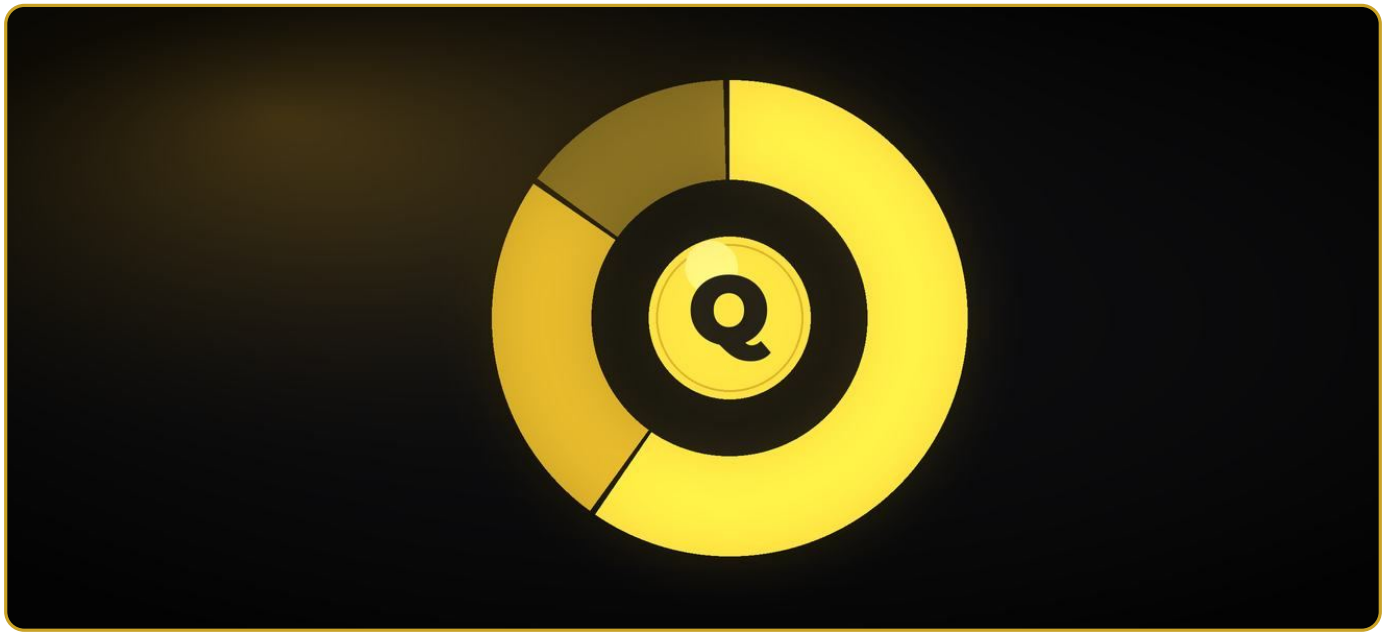

REFLECT AND RESET

If your spending were a story, what would a stranger say you care about most?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE 50/30/20 GUIDELINE

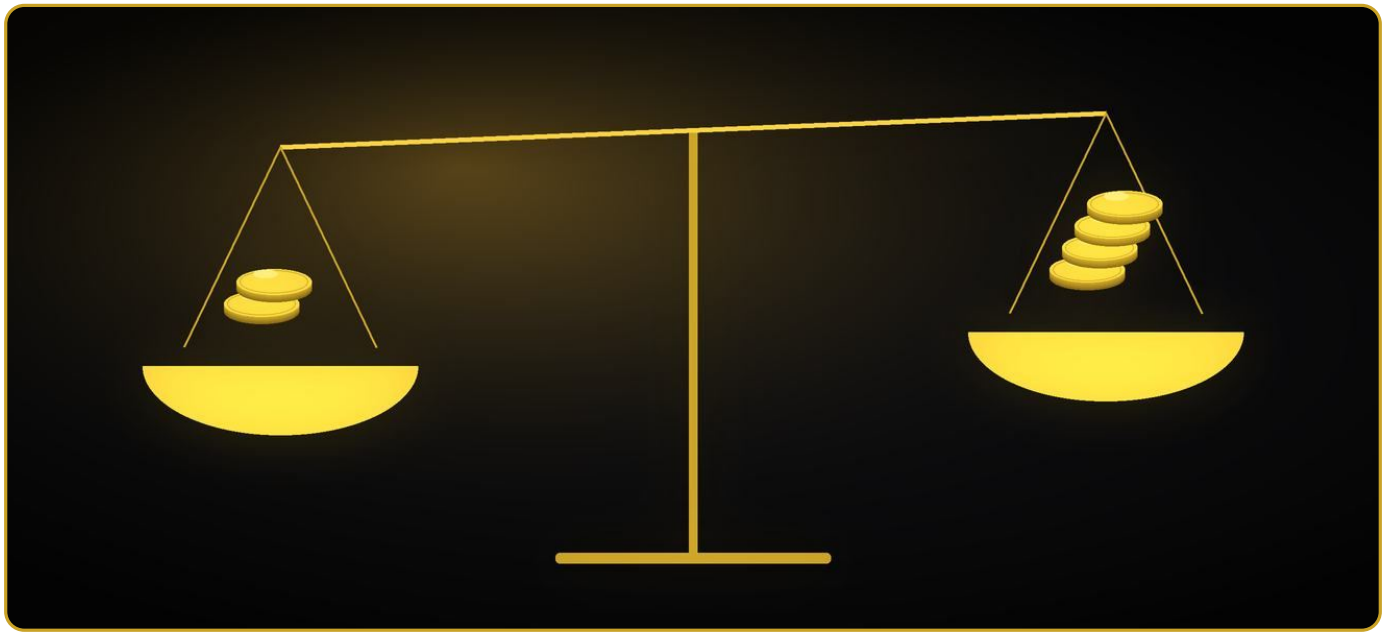

A simple split popularised by the 2005 book All Your Worth: about 50% of take-home pay to needs, 30% to wants and 20% to savings and debt repayment. It is a starting guideline, not a law.

TRY THIS ☐

Take your take-home pay and multiply by 0.5, 0.3 and 0.2. Write the three amounts in the margin.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

WHAT 20% DOES

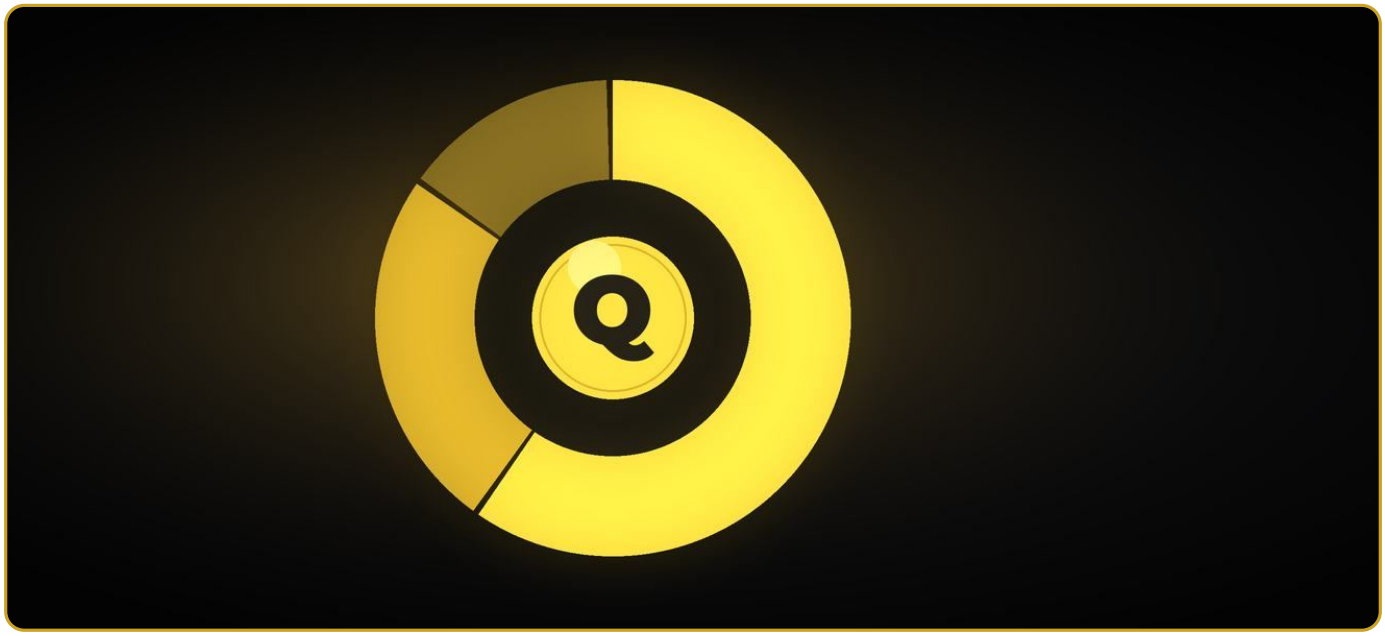

If you save and invest $600 a month (20% of a $3,000 paycheck) for 20 years at a hypothetical 7% a year, it grows to $312,556, of which you put in $144,000. Returns are never guaranteed, but the habit is the part you control.

TRY THIS

Take your own take-home pay and multiply it by 0.2. Write the monthly amount and what it adds up to in a year. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

SORT LAST MONTH

Take last month's spending and sort every line into needs, wants or future (savings and debt payments above the minimum). Your own split is the real data.

TRY THIS

Add up each group and write it as a percentage of take-home pay. Compare with 50/30/20. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

NEEDS CREEP

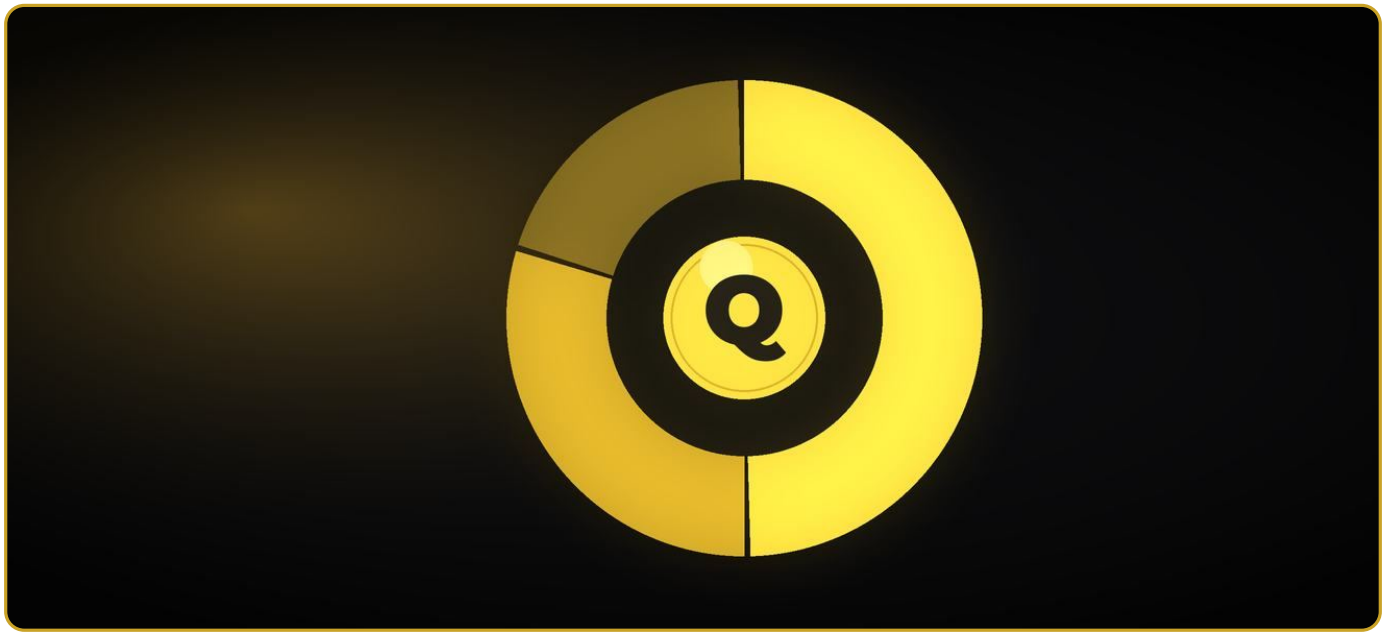

Many people start by calling most things needs. A phone is a need. The newest phone is a want. Honest sorting is the skill.

TRY THIS

Move one item you called a need into wants. Notice how it feels. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SET ONE NUMBER

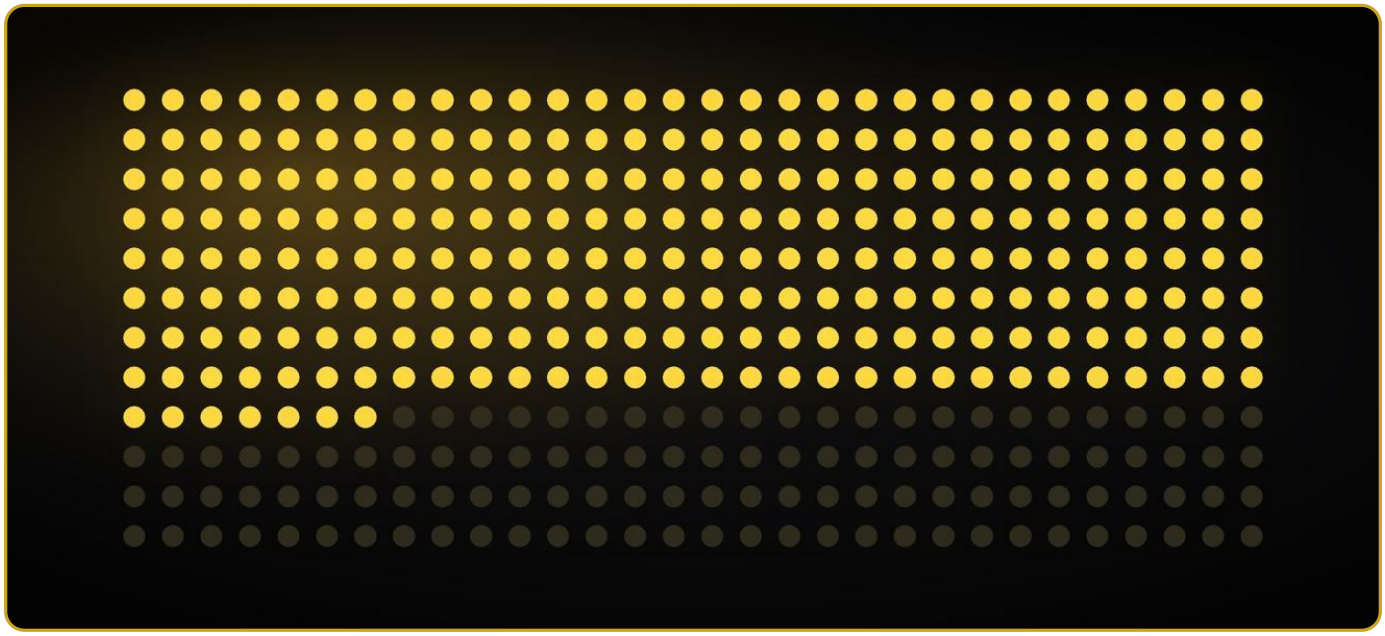

You do not need to hit 50/30/20 this week. Change one number by a small amount and keep it for a month.

TRY THIS

Choose one category to trim by 5 percentage points. Write the new monthly amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

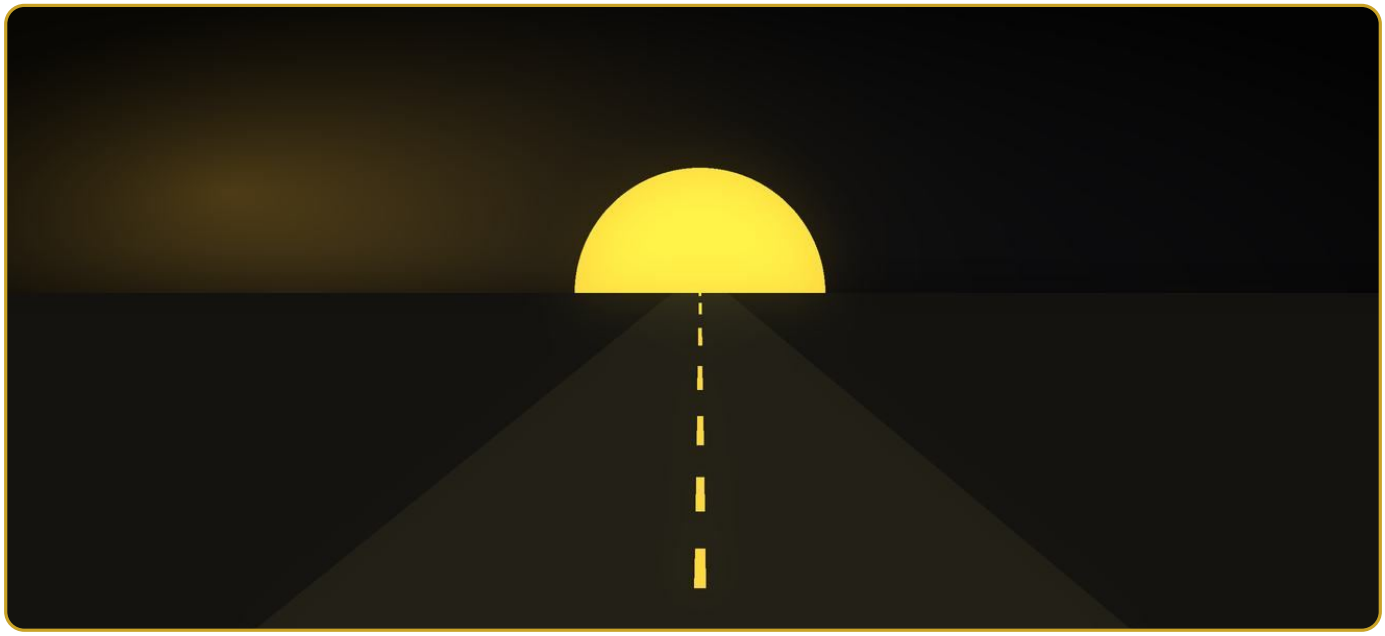

WEEKLY CHECK-IN

Did your spending this week match the split you wrote on Monday?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What would your 20% be buying you in five years if you kept it going?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE LINE BETWEEN THEM

A need is something you cannot safely go without: shelter, basic food, utilities, transport to work, insurance, minimum debt payments. A want is everything that makes life nicer. Wants are not bad. They just need a budget.

TRY THIS

Write 10 of your regular purchases. Mark each N (need) or W (want). Mark the ones that could be both with a question mark.

☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE WANT THAT BECOMES A NEED

A $350 monthly car payment is $4,200 a year. For some people the car is a transport need. For others the payment is a status choice. Notice how a want can lock in as a fixed cost for years.

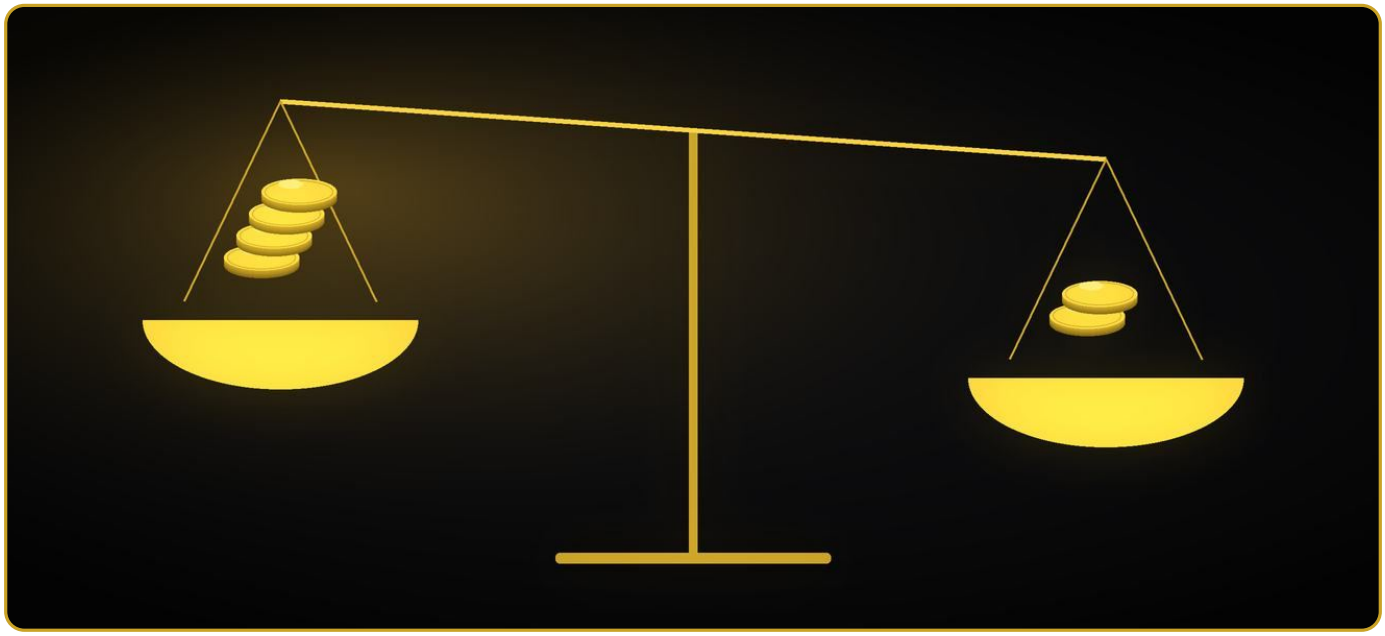

TRY THIS

Write down one want that has become a fixed monthly cost. Multiply it by 12, then by the years left on it.

☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

THE 30-DAY WISH LIST

Impulse buys lose power with time. Put a wish list at the top of a page and write the date next to each item. If you still want it in 30 days, it can go into next month's wants budget.

TRY THIS

Start a 30-day wish list. Add anything you were tempted to buy this week. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

HEDONIC ADAPTATION

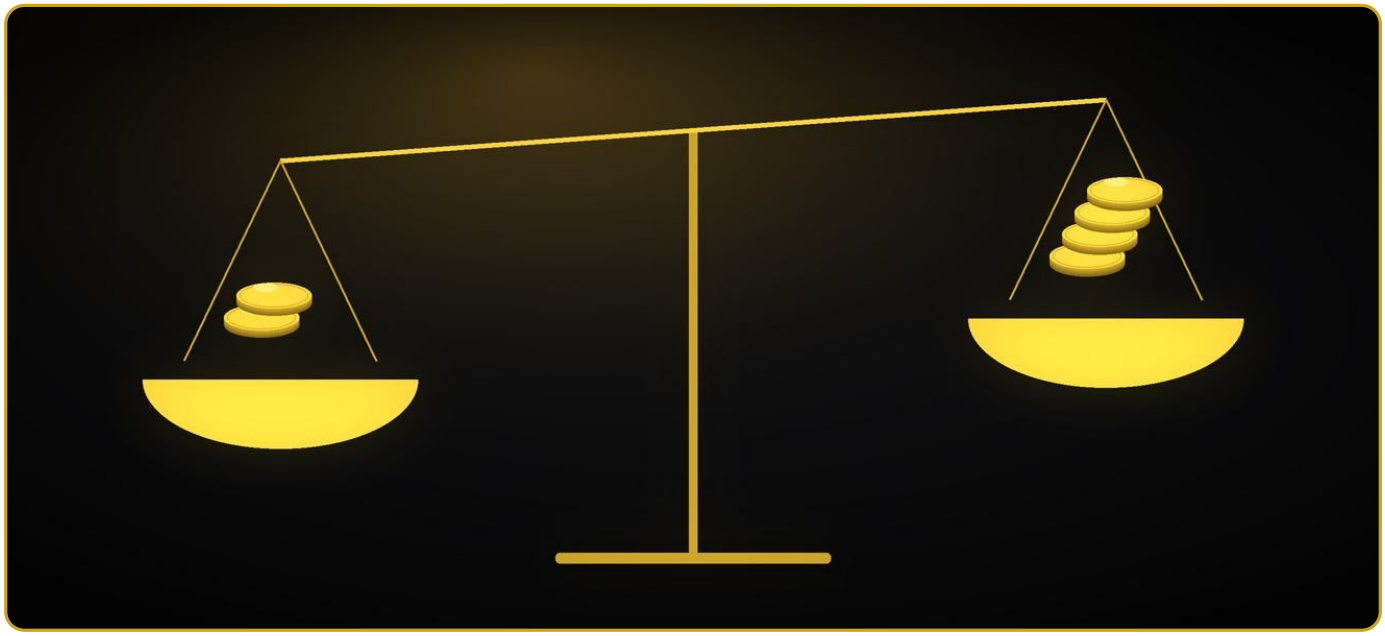

Researchers find that people tend to get used to upgrades quickly. The new thing feels great for a while, then it becomes normal and the bill stays.

TRY THIS

Name one purchase from the last year that you stopped noticing. What did it cost? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

BUY THE EXPERIENCE

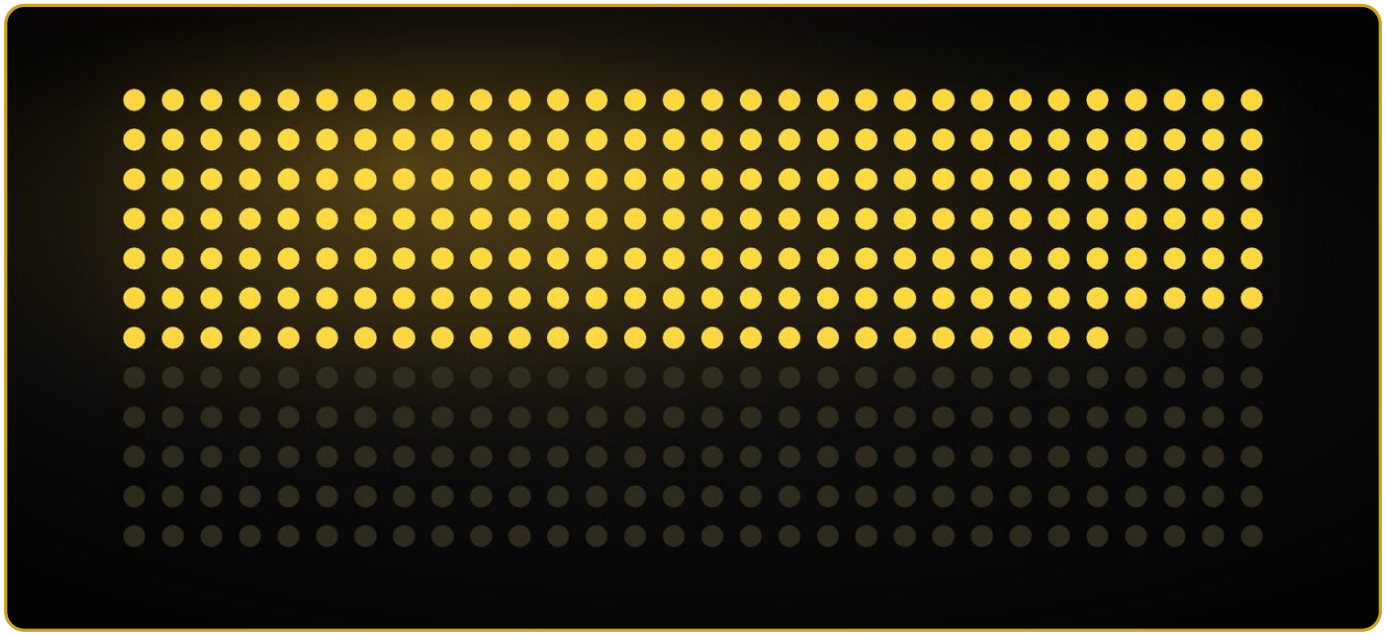

Many people say they get more lasting satisfaction from experiences and time with other people than from objects. Treat that as an idea to test, not a rule.

TRY THIS

Plan one low-cost experience for this month. Write its price next to it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

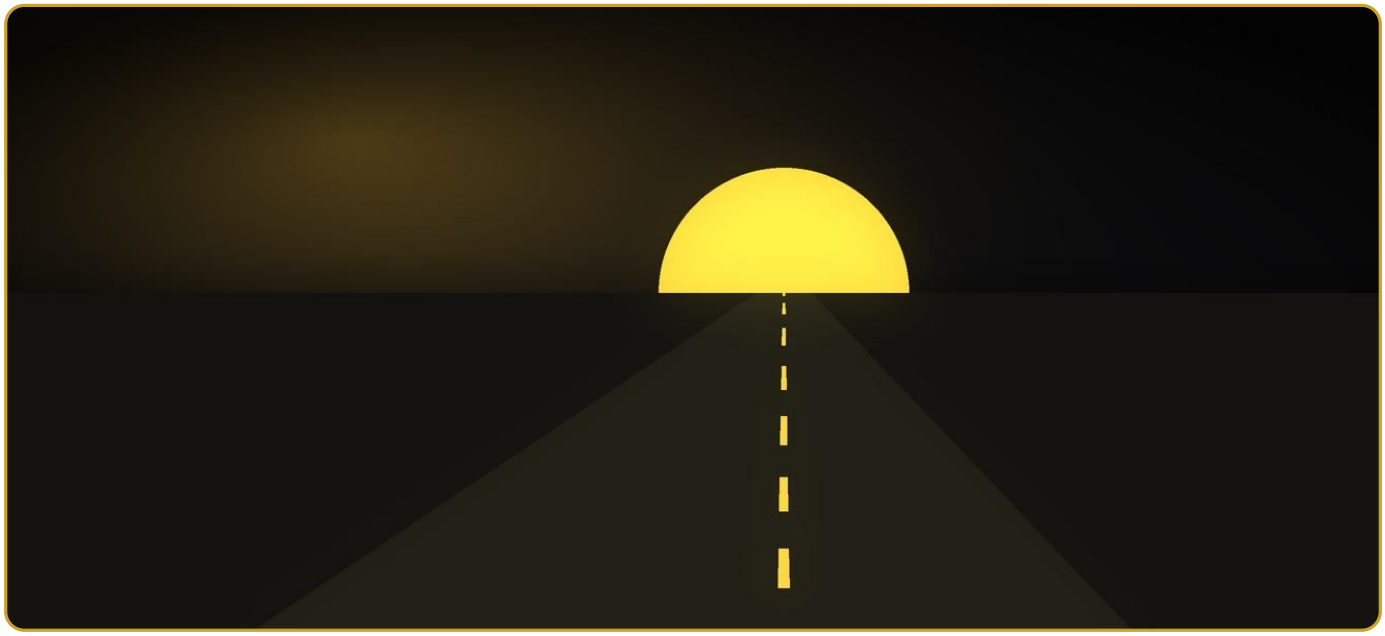

WEEKLY CHECK-IN

Which wants did you enjoy most this week, and which did you forget by the weekend?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

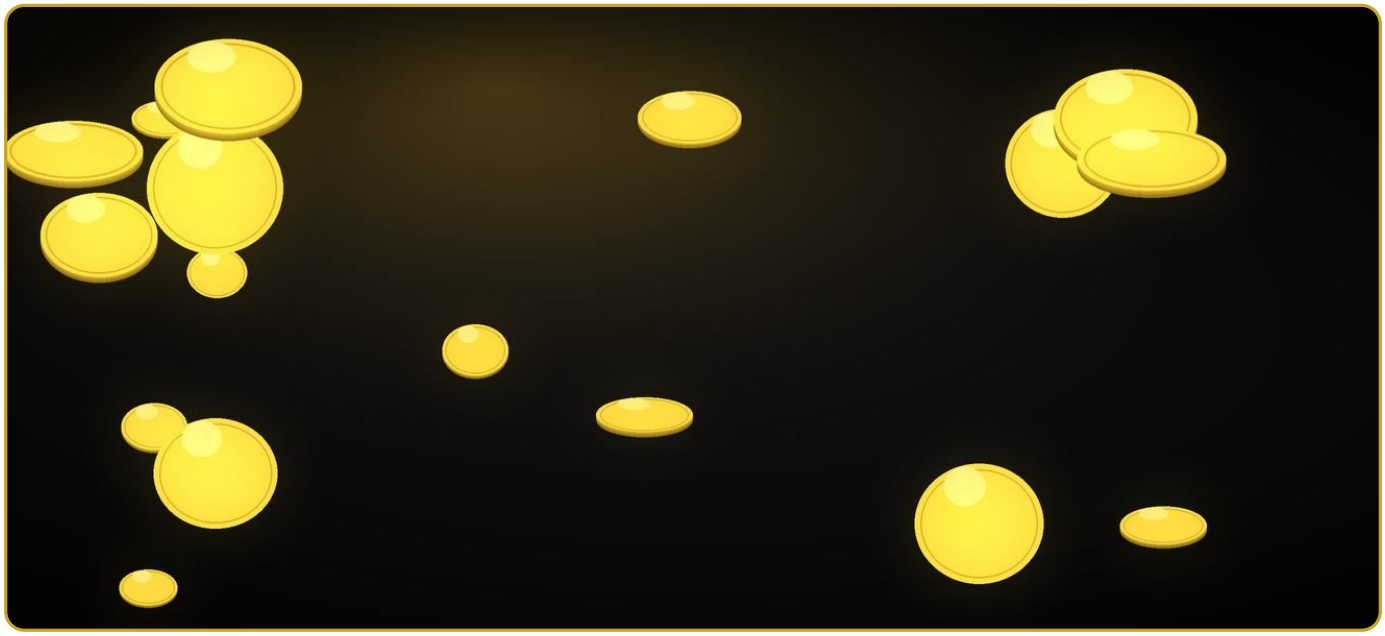

REFLECT AND RESET

What is one want you would keep even if it meant cutting somewhere else?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

SUBSCRIPTIONS THAT SLEEP

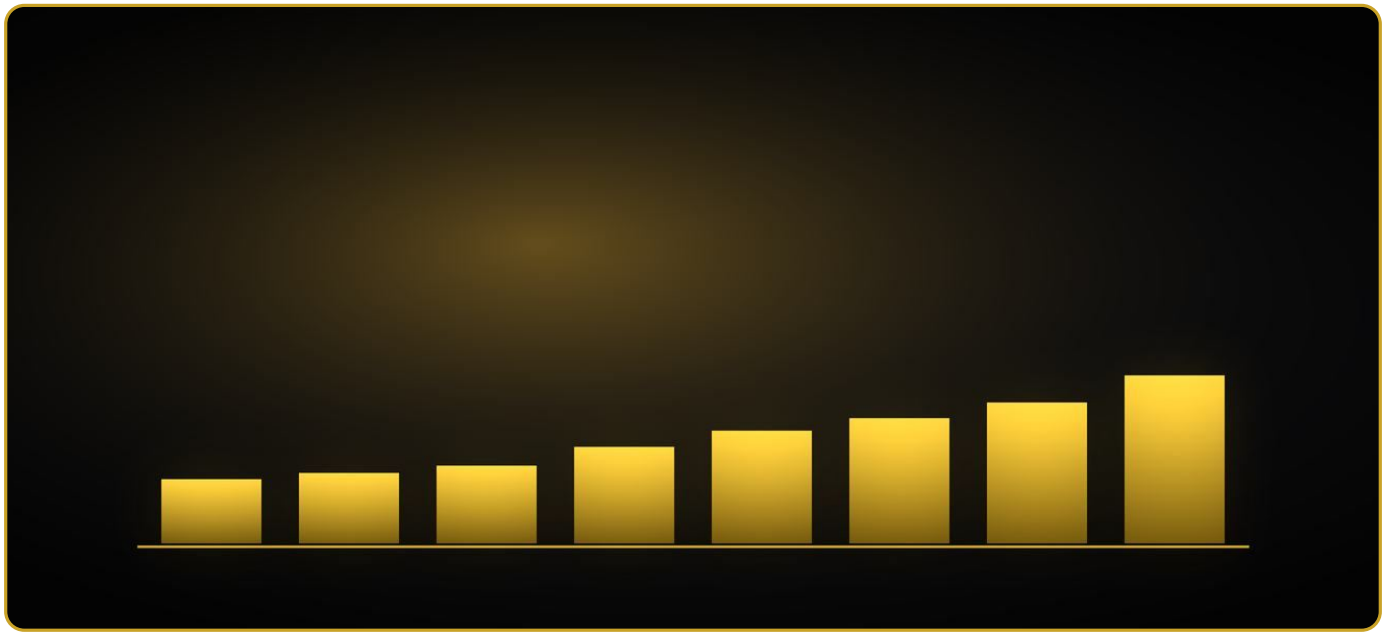

Subscriptions are built to be easy to start and slow to cancel. A dozen small ones can add up to a surprising amount. A yearly audit is one of the fastest ways to recover money.

TRY THIS

Search your last three months of statements for repeating charges. List every one with its monthly cost. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE $15 FOREVER BILL

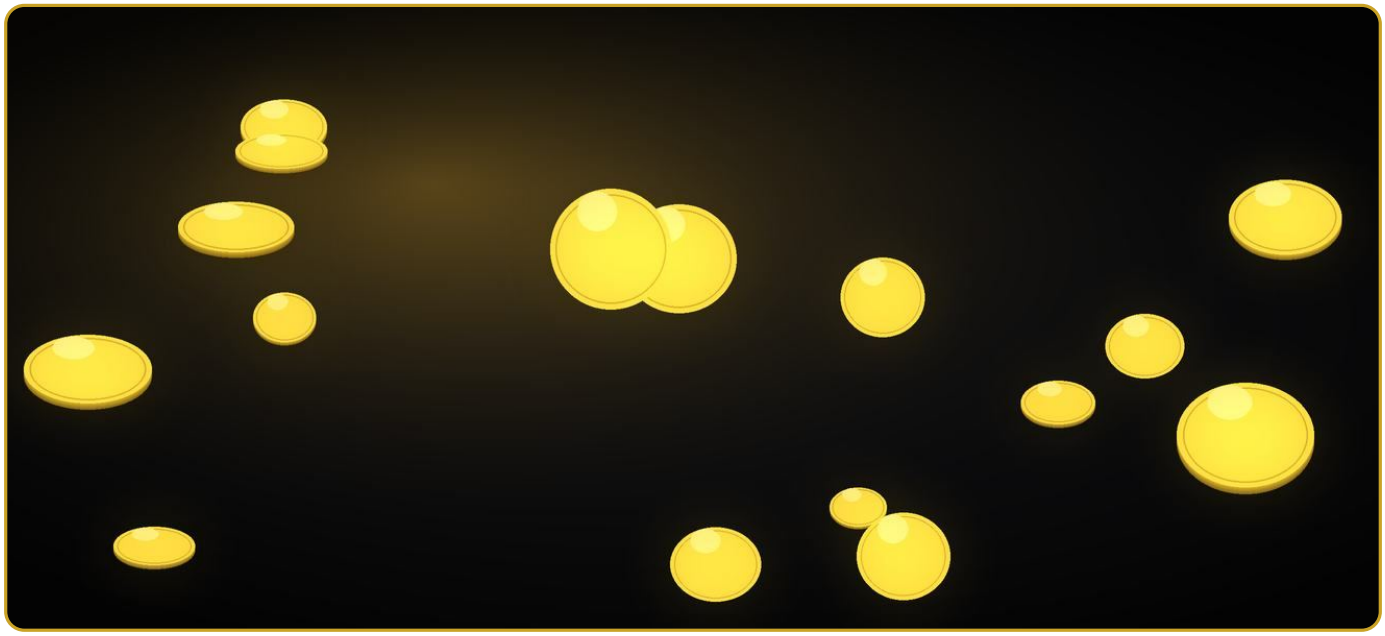

A $15 a month subscription is $180 a year and $1,800 over 10 years. If the same $15 went into an investment each month for 10 years at a hypothetical 8% a year it would be $2,744.

TRY THIS

Pick your most expensive subscription. Calculate its cost over 10 years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

CANCEL OR KEEP

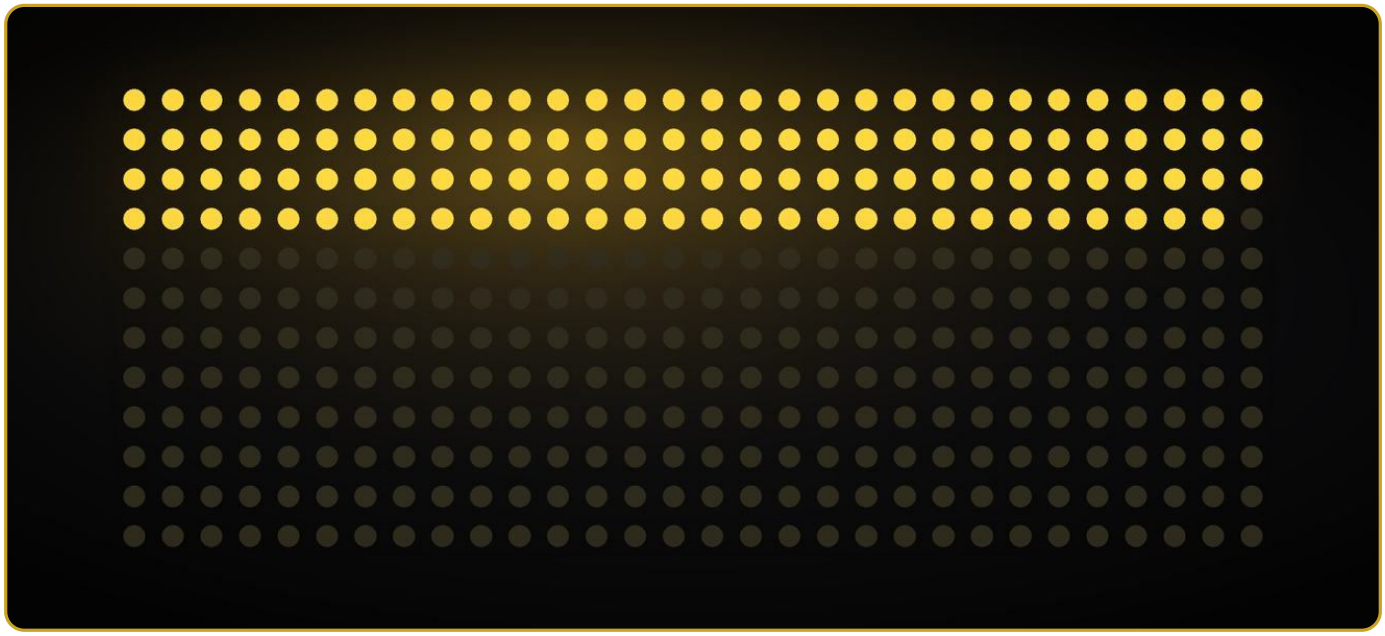

For each subscription ask: did I use it this month? Would I buy it again today at full price? If either answer is no, cancelling is not a loss. It is a decision.

TRY THIS

Cancel at least one subscription you do not use. Write down the date and the monthly amount saved. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

FREE TRIALS

Companies use free trials because people forget to cancel. This is called inertia. A calendar reminder on day one beats willpower on day thirty.

TRY THIS

Check any free trial you started this year. Set a reminder to cancel before the date it converts. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

BANK FEE CHECK

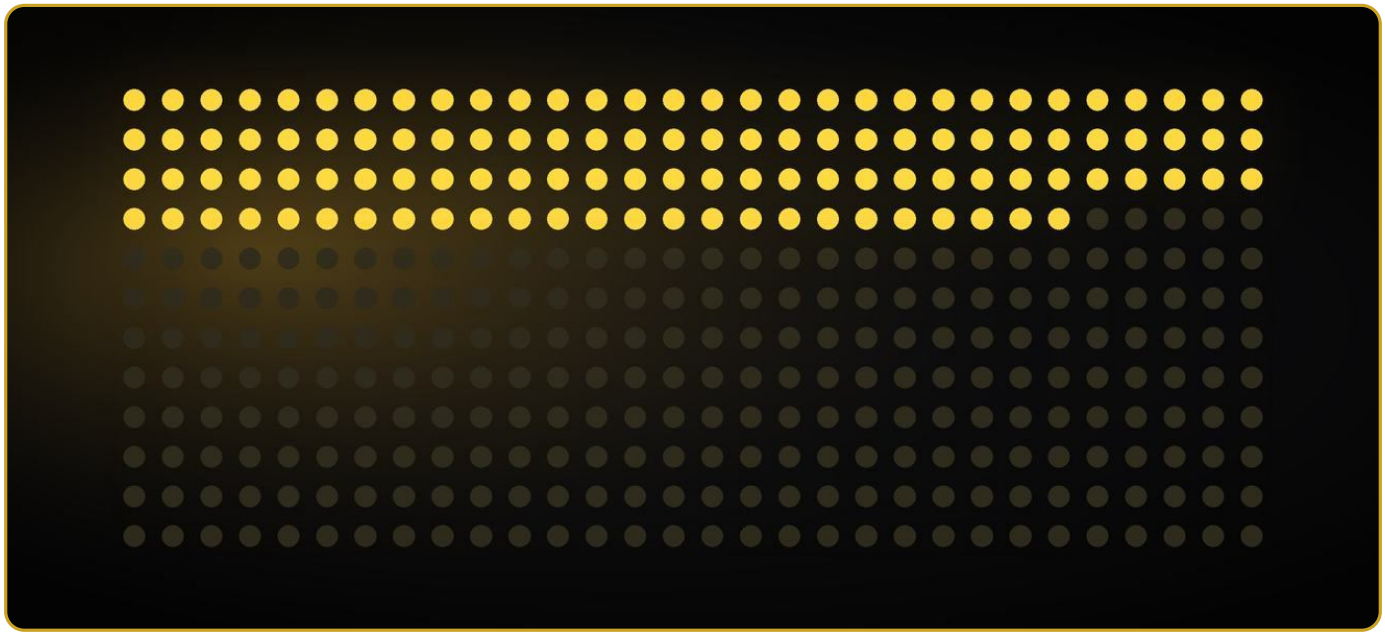

Look for fees on your accounts: overdraft, monthly maintenance, ATM, foreign transaction. Many banks will waive a fee if you ask or change account type.

TRY THIS

Search your statements for the word fee. Write down every fee in the last 90 days. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

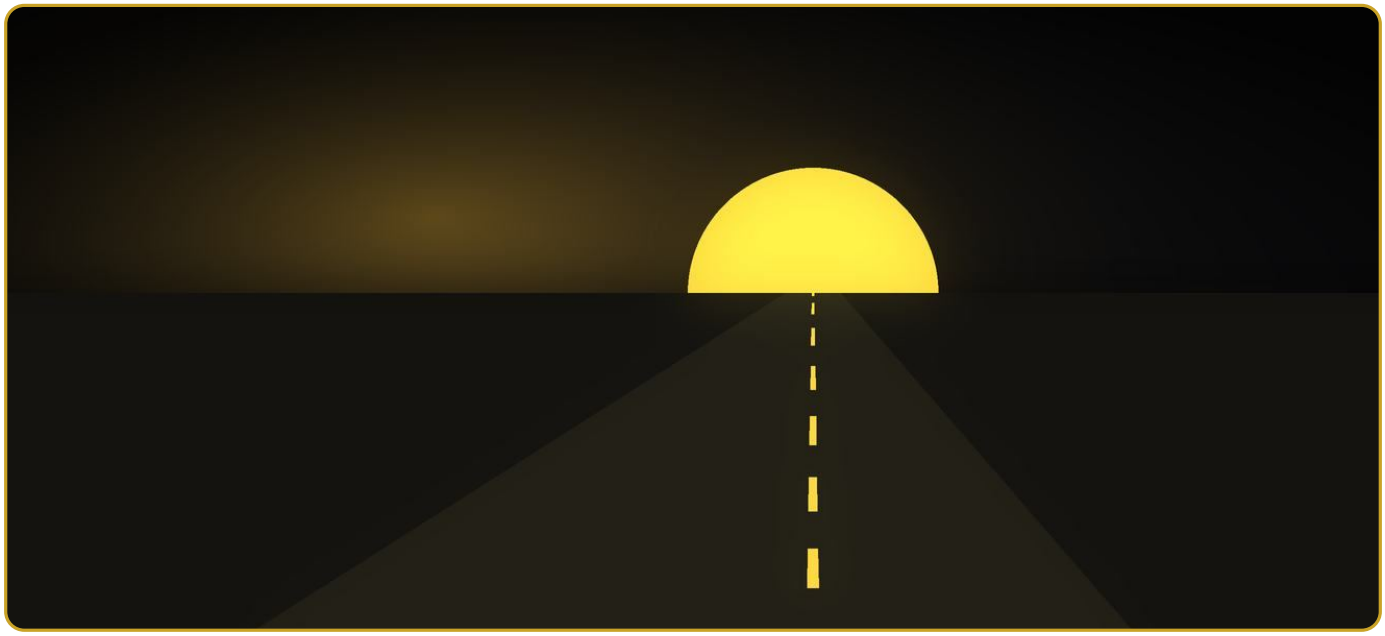

WEEKLY CHECK-IN

How much per month did your audit free up, and where will it go?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

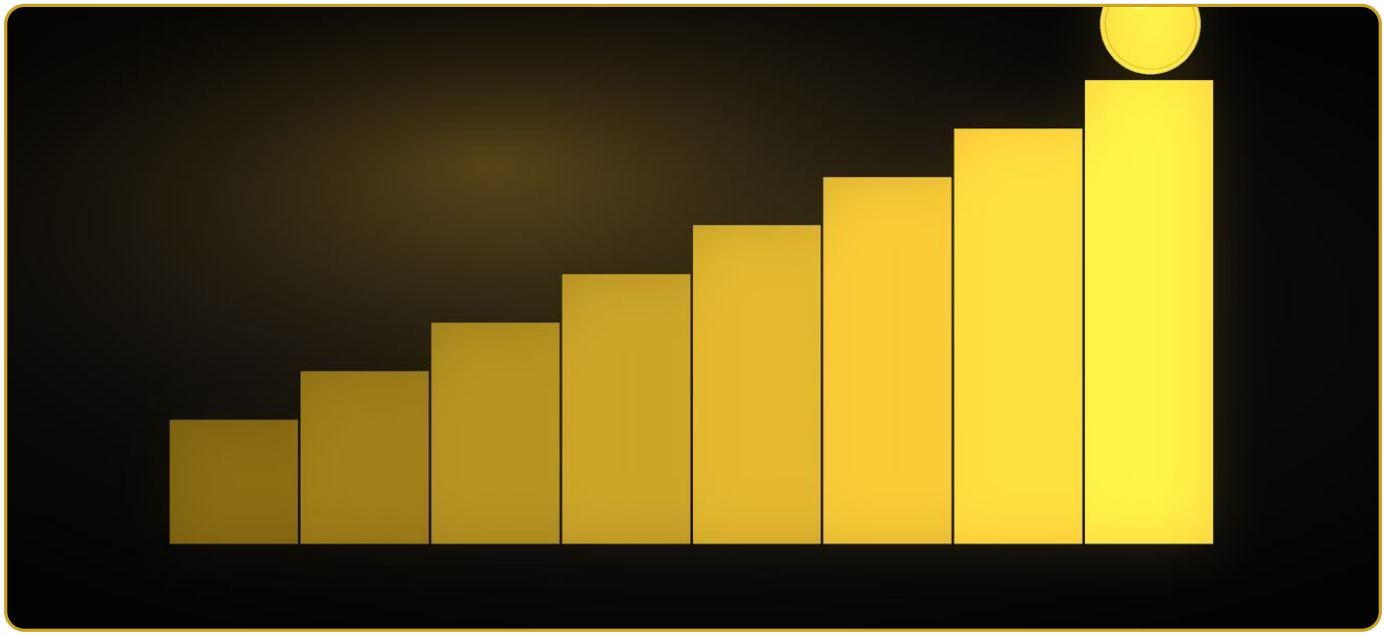

REFLECT AND RESET

Which subscription taught you something about what you really value?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

WILLPOWER IS A BAD SYSTEM

Behavioural economists point out that good habits survive when they are the default. Automation takes the monthly decision away. You do it once and it keeps working on busy and tired days.

TRY THIS

Look at your bank's automatic transfer options. Note what is possible: day, amount, destination. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

SMALL, STEADY, EARLY

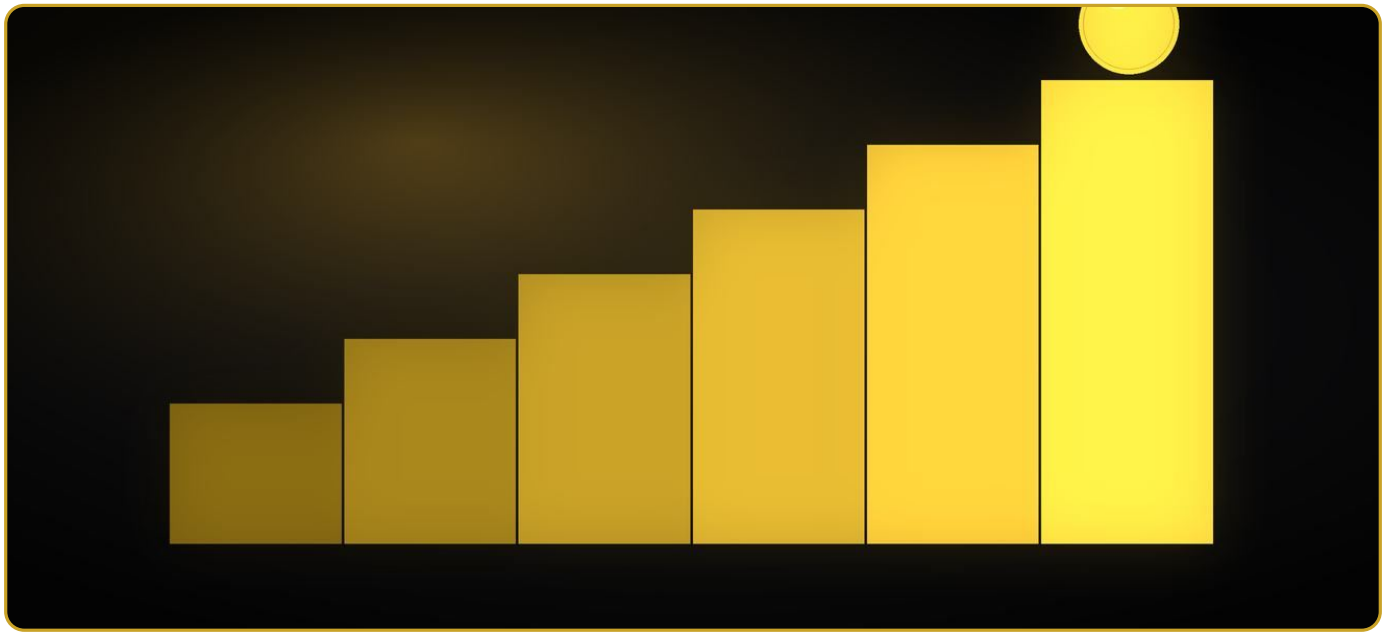

Saving $600 a year does not sound like much. At a hypothetical 7% a year for 30 years, $50 a month grows to $60,999, and only $18,000 of it came from you.

TRY THIS

Write the smallest monthly amount you could automate without noticing. Calculate its 10-year total. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

SET THE TRANSFER

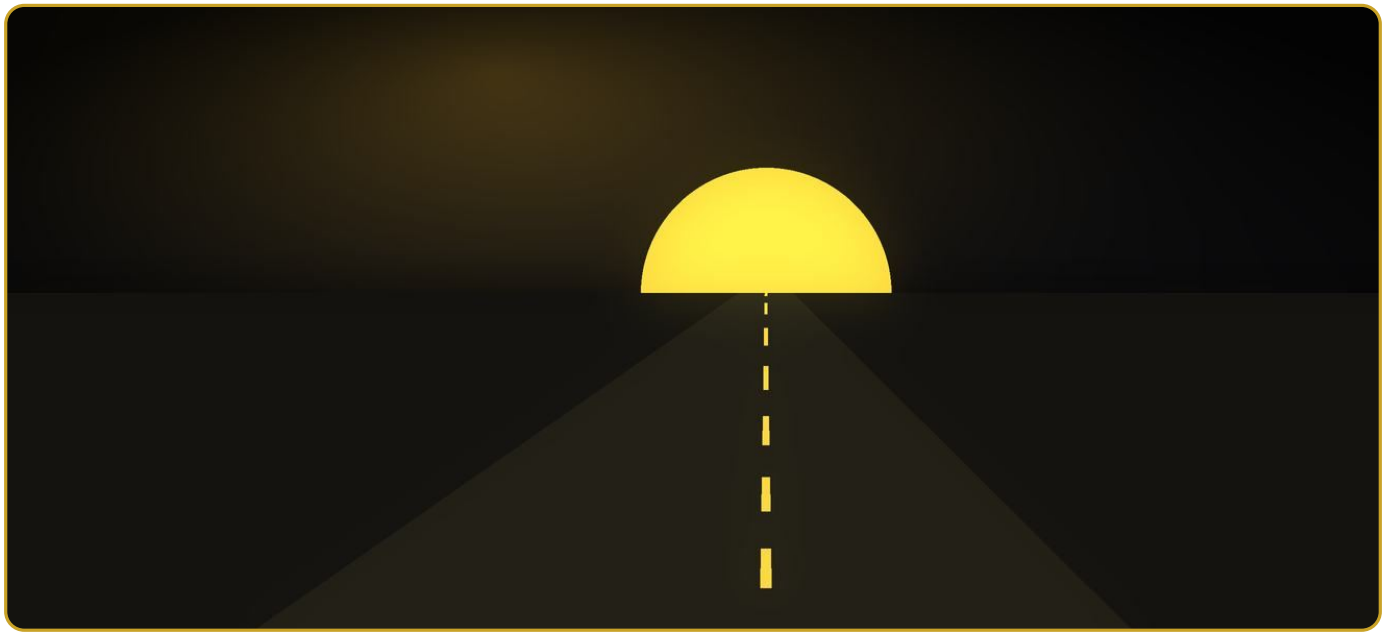

Set a recurring transfer for the day after payday, from checking to a separate savings account. Start with an amount that feels almost too small. You can raise it later.

TRY THIS

Schedule your first automatic transfer today. Write the amount, the day and the account. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

DEFAULTS RULE

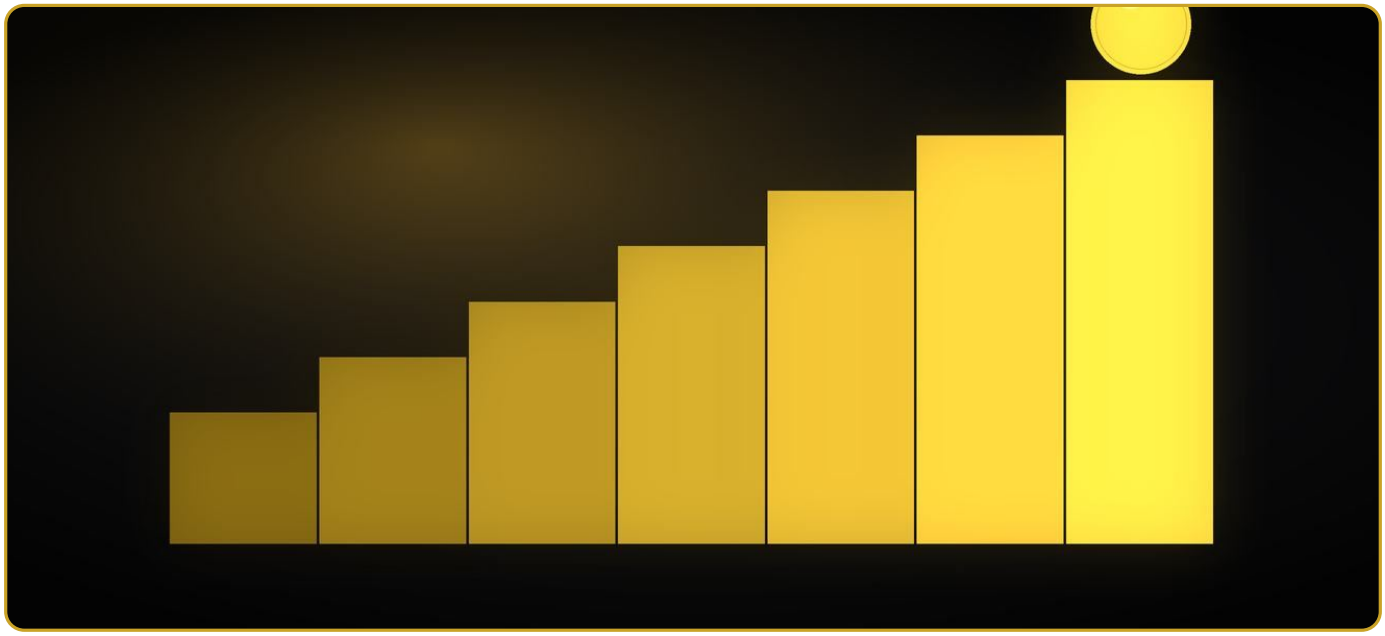

Studies of workplace retirement plans found that when people were enrolled automatically, far more of them ended up saving. The people were the same; the default was different.

TRY THIS

Name one money habit that would be better as a default than as a decision. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

AUTOMATE ONE BILL

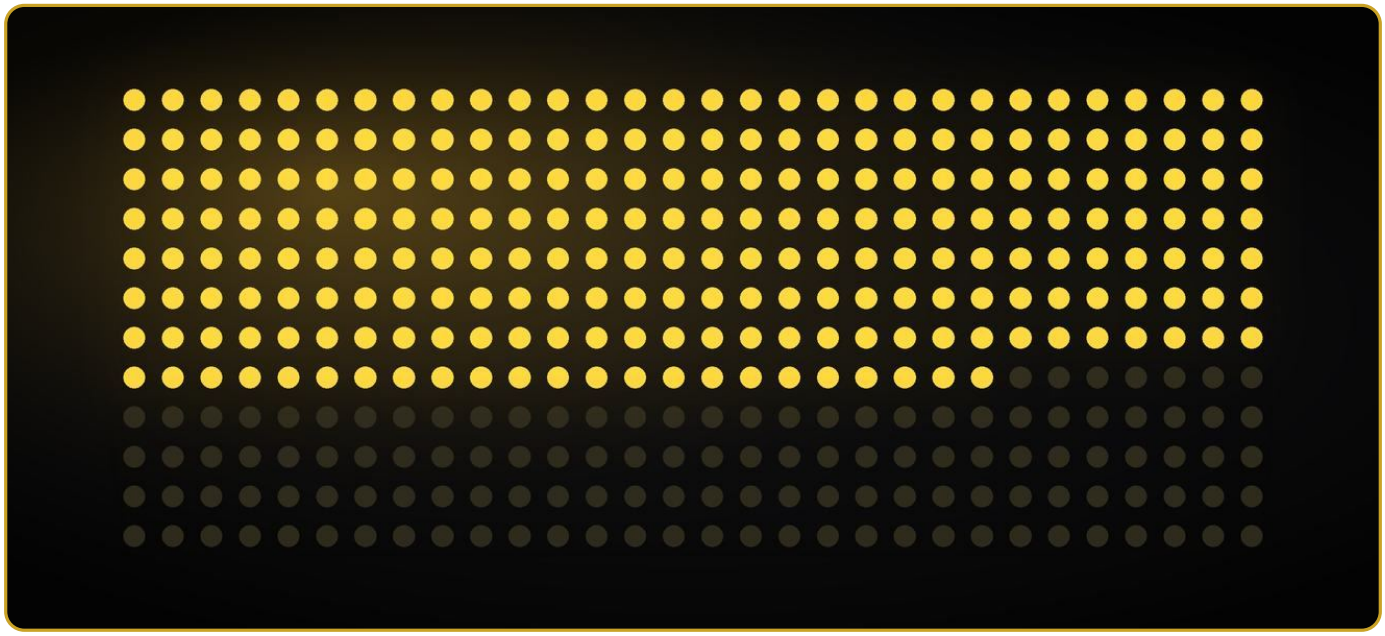

A late fee is a pure loss. Autopay the minimum on every bill you can, so nothing is ever late, and check statements monthly.

TRY THIS ☐

Turn on autopay for at least one bill. Keep the due-date reminder on in case funds are short.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Did your transfer run? Did the amount feel too small, too big or right?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What else in your life runs on autopilot because you set it up once?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE OLDEST RULE

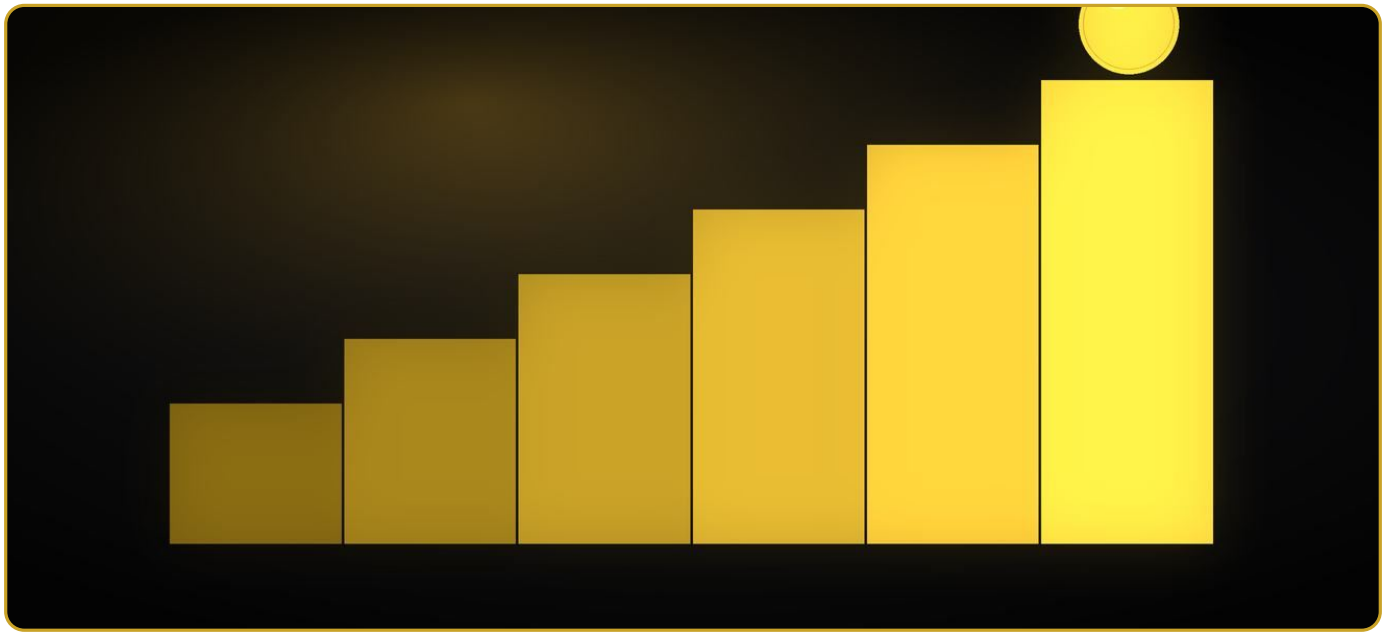

The 1926 book The Richest Man in Babylon puts it simply: a part of all you earn is yours to keep. The order matters. Save first, spend the rest, instead of saving what is left.

TRY THIS

Write the sentence "A part of all I earn is mine to keep" at the top of this page, then write the percentage you will start with. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

ORDER BEATS AMOUNT

Saving $1,200 a year at a hypothetical 6% a year for 25 years gives $69,299. Saving the same amount only when you have leftovers often means saving none of it.

TRY THIS ☐

Look at your last three months. How much was left over each month? Write all three numbers.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

SPLIT THE PAYCHECK AT THE SOURCE

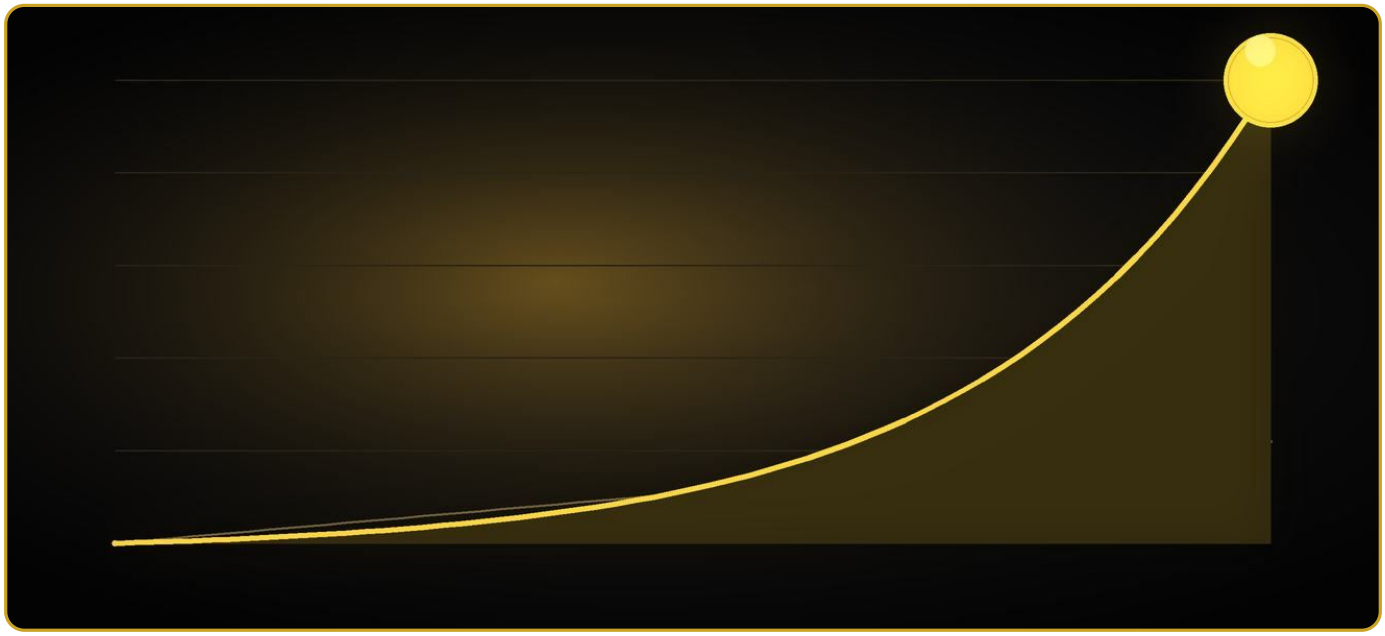

If your employer allows it, ask for part of your pay to go straight to a savings account. Money you never see is money you do not miss.

TRY THIS

Ask your employer or your bank how to split a deposit. Write what you learn. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE 1% RAISE

Increasing your savings rate by one percentage point a year is nearly painless. In five years it adds up to 5 points without any single big change.

TRY THIS ☐

Decide when you will raise your savings amount. Pick a date and a small increase.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

NAME YOUR ACCOUNTS

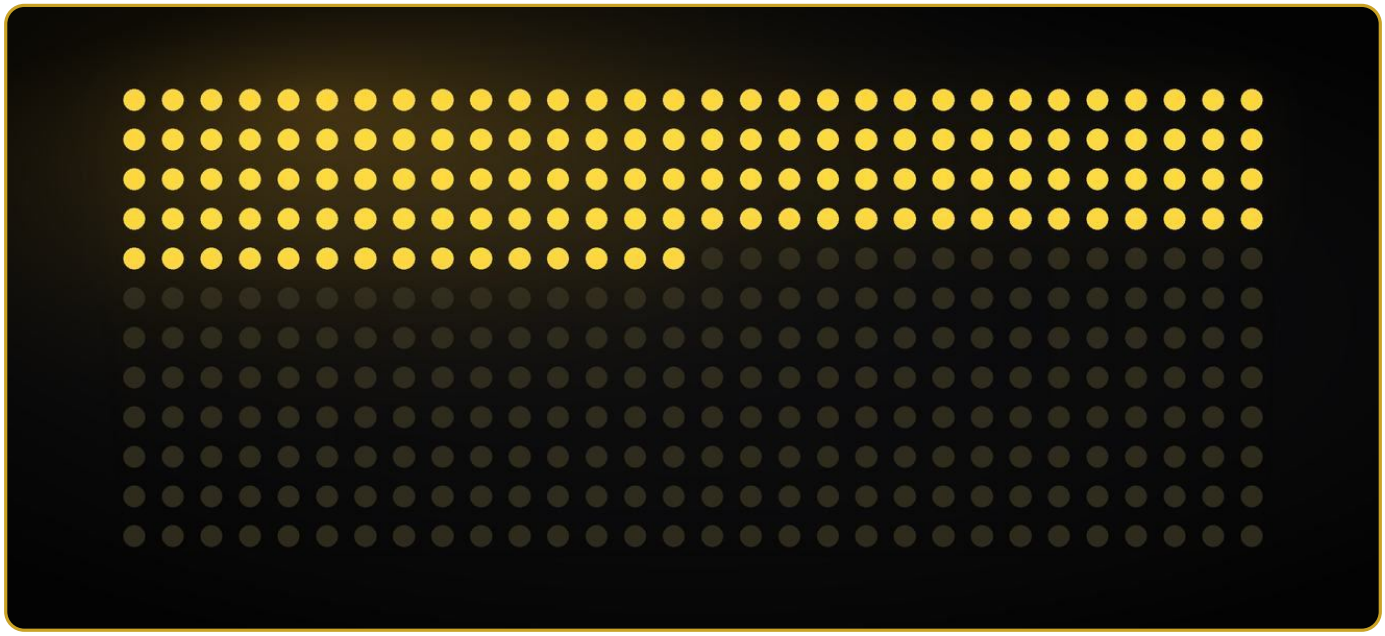

Giving savings accounts a name such as Emergency or Car makes them feel like jobs rather than a pile. Many banks let you rename accounts.

TRY THIS ☐

Rename or label your savings accounts by their purpose.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

How much did you pay yourself first this week? How did the rest of the week go?

Money in this week $

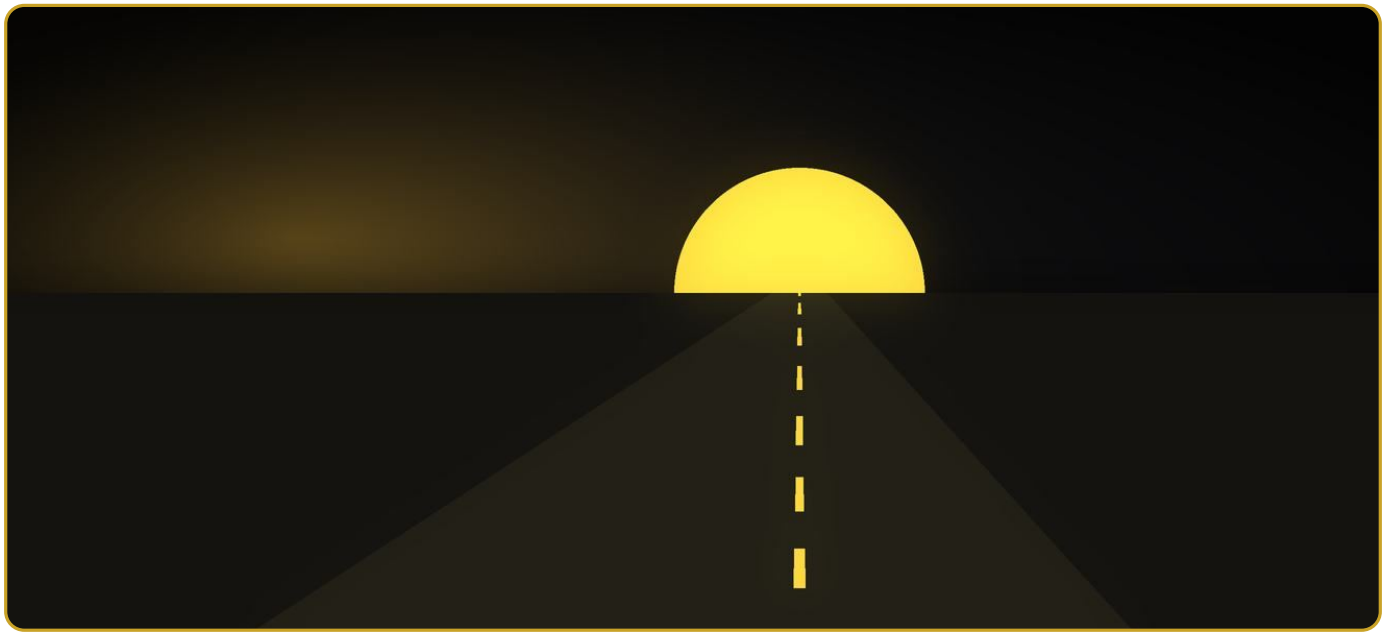

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

When has saving felt good to you? What was different that time?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

A STARTER BUFFER

Before anything else many planners suggest a small emergency buffer, often $500 to $1,000, so one surprise bill does not land on a credit card. It is a first step, not a full emergency fund.

TRY THIS

Write the amount you will use as your starter buffer and the date you want to reach it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

HOW FAST?

Setting aside $100 a month reaches $1,000 in 10 months, and $200 a month gets there in 5. Break any goal into months and it stops being a feeling and becomes a schedule.

TRY THIS

Divide your buffer goal by the monthly amount you can set aside. Write the number of months. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

OPEN A SEPARATE ACCOUNT

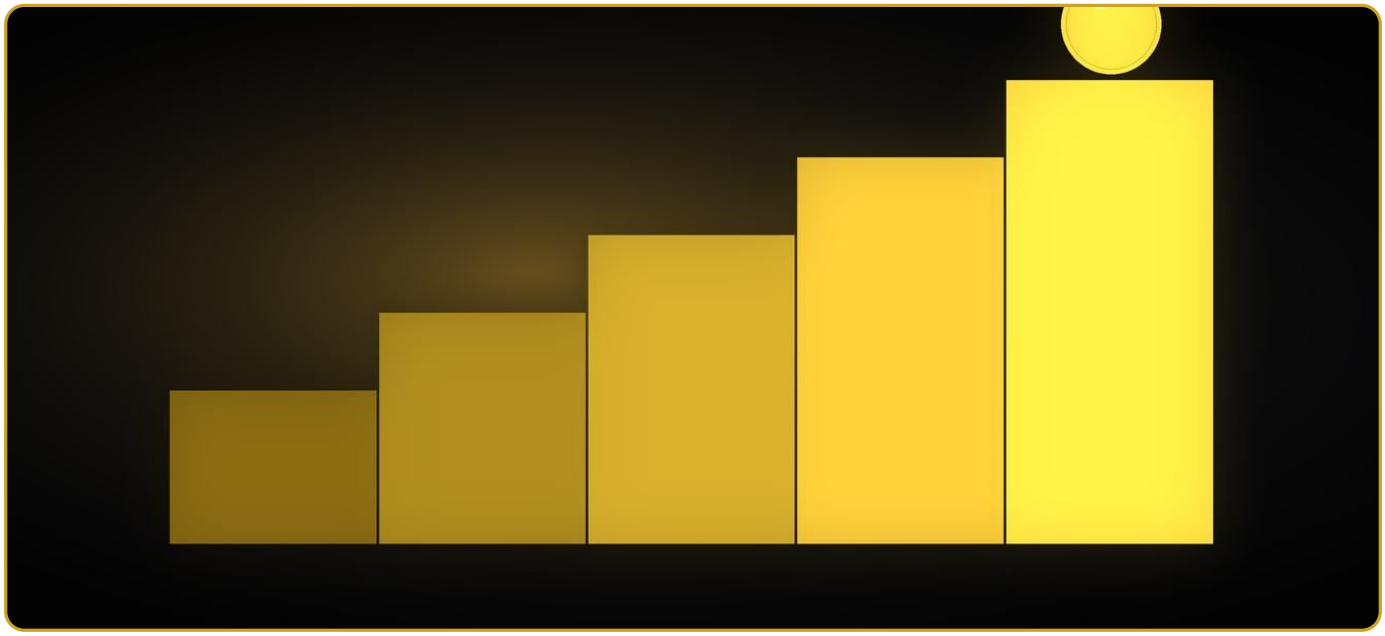

Keep the buffer apart from daily spending so it does not disappear into groceries. A free savings account at a different bank is one way. Check the terms and the fees.

TRY THIS

Open or choose the account that will hold your buffer. Write its name. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE SCARCITY TUNNEL

Research on scarcity suggests that worry about money can narrow attention and crowd out long-term thinking. A buffer is partly a mental space investment.

TRY THIS

Write the last unexpected cost you faced. How did you pay for it? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

FIND THE FIRST $50

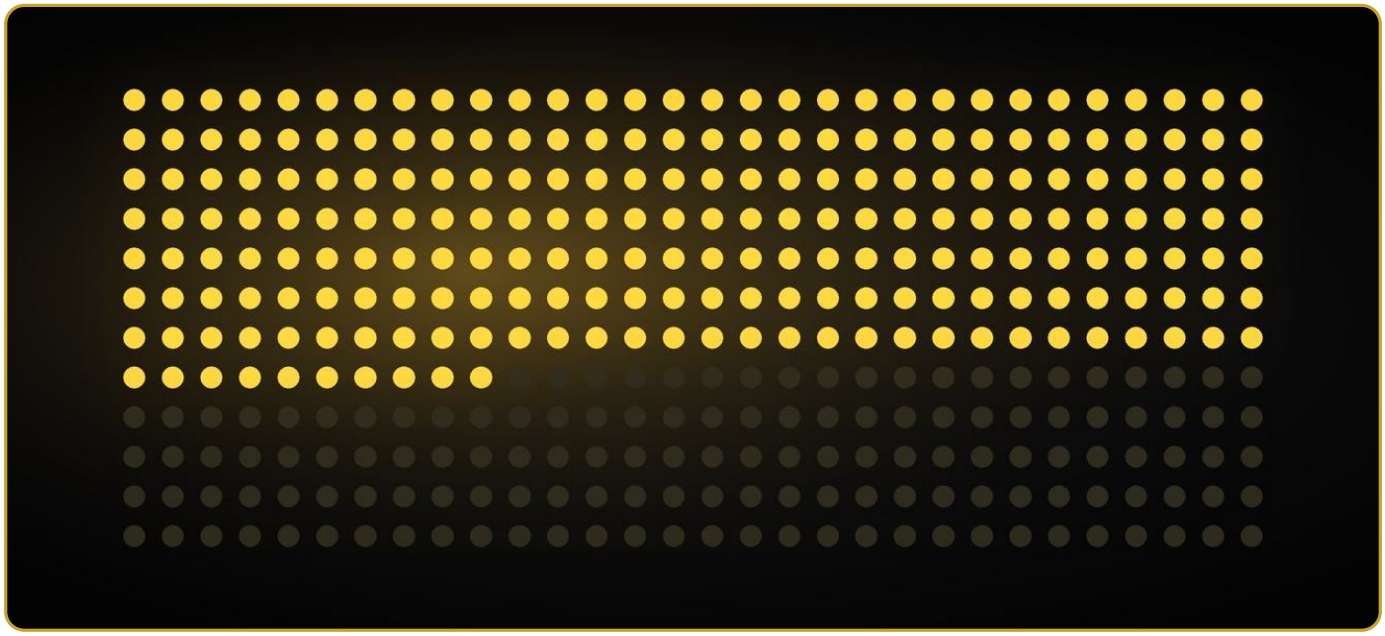

A first deposit builds momentum. Sell something you do not use, return an item or pause one subscription.

TRY THIS

Move your first $50 into the buffer today. Write the date. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

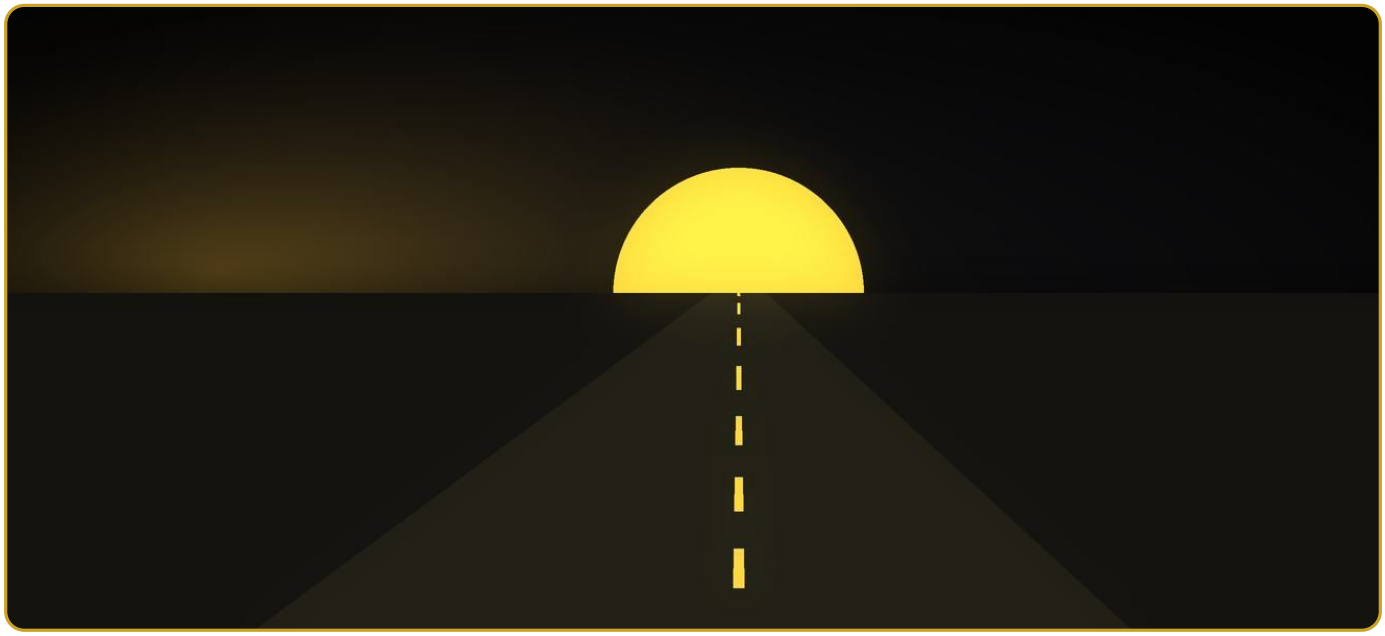

WEEKLY CHECK-IN

How much is in your buffer now, and what is next month's goal?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

How would you feel with a small cushion under you? What would you do differently?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THREE TO SIX MONTHS

A common guideline is to keep three to six months of essential expenses in cash. People with irregular income or one earner at home often aim for the higher end. It is a guideline, not a promise of safety.

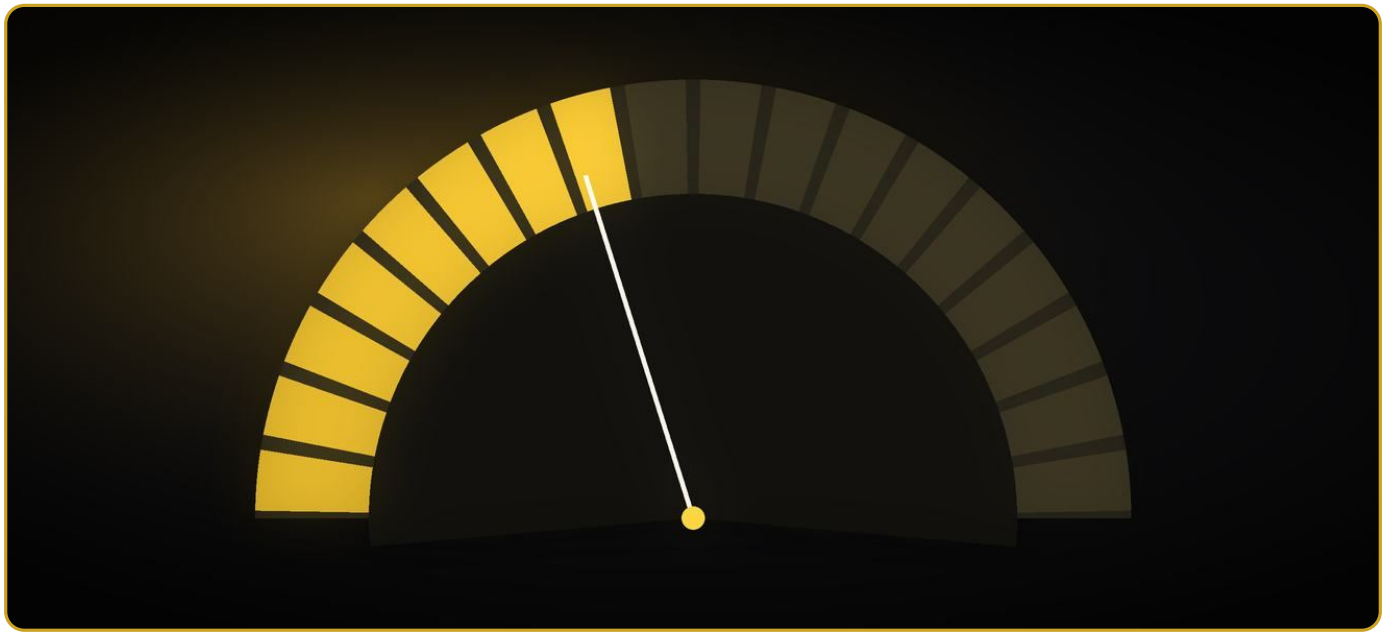

TRY THIS

Add up one month of essentials: housing, utilities, food, transport, insurance, minimum debt payments. Write the total.

☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

YOUR NUMBER

If your essentials are $2,500 a month, three months is $7,500 and six months is $15,000. The target is about essentials, not your full spending.

TRY THIS

Multiply your essentials by 3 and by 6. Circle the target you will aim for. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

CHOOSE WHERE IT LIVES

An emergency fund should be safe and easy to reach. Many people use a high-yield savings account. Check that it is insured where you live and what the current rate is.

TRY THIS

Write the account you will use and one question to check before you commit. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

WHAT COUNTS AS AN EMERGENCY

Unplanned, necessary and urgent. A sale is not an emergency. A broken water heater is. Writing the rules in advance protects the fund.

TRY THIS

Write three things that count as an emergency and three that do not. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SET THE MILESTONES

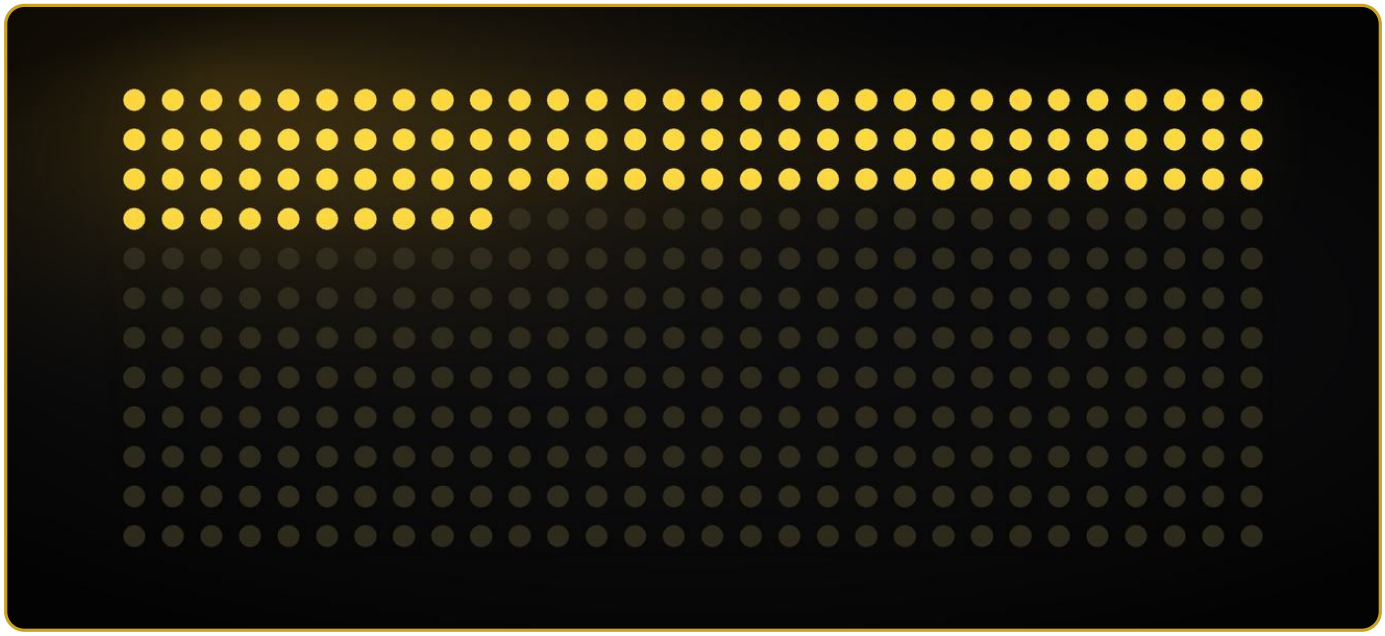

Big goals are easier in pieces. One month of essentials, then two, then three. Each milestone is a win.

TRY THIS

Write your first three milestones with dates. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

How far are you toward month one of essentials?

Money in this week $

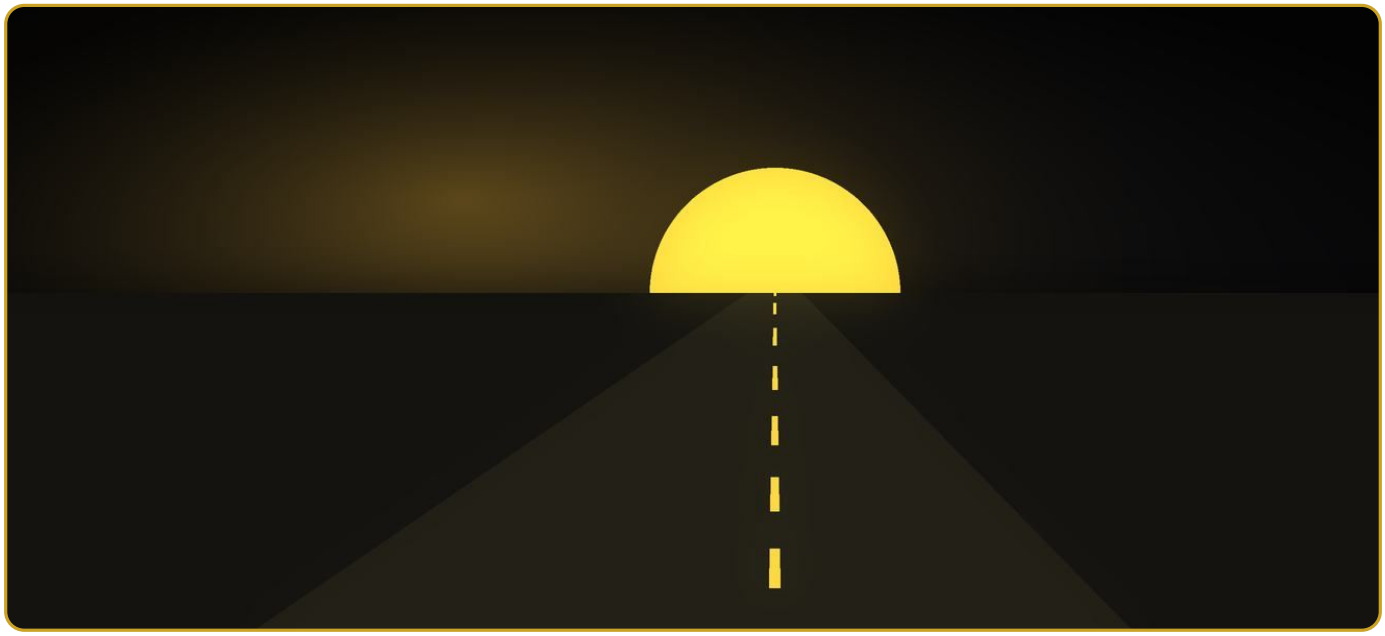

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What would having this fund change about how you handle your job, your housing or your health?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

TURN SURPRISES INTO PLANS

A sinking fund is money set aside monthly for a cost you know is coming: car repairs, gifts, annual fees, travel. A big bill becomes a small monthly habit instead of a crisis.

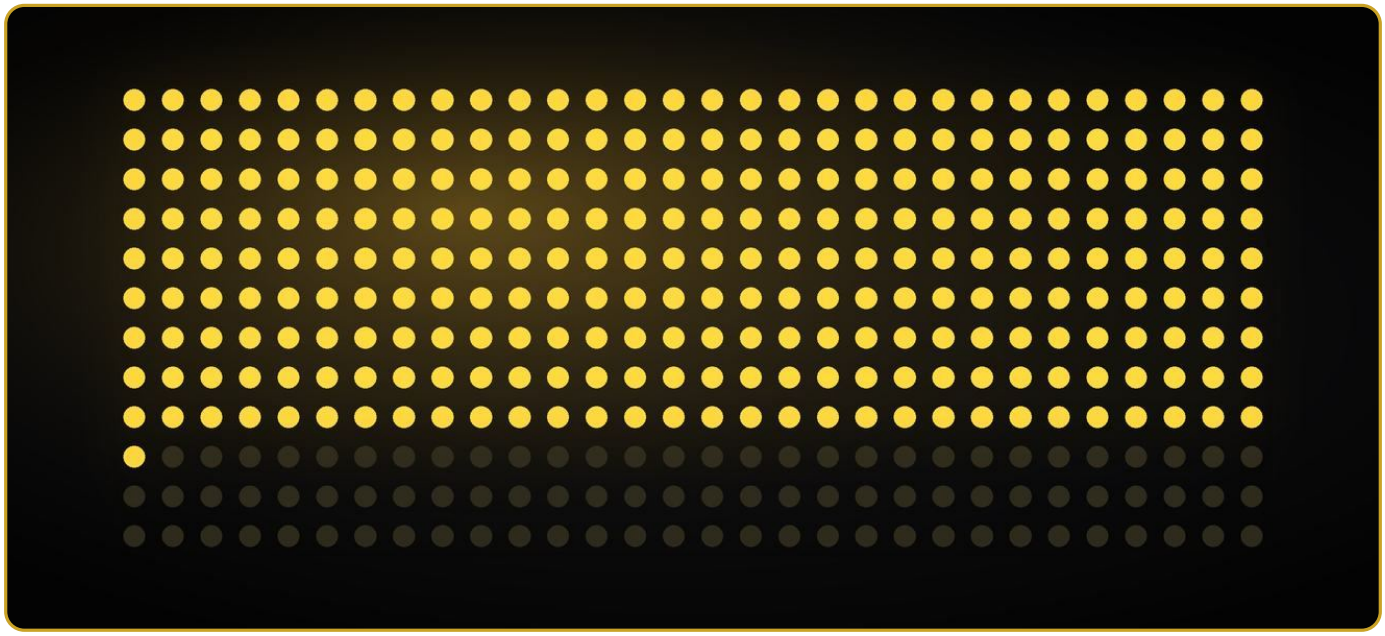

TRY THIS

List five costs you know will come this year that are not monthly. Write the estimated amount for each.

☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE MONTHLY SHARE

A $1,200 yearly cost is $100 a month. Five of those is $500 a month, which feels very different from $6,000 landing at once.

TRY THIS

Pick one big yearly cost. Divide by 12 and write the monthly amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

CREATE THE ENVELOPES

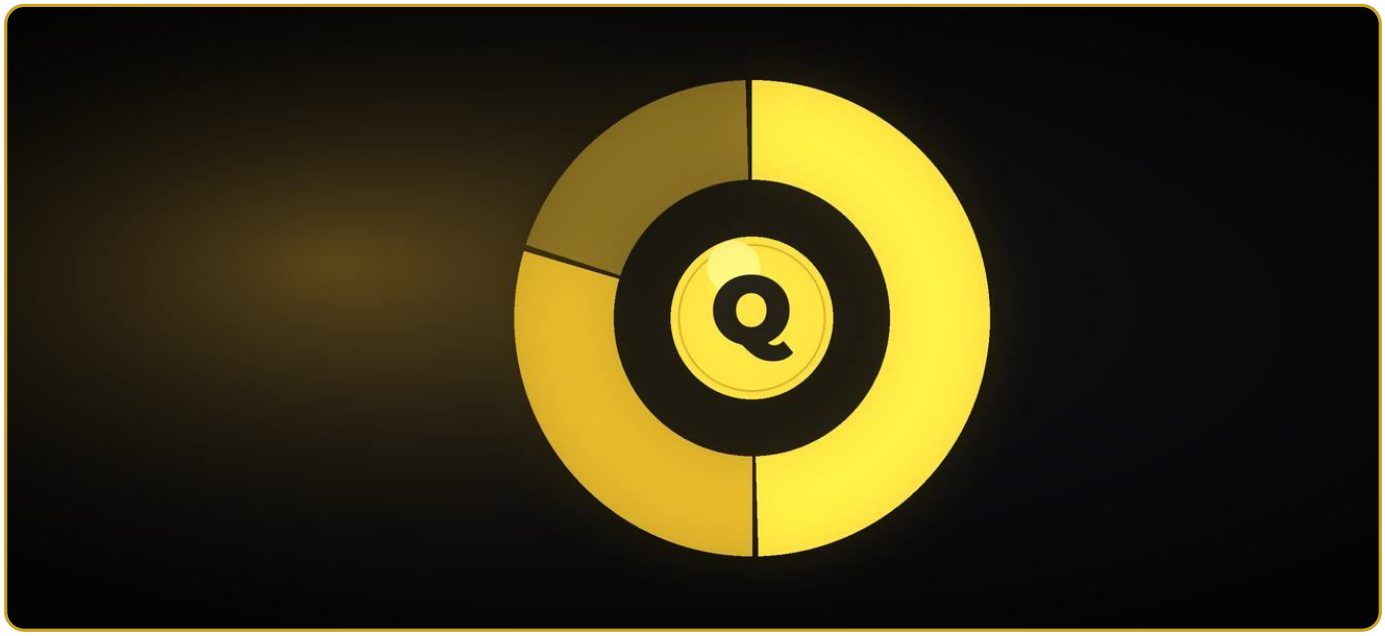

You can use separate savings buckets, a spreadsheet or even cash envelopes. What matters is that each fund has a name and a target.

TRY THIS

Set up one sinking fund. Name it, set the target and the monthly amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

MENTAL ACCOUNTING

Behavioural economists call it mental accounting: people treat money differently depending on its label. That can be a trap, and it can also be a tool when you label money for a purpose.

TRY THIS

Write one label you could give a pile of money to make it harder to spend. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PAY THE FIRST MONTH

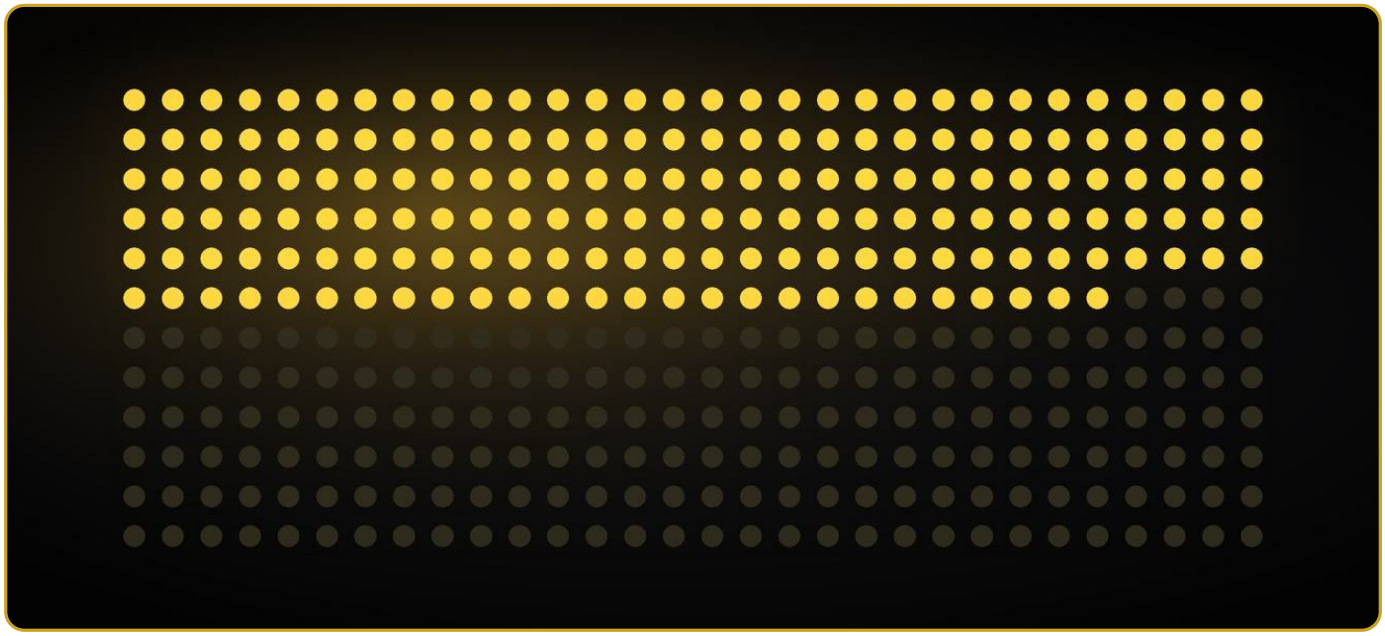

Starting is the hardest part. Move the first monthly amount today, even if it is small.

TRY THIS

Transfer your first sinking fund payment. Write the amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

LEARN

YOU ARE NOT A SPREADSHEET

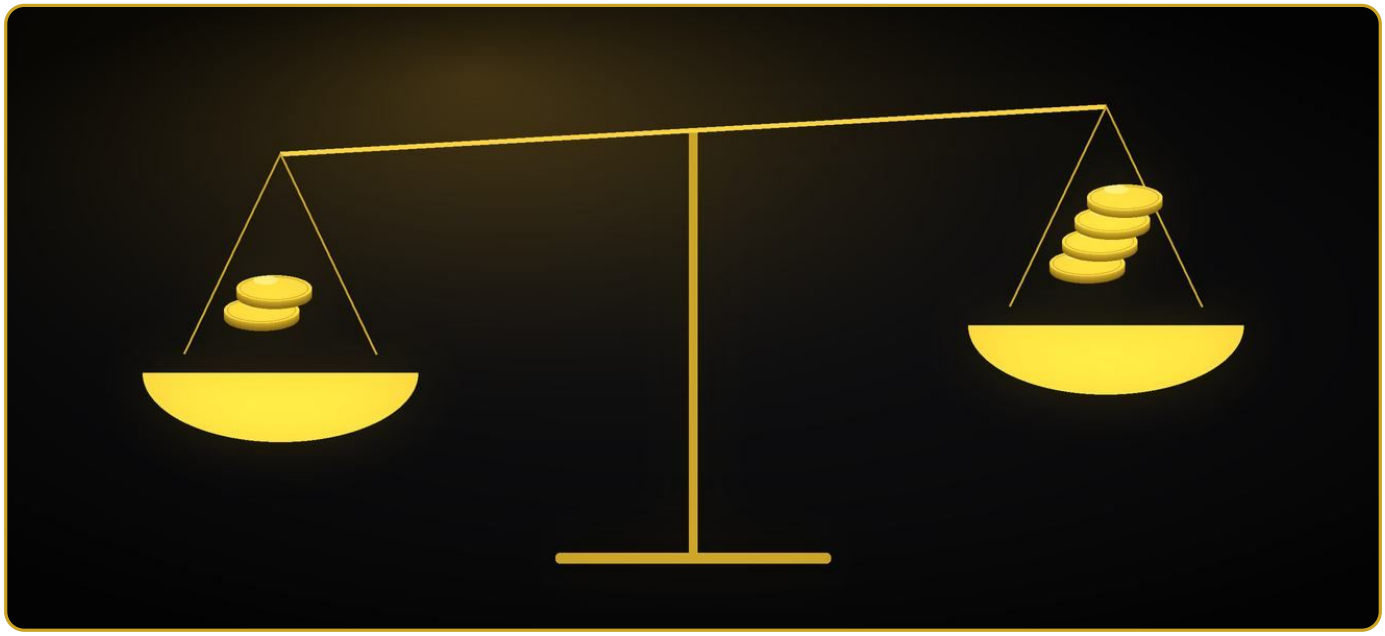

Behavioural economists have documented many predictable biases: we overvalue the present, hate losses, follow the crowd and stick to defaults. Knowing them does not make you immune, but it helps you design around them.

TRY THIS

List two money decisions you regret. Write what you were feeling when you made them. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

LOSS AVERSION

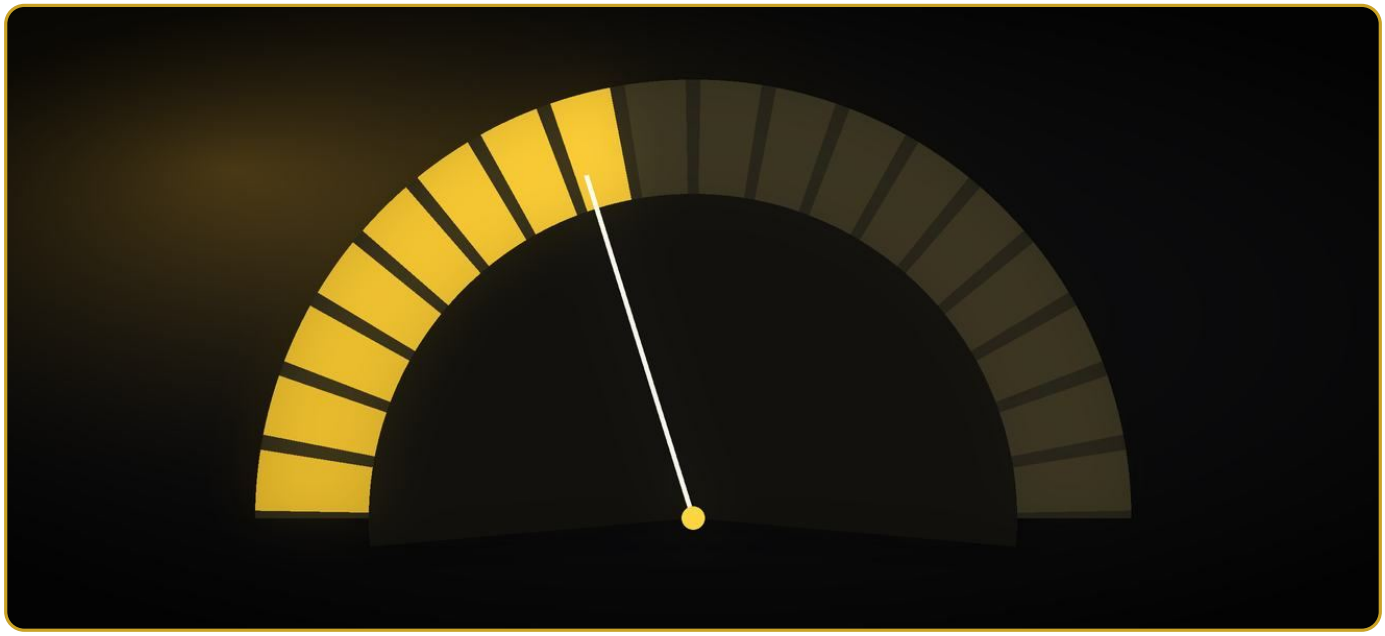

Prospect theory, a famous idea in behavioural economics, suggests that losses can feel roughly twice as strong as equal gains. Losing $100 can hurt about as much as gaining $200 feels good. That is why people hold losing investments too long.

TRY THIS

Think of a time you refused to sell something at a loss. What would you do now? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

ANCHORING

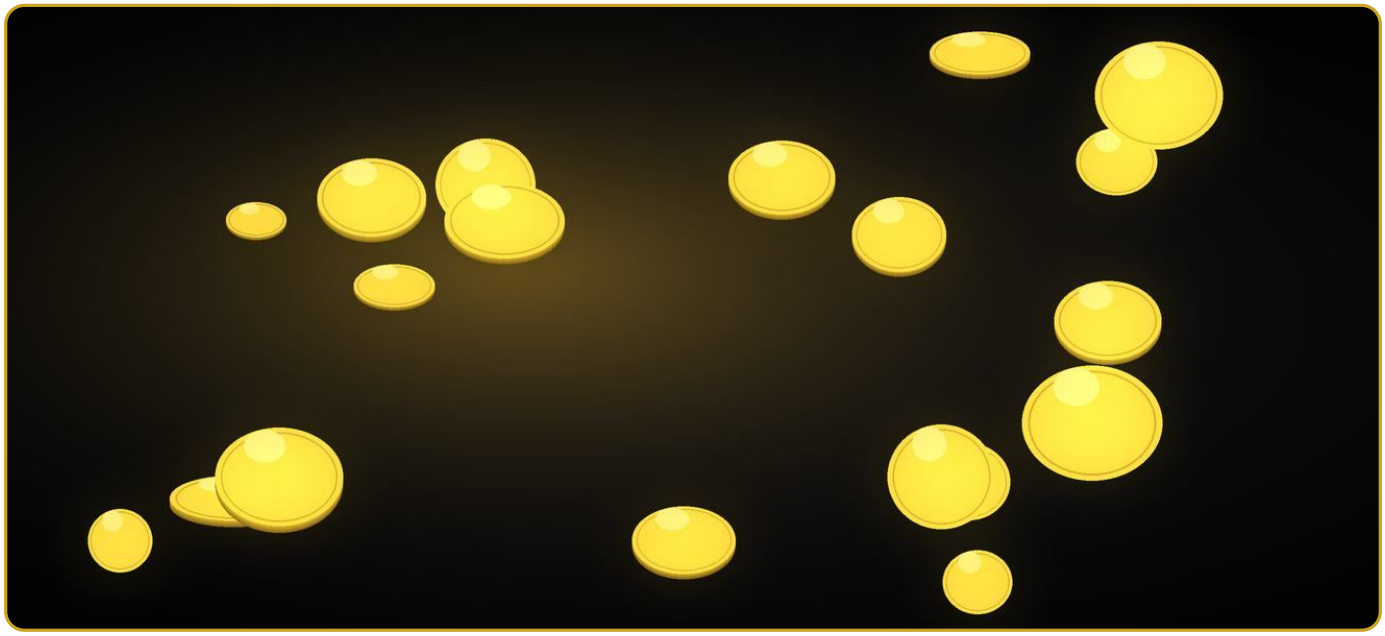

The first number you see shapes every later judgement. A $400 price crossed out to $250 feels like a bargain even when $250 is more than it is worth.

TRY THIS

Next time you see a sale, write the original price, the sale price and what you would pay if there were no tag. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

SUNK COST

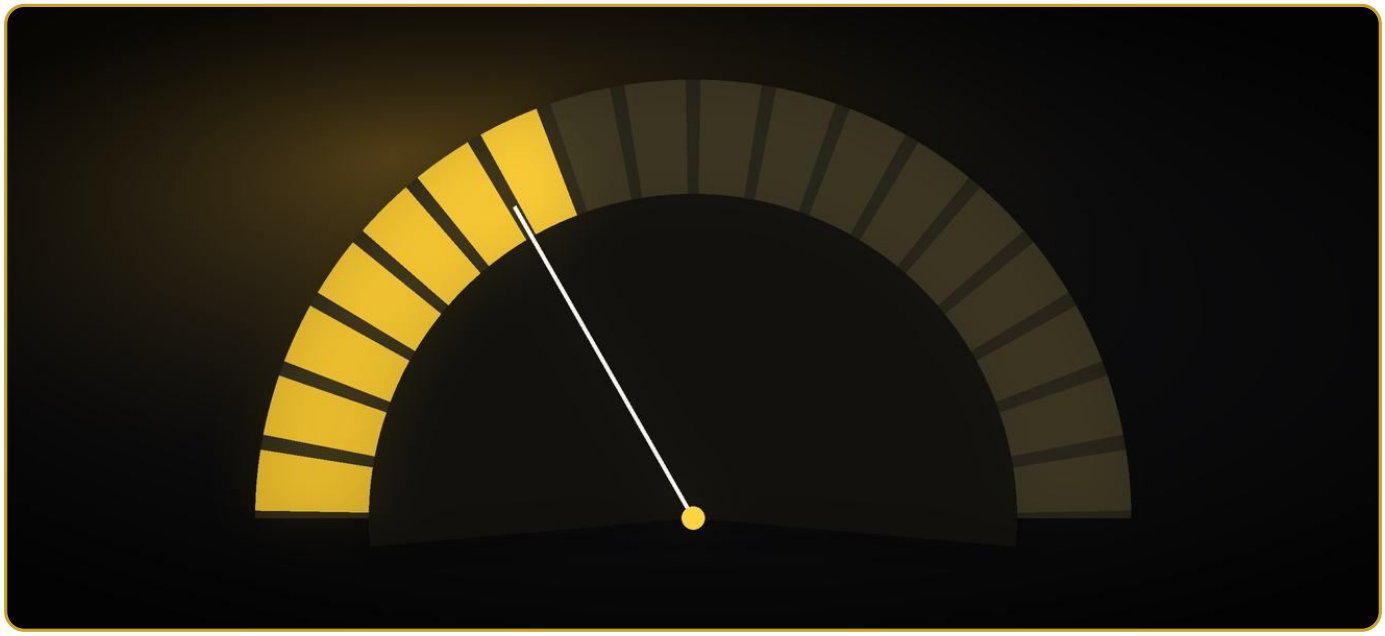

Money already spent cannot be recovered. The question is only whether future costs are worth future benefits. A class you hate is not worth finishing just because you paid.

TRY THIS

Name one thing you keep paying for because of what you already spent. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PAUSE BUTTON

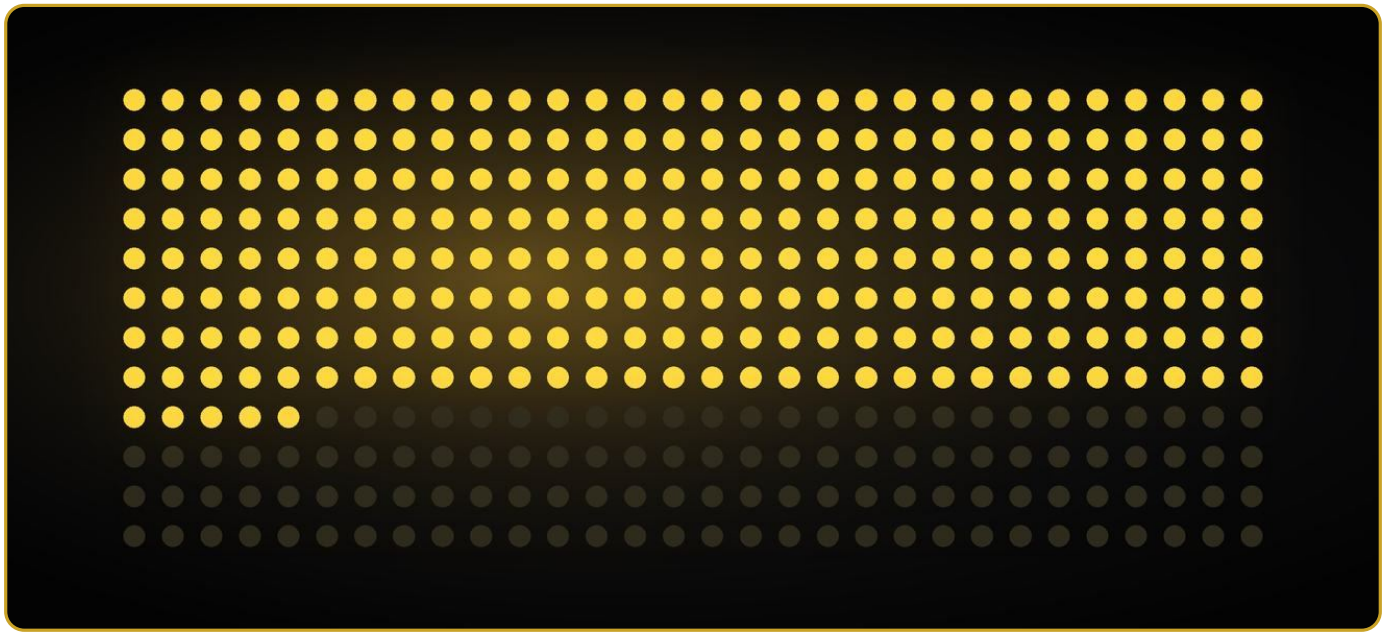

A cooling-off rule can protect you from many biases at once. A common version is to wait 24 hours before any non-essential purchase over a set amount.

TRY THIS

Write your own rule: the amount that triggers the wait and how long you will wait. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

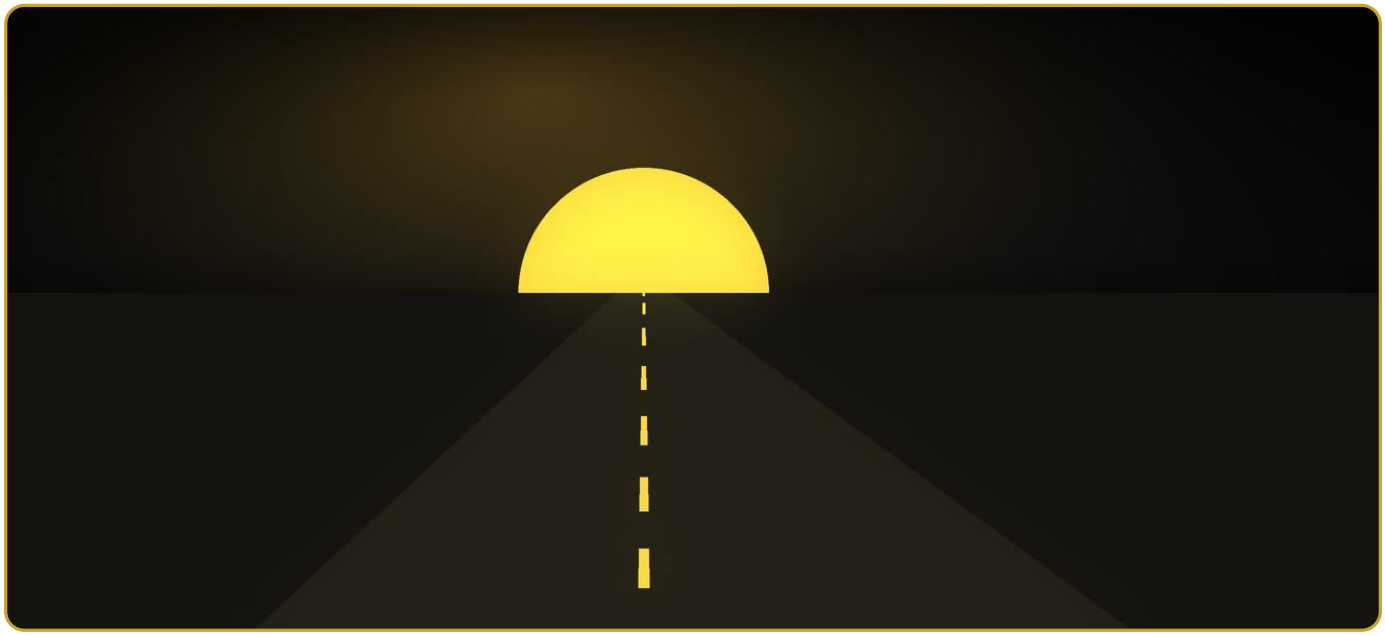

WEEKLY CHECK-IN

Which bias did you catch yourself using this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

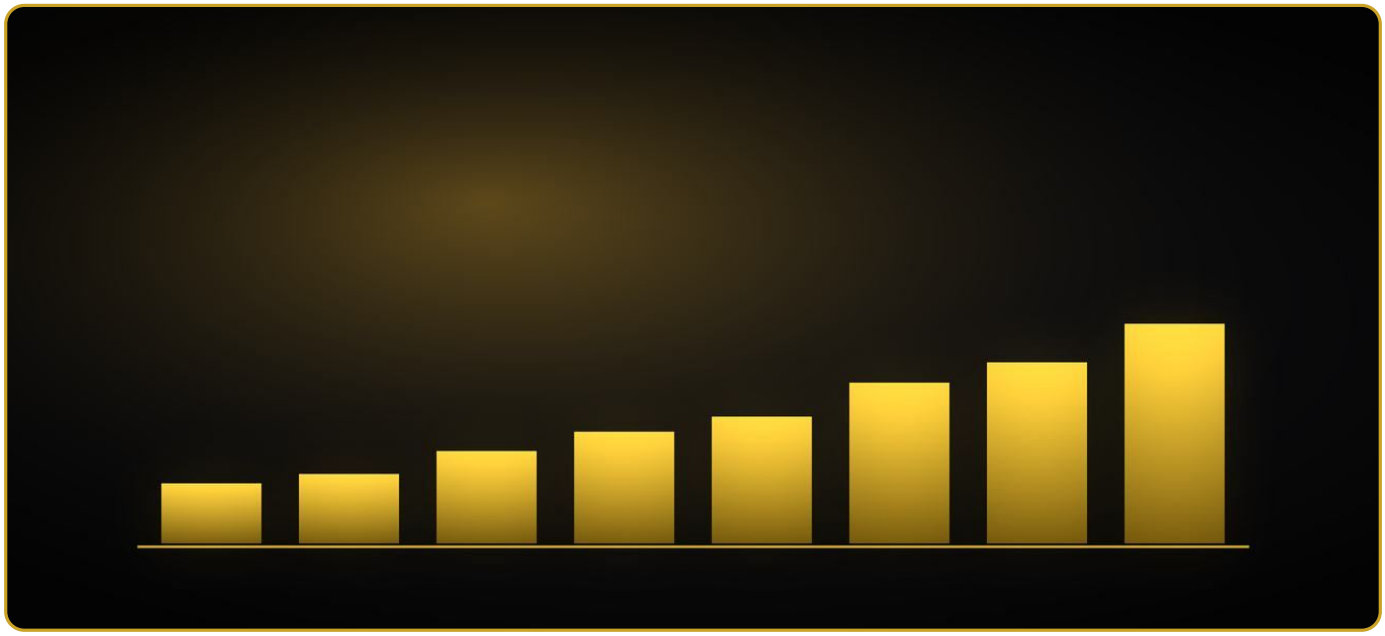

REFLECT AND RESET

Which bias do you think costs you the most, and what is one guardrail you can build?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE RAISE THAT DISAPPEARS

Lifestyle creep is when spending rises every time income rises, so you never feel richer. A bigger paycheck gives you the option to save more. It does not do it for you.

TRY THIS

Write your income and your spending from one year ago and now. Which grew faster? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

HALF THE RAISE

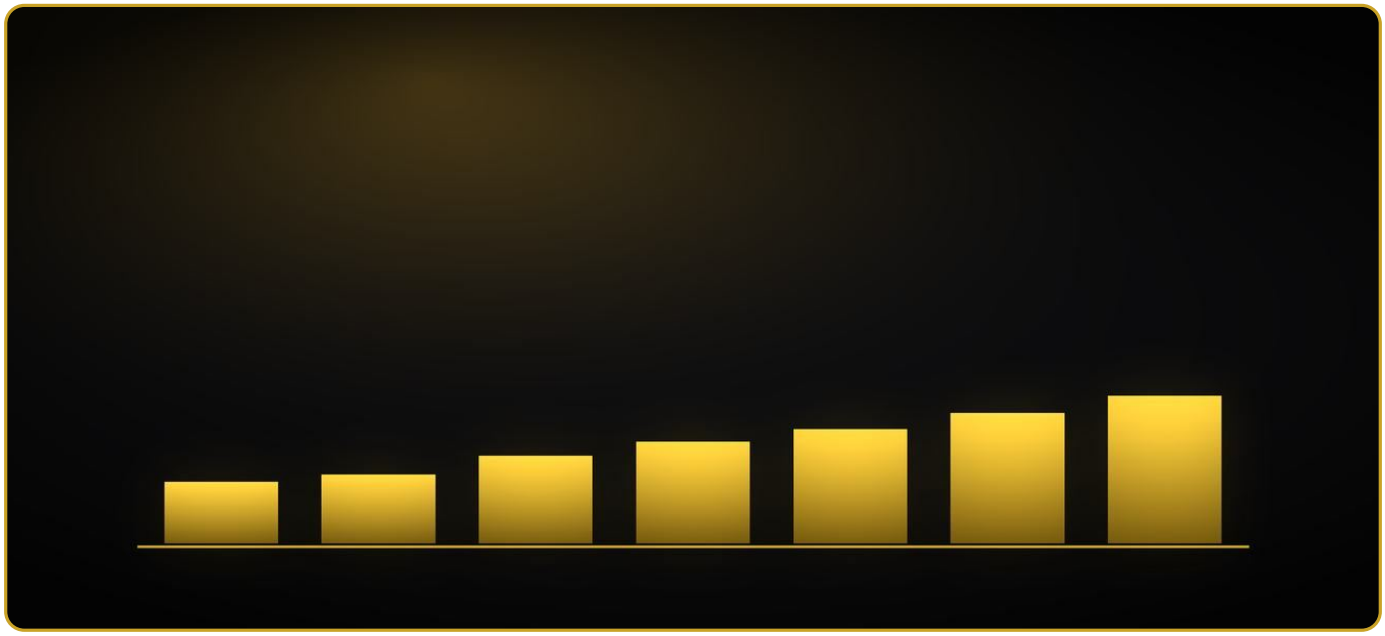

If you get a $4,000 raise and save half of it, that is $2,000 a year, or about $167 a month. Invested every month for 20 years at a hypothetical 7% a year, that becomes $86,821.

TRY THIS

Decide your rule for the next raise: what percentage goes to your future first. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

KEEP ONE OLD STANDARD

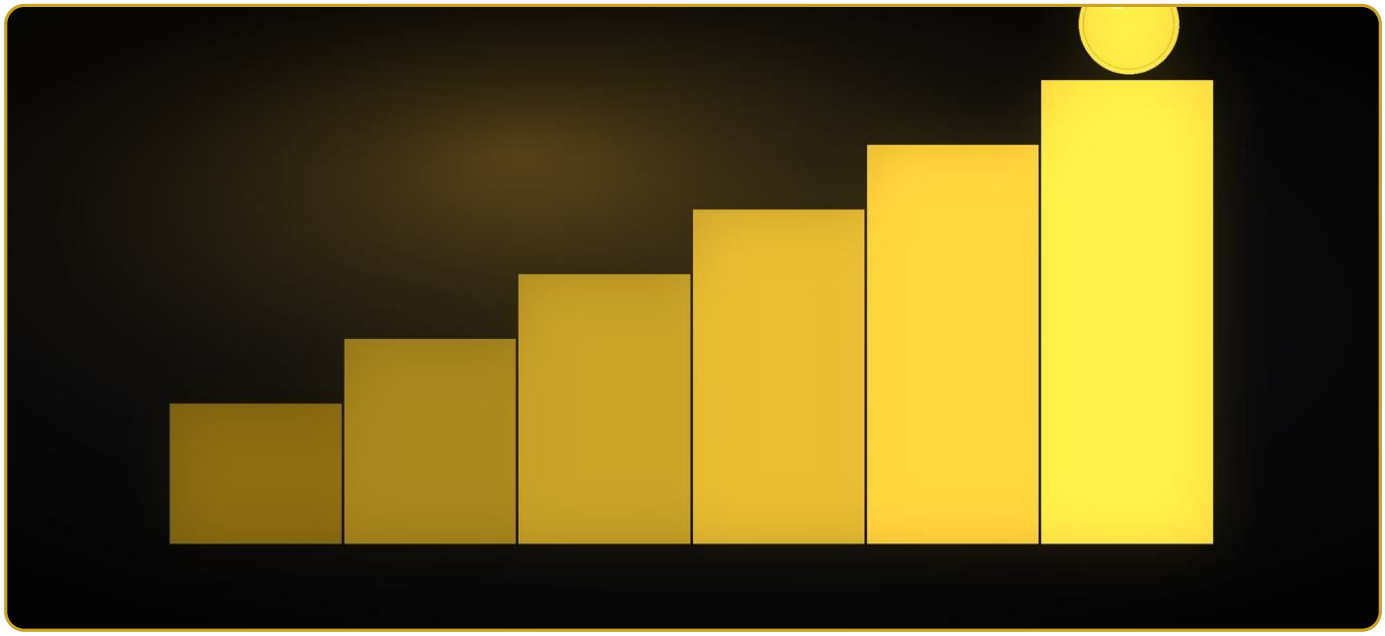

Pick one area where you keep your old, cheaper habit even when you could afford more. It is a quiet way to keep a gap between what you earn and what you spend.

TRY THIS

Choose one habit you will keep at its old level on purpose. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

KEEPING UP

People compare themselves with people just above them, not people far away. Social media makes the comparison group bigger and richer. Spending to match them is expensive.

TRY THIS

Write whose spending you compare yourself to most. Note one thing you really want, not one you were shown. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

RAISE THE FLOOR FIRST

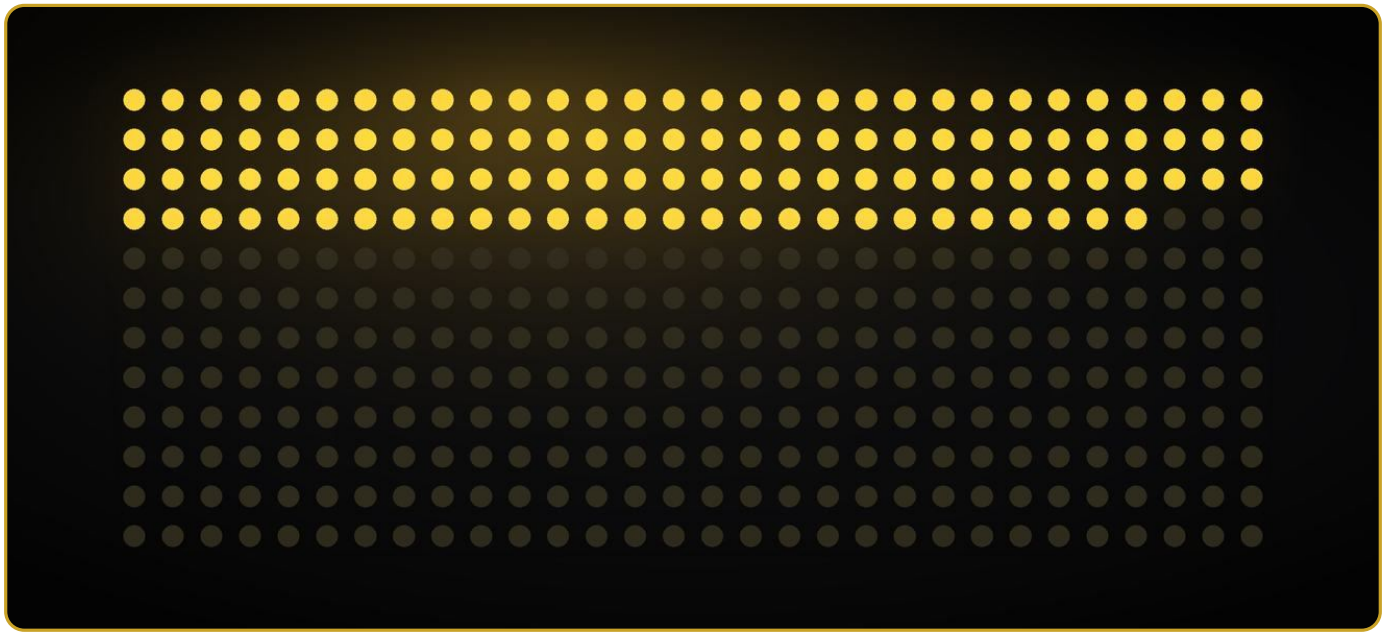

Before you spend a raise, send a share of it to savings or debt. Do it the day it hits your account.

TRY THIS

If a raise is coming, write the percentage you will send to savings first. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

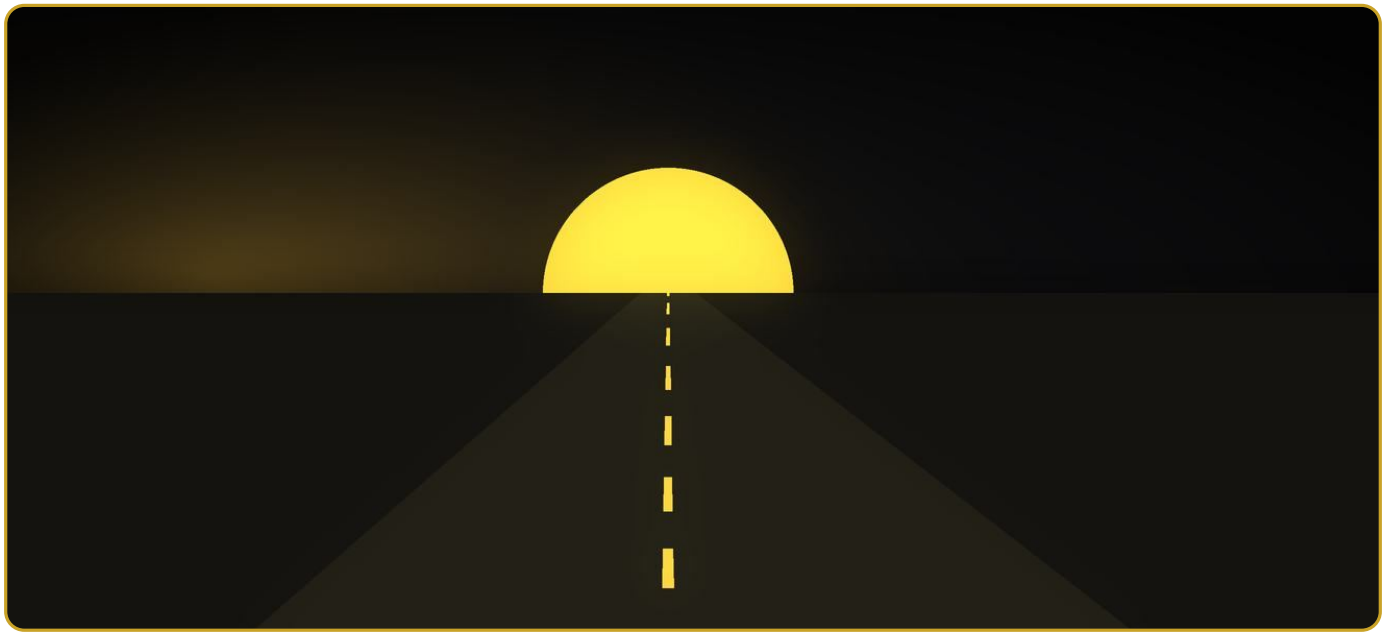

WEEKLY CHECK-IN

Did any spending creep up this week? Was it a decision or a drift?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

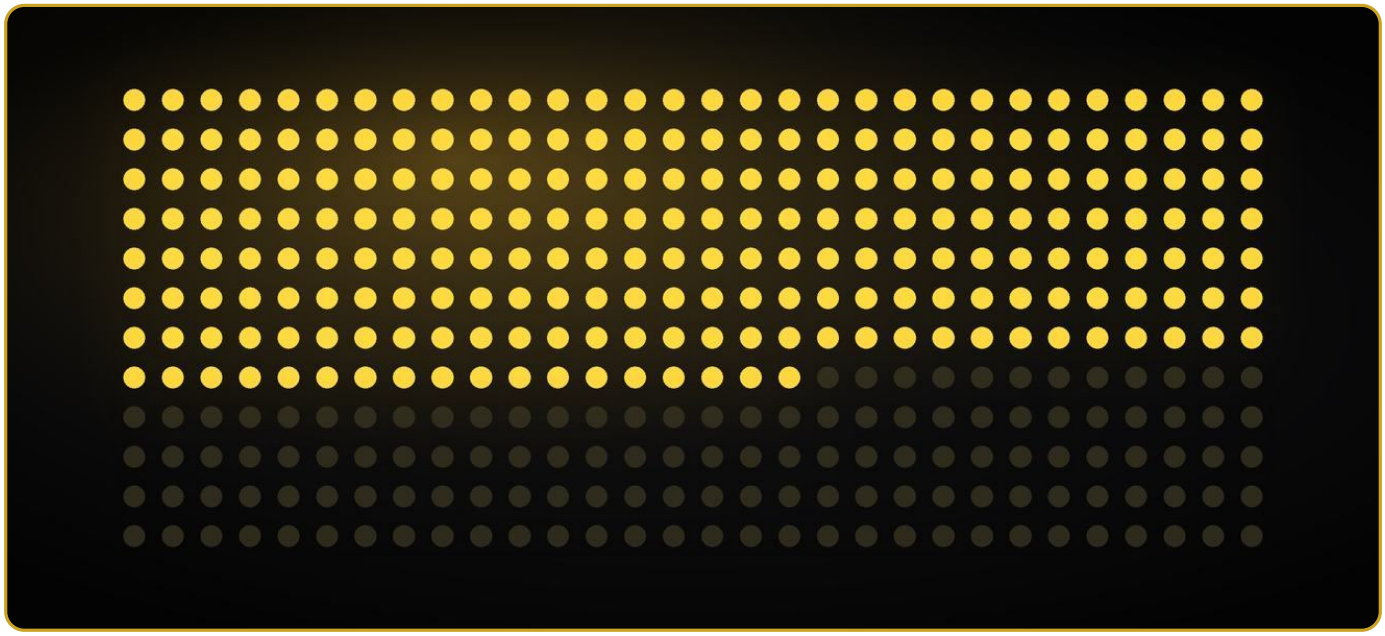

REFLECT AND RESET

What does enough look like for you? Describe it in one sentence.

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

A CHECKPOINT

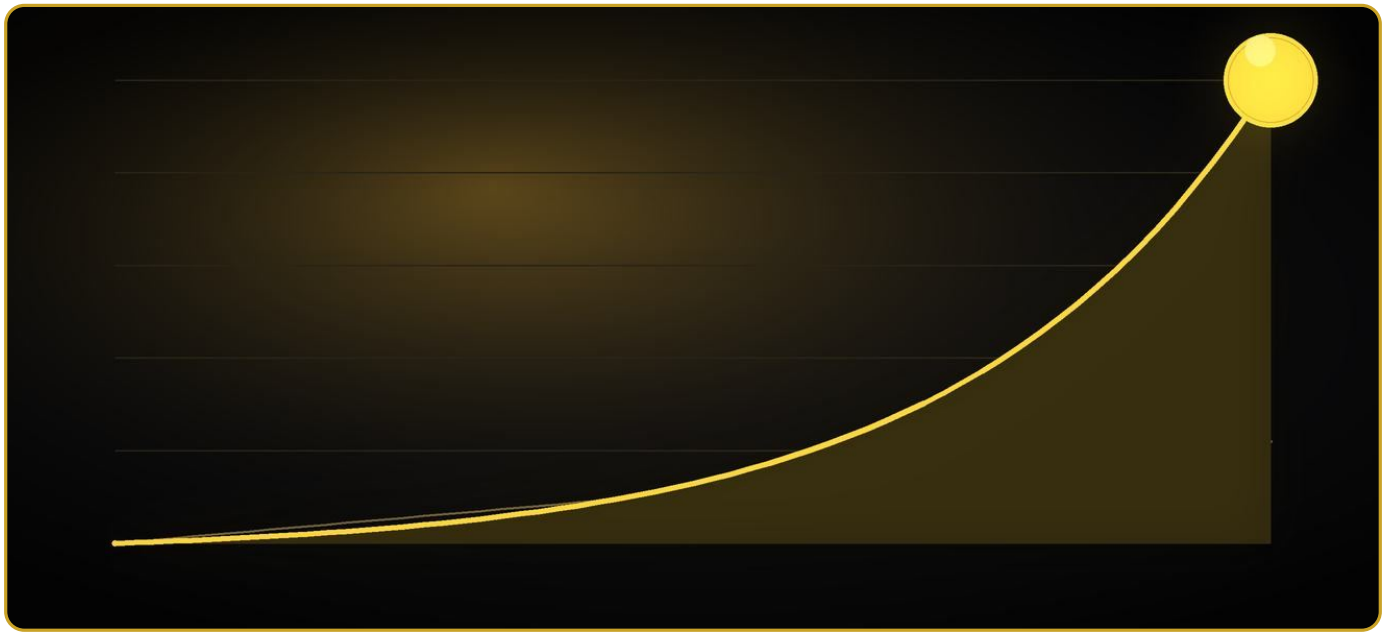

Thirteen weeks is a quarter, and it is long enough to see patterns. A review is not a grade. It is a chance to see which small habits held and which did not.

TRY THIS

Fill in your net worth again on the snapshot page. Compare it with Day 1. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

HOW FAR YOU CAME

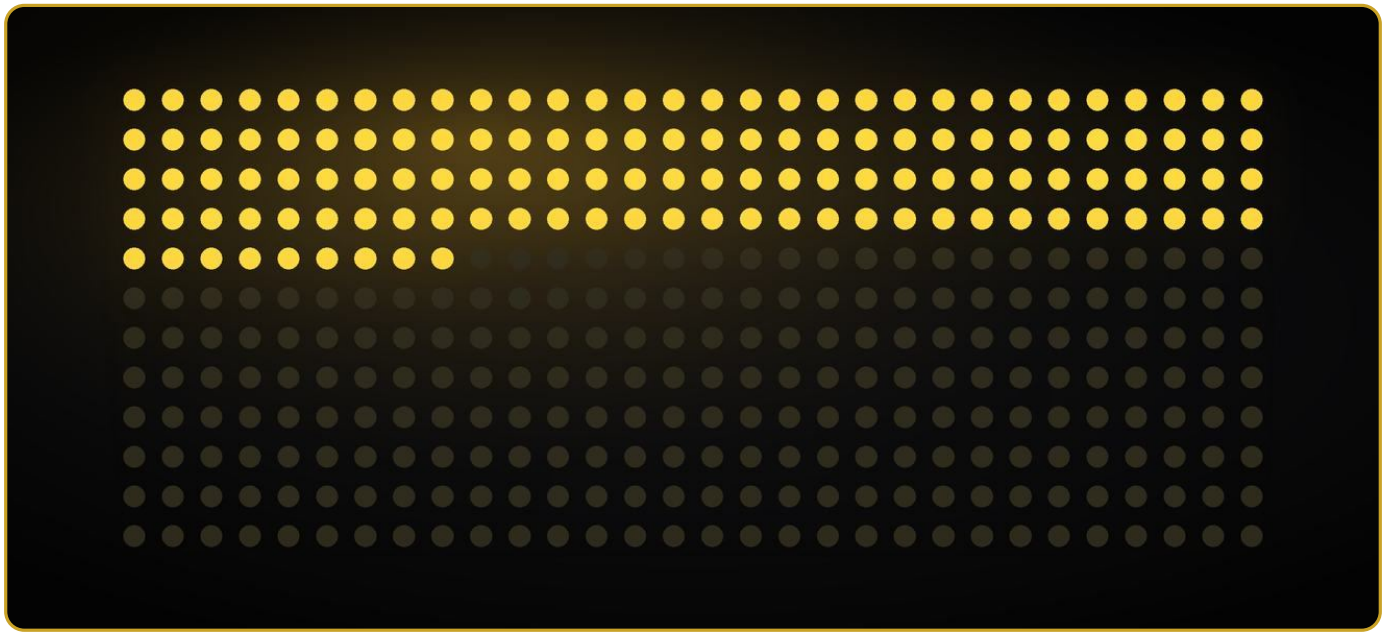

If your net worth moved by even a small amount, that is the system working. Calculate the change in dollars and in percent. For example, going from $1,000 to $1,250 is 25% growth.

TRY THIS

Write your change in net worth since Day 1 in dollars and in percent. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

KEEP, CHANGE, DROP

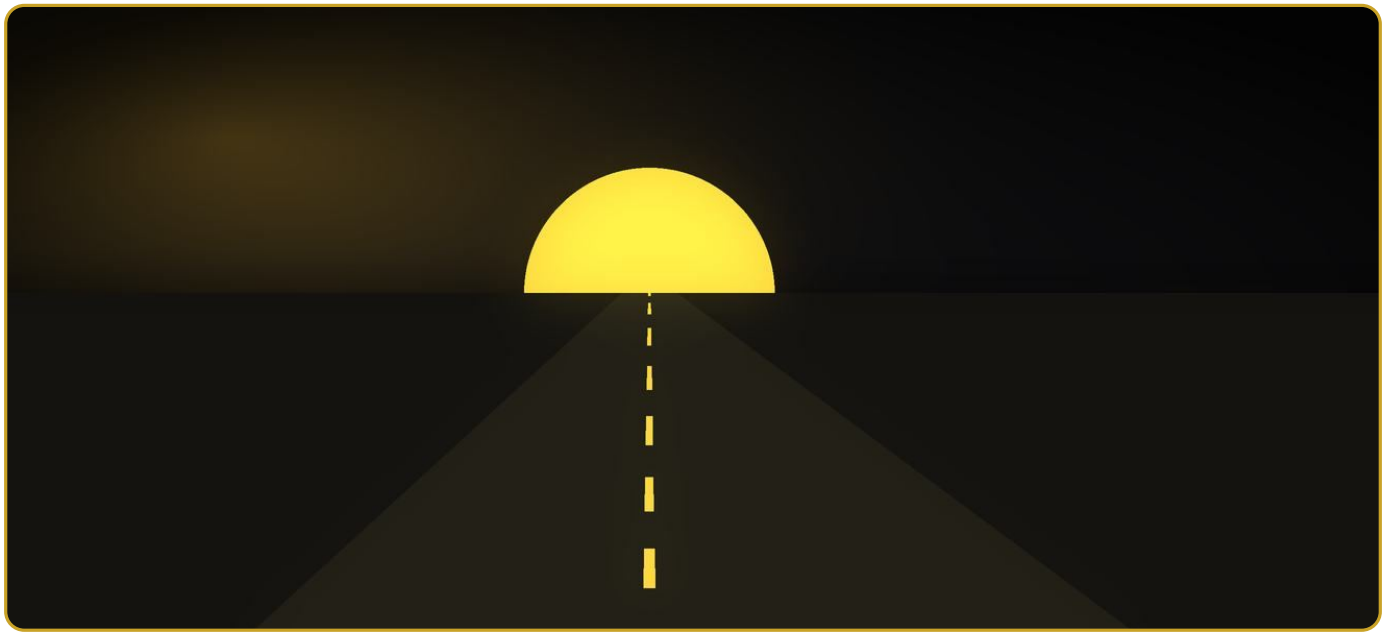

Go through the habits you tried this quarter. Keep the ones that worked, change the ones that half worked and drop the ones that did not fit your life.

TRY THIS

Write one habit to keep, one to change and one to drop. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

PROGRESS IS NOT A STRAIGHT LINE

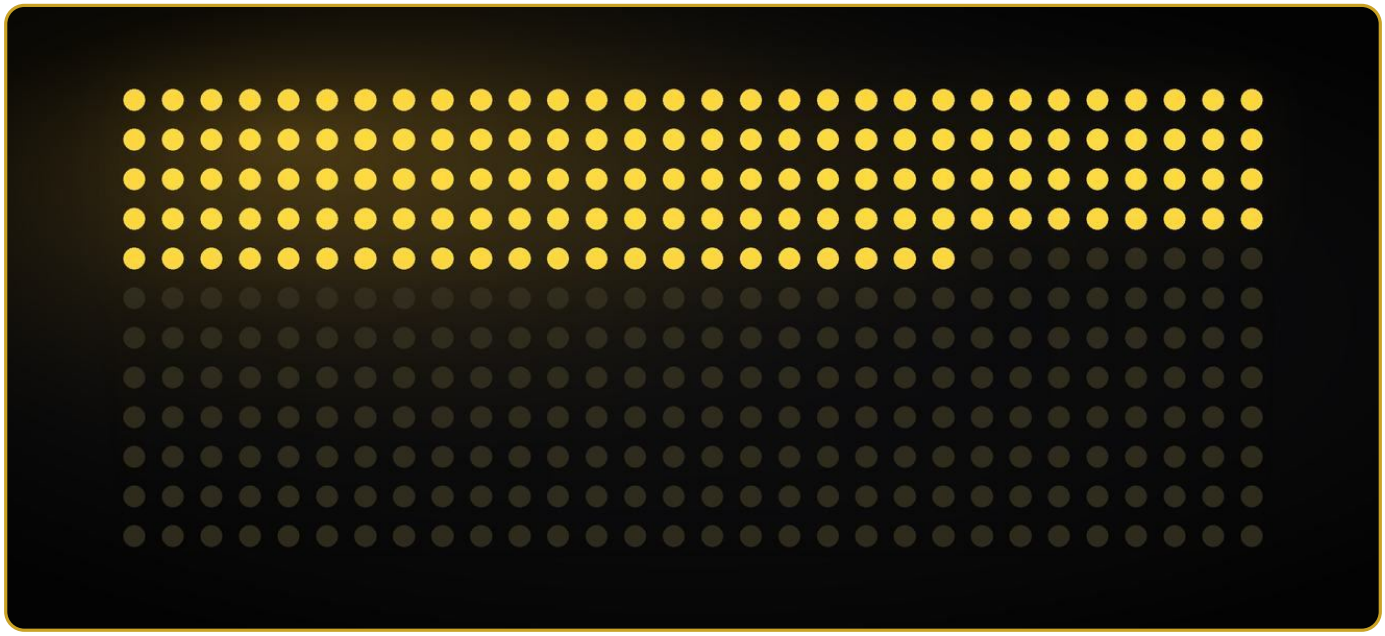

Months go badly for everyone. A month with no saving does not erase the quarter. What predicts success is returning to the plan.

TRY THIS

Write the thing that most often knocks you off track and a one-line plan for next time. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

REWARD THE WORK

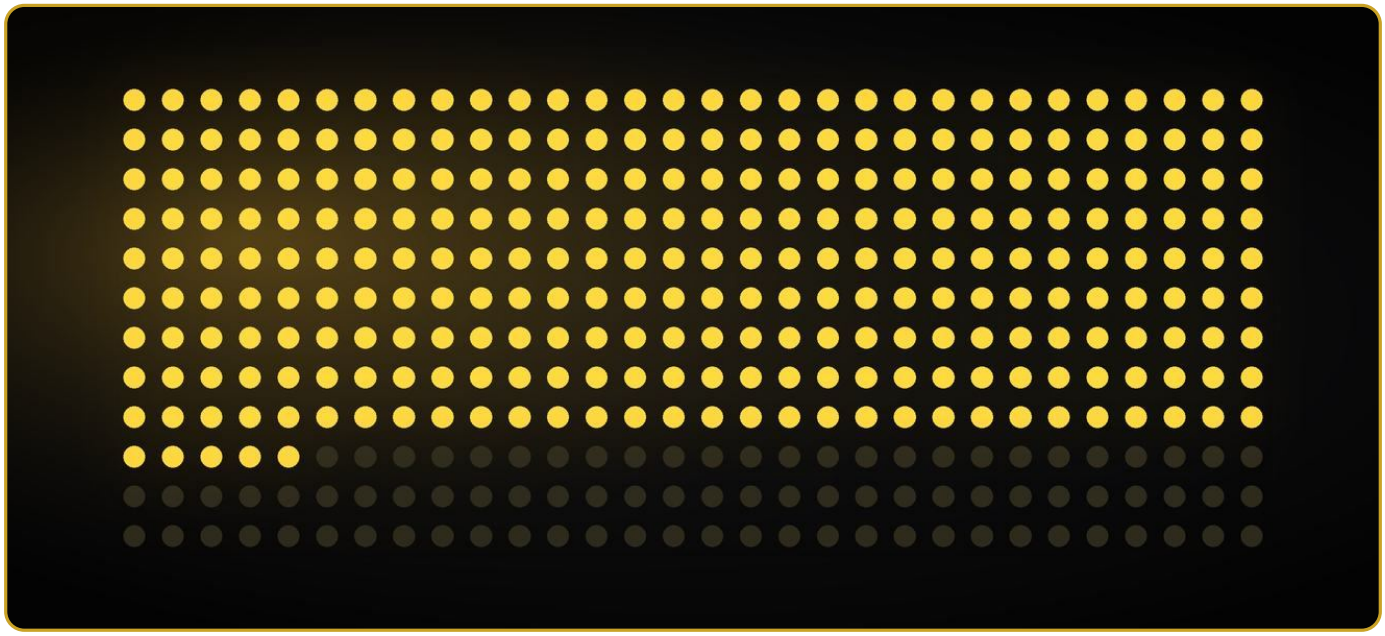

Celebrating small wins can keep habits going. Pick a reward that costs little and say it out loud.

TRY THIS

Choose a low-cost reward for finishing the first quarter. Write the date you will take it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Write three wins from this quarter, however small.

Money in this week $

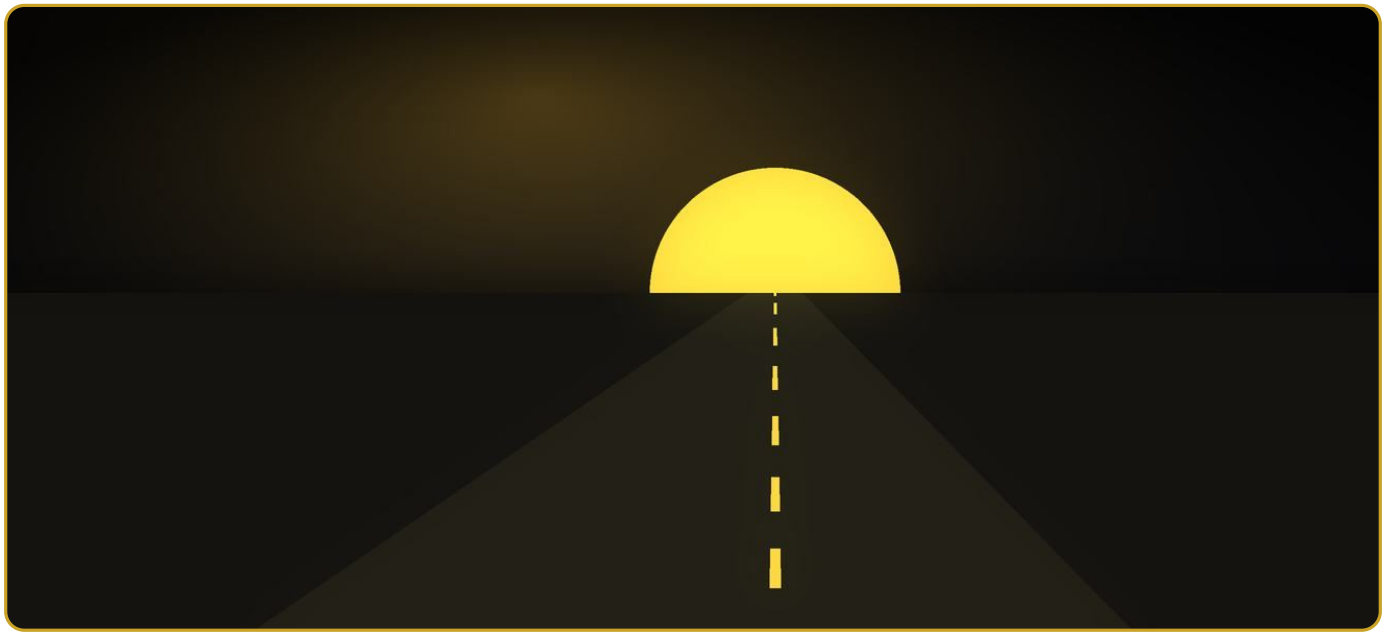

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

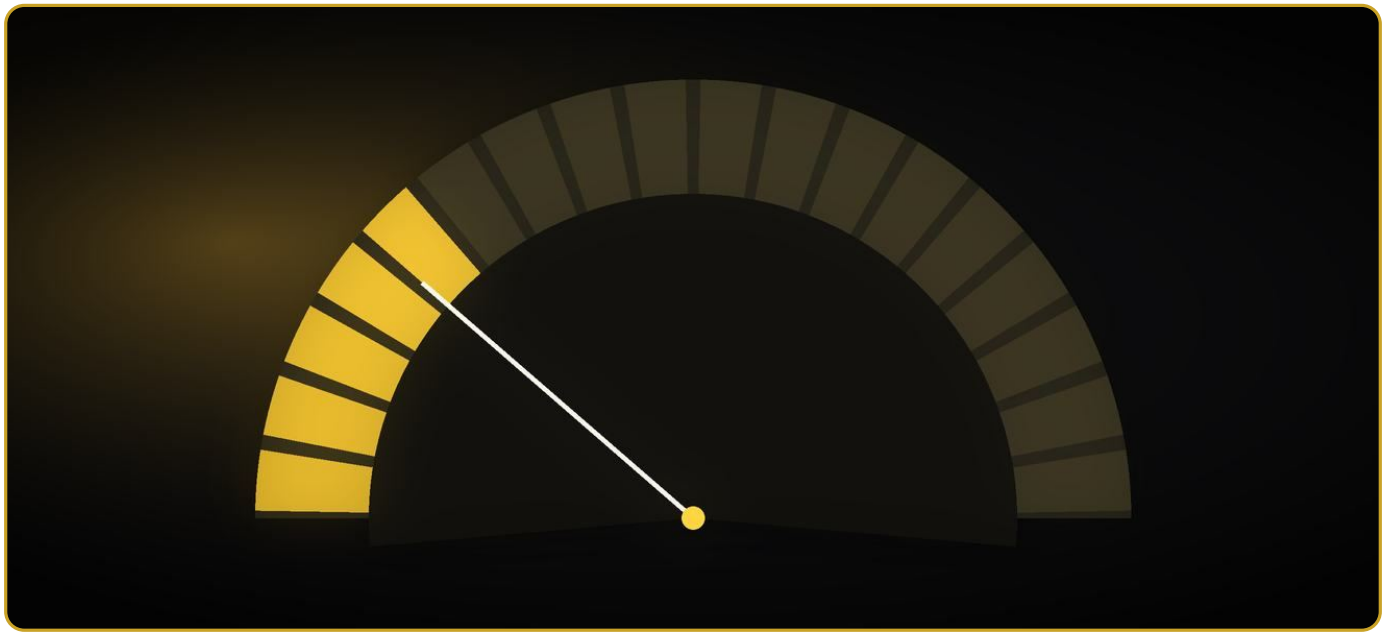

REFLECT AND RESET

What is the one thing you want to be true about your money 90 days from now?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

LOOK AT EVERY DEBT

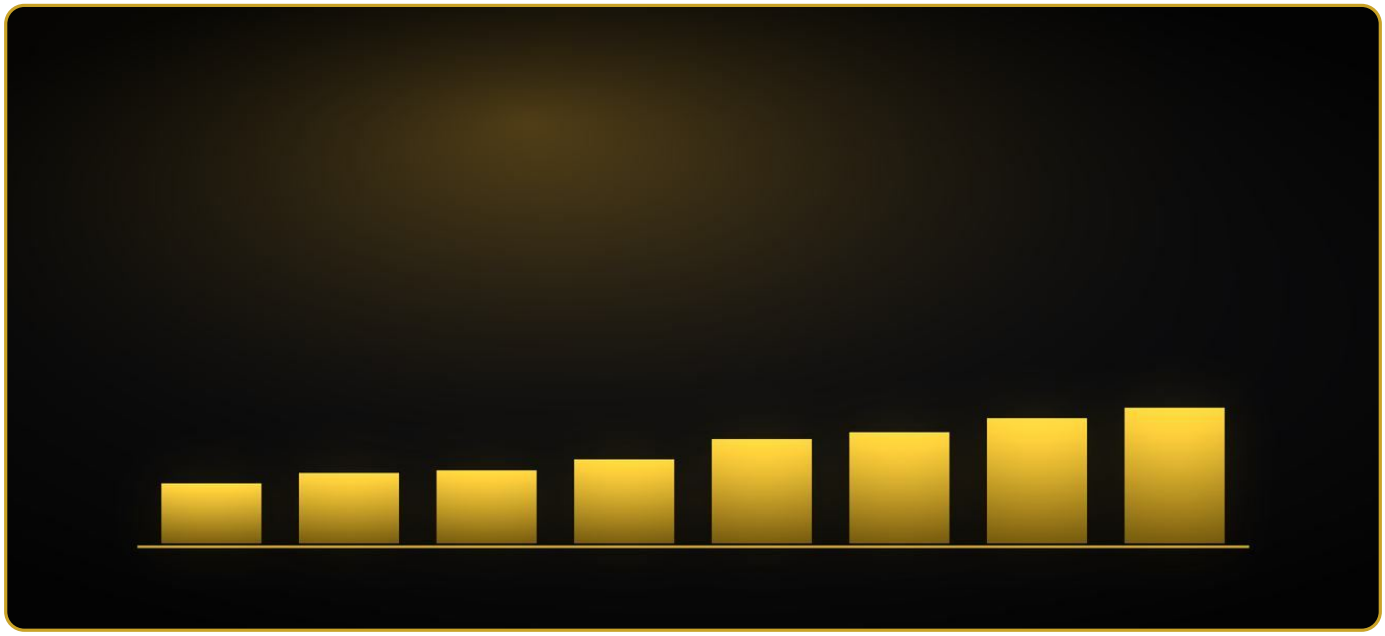

You cannot plan a debt payoff from memory. A debt map lists each balance, its interest rate (APR) and its minimum payment on one page. Seeing it all together usually feels better than the vague worry of not looking.

TRY THIS

Fill in the Debt Map page: lender, balance, APR and minimum payment for every debt you have. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE COST OF A RATE

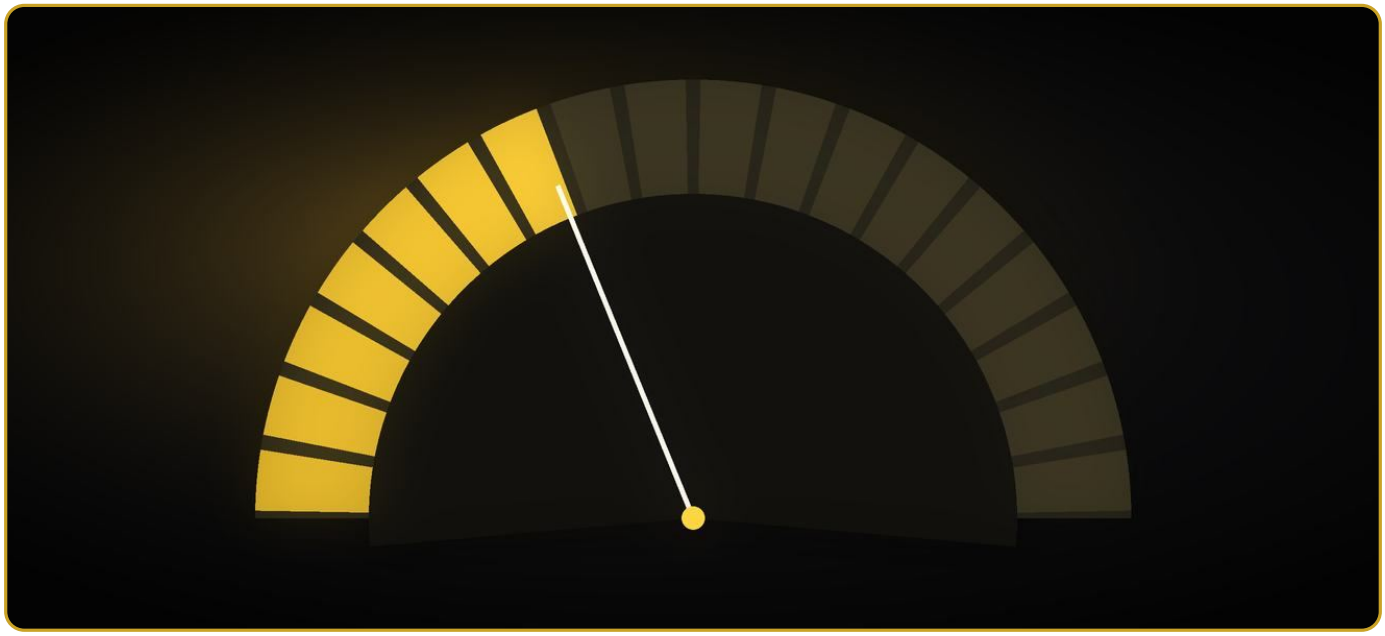

Interest is the price of borrowing. The interest on a $5,000 balance at 24% APR is about $1,200 a year before compounding, while the same balance at 6% is about $300.

TRY THIS

Write the highest APR on your debt map. Multiply the balance by the rate to see a year of interest. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

RANK BY RATE

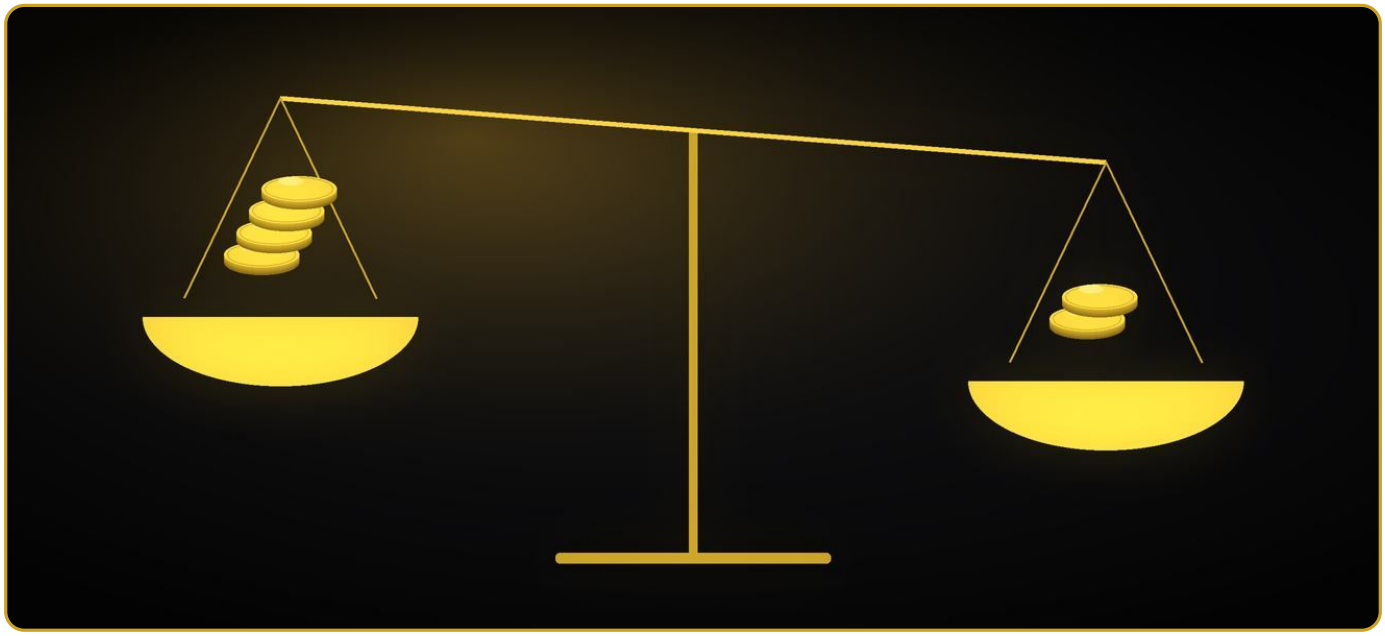

Put the debts in order from highest APR to lowest. The top of the list is where each extra dollar does the most work.

TRY THIS

Number each debt on the map from 1 (highest APR) to the last. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

DEBT SHAME

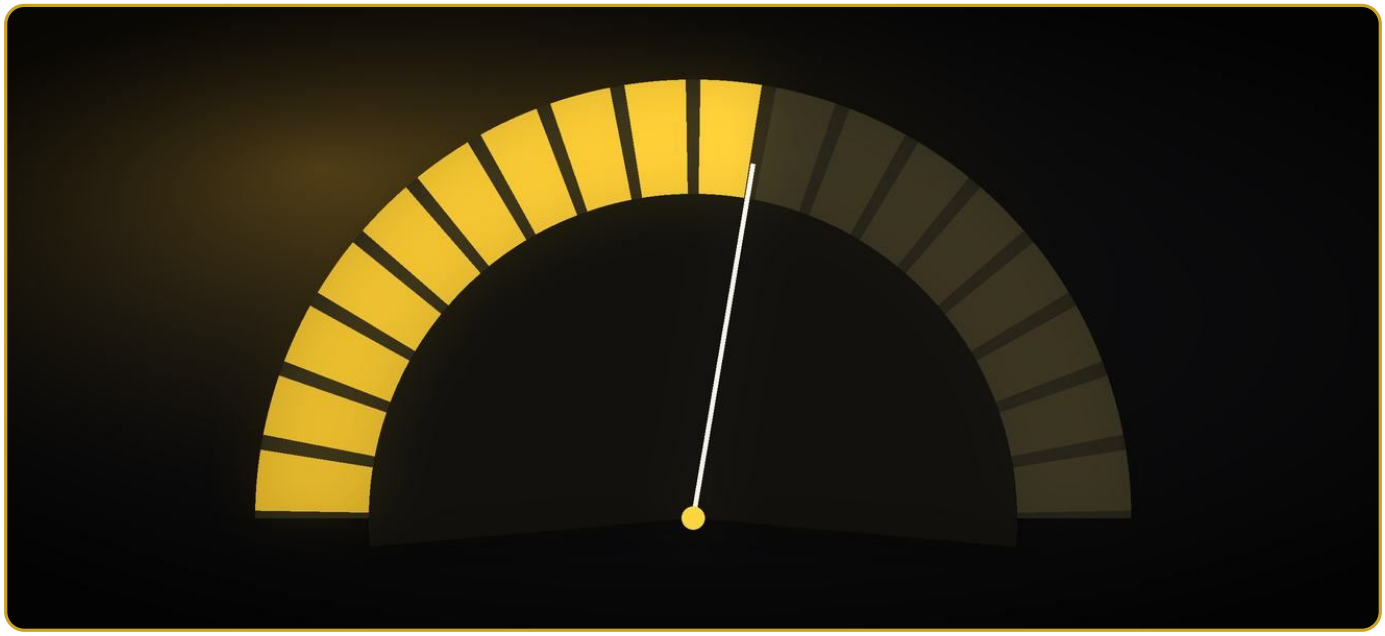

Debt carries shame for many people, which makes them avoid the statements. Debt is a tool that went wrong, not a personality trait. A map turns a feeling into a list of numbers.

TRY THIS

Write one sentence about how you feel about your debt. Then write one fact about it from the map.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

FIND THE MINIMUMS

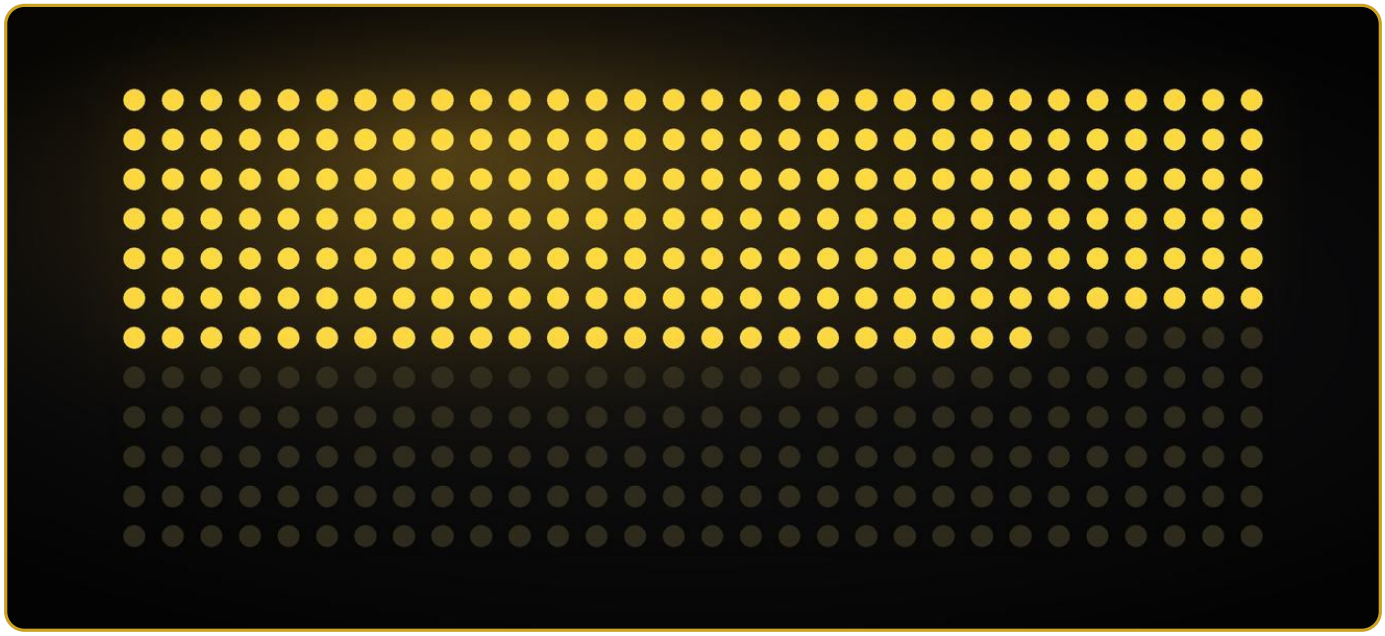

Late payments can bring fees and a higher rate. Confirm every minimum payment and due date and put them on your calendar.

TRY THIS

Write every due date on one monthly calendar. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Did every payment arrive on time this week? What did the map teach you?

Money in this week $

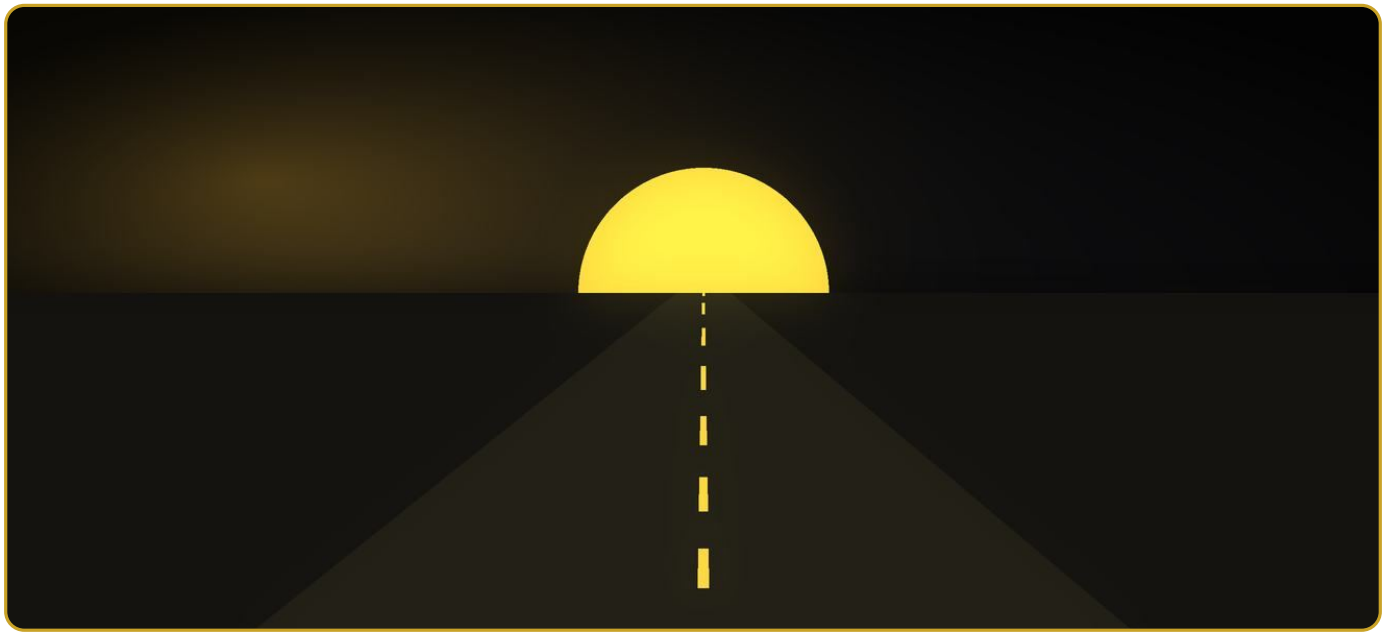

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

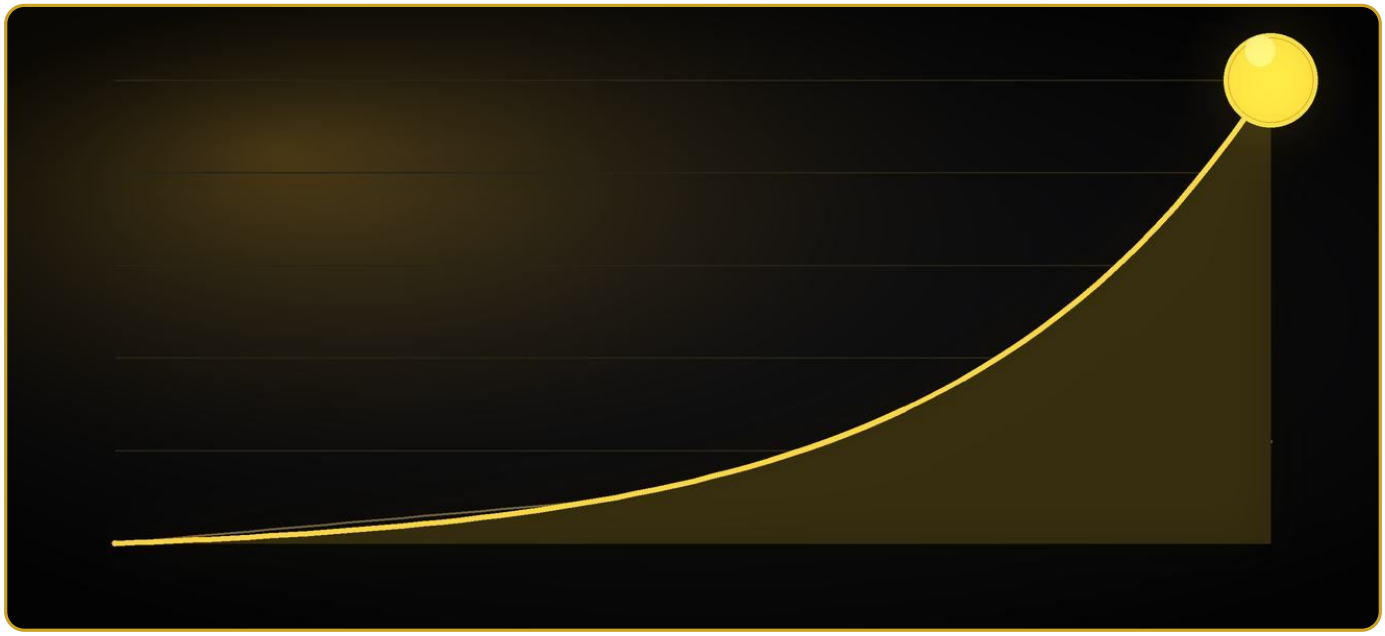

REFLECT AND RESET

If your debt were gone, what is the first thing you would do with the monthly payment?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

WHY MINIMUMS ARE SLOW

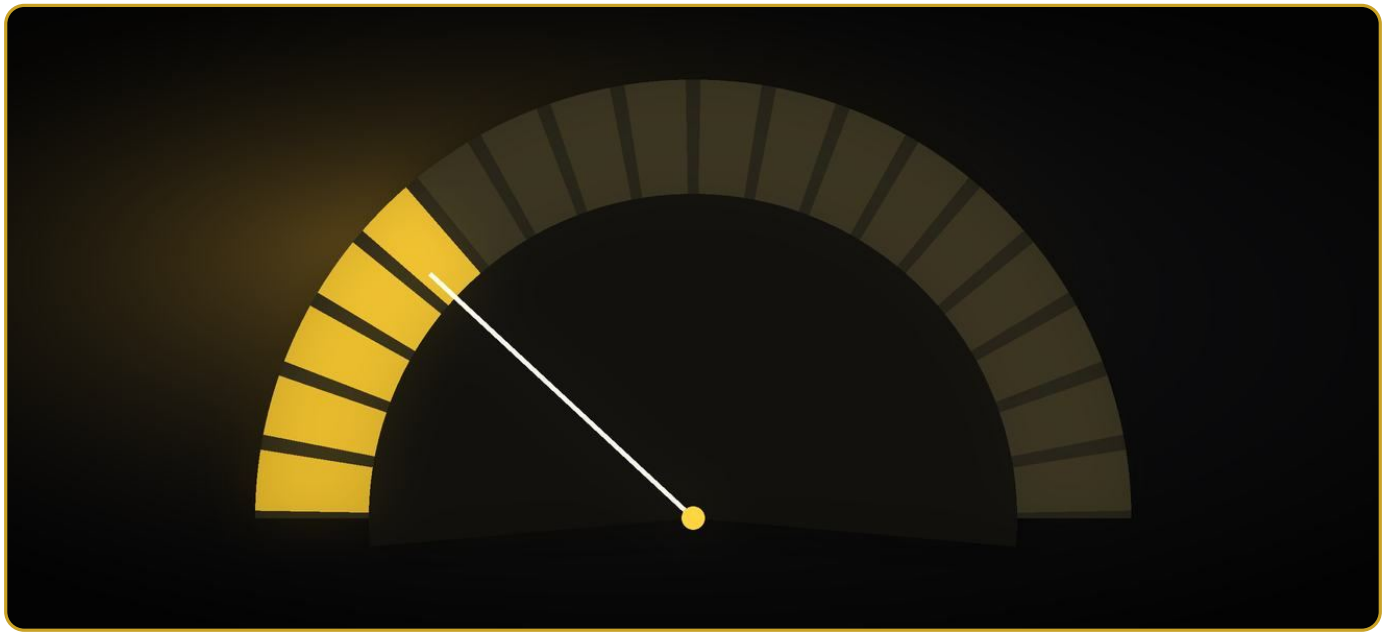

A minimum payment is set so the balance falls slowly, which keeps interest flowing. A typical card minimum is about 1% of the balance plus that month's interest.

TRY THIS

Look at one statement. Find the minimum payment, the interest charged and the new balance. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 21-YEAR CARD

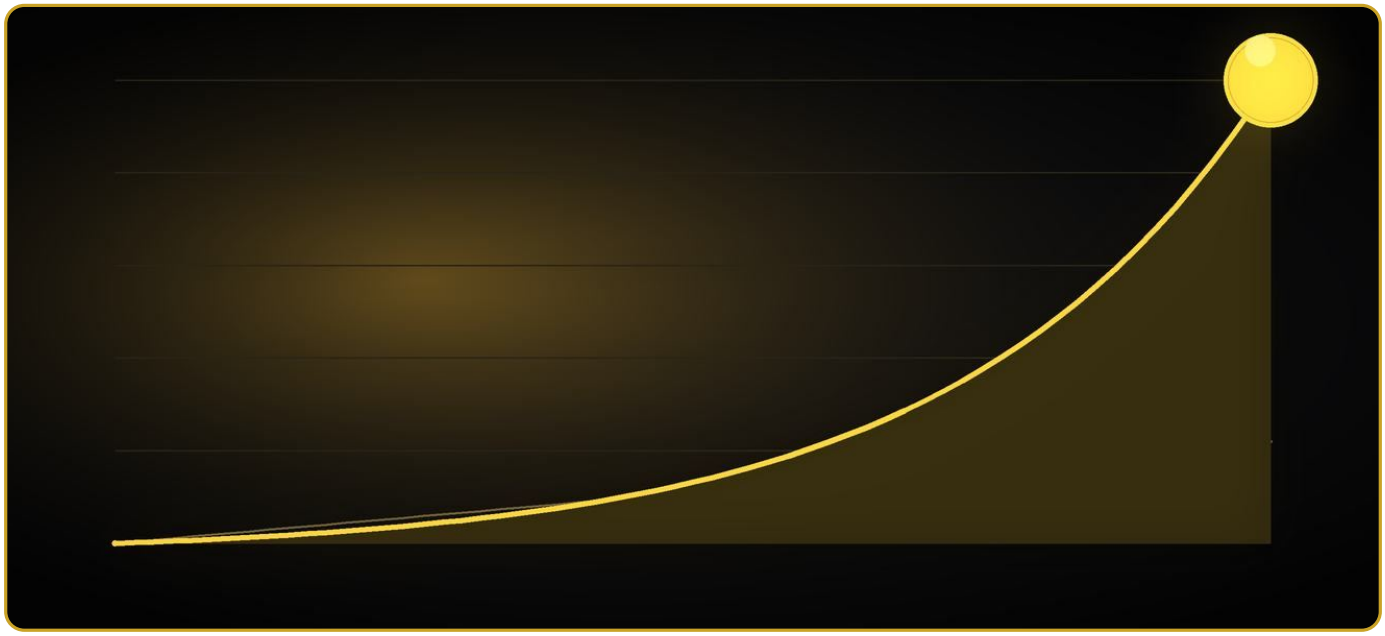

A $6,000 balance at 24% APR with only the minimum payment (1% of the balance plus interest, at least $25) takes 21 years and costs $10,887 in interest.

TRY THIS

Look up your own card's payoff warning on your statement. Many show a time to pay off on minimums. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

THE $300 TEST

The same $6,000 at 24% with a fixed $300 a month is gone in 26 months and costs $1,739 in interest. A fixed payment turns a card from a trap into a countdown.

TRY THIS

Pick the amount you can pay each month, above the minimum, on your highest-rate debt. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

INTEREST IS NOT A BILL

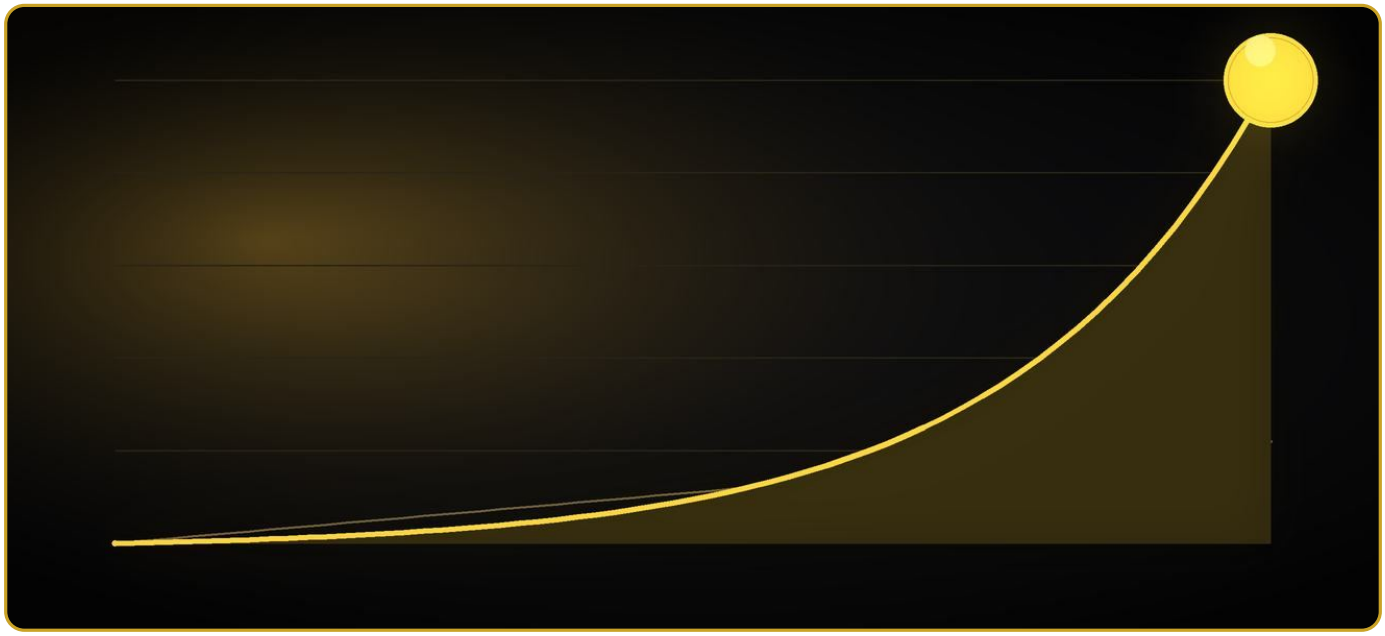

Interest does not arrive on an invoice. It is added quietly to the balance. The shock is delayed, which is why it is easy to ignore.

TRY THIS

Check how much interest you were charged in the last month across all debts. Add it up. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PAY A LITTLE MORE, TWICE A MONTH

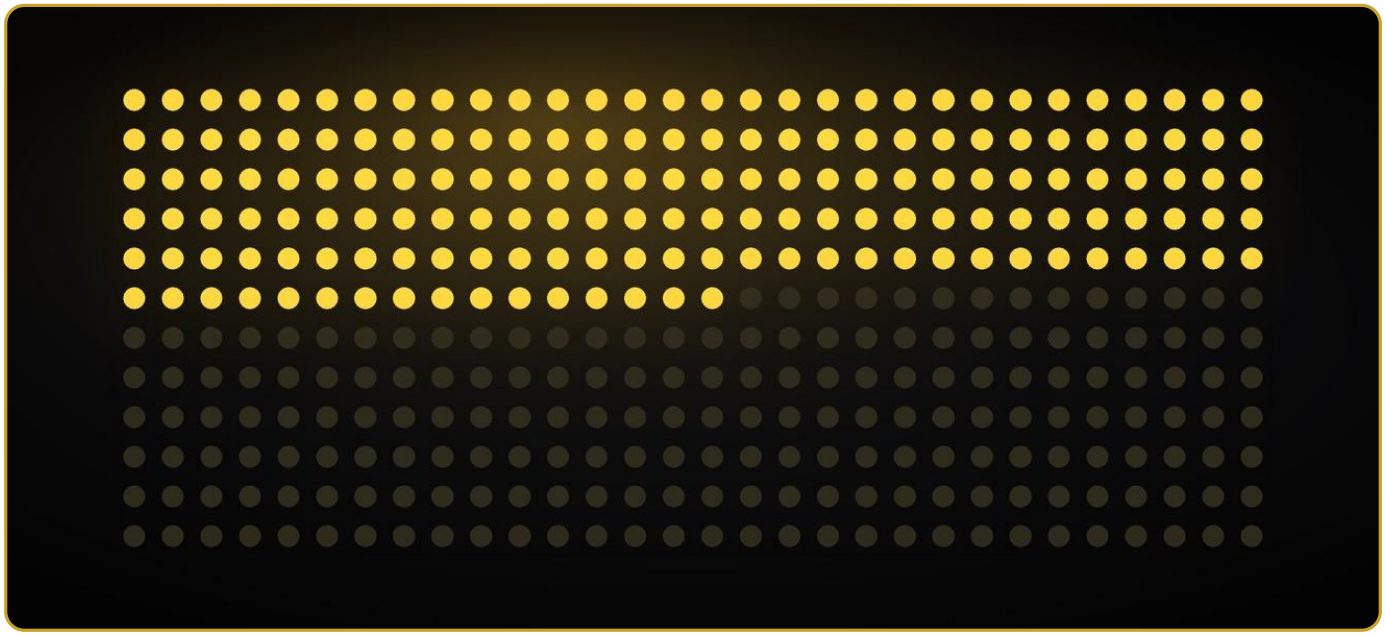

Interest on many cards is calculated daily on the balance. Paying half the amount twice a month can cut a little interest. Check your terms before you rely on it.

TRY THIS ☐

Set up one extra payment this month, even $10, above the minimum.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

What did you pay on your top debt this week and how much interest did that avoid?

Money in this week $

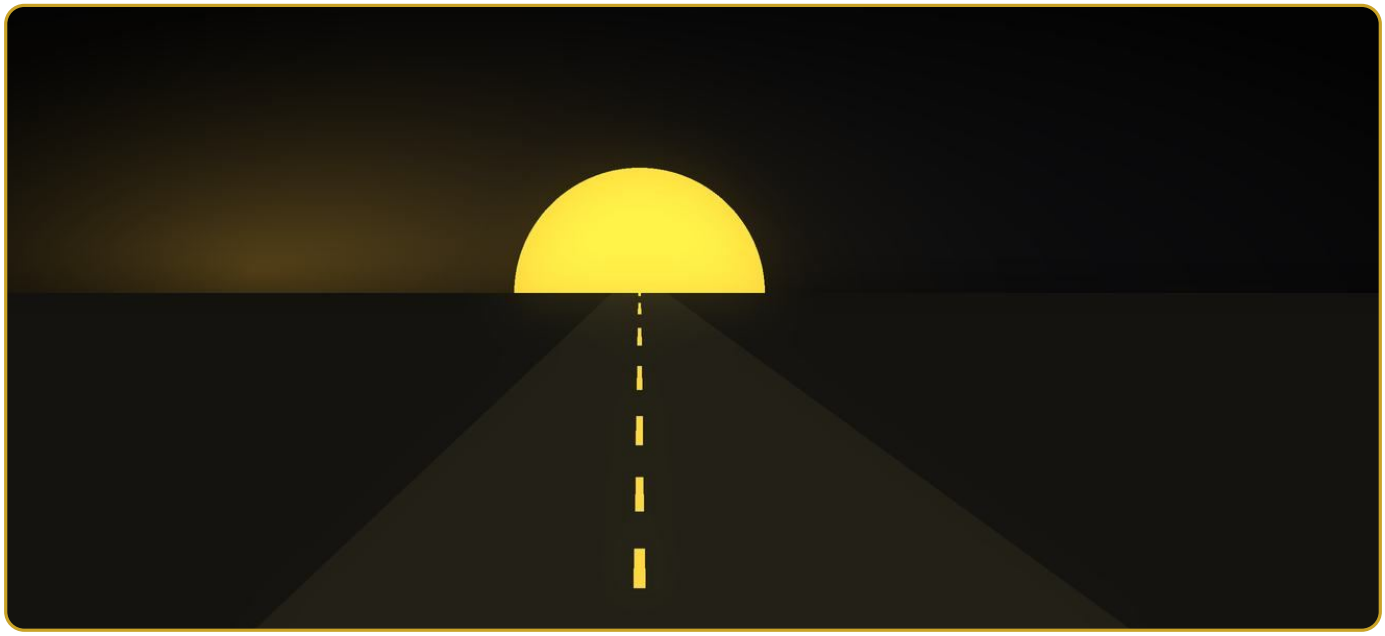

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

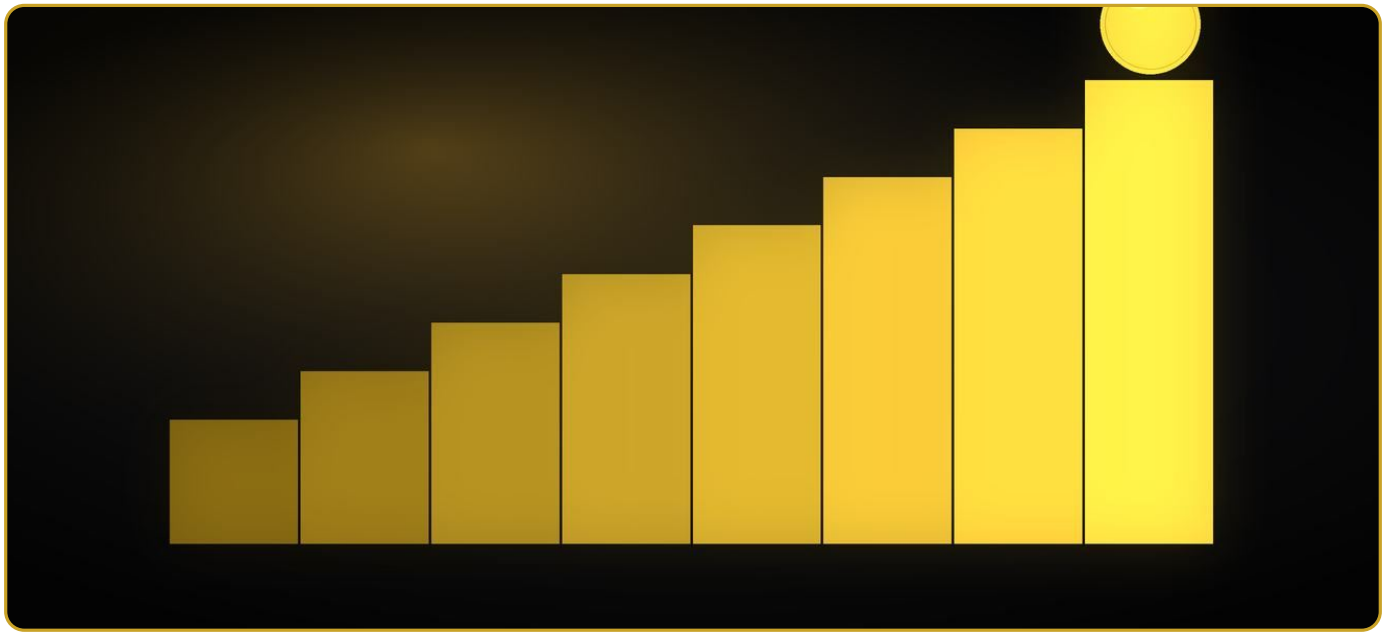

REFLECT AND RESET

What would you change about debt if you were designing the system yourself?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

TWO PROVEN METHODS

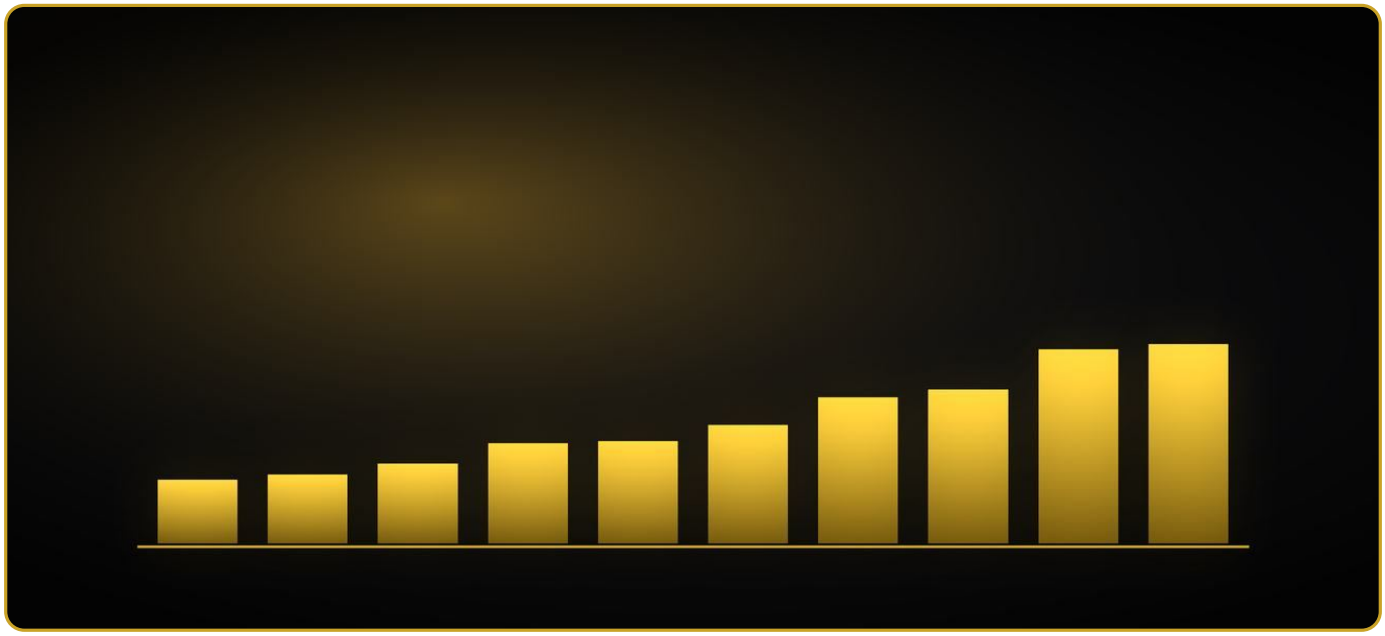

The avalanche pays extra on the highest-rate debt first and saves the most interest. The snowball pays extra on the smallest balance first and gives quicker wins. Both start by paying every minimum.

TRY THIS

Look at your debt map. Mark your highest-rate debt with an A and your smallest balance with an S. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

SAME DEBTS, TWO ORDERS

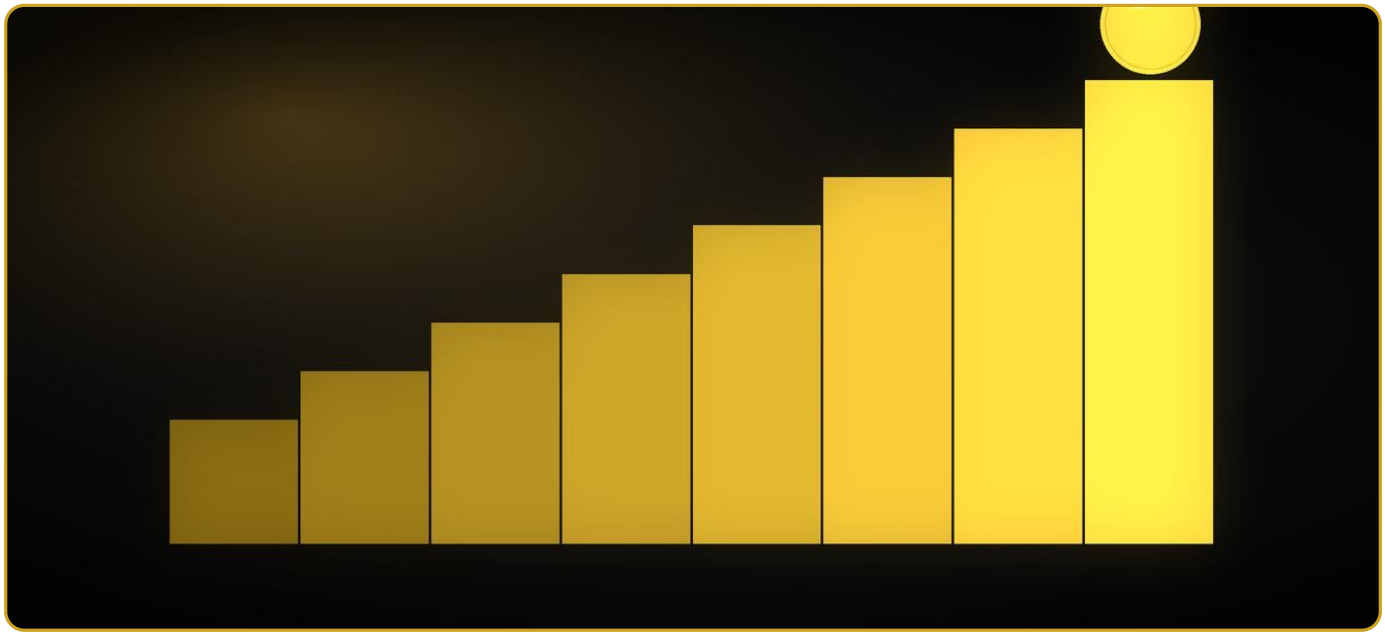

With $300 a month extra toward debt, the avalanche usually costs less. The snowball can feel better. The best method is the one you will keep doing for the whole payoff. A $1,000 balance paid at $300 a month takes about 4 months at 24% APR.

TRY THIS

Try the math on your own map. Which order finishes first and which costs less? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

PICK ONE

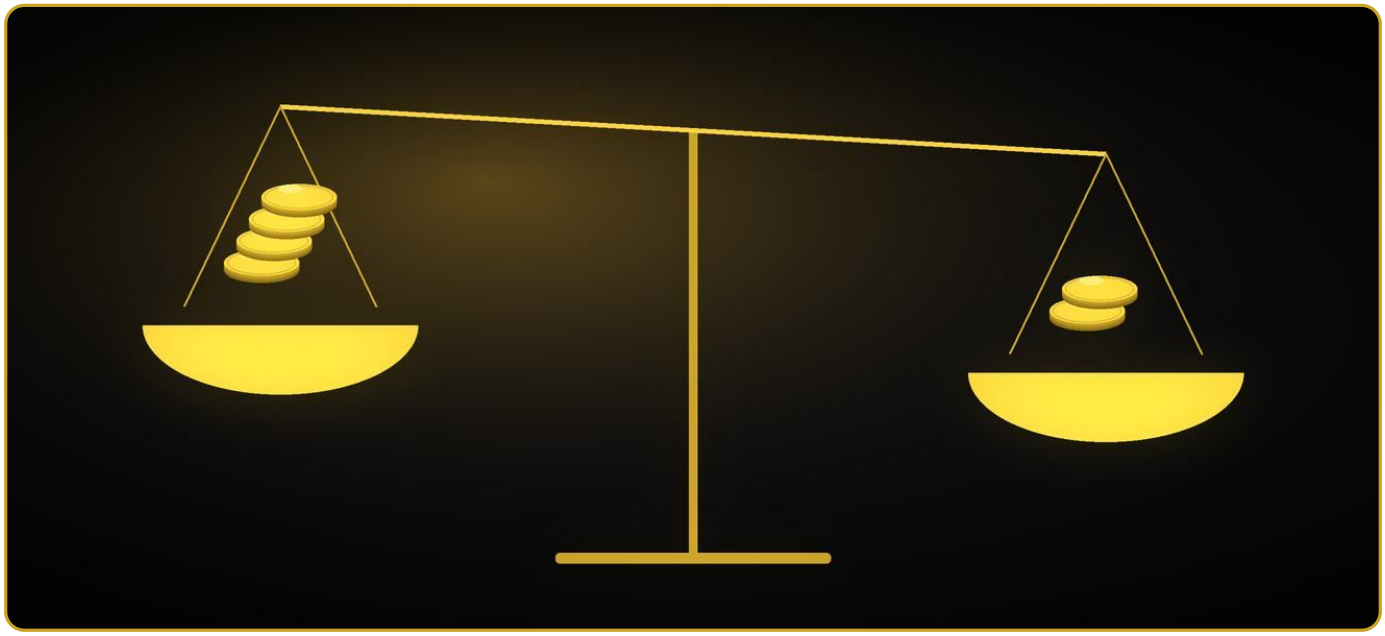

Decide today. Staying in the decision costs more than a small difference between methods. Write the rule: all extra money goes to this one debt until it is gone.

TRY THIS

Write the name of the debt you will attack first and the monthly amount you will add. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE PROGRESS PRINCIPLE

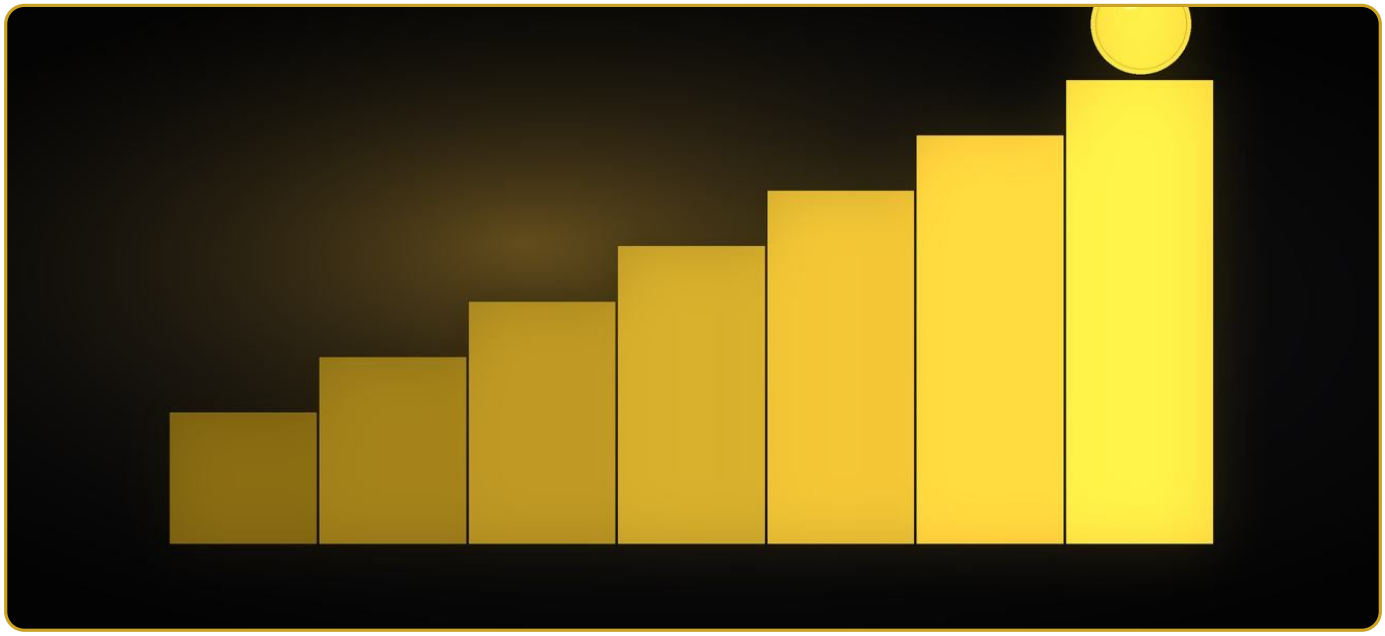

Seeing progress is a strong motivator. A visual tracker of paid-off balances can keep you going when the work is dull.

TRY THIS

Draw a bar or a thermometer on this page for your first debt. Colour in what you have paid. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

ROLL THE PAYMENT

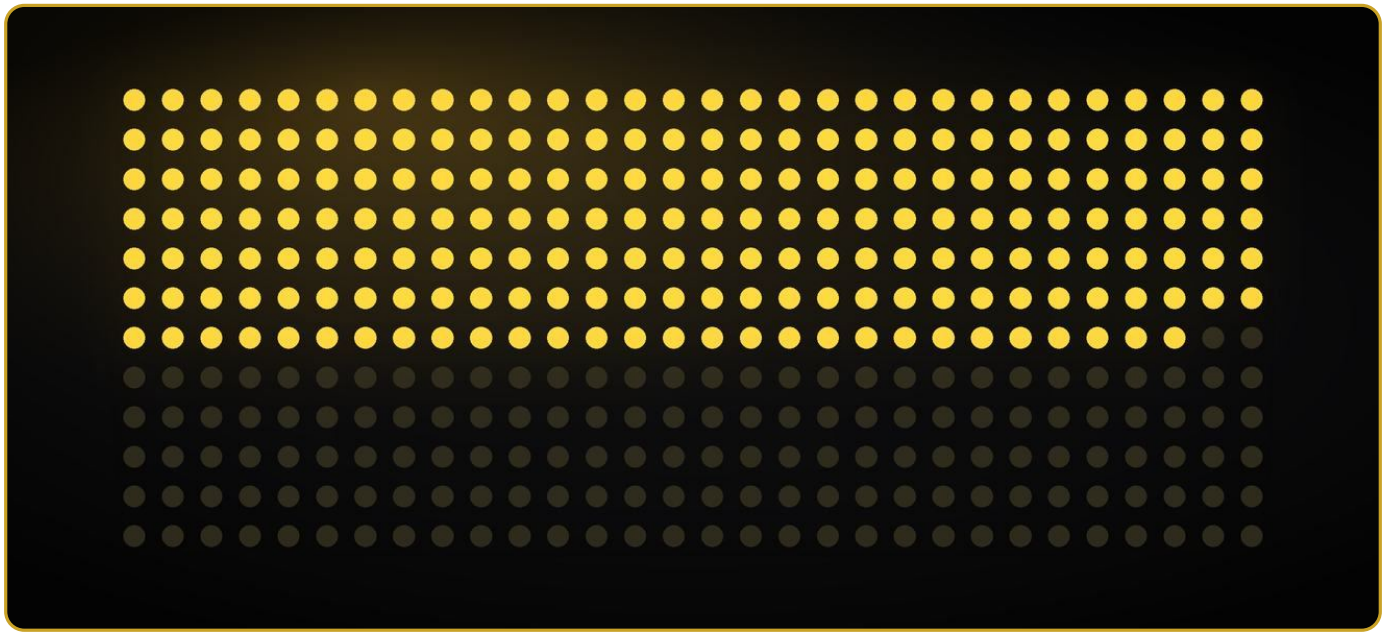

When a debt is paid off, keep paying the same total amount and send it to the next debt. This is the roll in the snowball.

TRY THIS

Write what you will do with the freed-up payment on the day your first debt ends. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

What did you pay on your target debt this week? How far did the bar move?

Money in this week $

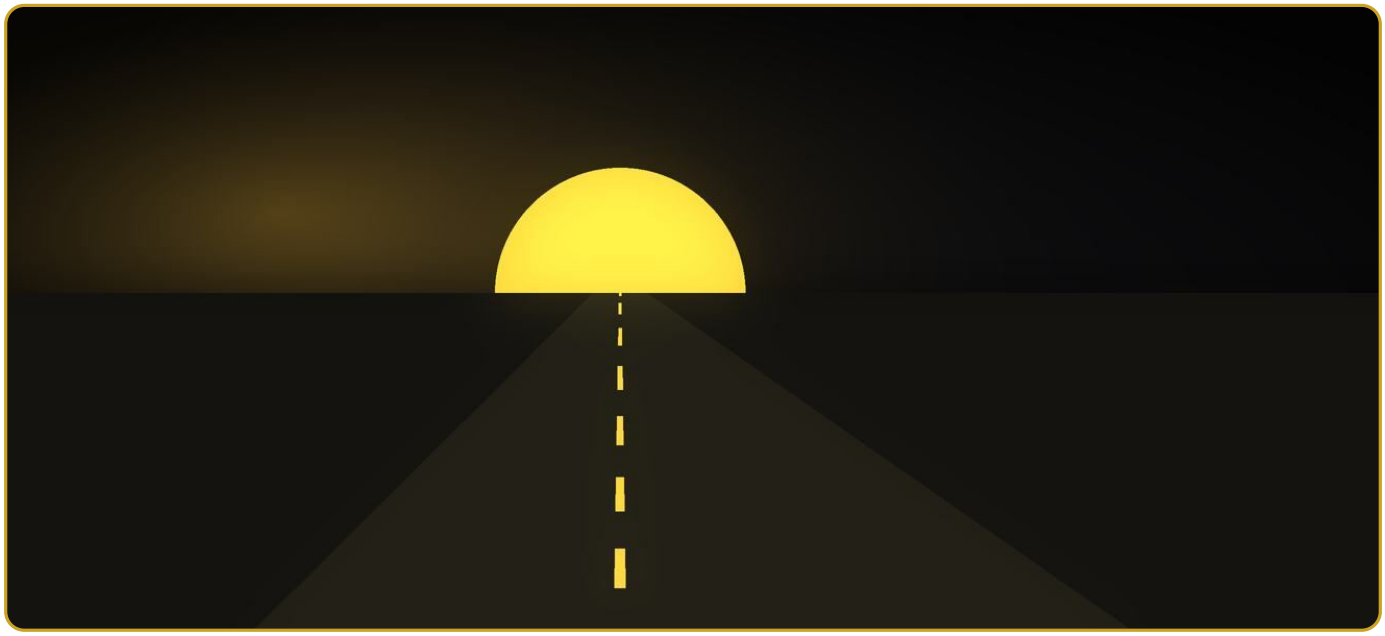

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

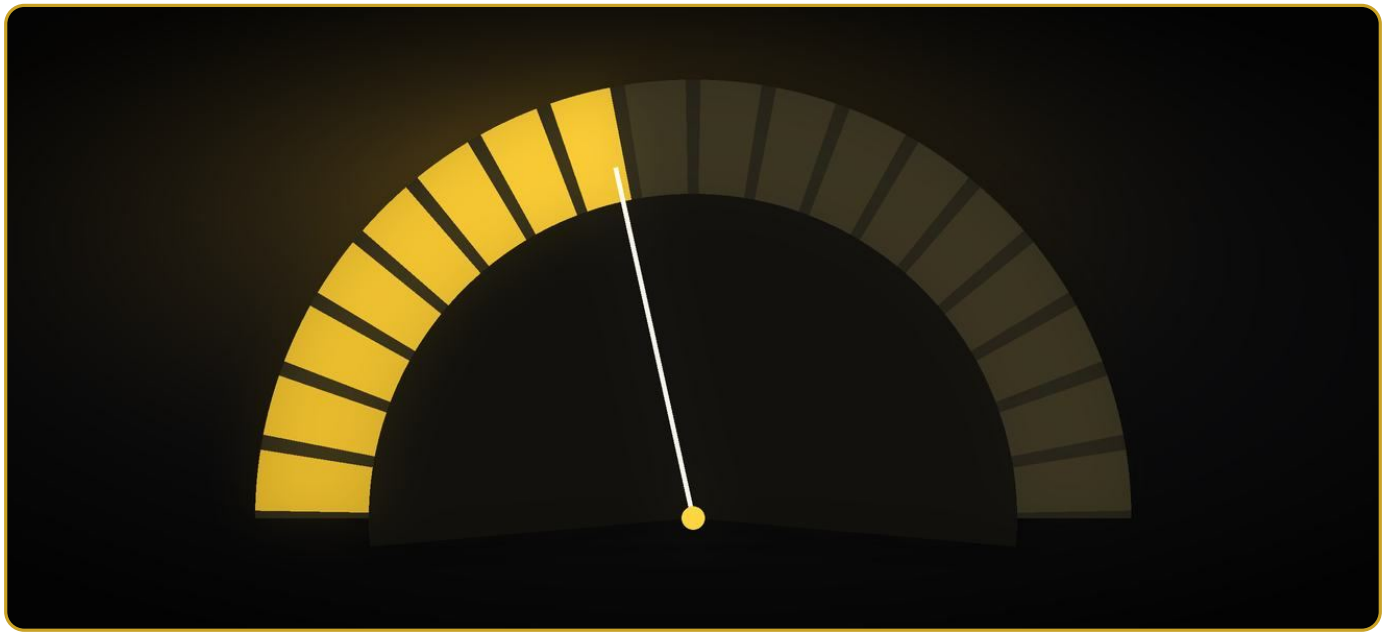

REFLECT AND RESET

When has a visible scoreboard helped you finish something hard?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

A CARD IS A LOAN WITH A TAP

A credit card is short-term borrowing. If you pay the full statement balance by the due date, many cards charge no interest on purchases. If you carry a balance, interest starts to apply.

TRY THIS

Read the terms of your main card. Write its APR, its due date and the grace period. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 30% GUIDELINE

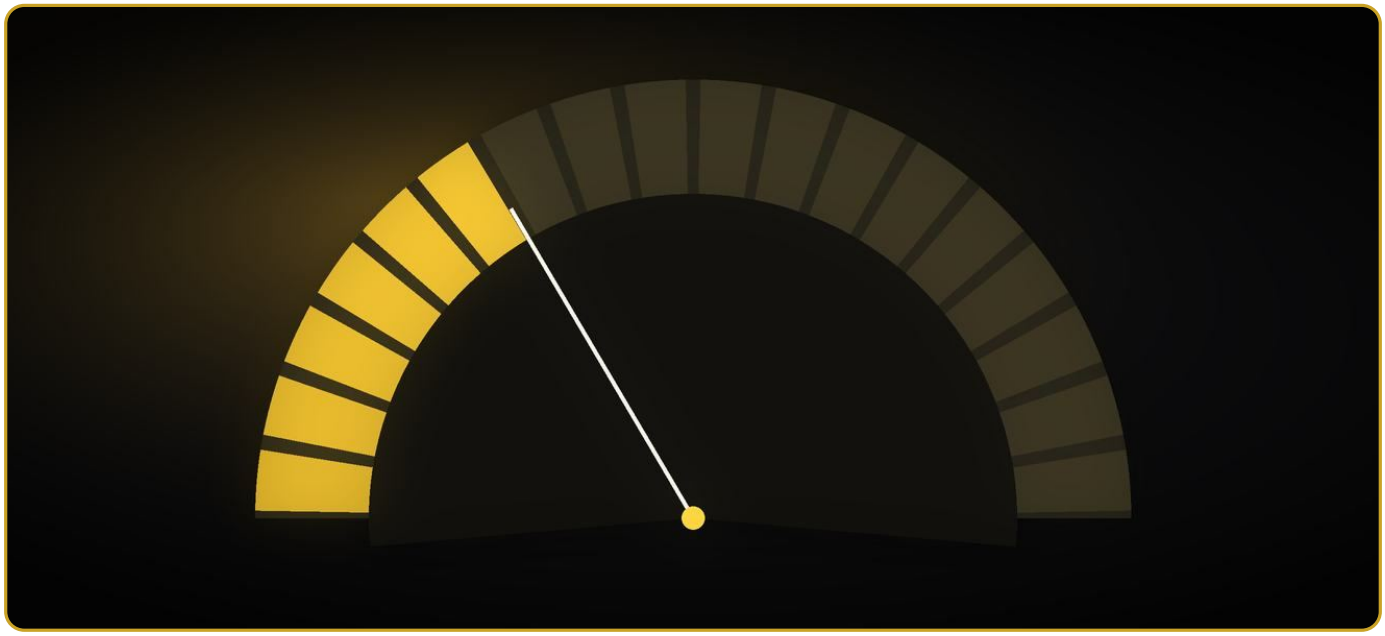

Credit utilisation is how much of your limit you use. A commonly cited guideline is to stay below 30%, and lower is generally better. A $2,000 balance on a $5,000 limit is 40% utilisation.

TRY THIS

Calculate utilisation for each card: balance divided by limit. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

STATEMENT VS DUE DATE

The statement balance is what you owe from the last cycle. The current balance may be higher. Paying the statement balance in full by the due date is how people use cards without paying interest.

TRY THIS

Check which amount you paid last month and whether any interest was charged. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

REWARDS AND SPENDING

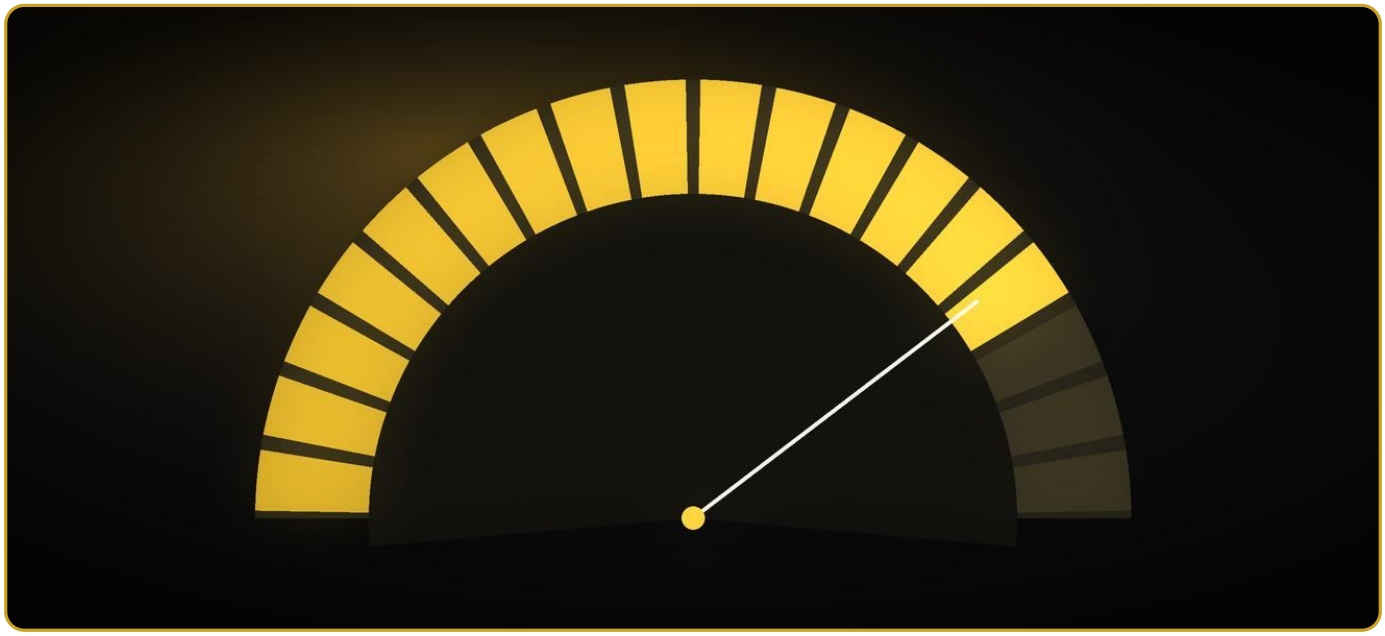

Rewards of 1% or 2% can look generous. If using a card makes you spend even a few percent more, the reward is cancelled out. Pay attention to how your own spending changes.

TRY THIS

Look at the last three months. Did your spending rise after you got a rewards card? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

LOCK THE BASICS

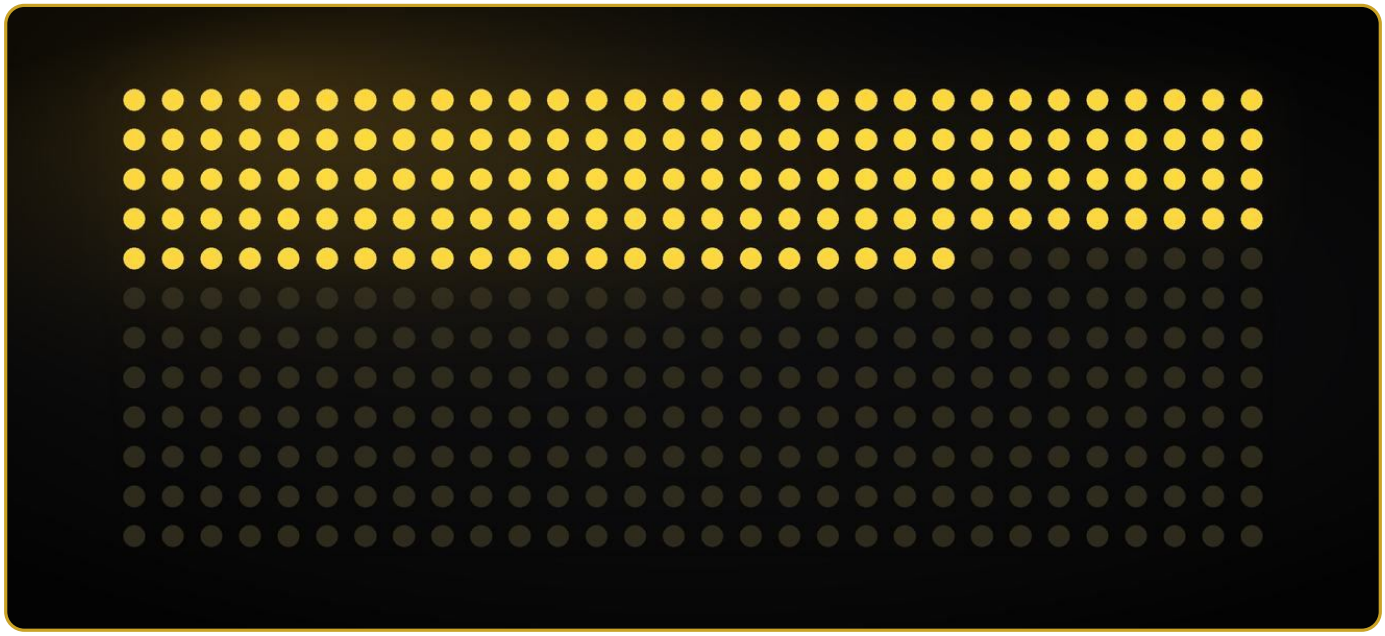

Turn on alerts for payments due, balances and unusual purchases. Know where to freeze your card in an app.

TRY THIS

Switch on three alerts on your main card and write what they are. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

One thing to fix next week

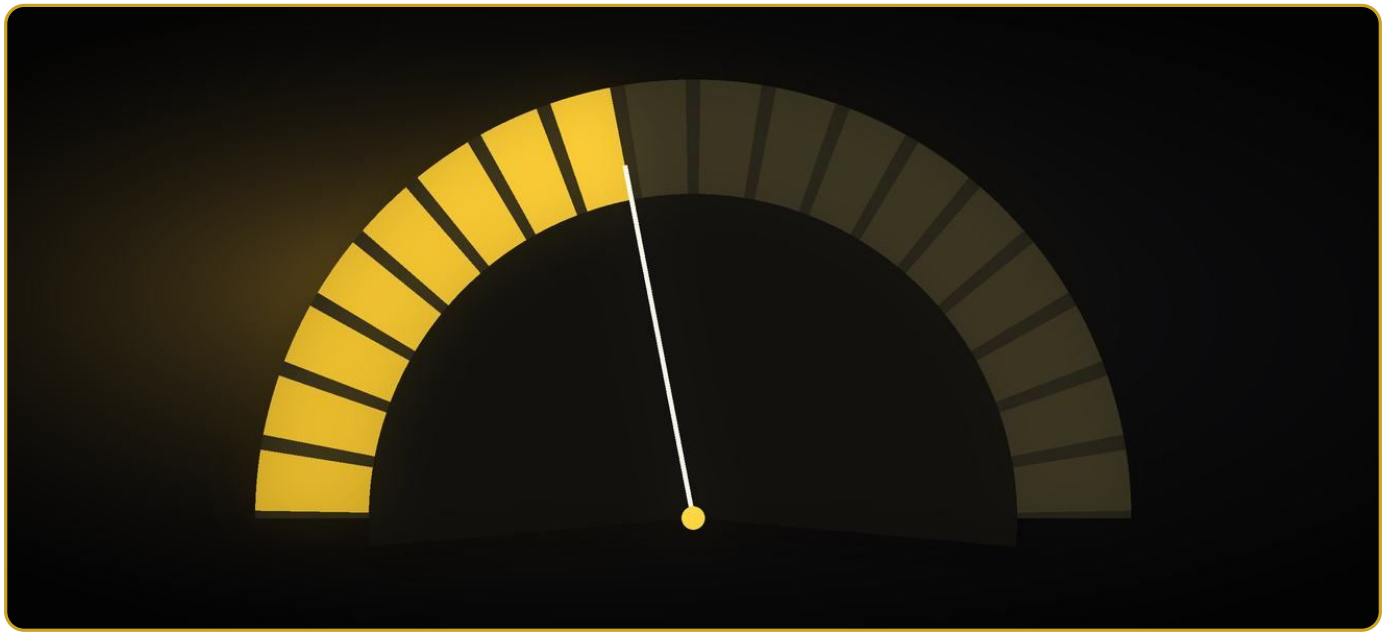

REFLECT AND RESET

What role does a credit card play in your life: a tool, a crutch or something in between?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

WHAT A SCORE IS

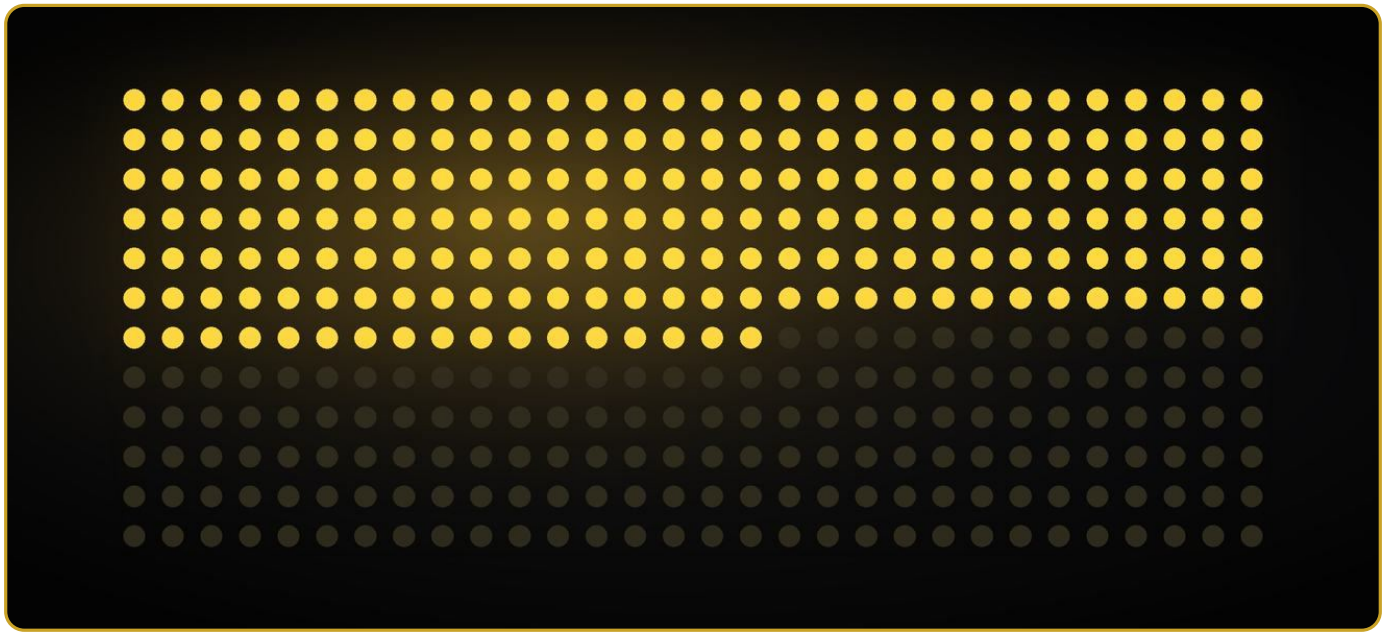

A credit score is a number lenders use to estimate how likely you are to repay. In the US the best-known models weigh payment history, amounts owed, length of history, new credit and mix of credit. Other countries use different systems.

TRY THIS

Find out which agencies and scores matter where you live. Write their names. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE BIGGEST PIECE

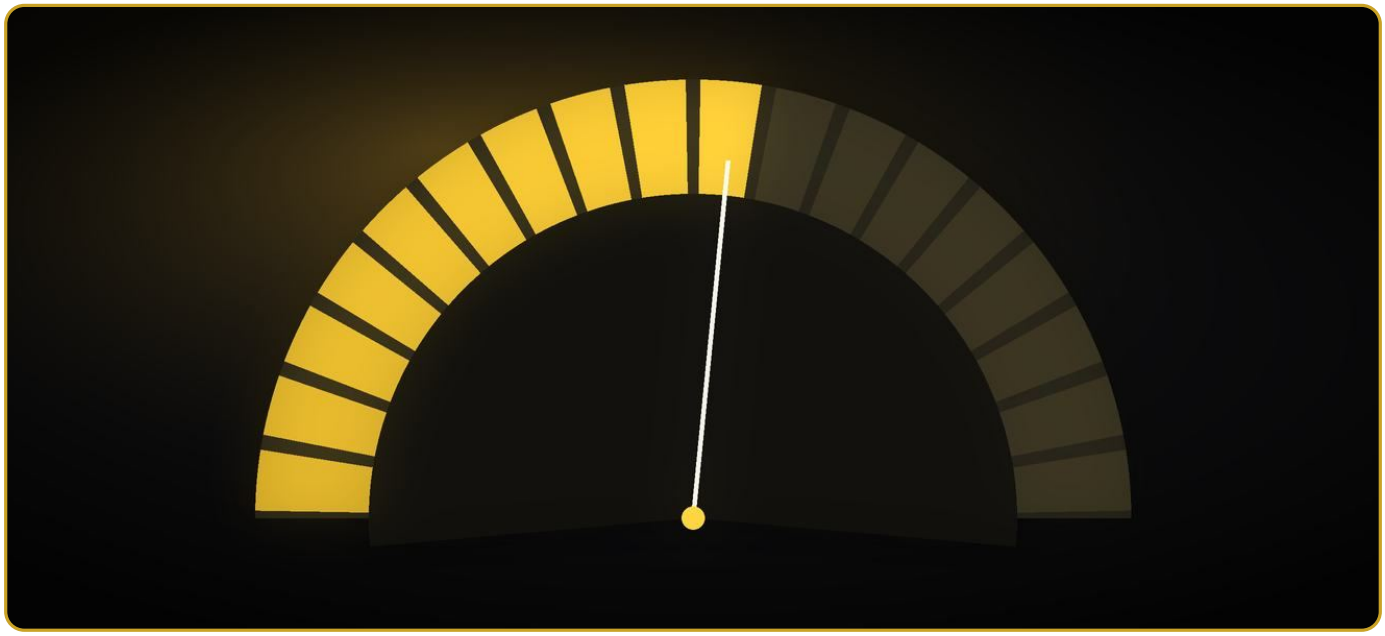

In the common US FICO model, payment history is about 35% of the score and amounts owed about 30%. Paying on time, every time, is the largest single lever. Those two factors together make up about 65% of the model.

TRY THIS

Write your own payment record. Any late payments in the last two years? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

CHECK YOUR REPORT

In the US you can get free credit reports from the three bureaus through AnnualCreditReport.com. Look for accounts you do not recognise and for mistakes. Errors can be disputed.

TRY THIS

Pull one credit report and check every account. Write anything that looks wrong. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

SCORE VS WORTH

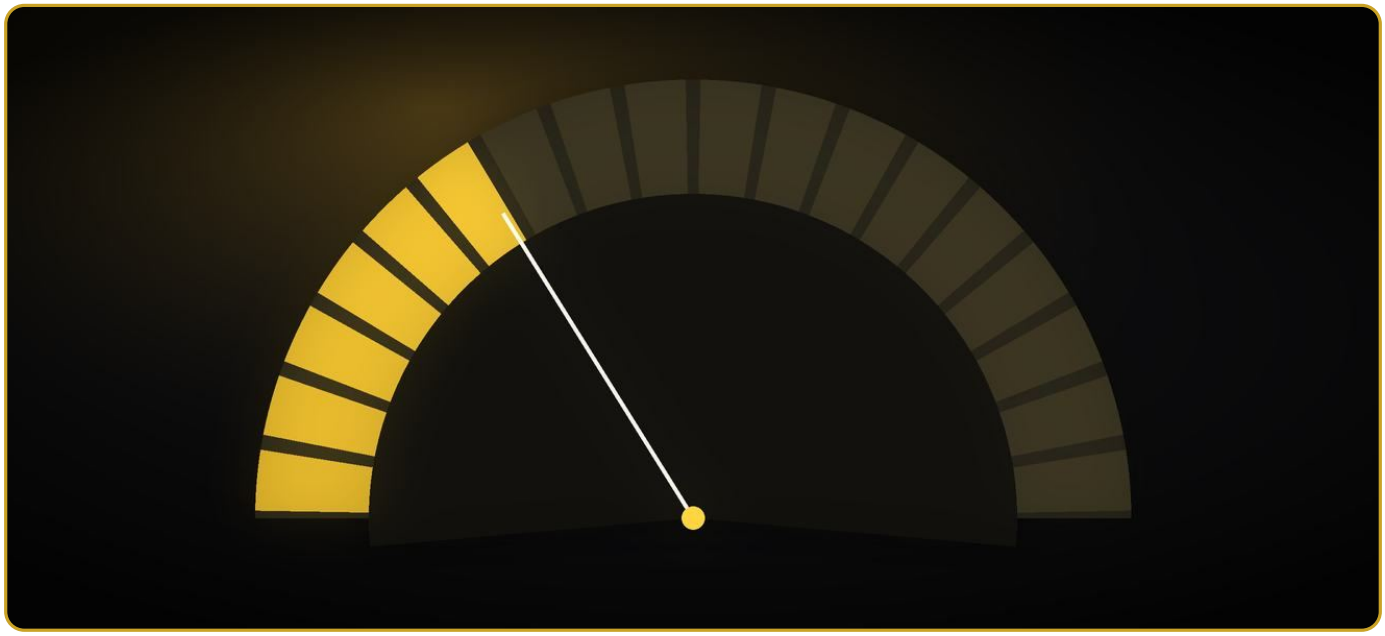

A credit score measures how lenders see your borrowing record. It says nothing about you as a person. It can be rebuilt and it changes with behaviour, not with luck.

TRY THIS

Write what you want your score to open up for you, such as lower rates or a rental. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

HARD AND SOFT CHECKS

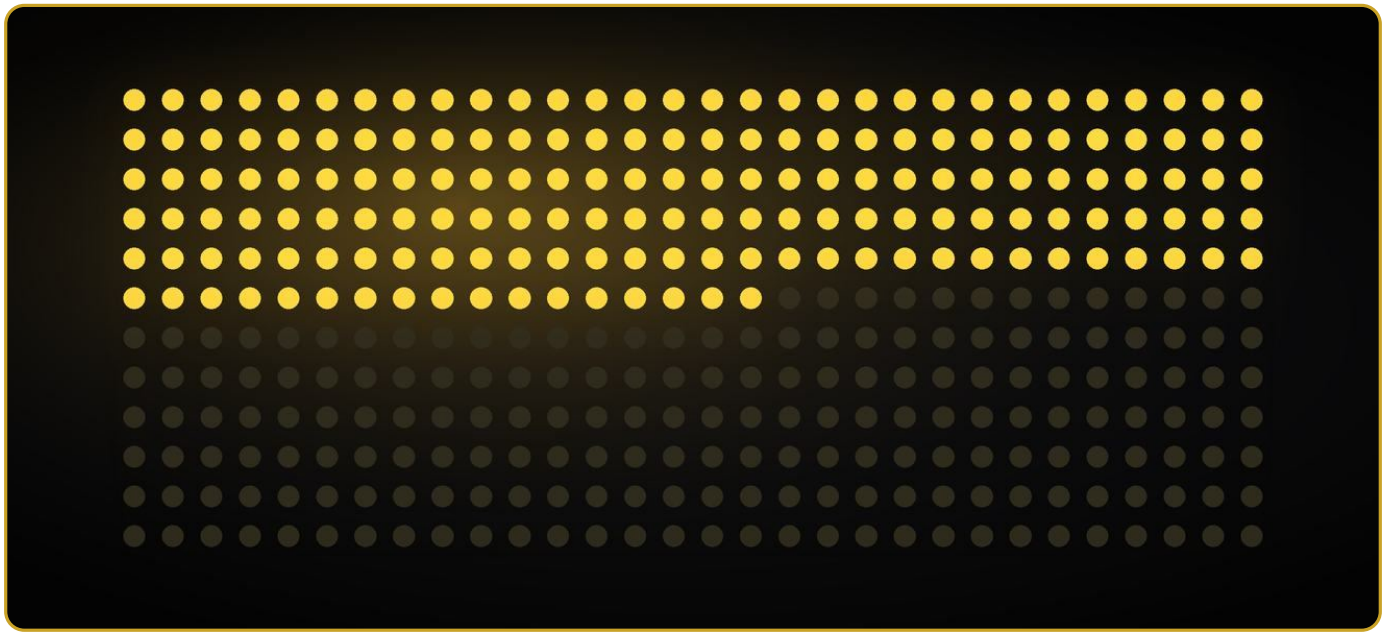

Applying for credit can create a hard inquiry that may lower your score slightly for a time. Checking your own score is a soft check and does not hurt it.

TRY THIS

List any credit applications you plan this year. Space them out where possible. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

LOANS HAVE SHAPES

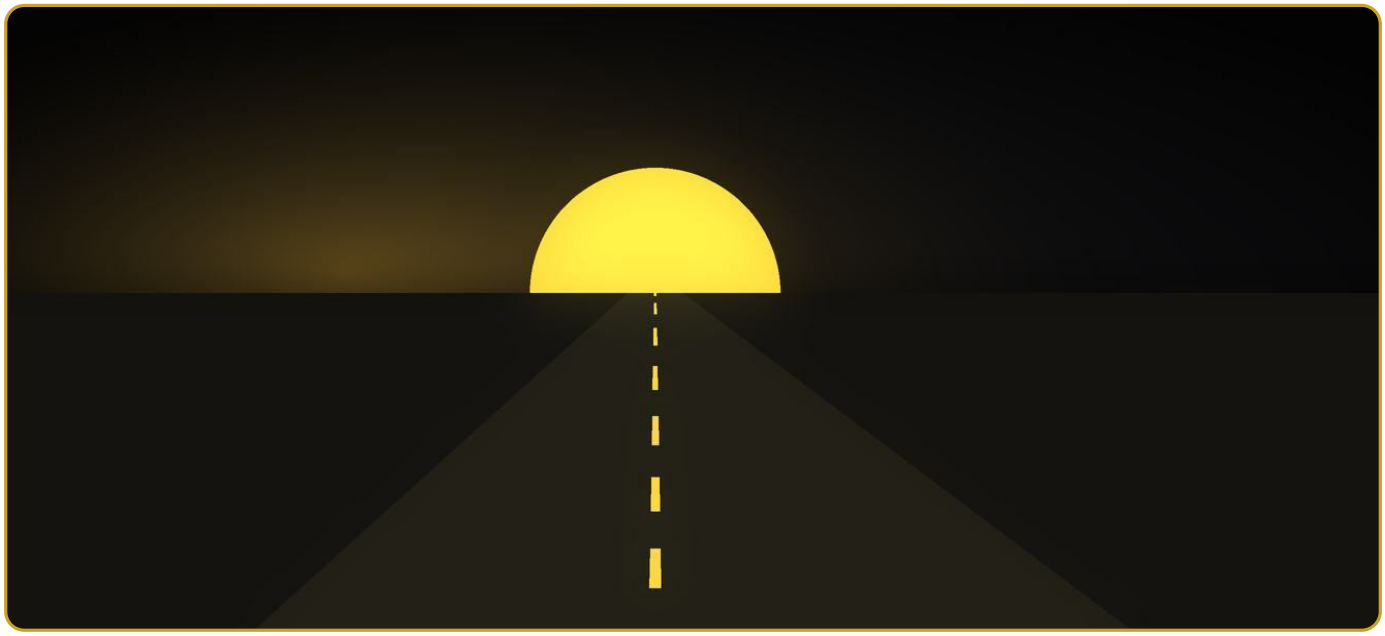

Loans differ in rate, term and rules. The total cost of a loan is the monthly payment times the number of months, so a longer term means a lower payment and more total interest.

TRY THIS

Write the rate, term and remaining balance for each loan you have. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE LONGER TERM

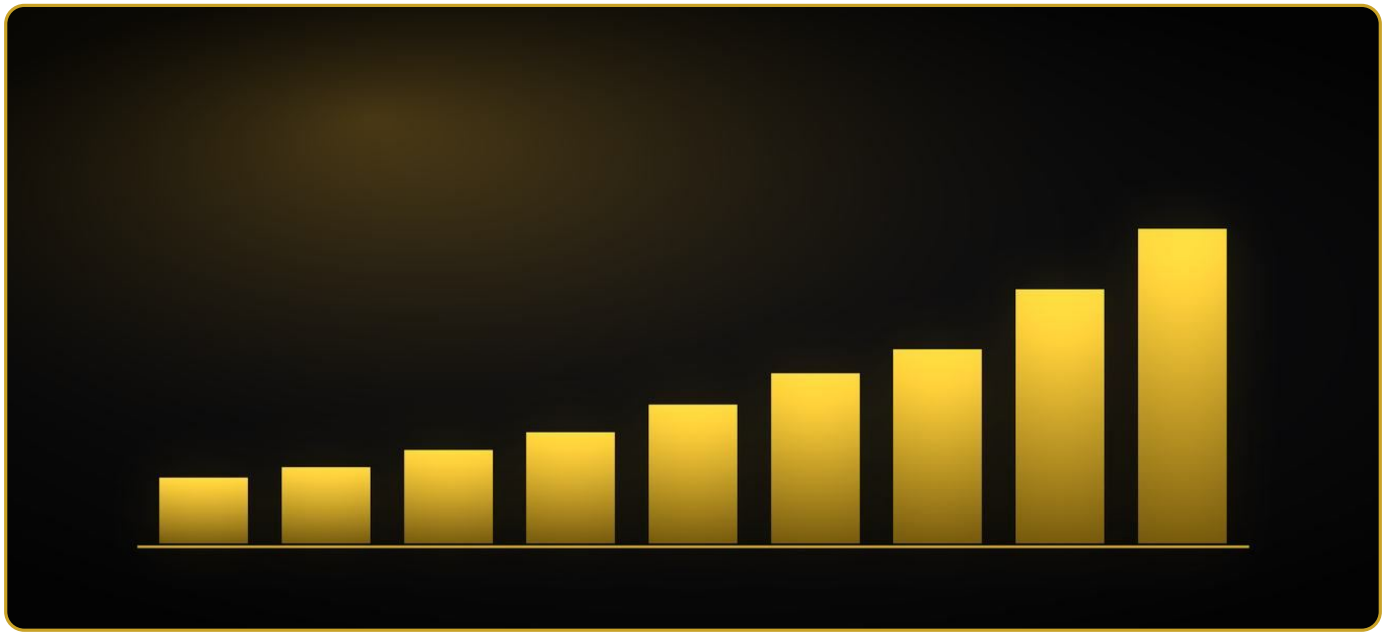

A $20,000 loan at 7% over 36 months has a payment of about $618 and costs $2,232 in interest. Stretched to 72 months the payment falls to about $341, but interest grows to $4,551.

TRY THIS

Take one loan and calculate the total interest. Payment times months, minus the amount borrowed. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

EXTRA TO PRINCIPAL

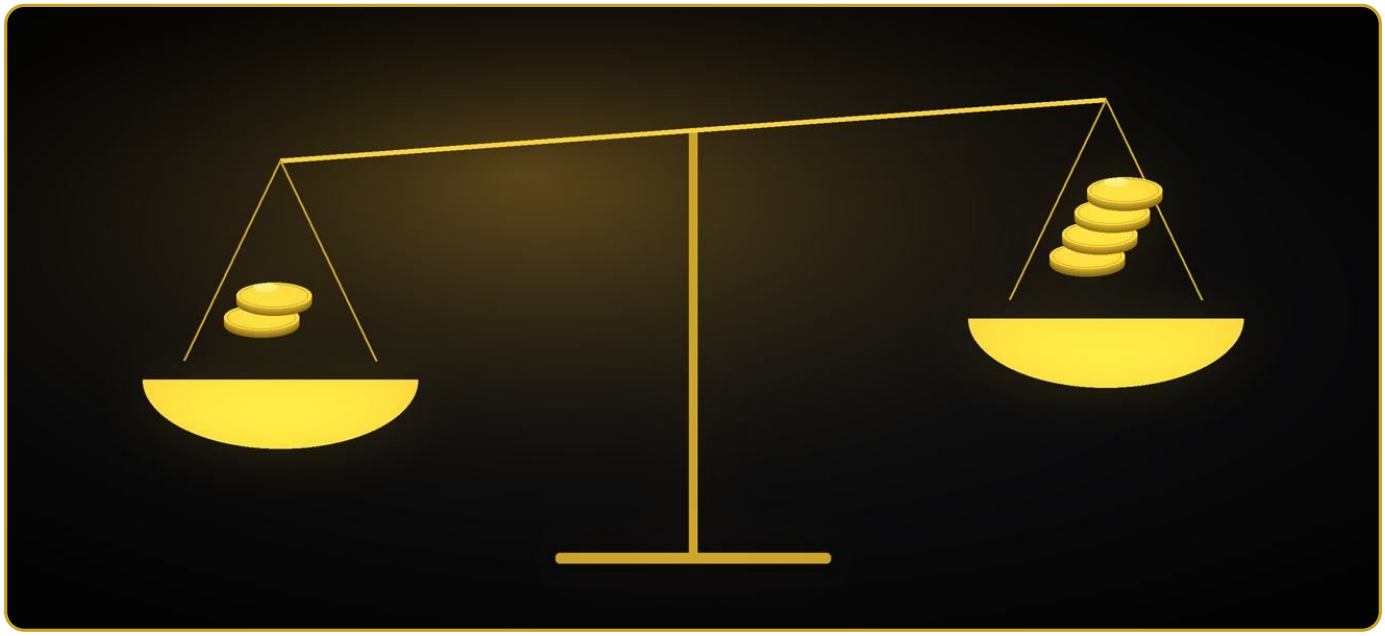

If your lender allows it, extra payments marked as principal-only reduce the balance without paying extra interest in advance. Check for prepayment penalties first.

TRY THIS

Call or log in and ask: can I pay extra toward principal, and is there any penalty? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE CAR AS IDENTITY

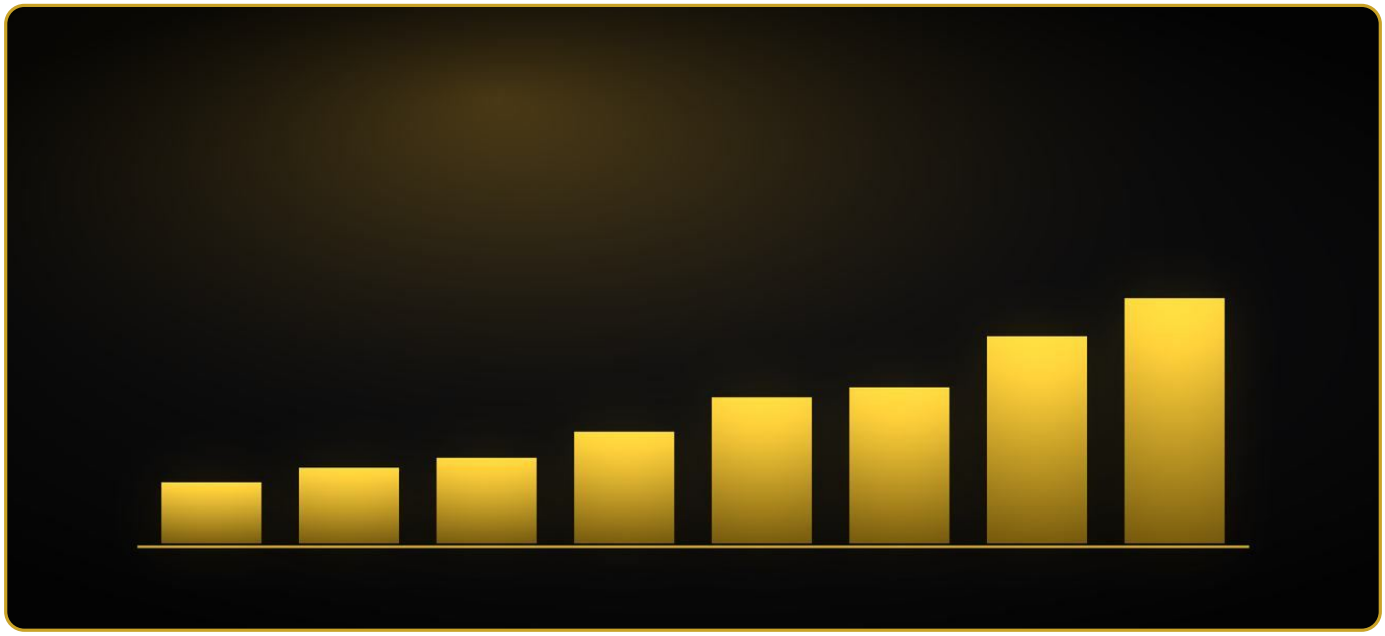

Cars are a place where status and money collide. A guideline some planners use is to keep total transport costs well below 15% of take-home pay. Treat it as a prompt to check, not a rule.

TRY THIS

Add your car payment, fuel, insurance and repairs. Write them as a percentage of take-home pay. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

REFINANCE CHECK

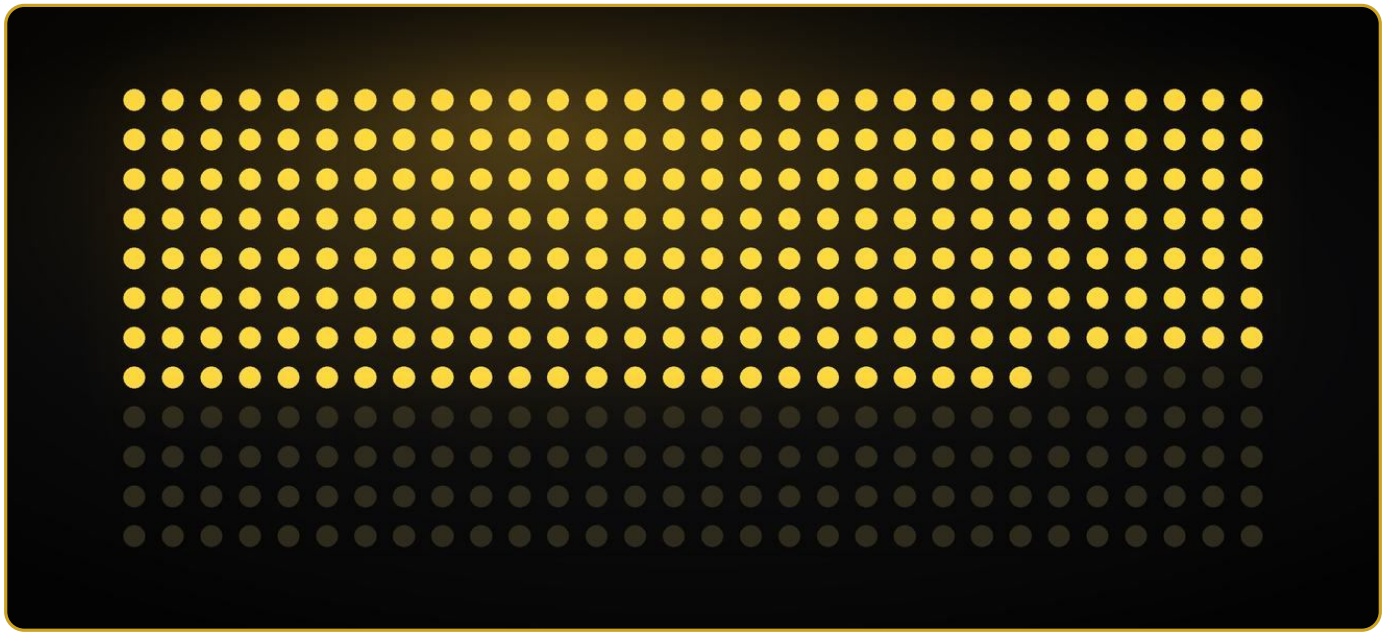

Refinancing can lower a rate when rates have dropped or your credit has improved. There can be fees, so compare the total cost.

TRY THIS

Write two lenders you could ask for a quote and the date you will ask. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

ASKING IS FREE

Companies often have retention offers that are not advertised. Phone, internet, insurance and many other services can sometimes be reduced if you ask politely and compare competing offers. Results vary.

TRY THIS ☐

List your five biggest recurring bills with their monthly amount.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

ONE CALL, A YEAR OF SAVINGS

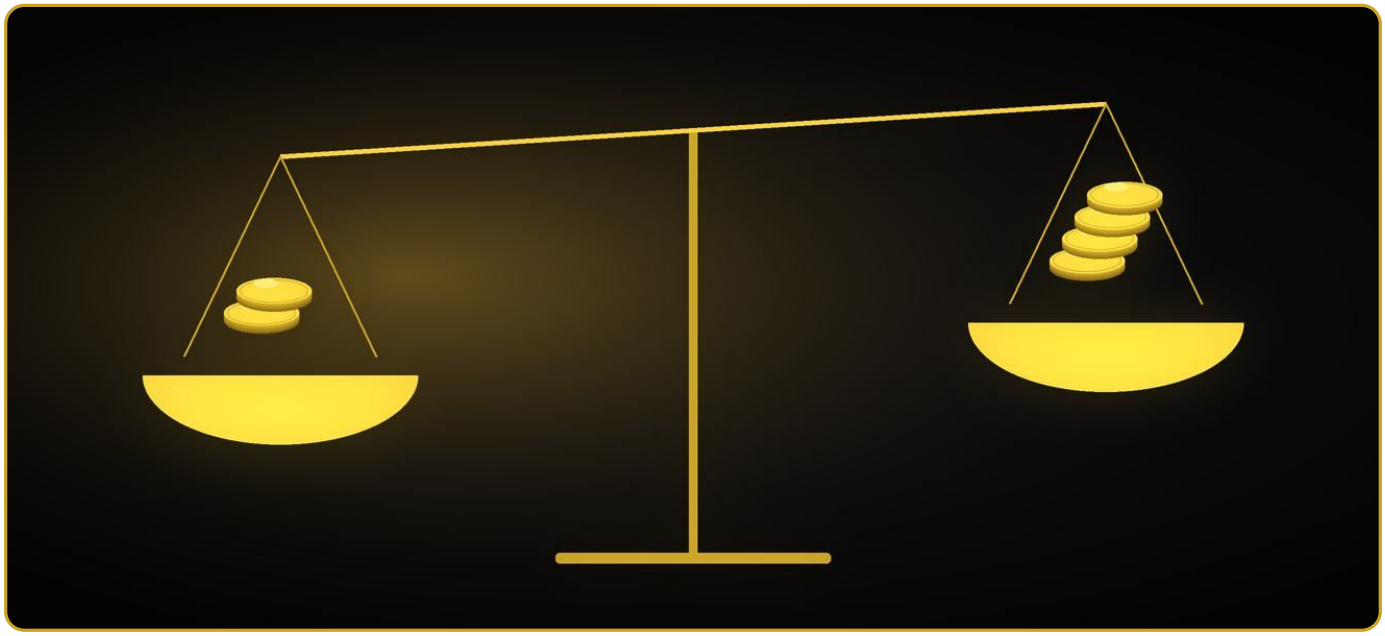

If a single call lowers a bill by $15 a month, that is $180 a year and $1,800 over ten years. If the call takes 20 minutes, the first year's saving works out to $540 for each hour of your time.

TRY THIS

Pick one bill. Write what a $10 monthly cut would save over ten years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

MAKE THE CALL

Prepare three things: your account details, a competitor's price you have found and a calm sentence such as "I would like to reduce my bill. What can you offer?" Be polite. Be ready to say you will consider switching.

TRY THIS

Call one provider today. Write the date, the person's name and the result. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

FEAR OF ASKING

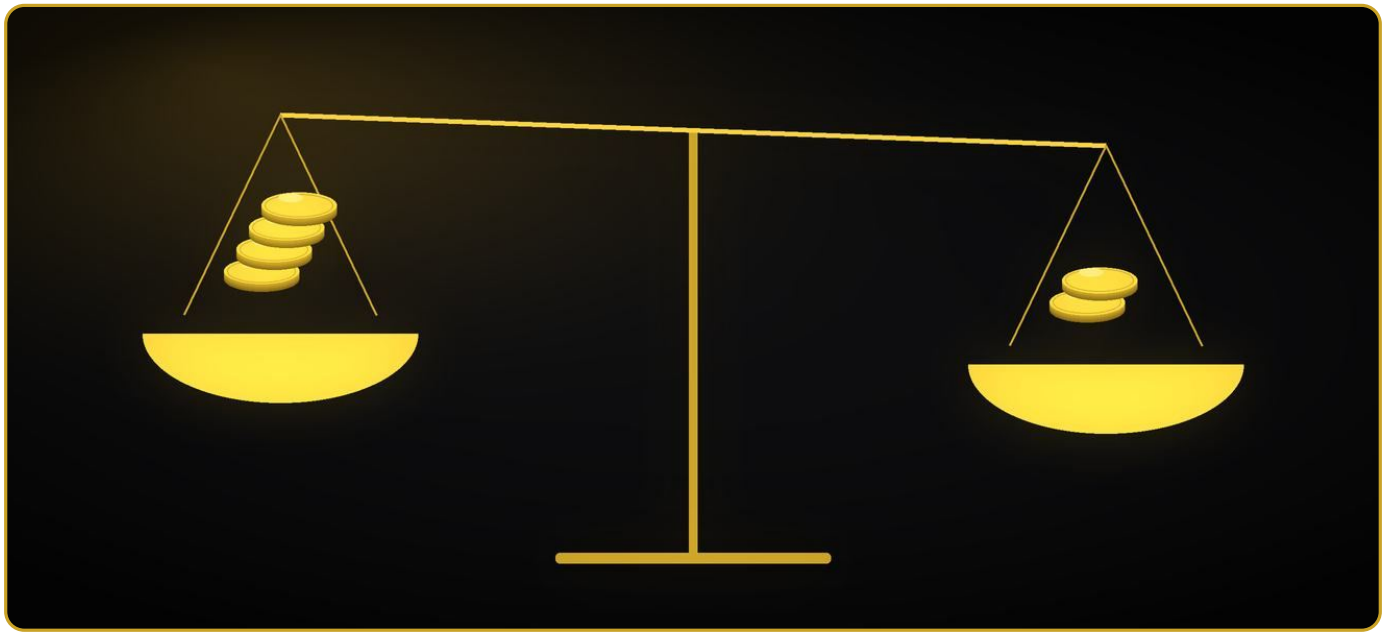

Many people do not negotiate because they fear sounding rude. In practice, the worst usual answer is no, which leaves you where you started.

TRY THIS

Write the sentence you will say. Practise it aloud once. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SHOP YOUR INSURANCE

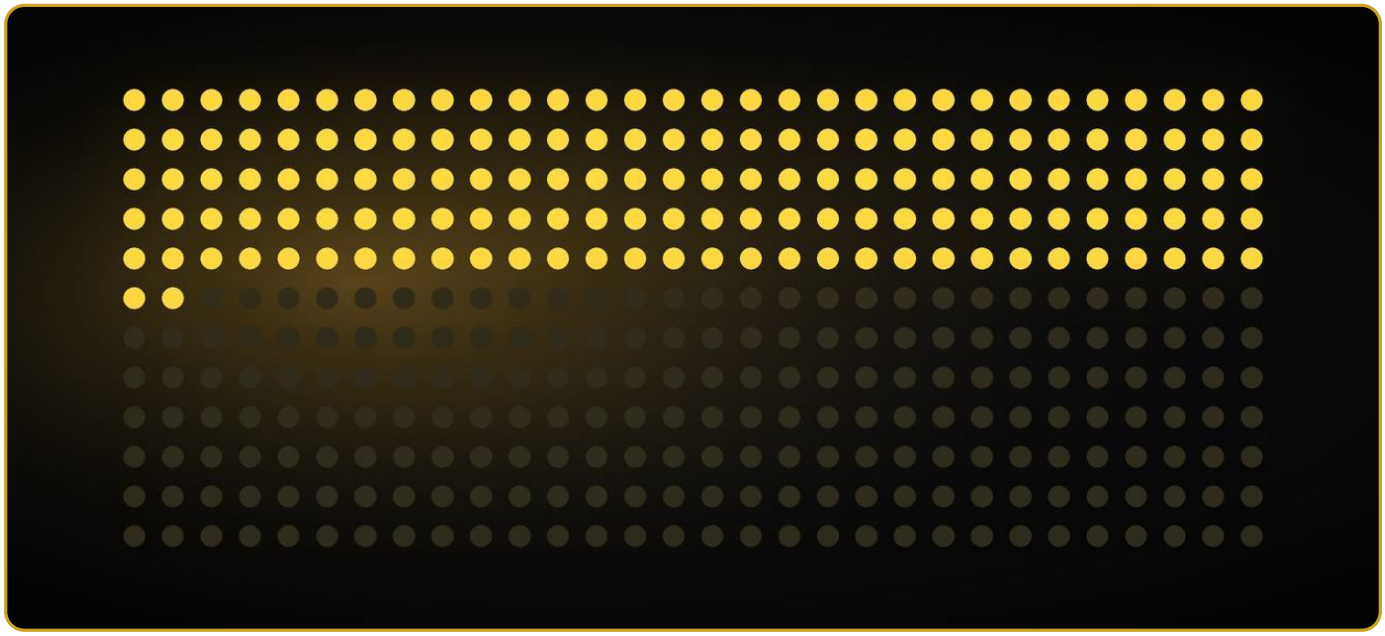

Insurance prices can differ a lot between companies for the same cover. Compare the same level of cover, not only the price.

TRY THIS

Get one quote for an insurance you hold. Write it next to your current price. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

SMALL FEES, BIG IMPACT

Fees are small, regular and easy to ignore. They work like a gremlin eating a stack of coins one by one: bank fees, card fees, late fees, fund fees, subscription fees. A few minutes spent finding them pays for years.

TRY THIS

Look through your accounts for annual, monthly and transaction fees. List each with its yearly cost. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 1% FEE

$100,000 invested for 30 years at a hypothetical 7% a year grows to $761,226. If a 1% yearly fee takes it to a 6% return, it becomes $574,349, a gap of $186,876.

TRY THIS

Find the annual fee on any fund or retirement account you hold. Write it as a percentage. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

COMPARE EXPENSE RATIOS

An expense ratio is the yearly percentage a fund charges. At 0.05% a year, the same $100,000 for 30 years at a gross 7% grows to $750,626. Differences like this compound.

TRY THIS

Look up the expense ratio of any fund you own. Write the number. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

CONVENIENCE TAX

You often pay a fee for convenience: ATM fees, delivery fees, instant transfer fees. A little planning avoids most of them.

TRY THIS

Count how many convenience fees you paid last month. Write the total. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

ASK FOR A REFUND

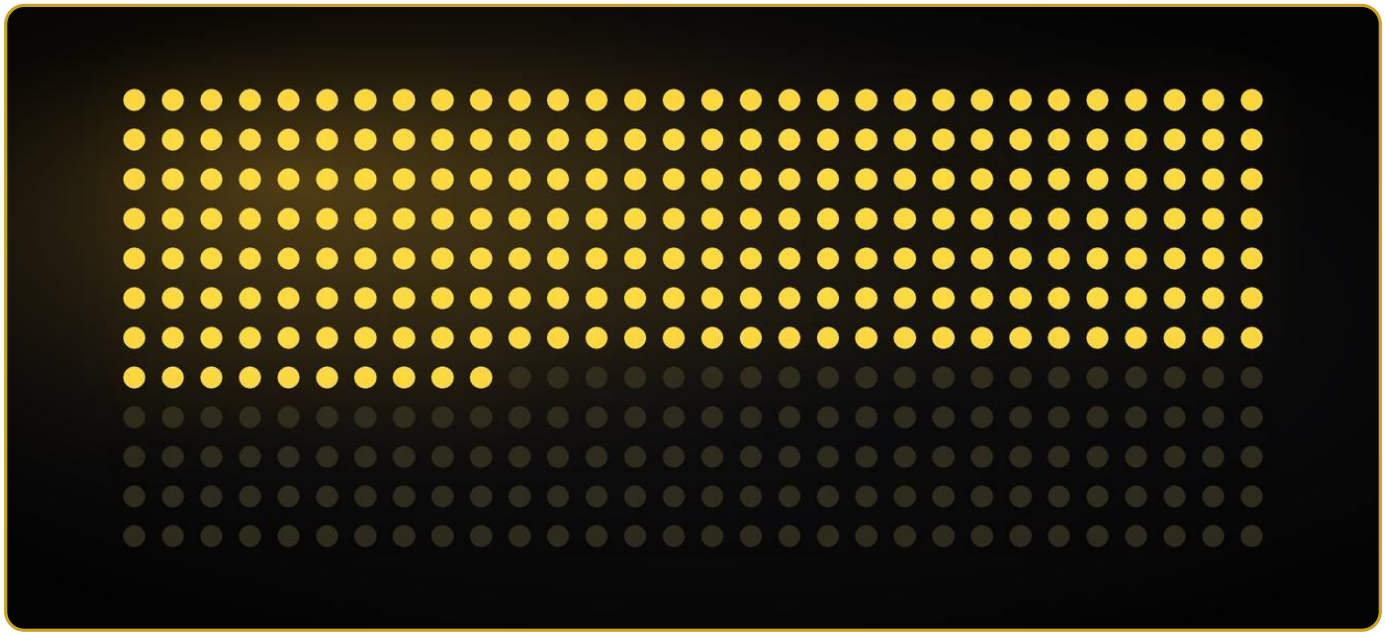

Banks sometimes refund a first late fee or overdraft if you ask. It is often worth one phone call.

TRY THIS

If you have paid a fee recently, contact the company and ask for it back. Note the answer. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

Money mood this week (1) (2) (3) (4) (5)

LEARN

INTEREST ON INTEREST

Compound interest means earning returns on your earlier returns as well as on your original money. Time is the main ingredient. The curve is slow at first and then rises steeply.

TRY THIS

Draw a rough curve on this page that goes slowly and then steeply. Label the early years and the late years.

☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 30-YEAR CURVE

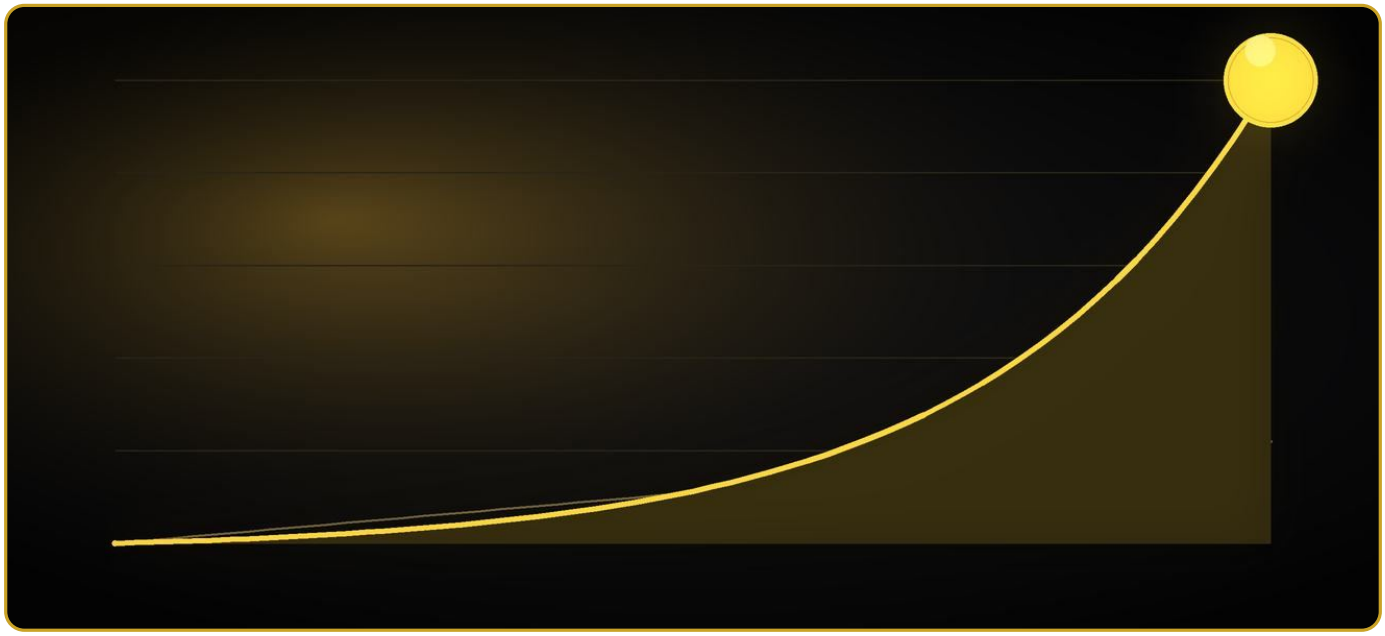

$200 a month at a hypothetical 8% a year grows to $36,589 after 10 years, $117,804 after 20 and $298,072 after 30. You put in $72,000 over the 30 years. Returns are never guaranteed.

TRY THIS

Pick a monthly amount you could save. Write what it becomes over 10, 20 and 30 years at 6%. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

USE A CALCULATOR

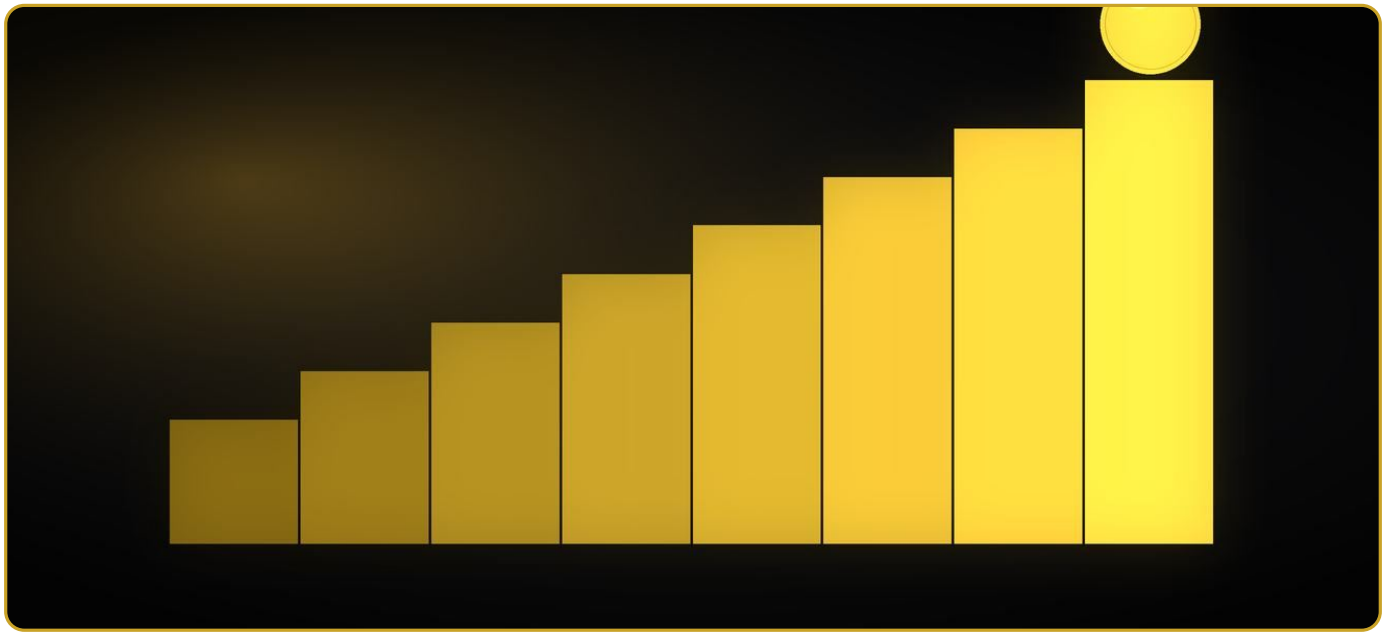

A free compound interest calculator lets you test different amounts, rates and times. Use it to see how each variable changes the result. Change one input at a time.

TRY THIS

Run your numbers through a calculator. Write the result for three different monthly amounts. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

EXPONENTIAL BLINDNESS

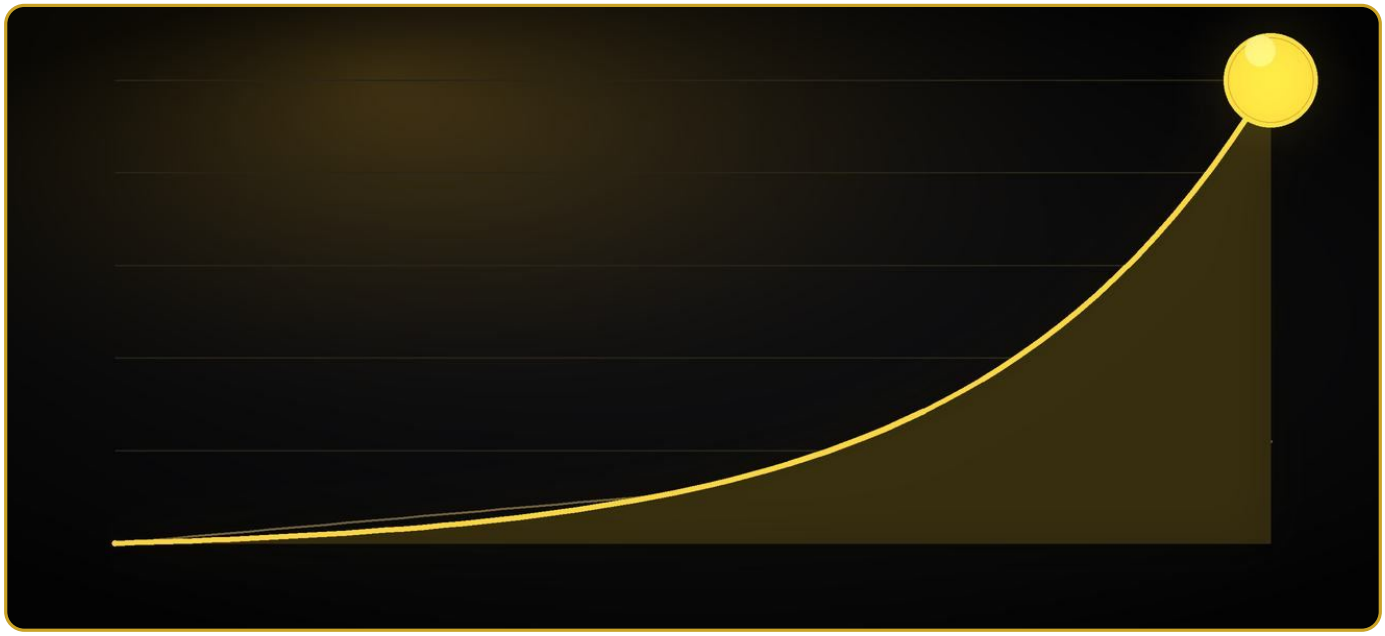

People find it hard to picture exponential growth. The first years look boring and the last years look huge. This is why patience is rare and valuable.

TRY THIS

Write what you tend to do when progress looks slow. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

START NOW

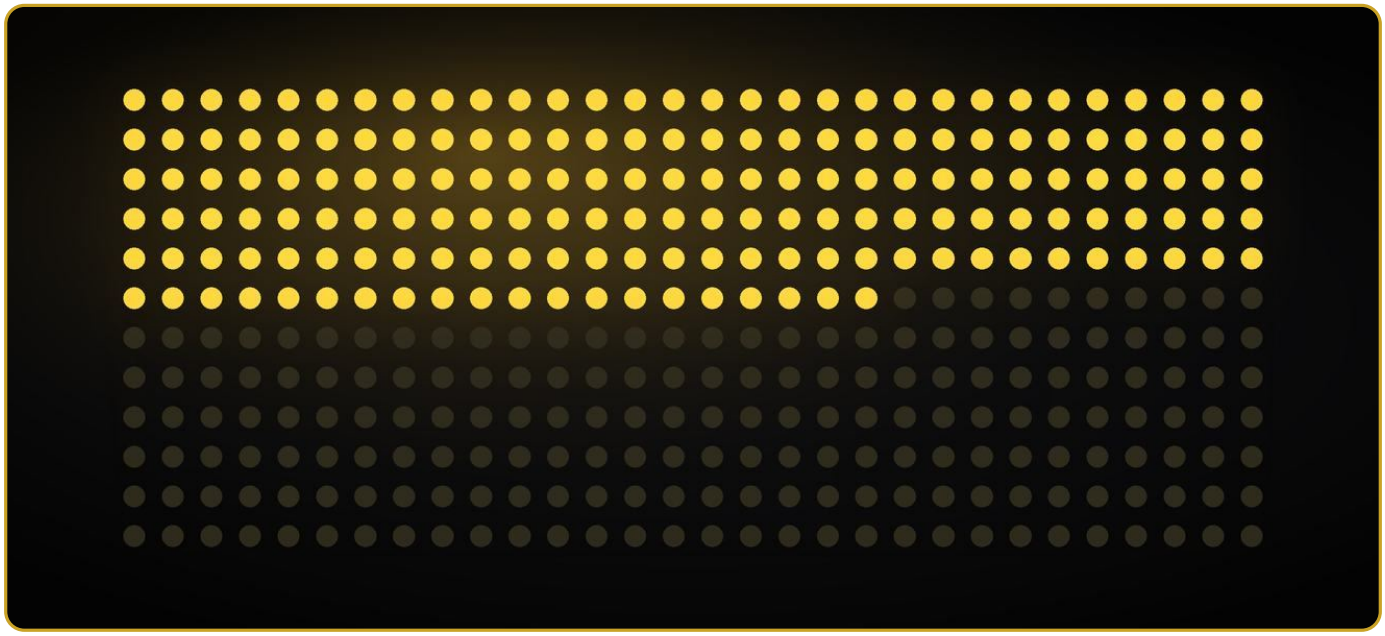

The most reliable lever is starting earlier. Even a small amount begun today beats a large amount begun later.

TRY THIS

Write your start date, your amount and the account. ☐

Money mood this week (1) (2) (3) (4) (5)

LEARN

A MENTAL SHORTCUT

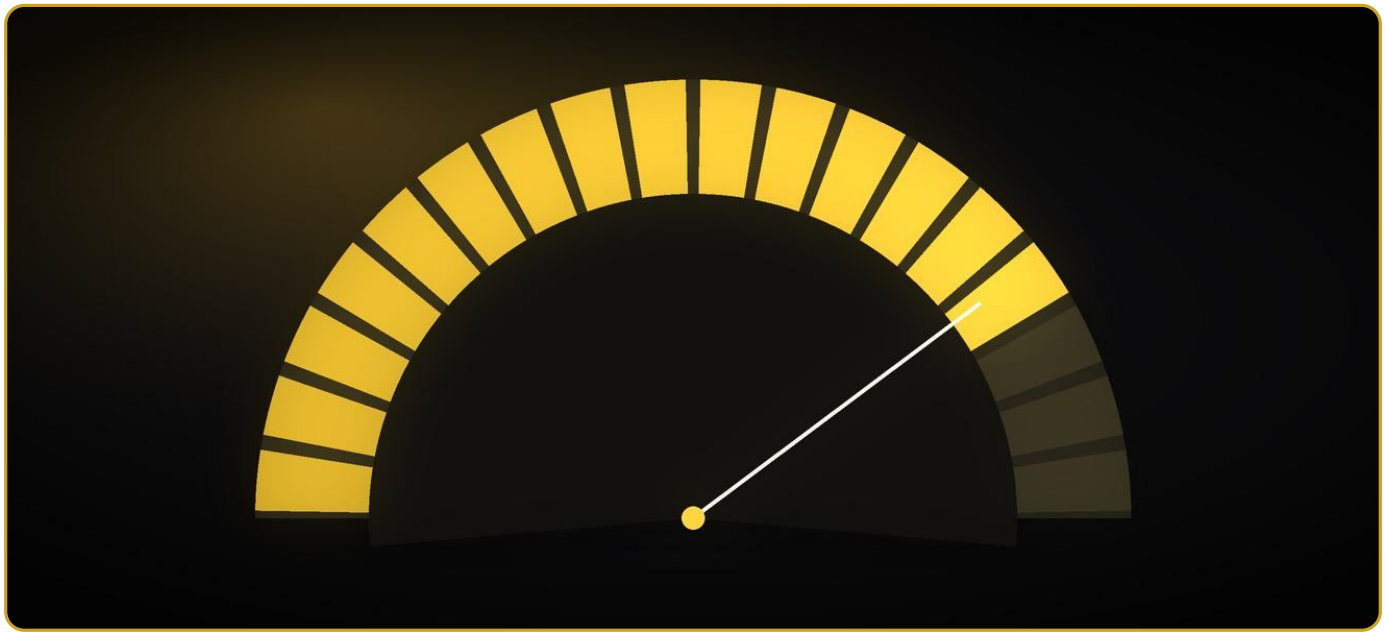

Divide 72 by an annual rate to estimate the years it takes money to double. At 8% a year that is 9 years. At 6% it is 12 years. It is an approximation that works best for rates between about 6% and 10%.

TRY THIS

Pick three rates, such as 4%, 6% and 8%. Divide 72 by each. Write the doubling times. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

DEBT DOUBLES TOO

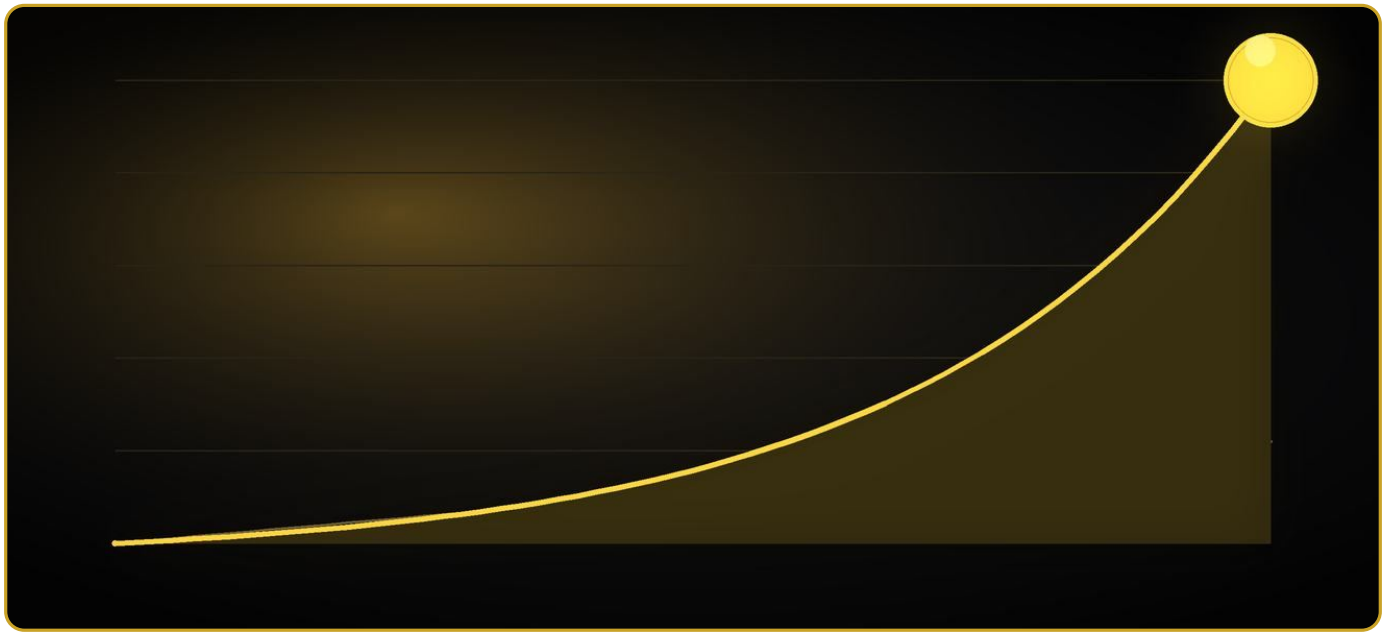

The rule works for debt. At 24% a year a balance left alone doubles roughly every 3 years. That is why high-interest debt can feel like it follows you.

TRY THIS

Write the APR of your highest debt and divide 72 by it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

DOUBLING CHAIN

Starting at $1,000 and doubling every 9 years gives $2,000, $4,000, $8,000 and $16,000 after 36 years. That is the same as $15,968 at a hypothetical 8% a year, roughly.

TRY THIS

Write your own doubling chain starting from an amount you could invest. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

PATIENCE IS A SKILL

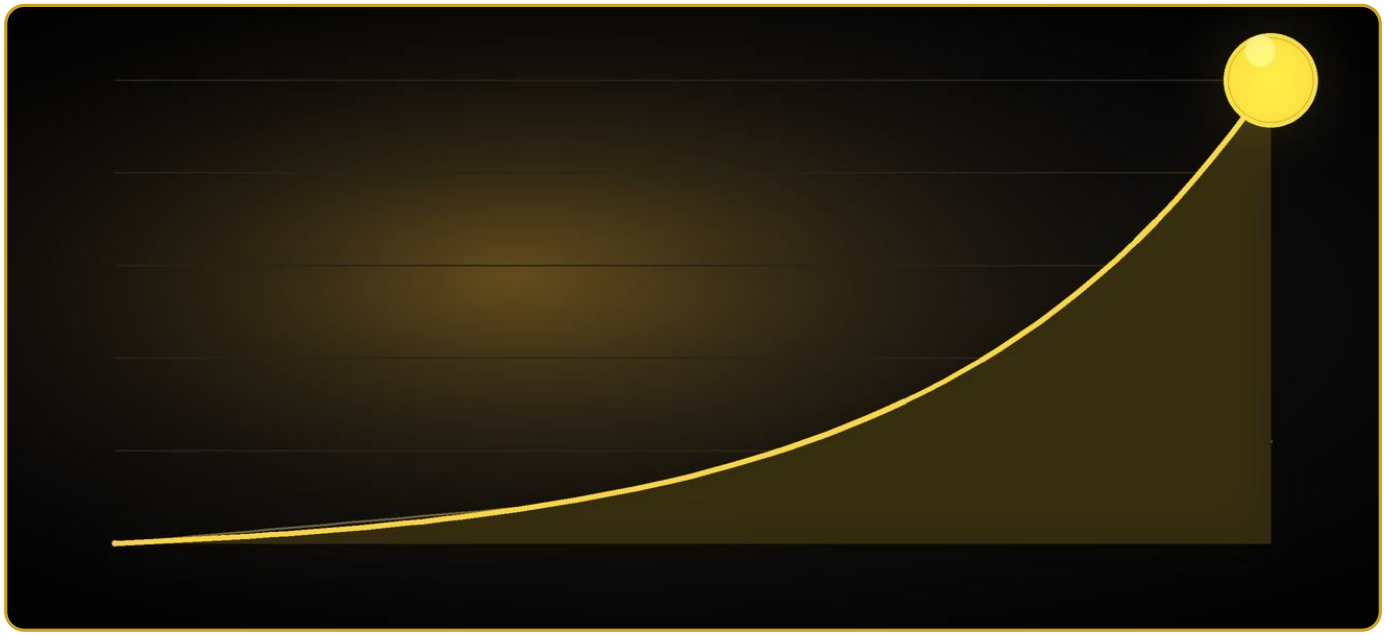

Doubling takes years. Most people stop before the later doublings, where most of the growth happens.

TRY THIS

Write one goal you quit early and what the next doubling might have brought. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

CHECK YOUR RETURNS

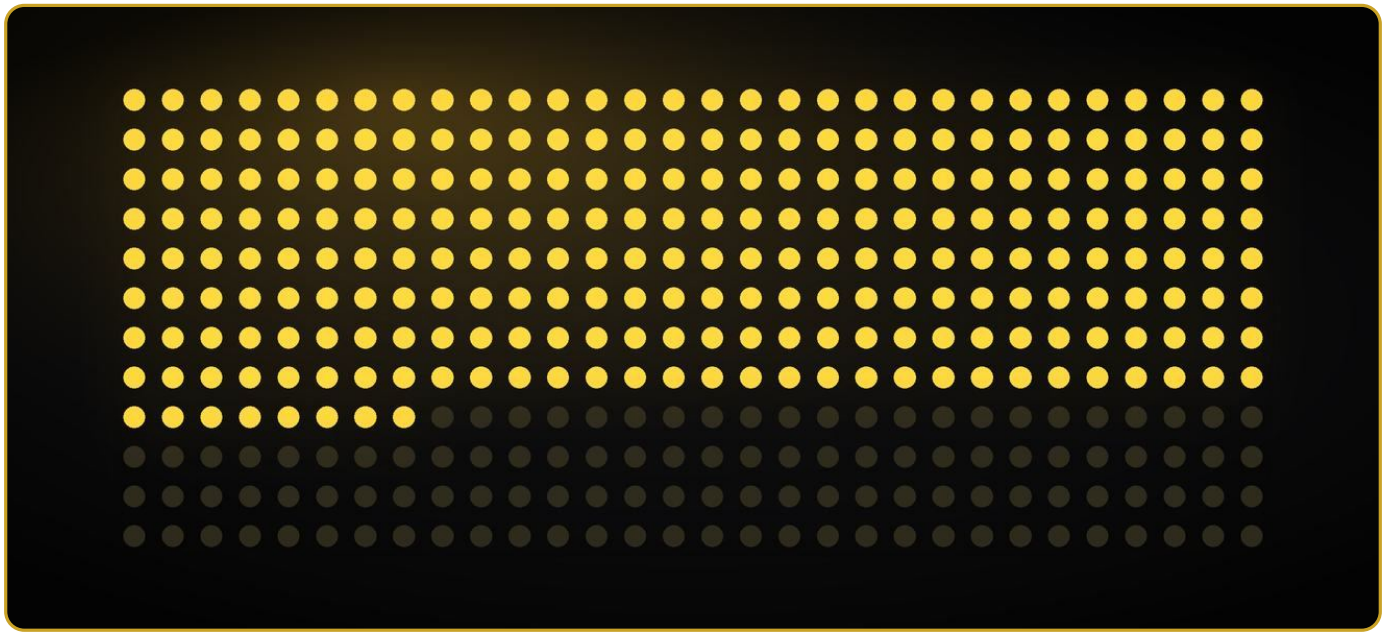

If your savings account pays 4% a year, your money doubles in 18 years if the rate stays the same. Rates change, so check the number now and then.

TRY THIS

Find the interest rate on your savings account today. Divide 72 by it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Which of your numbers is doubling and which one is also doubling in the wrong direction?

Money in this week $

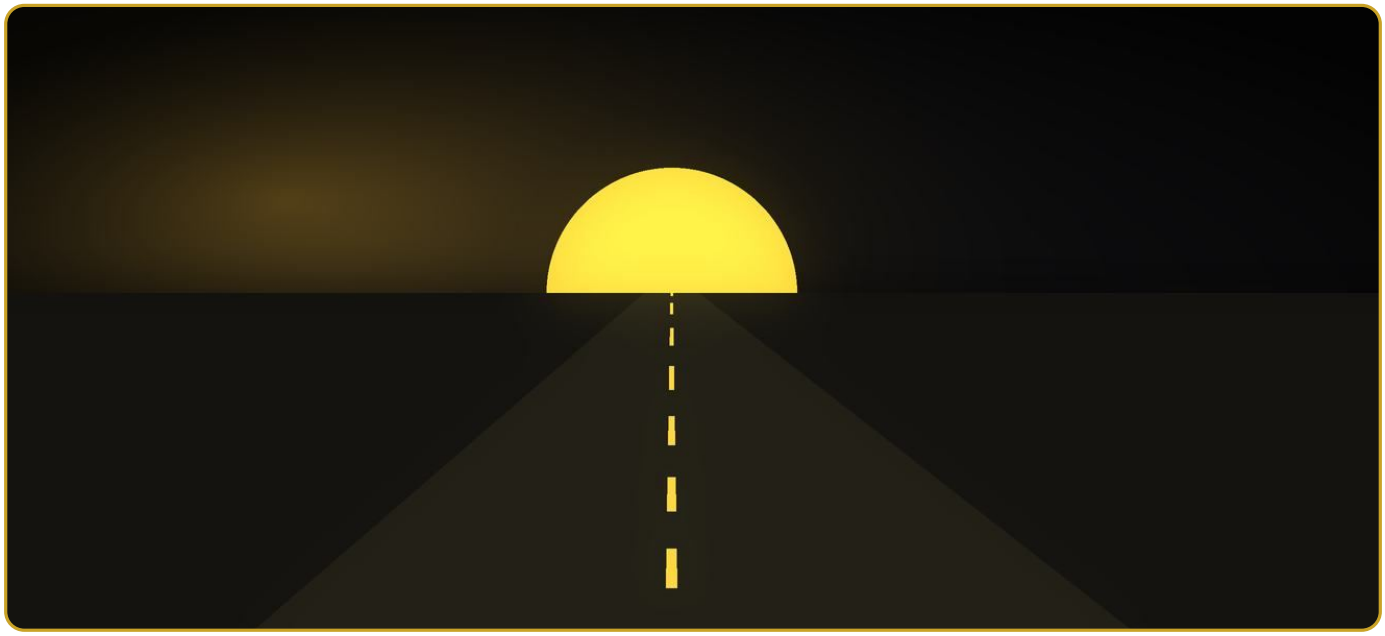

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What would you want to double in the next 10 years?

Next week I will (tick when done)

- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

STARTING EARLY

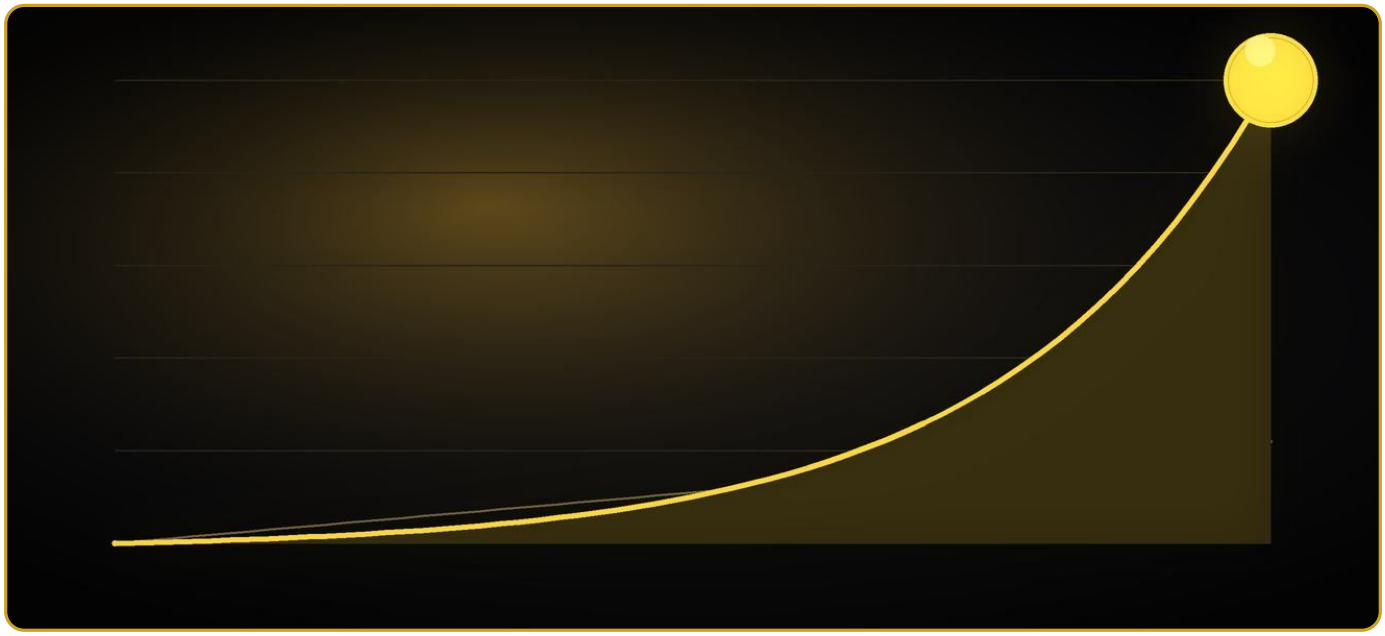

Two people save the same monthly amount to the same age. The one who starts ten years earlier ends up with much more than the extra ten years of deposits alone would explain, because those early deposits compound for decades.

TRY THIS

Draw two lines on a timeline: one starting at 25, one at 35. Mark the finish at 65. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE TEN-YEAR GAP

$200 a month from 25 to 65 at a hypothetical 8% a year gives $698,202. Starting at 35 gives $298,072. Waiting ten years costs $400,130.

TRY THIS

Write your own start age and your target age. Count the years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

DO NOT TRY TO TIME IT

People who wait for the perfect moment to invest often wait too long. Markets fall and rise unpredictably. Regular investing over time is one way people avoid betting on a single day.

TRY THIS

Write the date of your next regular investment. Make it a repeating date. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

FEAR AND GREED

Markets can make people greedy at the top and afraid at the bottom. A written plan helps you act the same way in both.

TRY THIS

Write what you will do the next time the market falls sharply. One sentence. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

REBALANCE THE CALENDAR

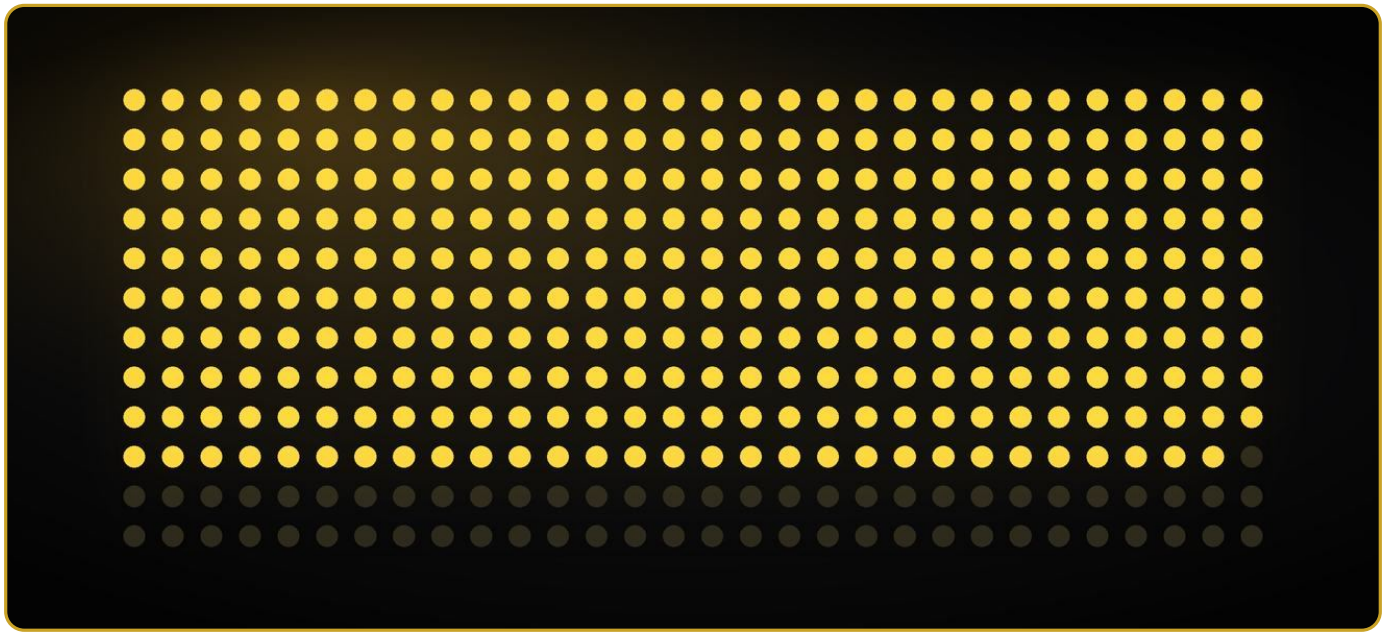

Put one yearly review date on your calendar for your long-term investments. That is the only date you really need.

TRY THIS

Add the yearly review date to your calendar now. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

How did the time you spent on your plan compare with the time you spent worrying?

Money in this week $

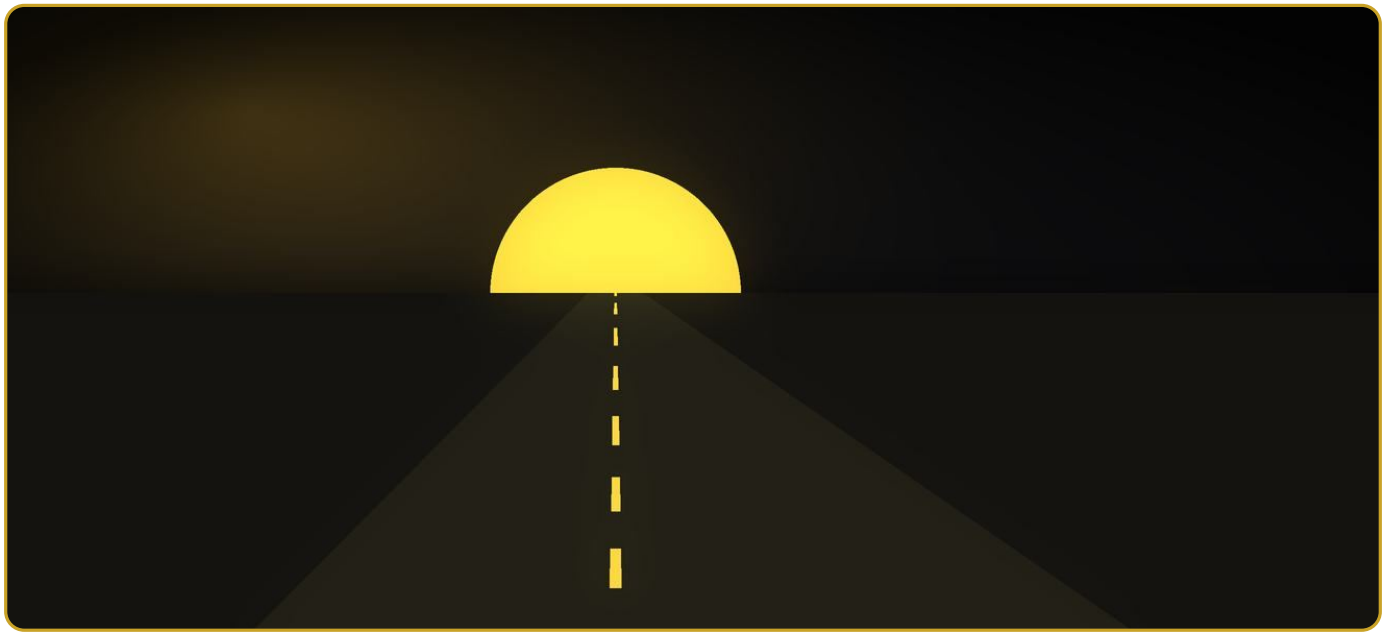

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

What would you tell a younger version of yourself about starting?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

THE SLOW LEAK

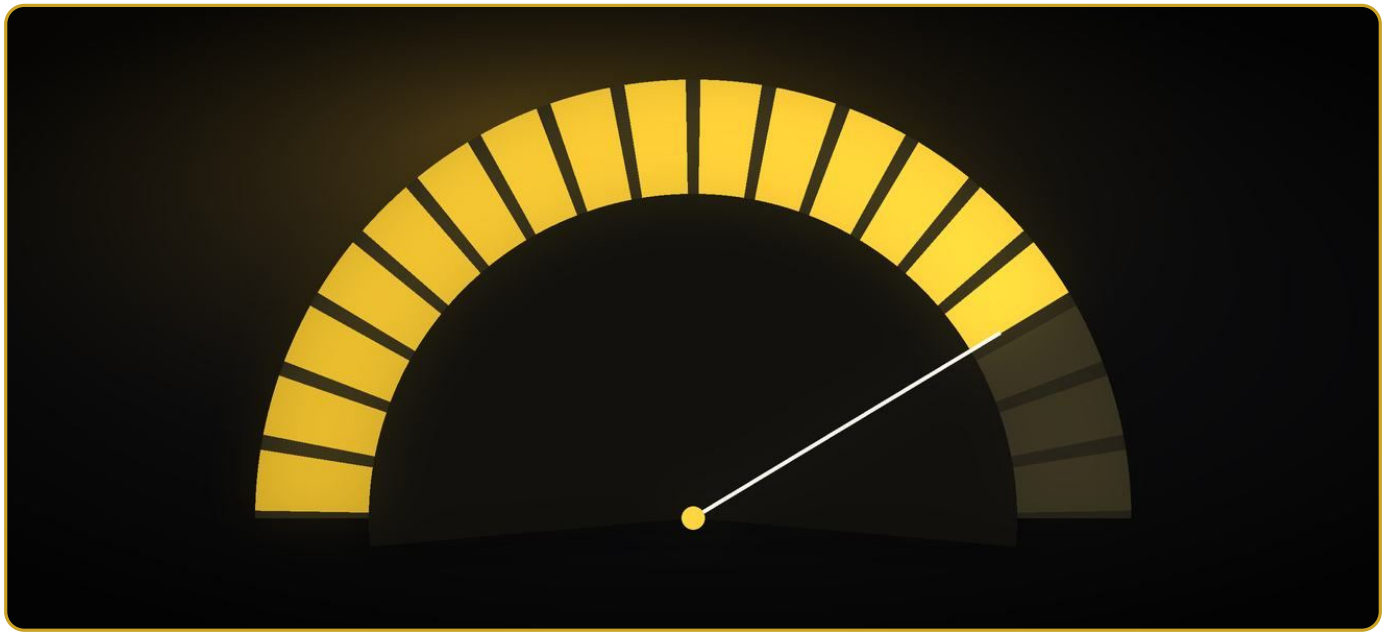

Inflation is the rise in prices over time, so the same money buys less. Cash is safe from market drops but not from inflation. Your savings need to be placed with that in mind.

TRY THIS

Ask an older relative what something cost when they were your age. Write the number and the item. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

$100 IN 20 YEARS

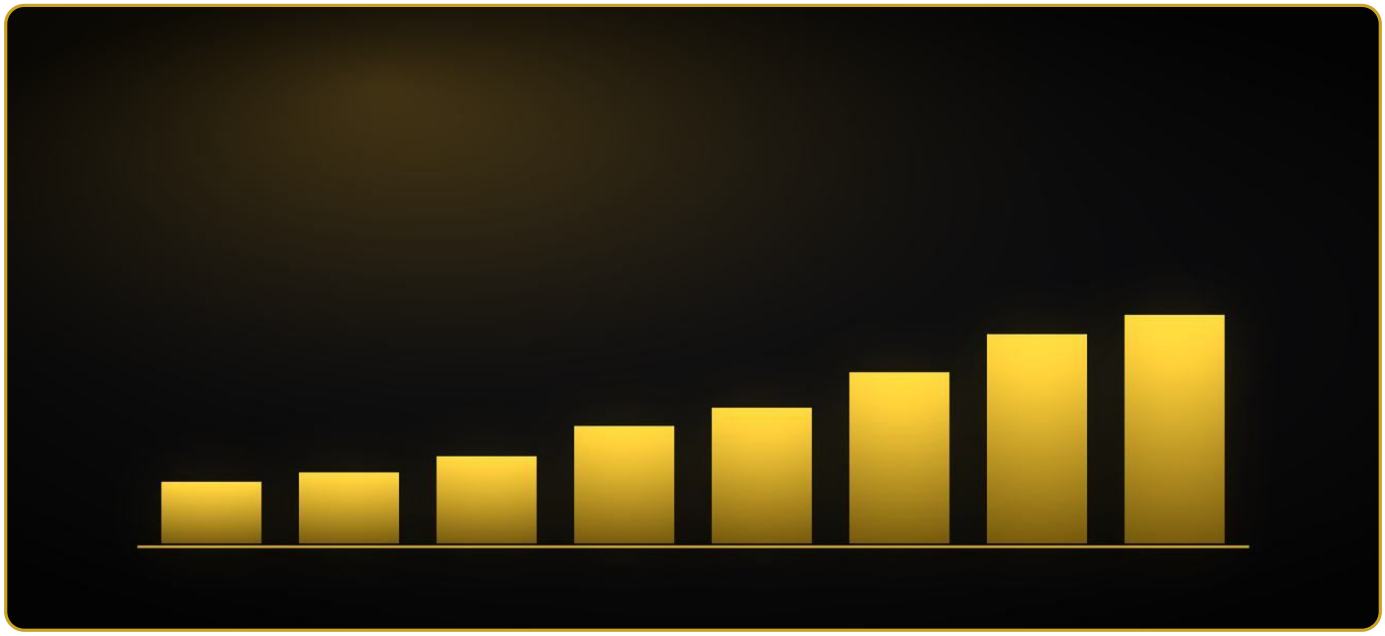

At 3% inflation, $100 today has the buying power of about $55 in 20 years. Inflation rates change from year to year, so this is a scenario, not a forecast.

TRY THIS

Choose any amount you hold in cash. Calculate its buying power after 20 years at 3%. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

REAL RETURN

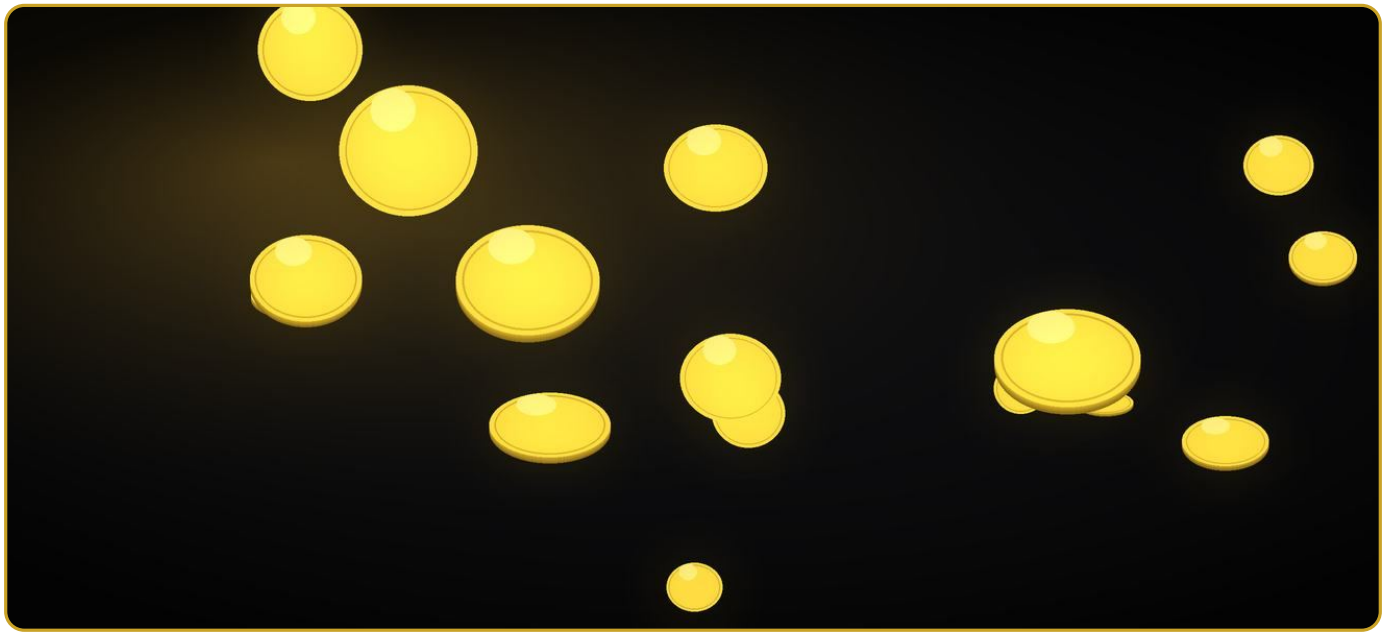

A real return is your return minus inflation. A savings account paying 4% in a year with 3% inflation grows your buying power by about 1%. If the rate is below inflation, you lose buying power.

TRY THIS

Look up your savings rate and the current inflation rate where you live. Subtract. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

MONEY ILLUSION

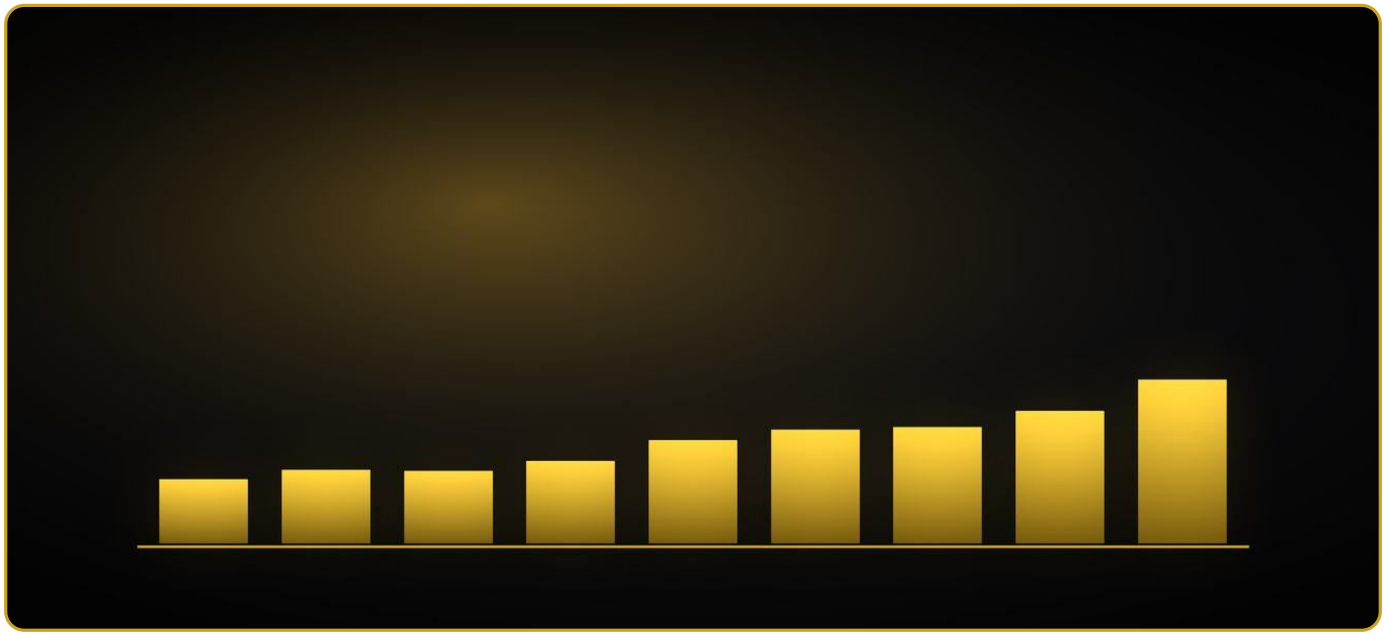

People tend to focus on the number on the paycheck instead of what it buys. A 3% raise during 4% inflation is a small pay cut in real terms.

TRY THIS

Write your last raise and compare it with the inflation rate for that year. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

CASH WITH A JOB

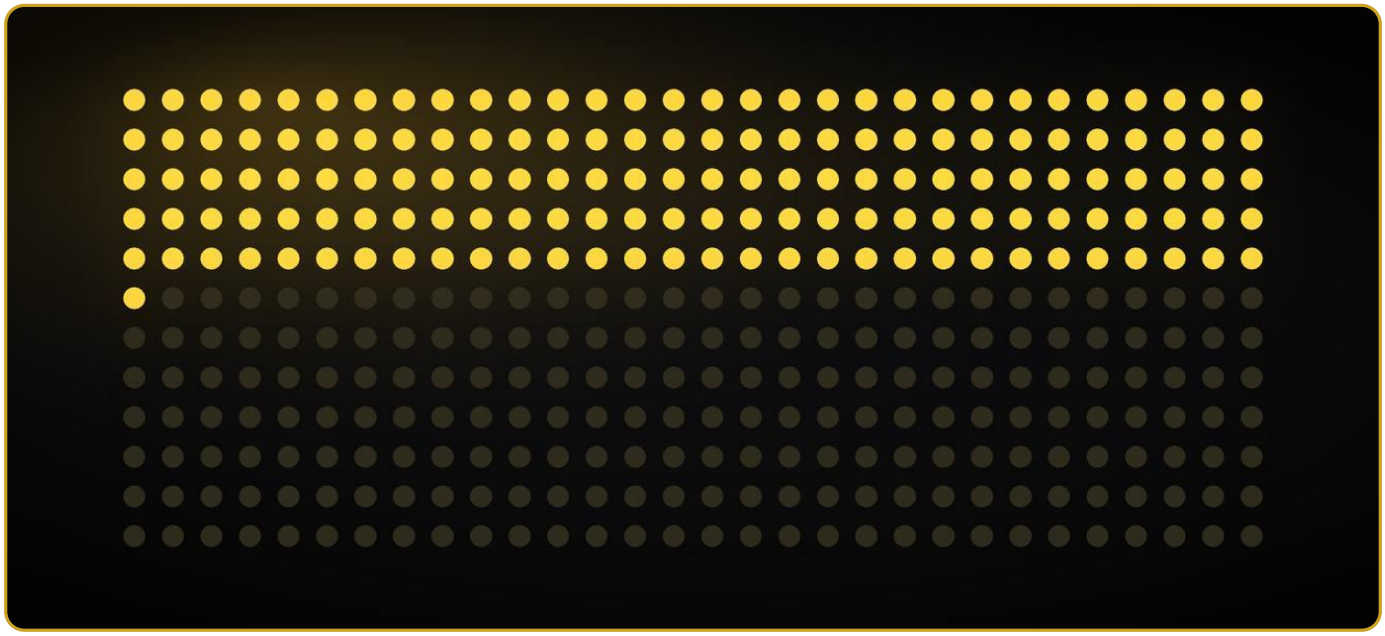

Keep what you need for emergencies and near-term bills in safe cash. Longer-term money has a different job. Match the tool to the time.

TRY THIS

Write which money you need in less than 2 years and which you will not touch for 10 or more. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

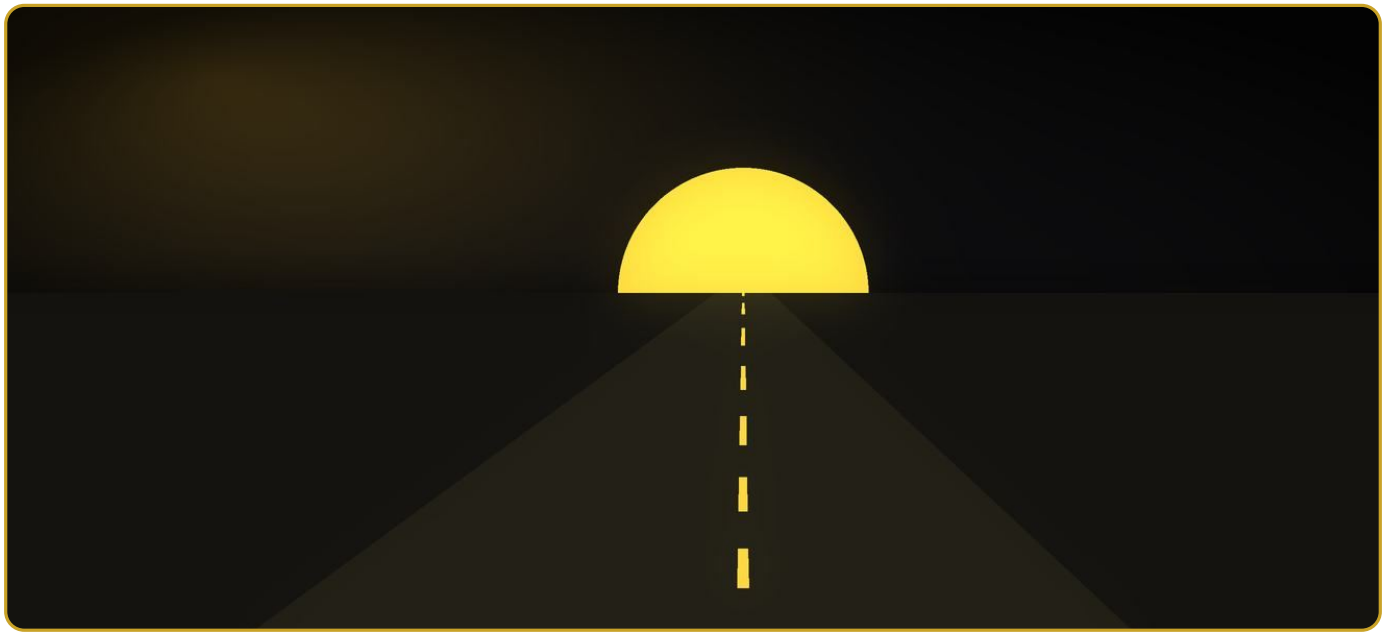

WEEKLY CHECK-IN

What rose in price this week, and what did you do about it?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

HALFWAY

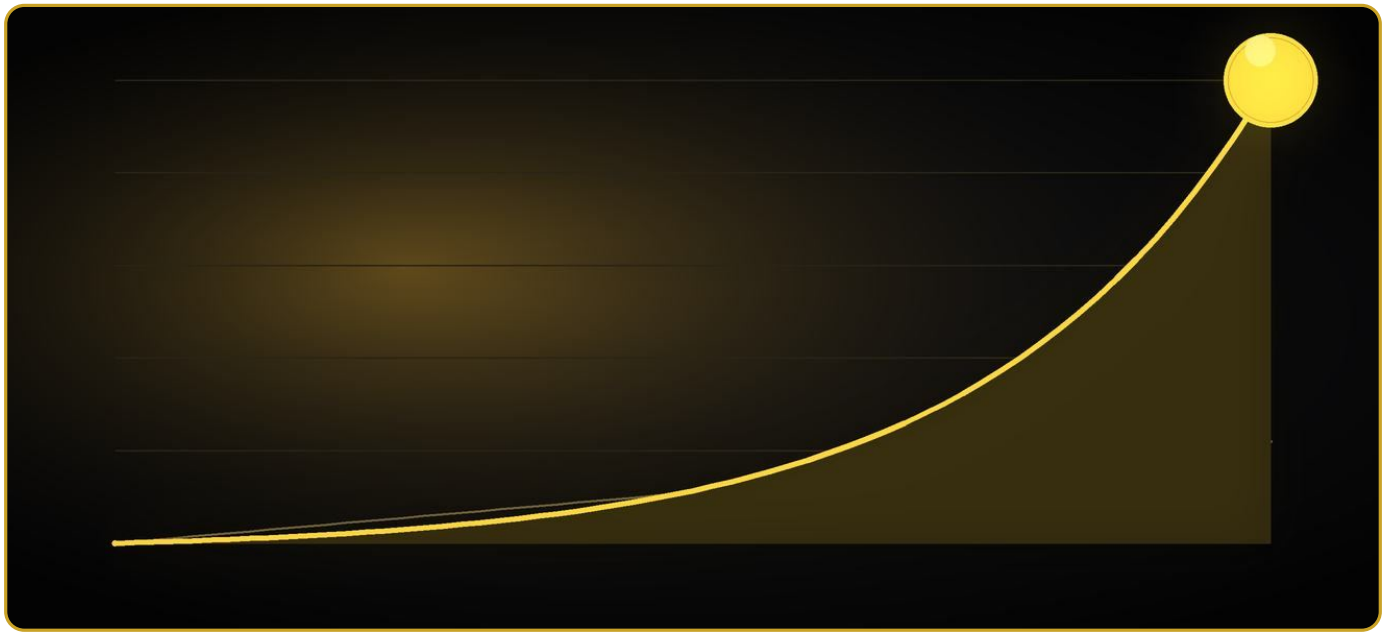

You have done 26 weeks. Even if some weeks were missed, you are far ahead of where you started. A midyear review is the moment to adjust the plan and keep going.

TRY THIS

Update your Net Worth Snapshot. Compare it with Day 1 and Day 91. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE SCOREBOARD

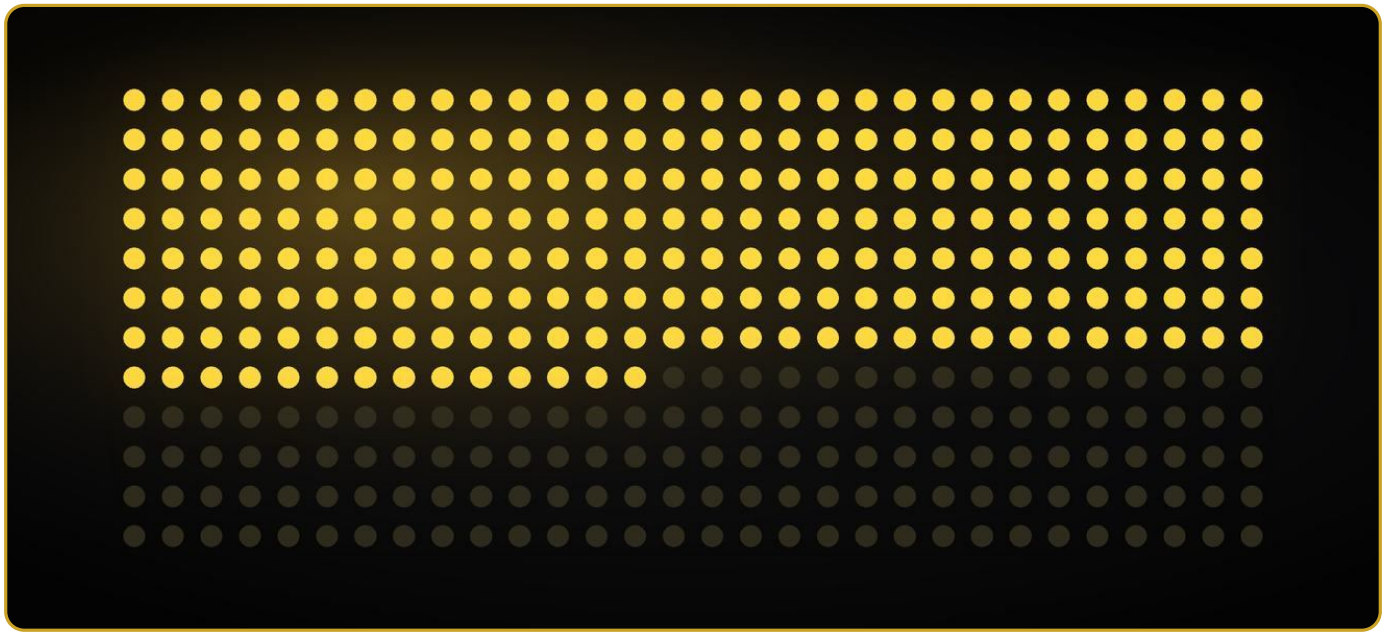

Add up what you saved in 26 weeks and what you paid toward debt. If you averaged $60 a week for 26 weeks, that is $1,560. Write your own totals.

TRY THIS

Write your total savings and total debt paid since Day 1. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

WHAT WORKED

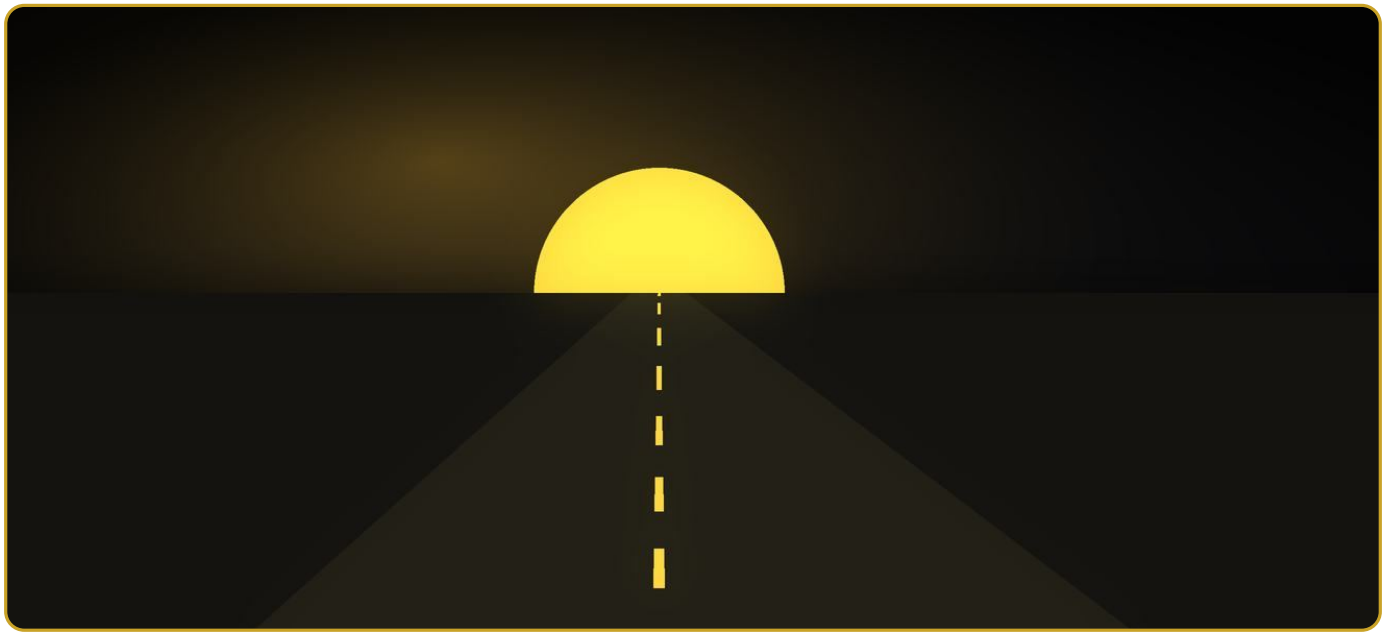

Look back through your check-ins. Which weeks were easiest? Which habits survived the busiest weeks?

TRY THIS

Write the three habits that stuck. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

DO NOT RESTART

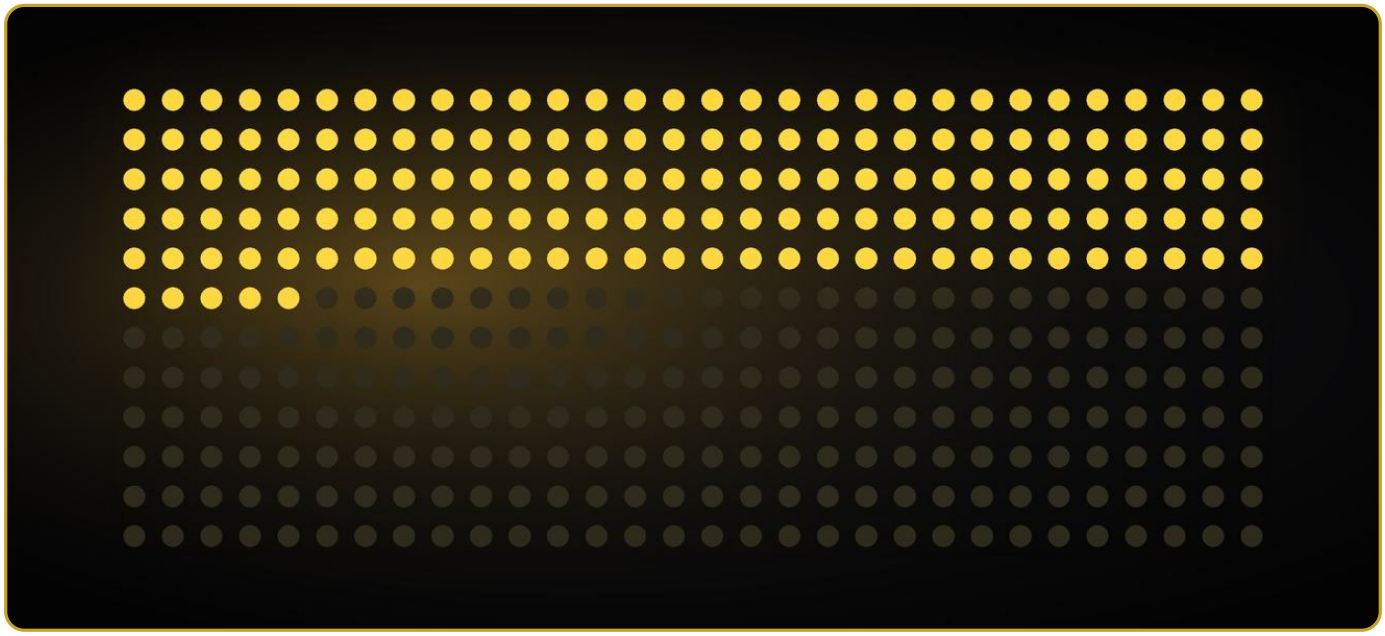

If you missed weeks, you do not need to begin again from Day 1. Skip to today's page and keep going. A missed day is just a missed day.

TRY THIS

Write the biggest obstacle of the last six months and one way around it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

RESET THE GOAL

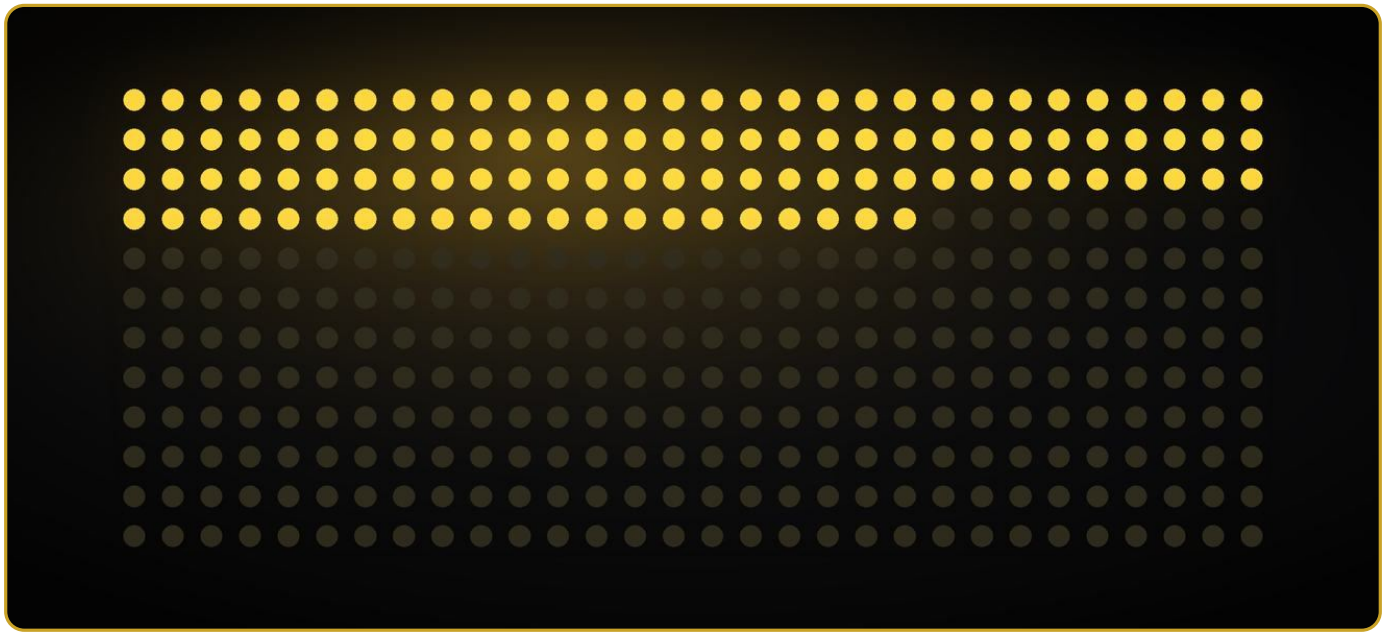

Choose one money goal for the second half. Make it specific, with a number and a date.

TRY THIS

Write your goal for Day 365. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

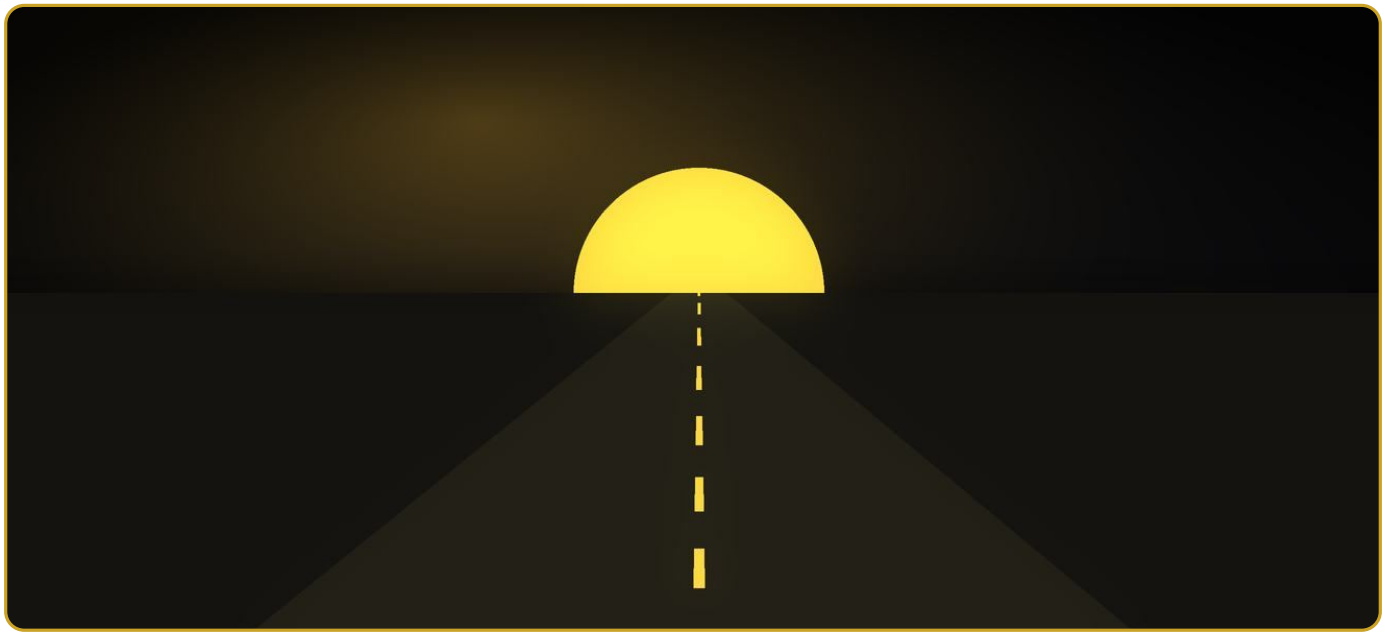

WEEKLY CHECK-IN

Write five things you now do with money that you did not do 26 weeks ago.

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What would you like to be able to say on the last page of this book?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

OWNING VERSUS LENDING

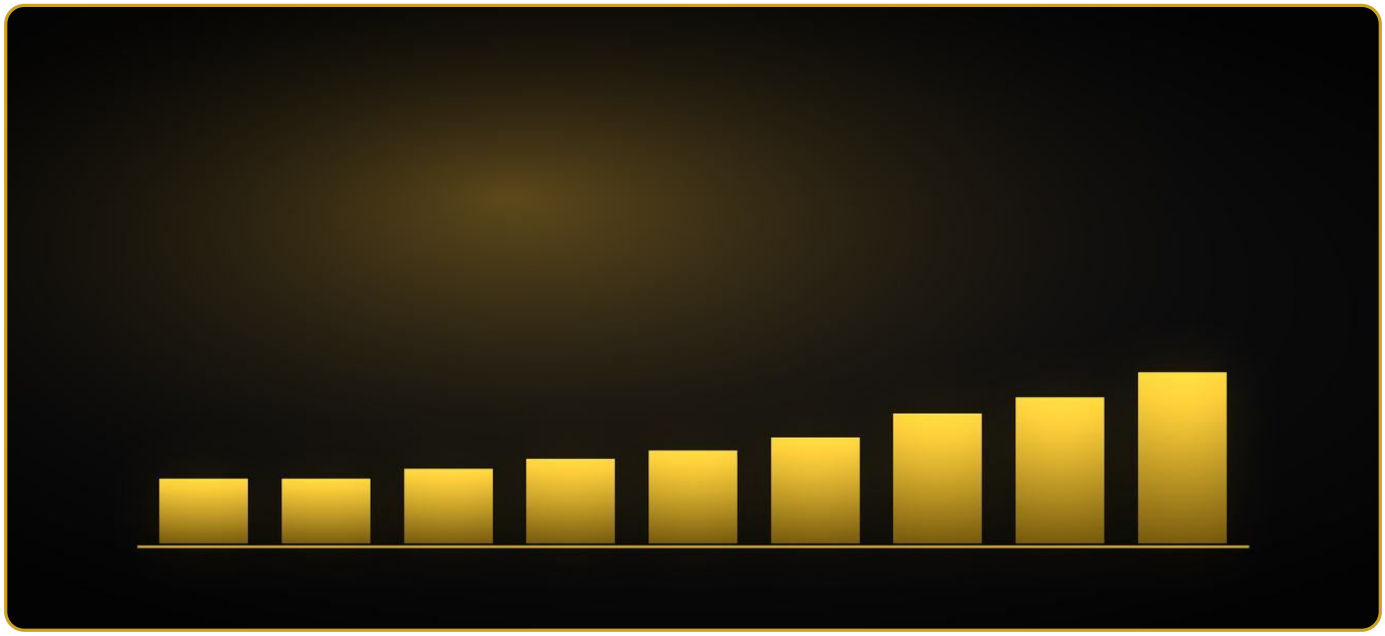

A stock is a small piece of ownership in a company. A bond is a loan to a company or a government that pays interest. Cash is stable but earns little. Most portfolios are a mix of the three. This book is education, not a recommendation to buy anything.

TRY THIS

Write one sentence each, in your own words, explaining what a stock, a bond and cash do. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

WHY NOT JUST CASH?

$10,000 left in a drawer for 20 years at 3% inflation has the buying power of about $5,537. The same $10,000 at a hypothetical 7% a year becomes $38,697. Returns are not guaranteed and investments can fall in value.

TRY THIS

Write what you hold in cash today. Write how many years you will not need it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

TIME HORIZON FIRST

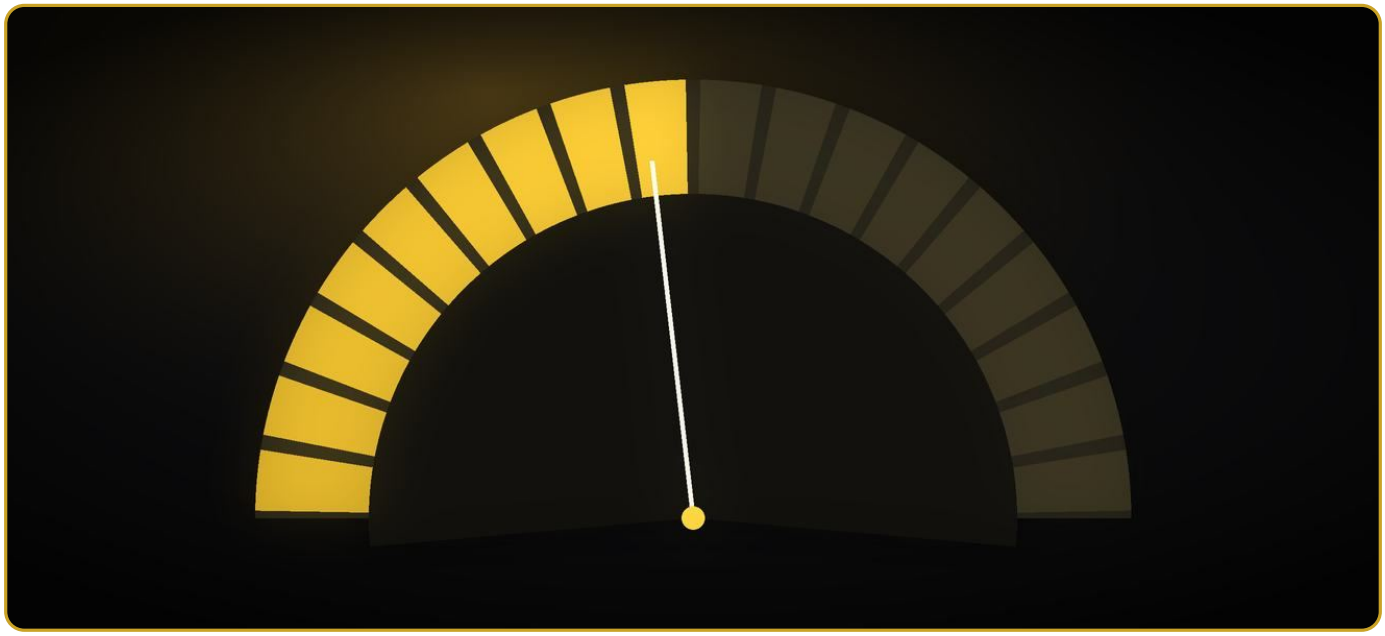

How long until you need the money matters more than any product. Money you need in two years has a different job from money you will not touch for twenty.

TRY THIS

Write three goals with the year you need the money for each one. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

INVESTING IS NOT GAMBLING

Gambling has a negative expected value and ends with each bet. Long-term investing in broad markets owns real businesses that produce goods and profits. But returns still vary and losses happen.

TRY THIS

Write one difference between a bet and a long-term investment in your own words. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

OPEN THE WINDOW

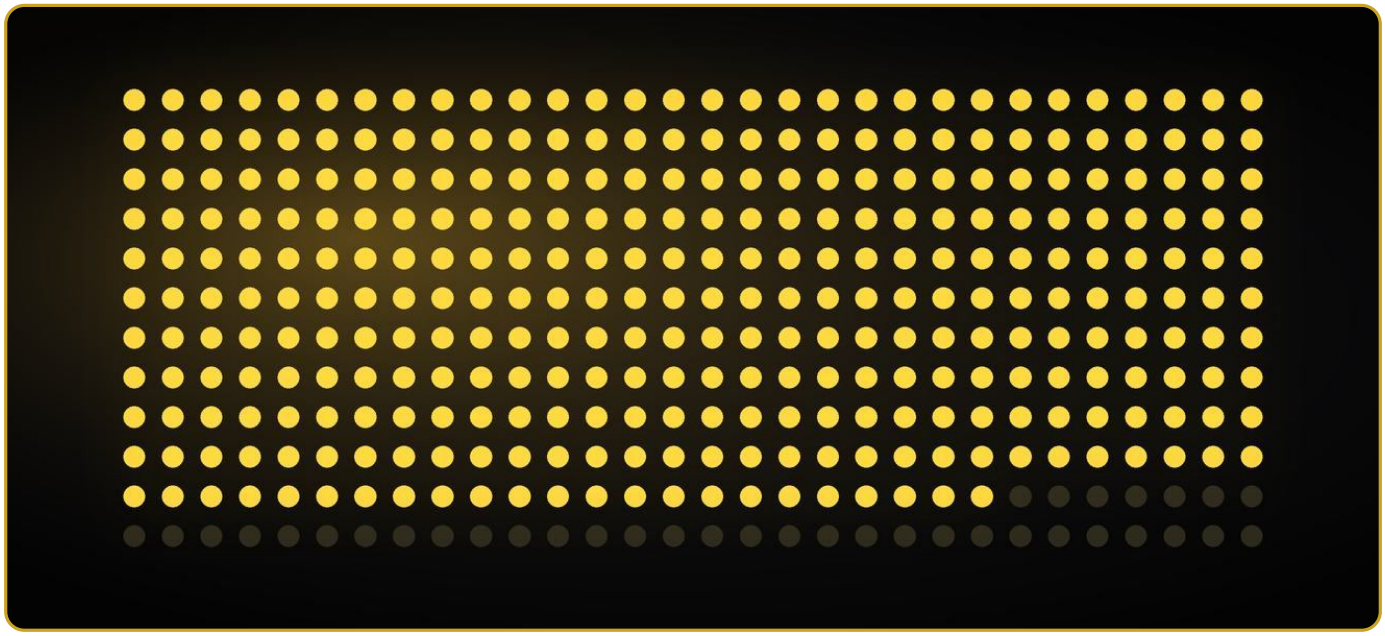

Look at how one investment account works where you live. Find out the fees, the minimums and the tax rules. Write down three questions to ask.

TRY THIS

Write three questions to ask before opening or funding an investment account. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

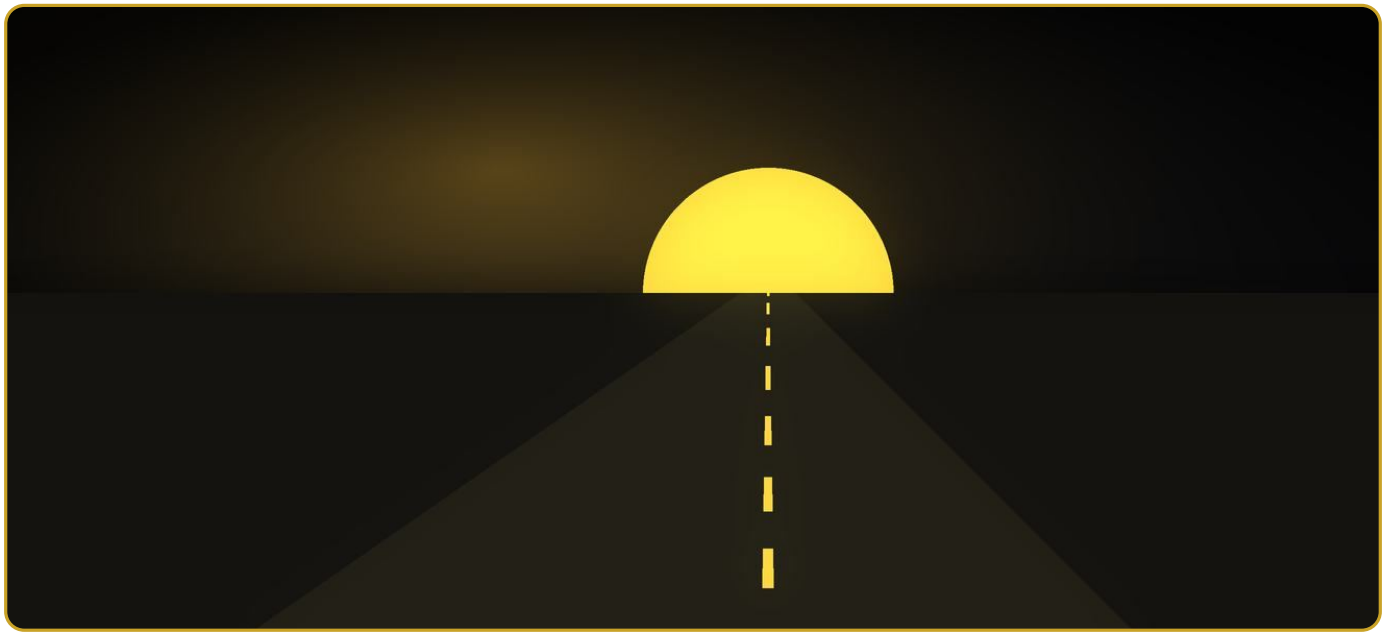

WEEKLY CHECK-IN

What is one investing word you now understand that you did not last week?

Money in this week $	Spent this week $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What fear about investing would you most like to understand better?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

DO NOT PICK ONE STOCK

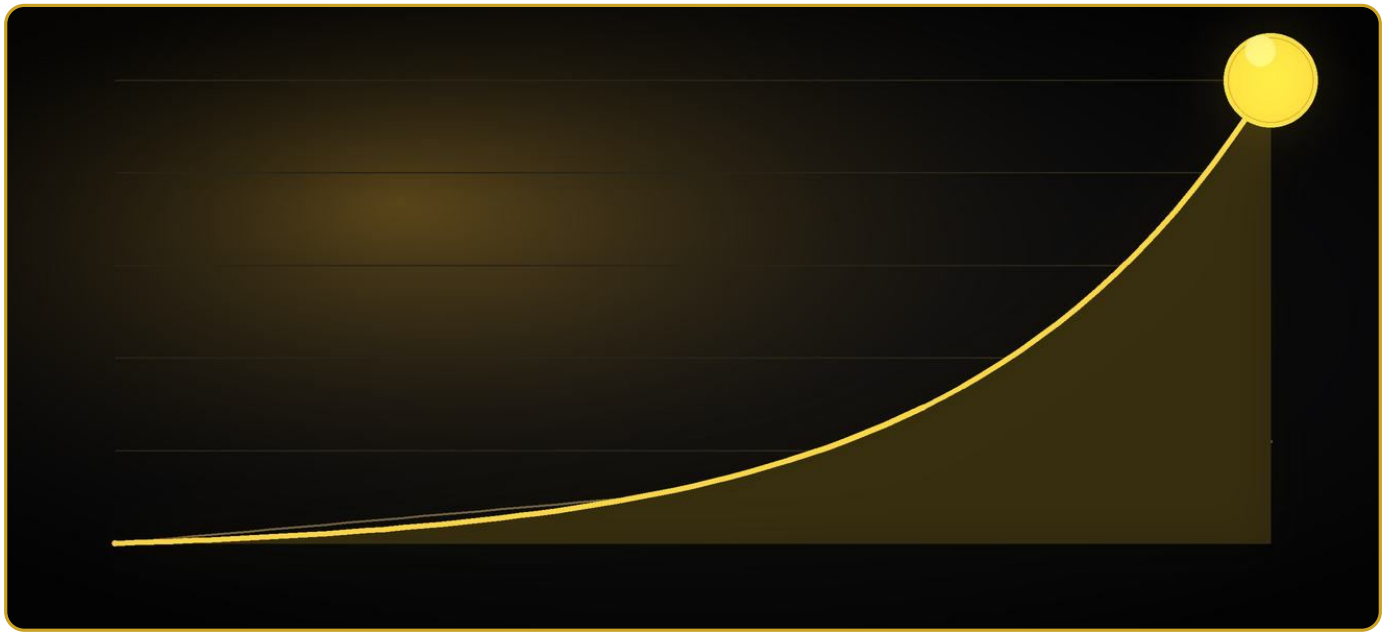

A fund holds many investments in one package. An index fund copies a market index, like the largest companies in a country, instead of trying to pick winners. That spreads risk across many companies at a low cost.

TRY THIS

Write what a fund is and how an index fund differs from picking individual stocks. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE COST OF PICKING

If a fund costs 1% a year and an index fund costs 0.05%, over 30 years on $100,000 at a gross 7% the gap is $176,277. Costs are one of the few things you can control.

TRY THIS

Find the cost percentage of any fund you own or are considering. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

READ THE FUND SHEET

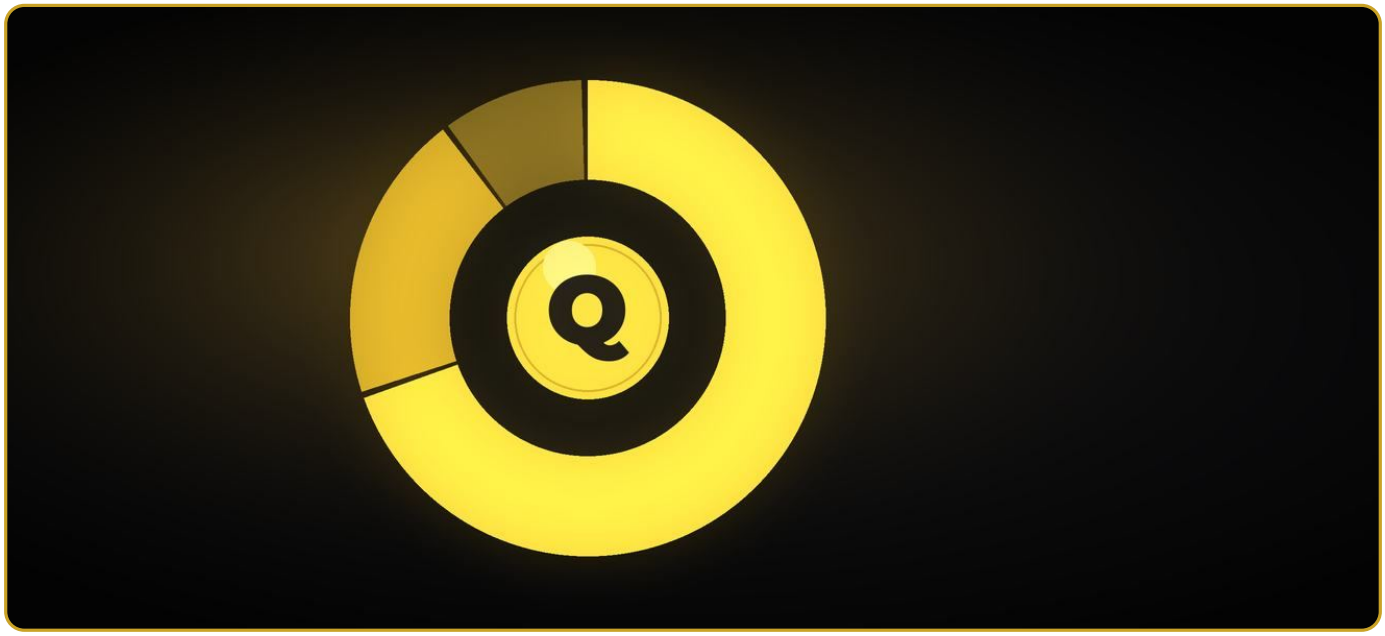

Every fund publishes a fact sheet with its fees, holdings and past performance. Past performance does not predict the future.

TRY THIS

Download one fund fact sheet. Write the expense ratio and the top three holdings. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE STAR MANAGER STORY

Studies of fund performance have repeatedly found that most actively managed funds do not beat their benchmark index over long periods, after fees. That is a pattern in data, not a promise.

TRY THIS

Write why a story about a star investor is more exciting than a boring index. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

DIVERSIFICATION CHECK

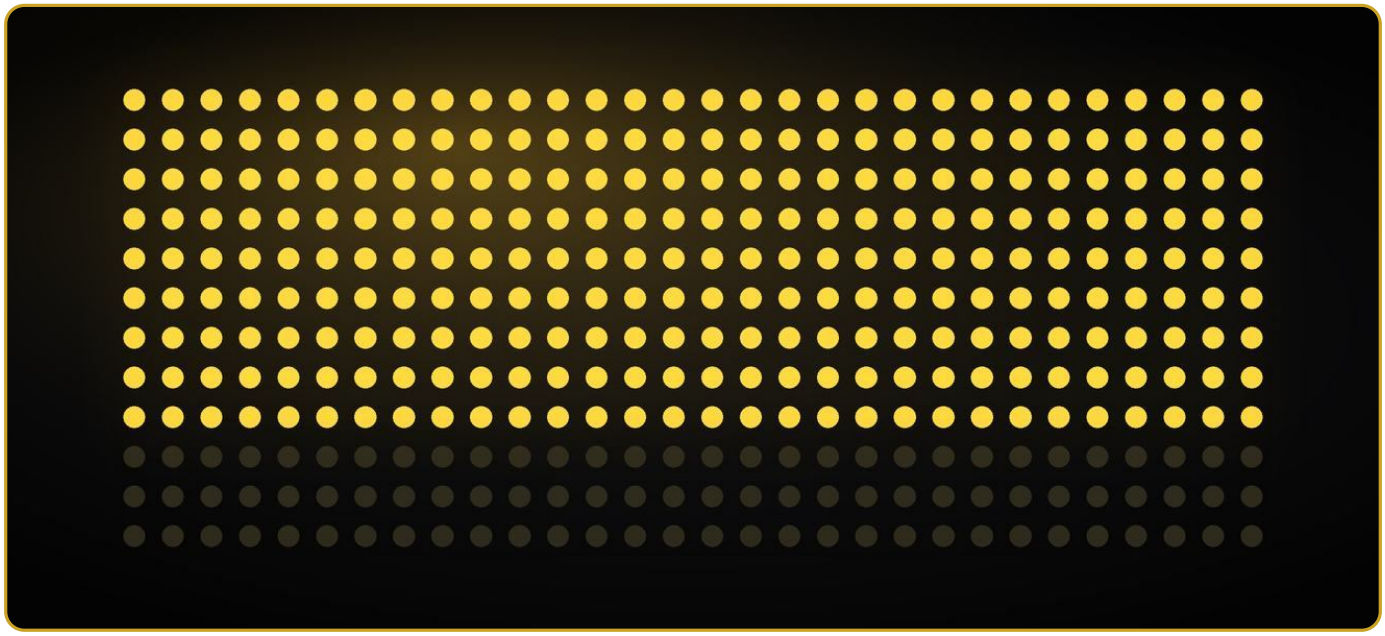

Diversification means not putting everything in one place. Count how many different companies, countries and asset types your investments cover.

TRY THIS

Look at your own holdings and write how concentrated they are. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Money mood this week (1) (2) (3) (4) (5)

LEARN

FREE MONEY, WITH RULES

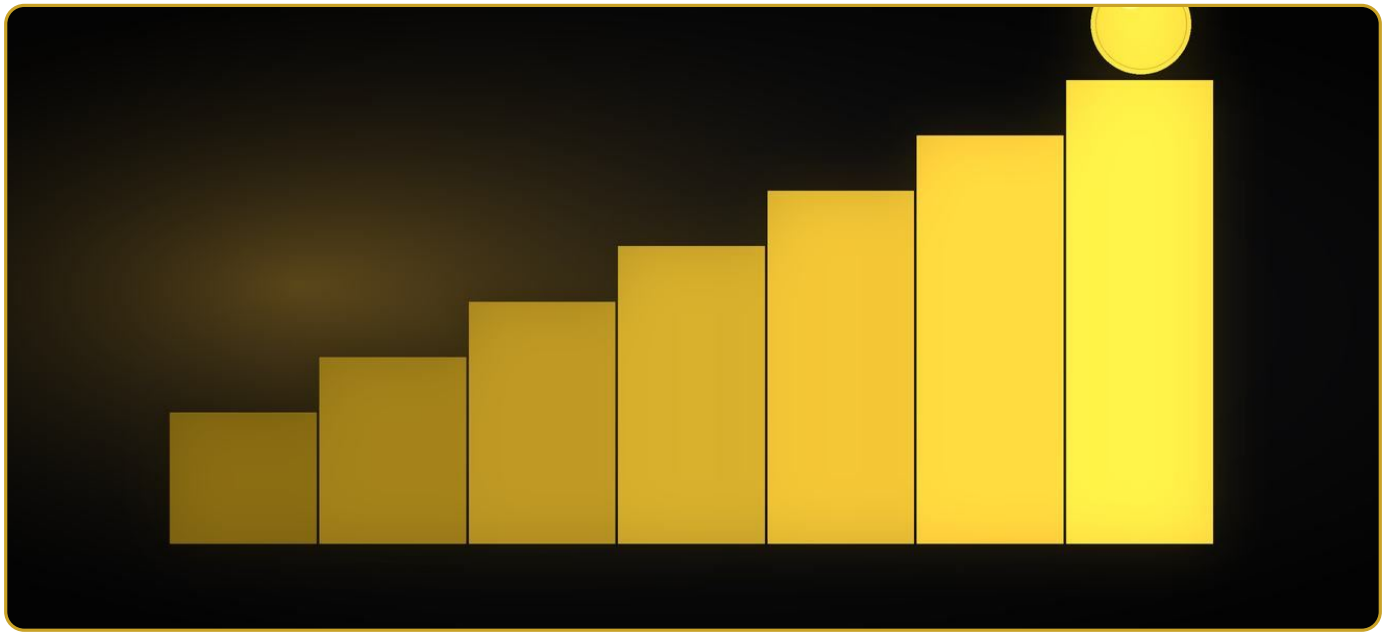

Many workplaces offer a retirement plan with an employer match: they add money when you contribute. If your employer matches 50% of your contributions up to 6% of a $60,000 salary, you put in $3,600 and they add $1,800. Plans and rules differ by country.

TRY THIS

Find out whether your workplace has a retirement plan and a match. Write the match rule. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

SKIPPING THE MATCH

Not taking a match means refusing part of your pay. On the example above, over 20 years of the combined $5,400 a year at a hypothetical 7% return the pot reaches $234,417. It is an example, not a forecast.

TRY THIS

If there is a match, write the percentage you would need to contribute to get all of it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

LEARN THE TAX WRAPPER

Retirement accounts often come with tax benefits, such as paying tax now or paying it later. The details vary by country and change over time.

TRY THIS

Write the name of the retirement account type in your country and one tax rule you have verified from an official source. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE DISTANT SELF

People tend to treat their future self like a stranger. Research on this suggests that picturing your older self makes saving feel more personal.

TRY THIS

Write a short note to yourself at 65. What do you want to be able to say? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

CHECK THE DEFAULT

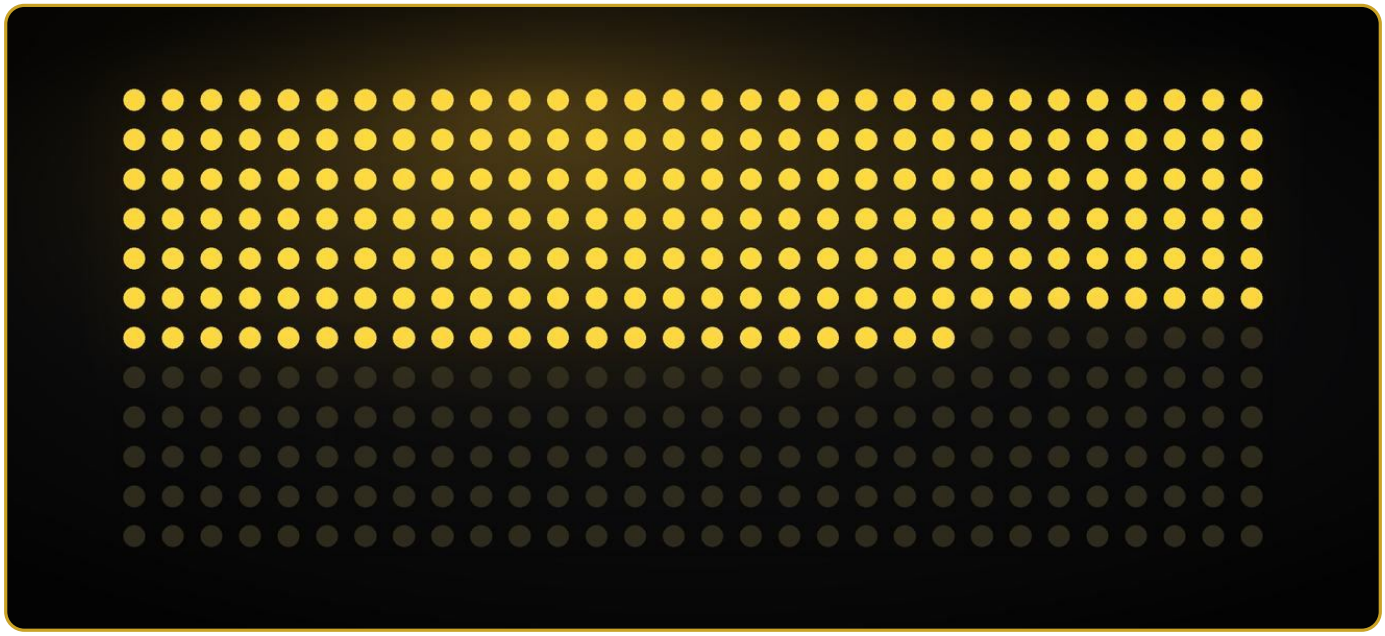

If you have a workplace plan, check what the default investment choice is and what percentage you are contributing. Many people never revisit it.

TRY THIS

Log in and write the contribution rate and the fund you are in. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

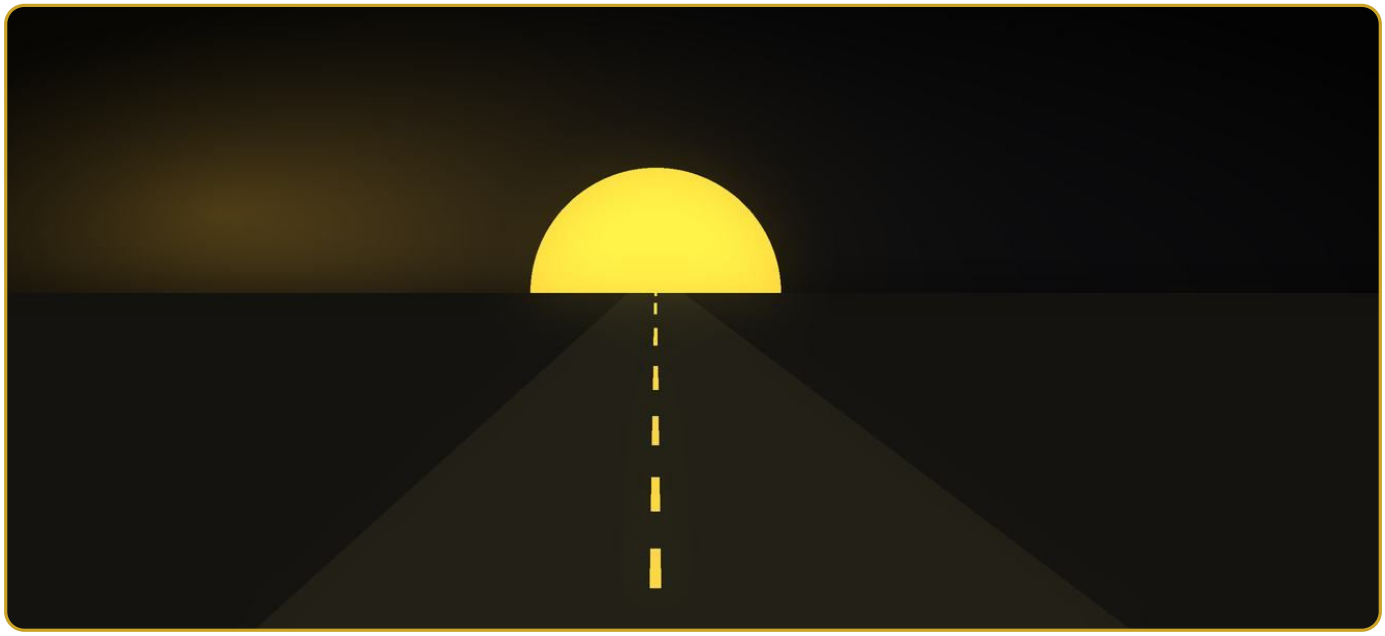

WEEKLY CHECK-IN

What did you find out about your retirement options this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

VOLATILITY IS THE PRICE

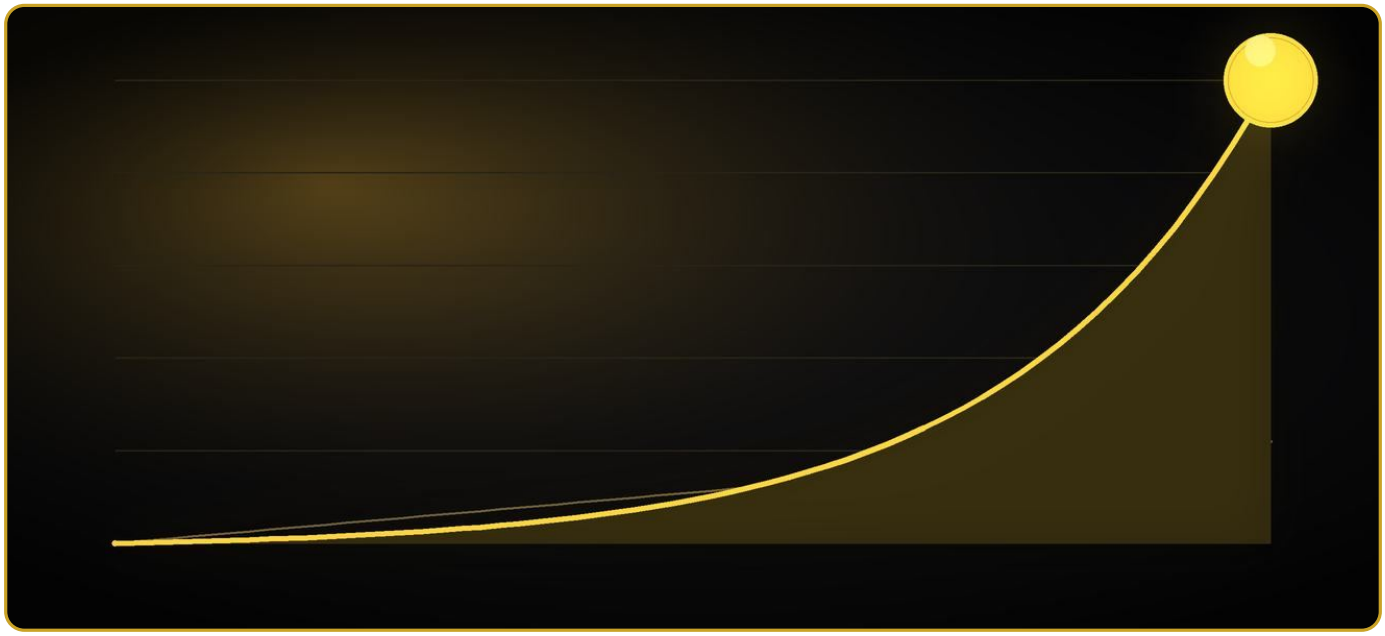

Investments that can grow can also fall. Volatility is how much the value jumps around. It is the price of long-term growth, and it is why you do not invest money you will need soon.

TRY THIS

Draw a zigzag line that trends upward. Write beside it what each drop would feel like. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

BIG DROPS HAPPEN

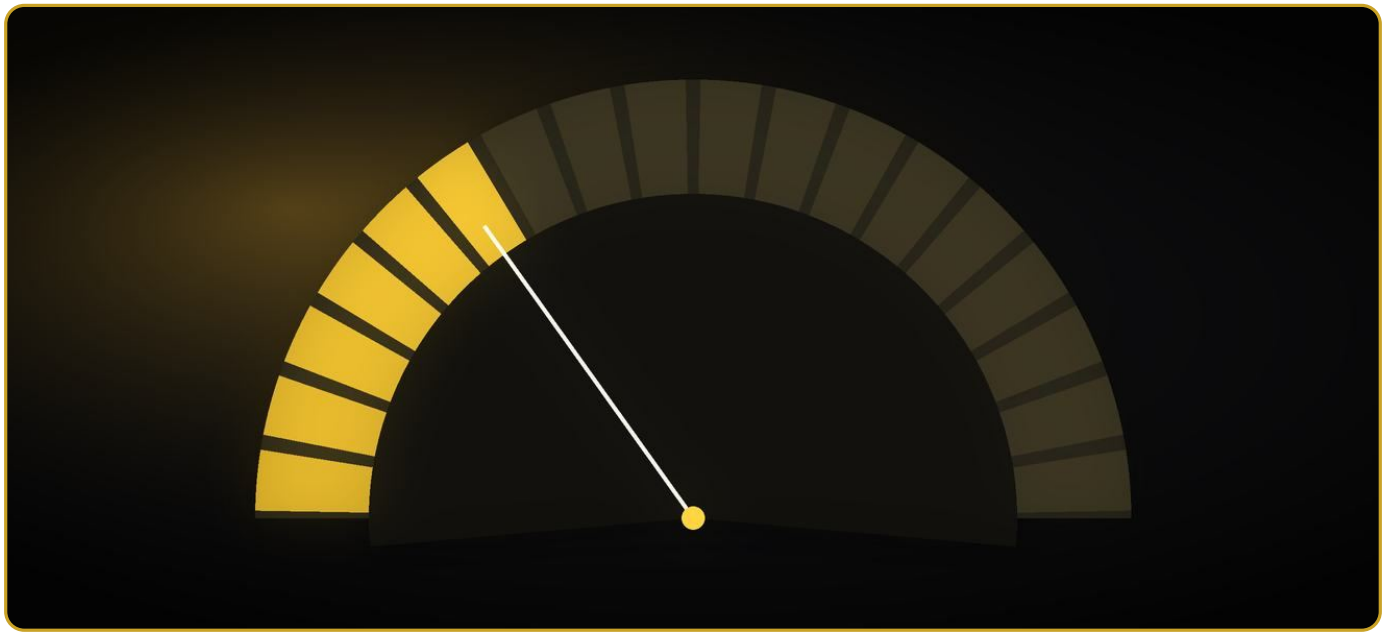

Stock markets have fallen by more than half in the past: US stocks dropped by more than 50% between 2007 and 2009. A $10,000 investment that falls 50% loses $5,000 and has $5,000 left. It then takes a 100% gain just to get back to even.

TRY THIS

Write how much a 50% drop on your own investments would be in dollars. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

KNOW YOUR RISK COMFORT

Risk tolerance is how much loss you can live with without selling in a panic. Imagine your investments down 30% for a year. What would you do? Write the truth.

TRY THIS

Write your honest reaction to a 30% fall. Do you buy, hold or sell? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

RECENCY BIAS

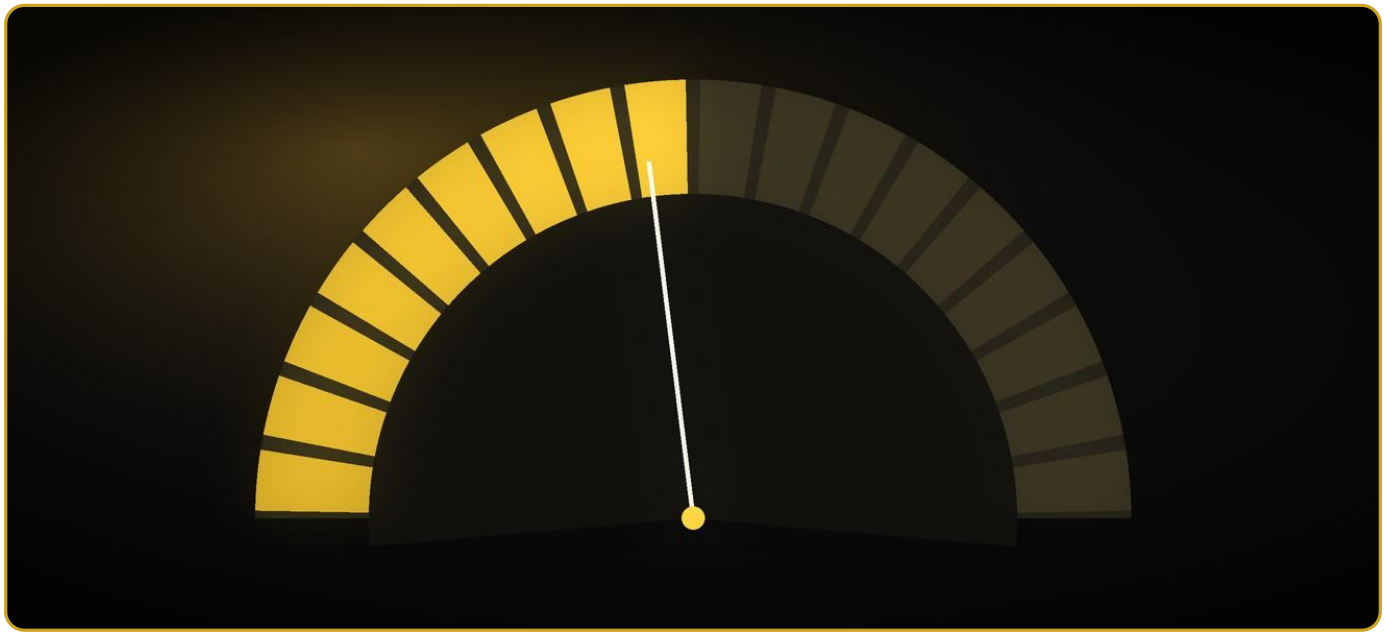

We overweight what happened recently. After good years, people think good years last. After a crash, they think it will not end. Both are guesses dressed as facts.

TRY THIS

Write one belief about markets that is based only on the last few years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

A WRITTEN PLAN

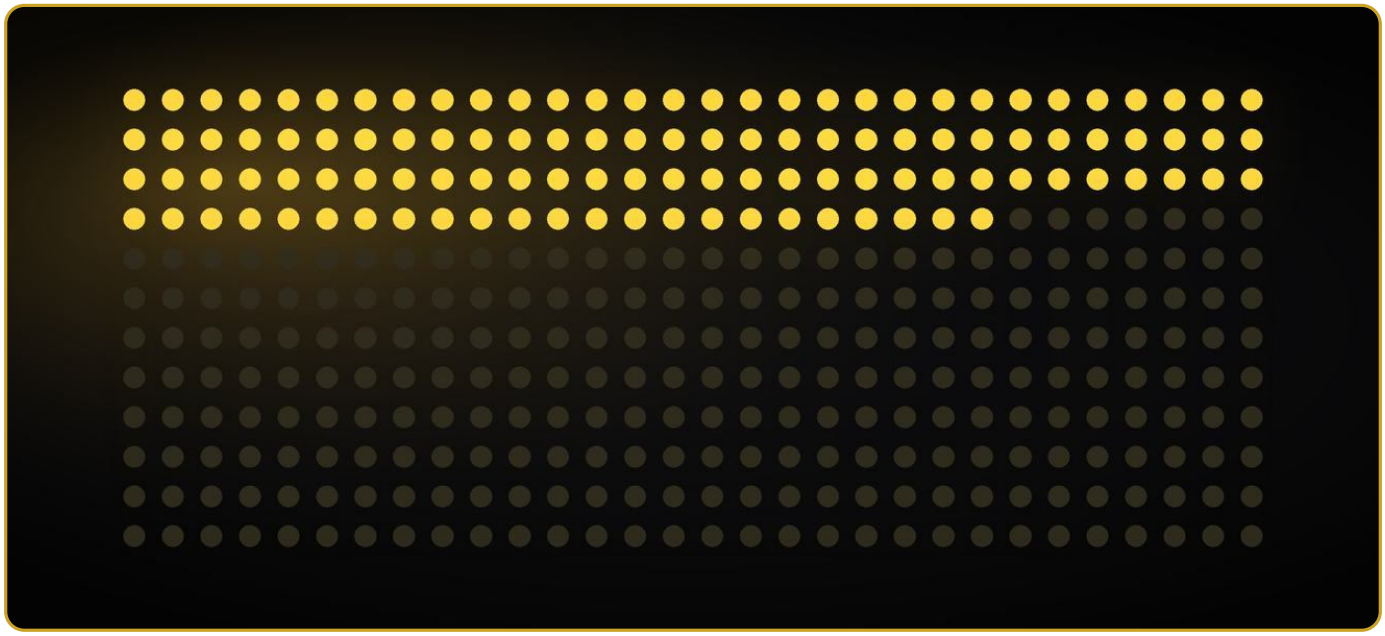

A one-page plan with your goals, your mix of investments and what you will do in a crash stops you from improvising under stress.

TRY THIS

Write a three-line plan: what I own, how often I add, what I do when it falls. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

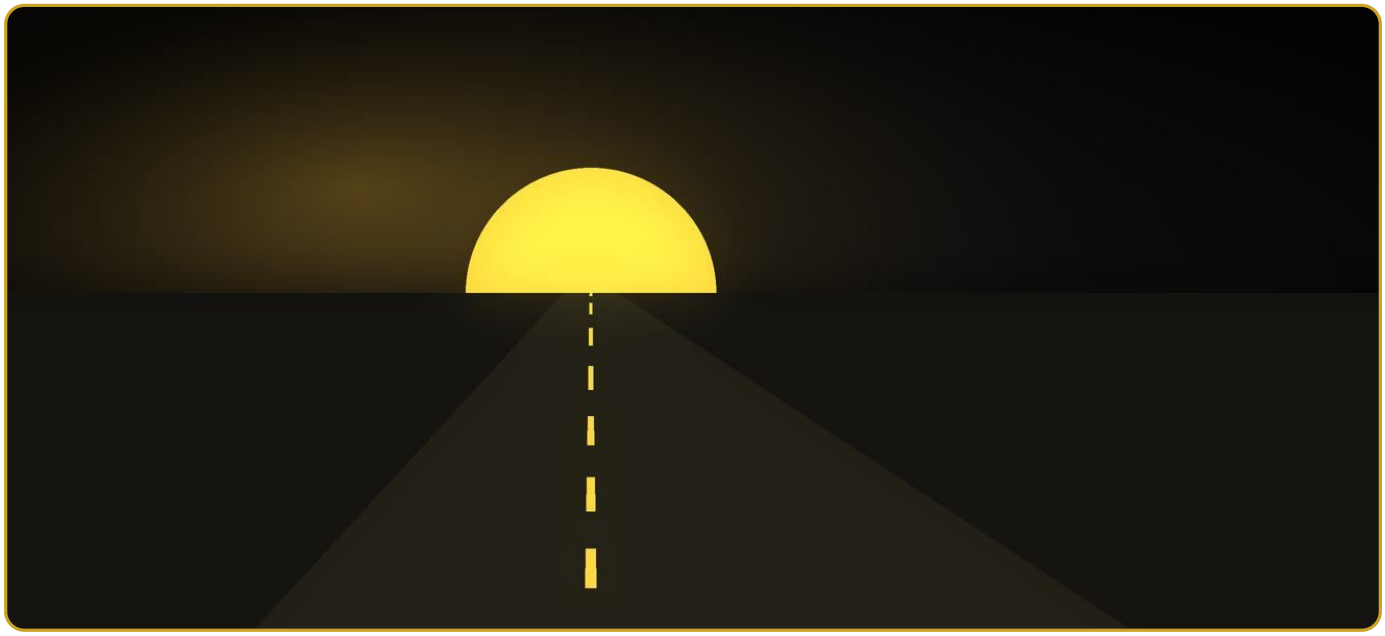

WEEKLY CHECK-IN

How did you react to any market news this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

What helps you stay calm when things are uncertain?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

TIME FOR MONEY, OR MONEY FOR MONEY

Active income comes from your time and work. Passive income comes from assets you own, such as investments, rental property or a business that runs without you. Passive rarely starts passive: it usually takes capital or years of work to build.

TRY THIS

Draw two columns: Active and Passive. List every income source you have in the right one. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE PASSIVE NUMBER

A common rule of thumb says a portfolio can pay out about 4% a year. At that rate, $2,000 a month of passive income needs about $600,000 invested. That 4% figure comes from US research done in the 1990s and is a guideline, not a guarantee.

TRY THIS

Write the monthly amount you would want from passive income. Multiply it by 12, then divide by 0.04. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

BUILD THE ROAD

Investing $1,000 a month at a hypothetical 8% a year would take about 20.2 years to reach that amount. Change the monthly amount or the target and the date moves.

TRY THIS

Write your target and how long it would take at the monthly amount you could invest. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

PASSIVE IS A SLOGAN

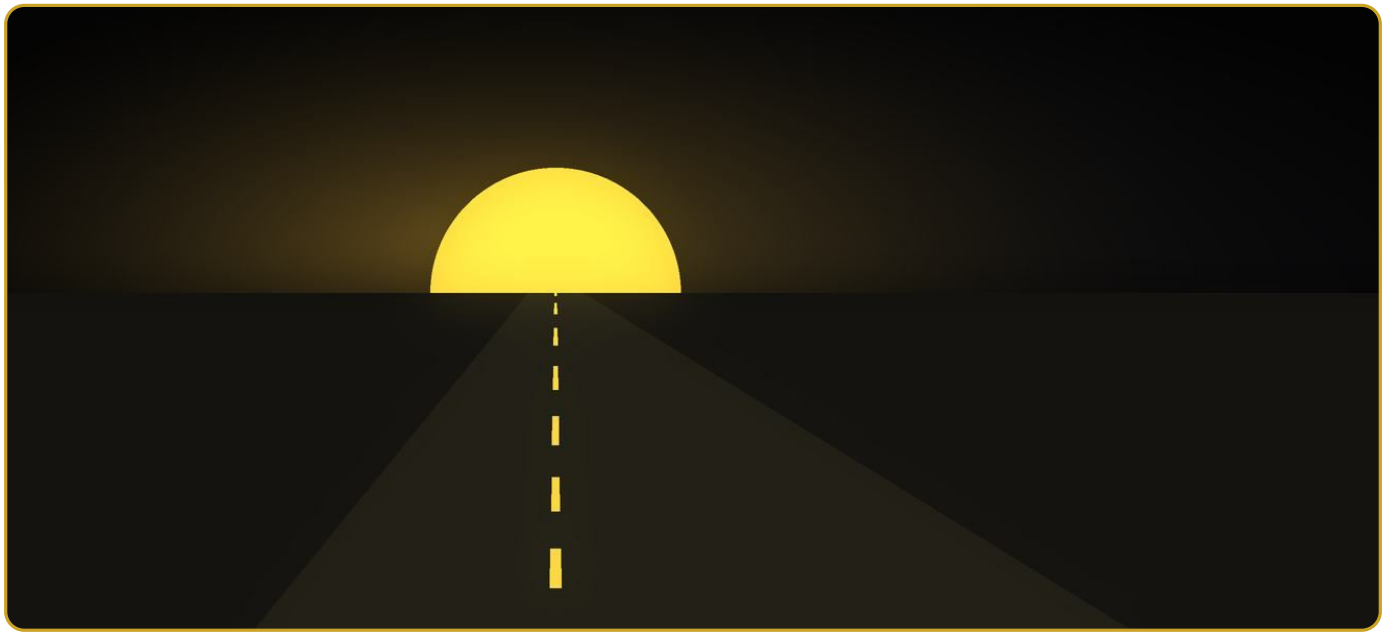

Many online promises call income passive when it is really work you do first. That does not make it bad. It only means plan for the work, not for a miracle.

TRY THIS

Write one income stream you have seen advertised as passive and what work it might hide. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

INCOME AUDIT

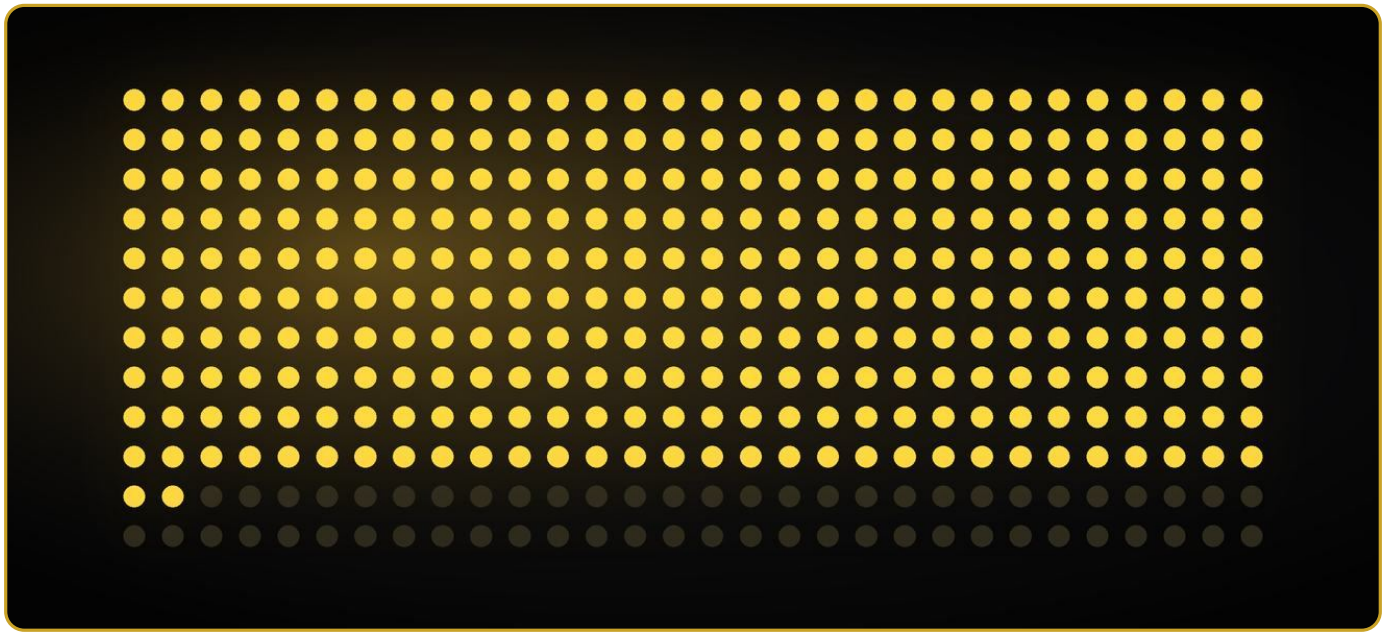

Add up each source of income and mark how many hours it takes. Dollars per hour is a useful honest number.

TRY THIS

Write each source's monthly income and weekly hours. Divide. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Which of your income streams gave the most money per hour this week?

Money in this week $

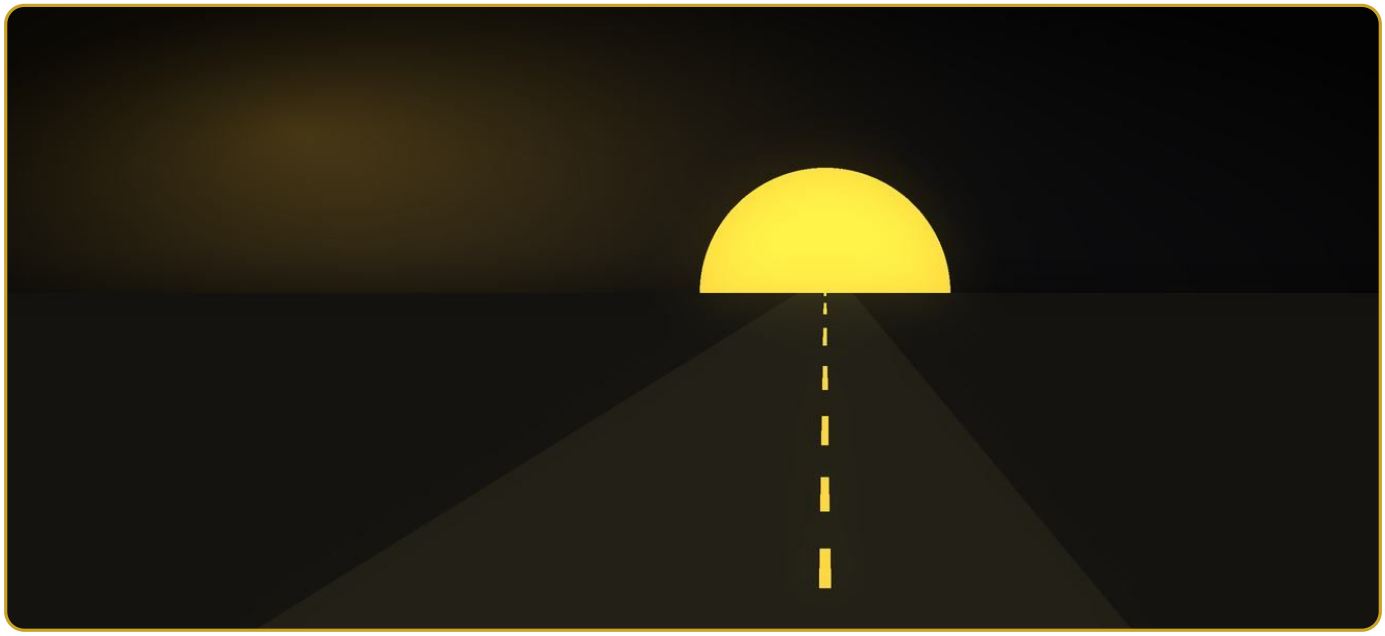

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

YOUR BIGGEST ASSET IS YOU

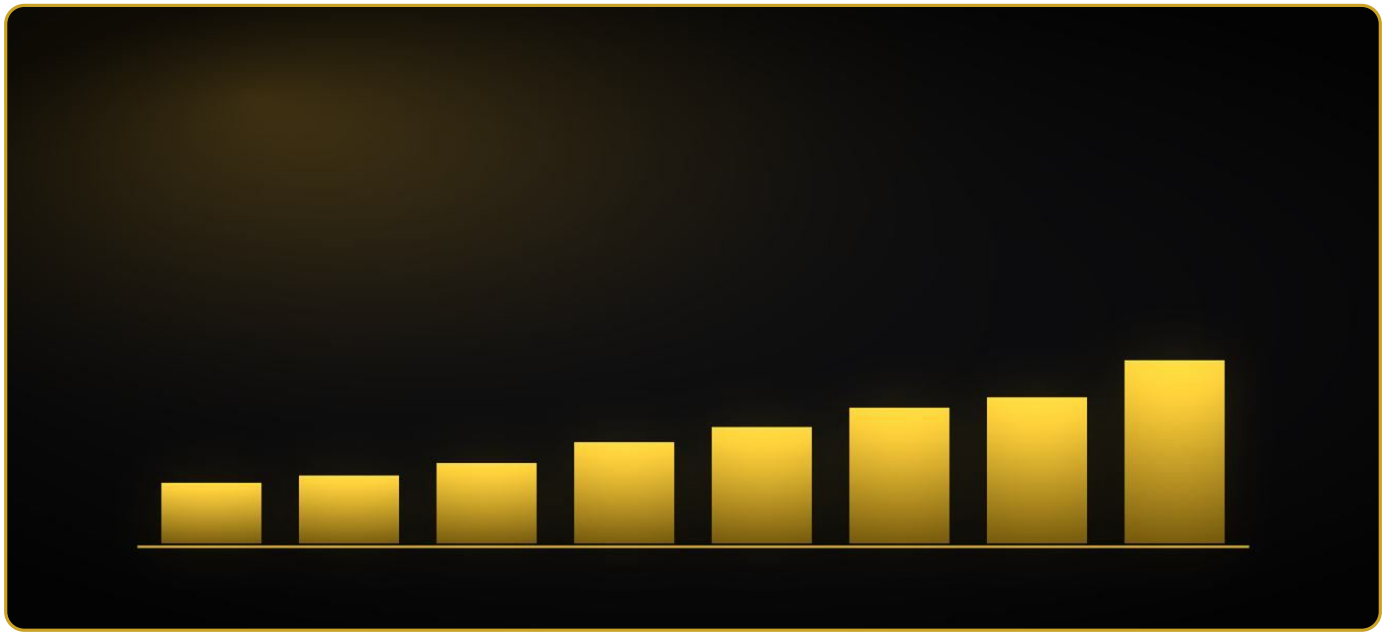

For most people, the largest financial lever in their 20s and 30s is income, not investment returns. A raise of 5% compounds across every future year of work.

TRY THIS

Write your current pay and the pay you would like in two years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

A RAISE COMPOUNDS

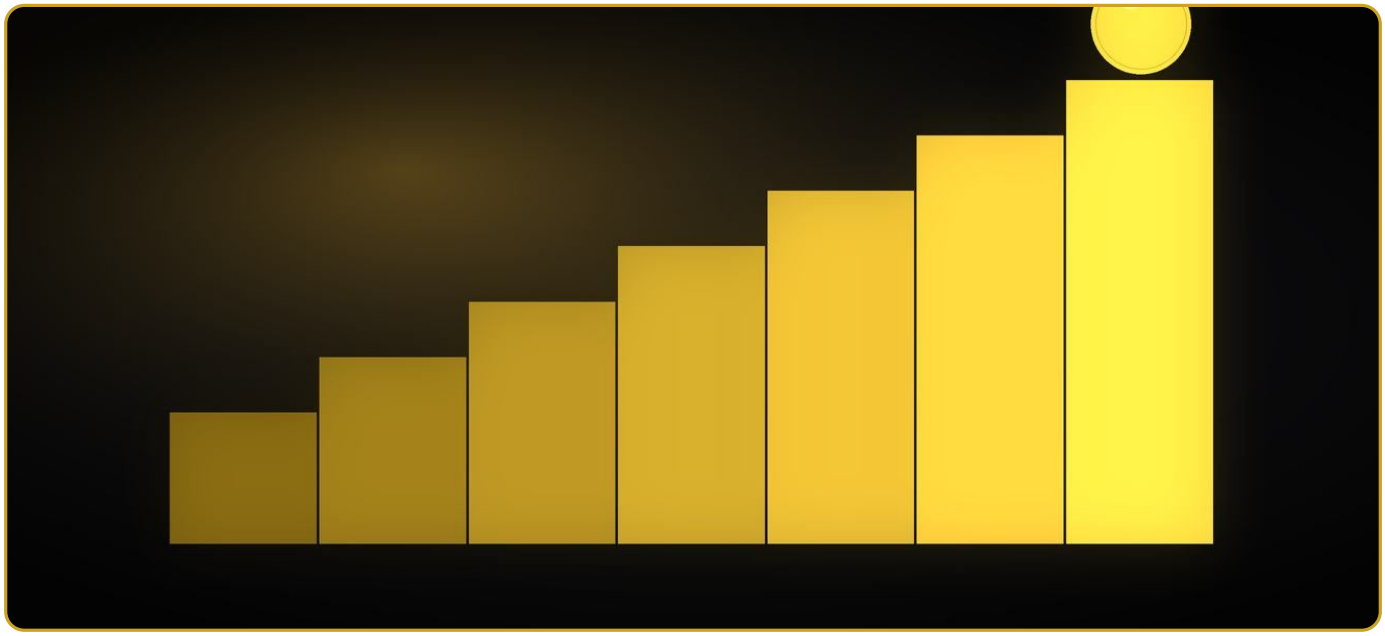

A $60,000 salary growing 3% a year for 10 years reaches $80,635. Without any increases it stays at $60,000, and with the cost of living rising, that is a pay cut over time.

TRY THIS

Write what your pay would be after 10 years of 3% growth. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

COLLECT YOUR EVIDENCE

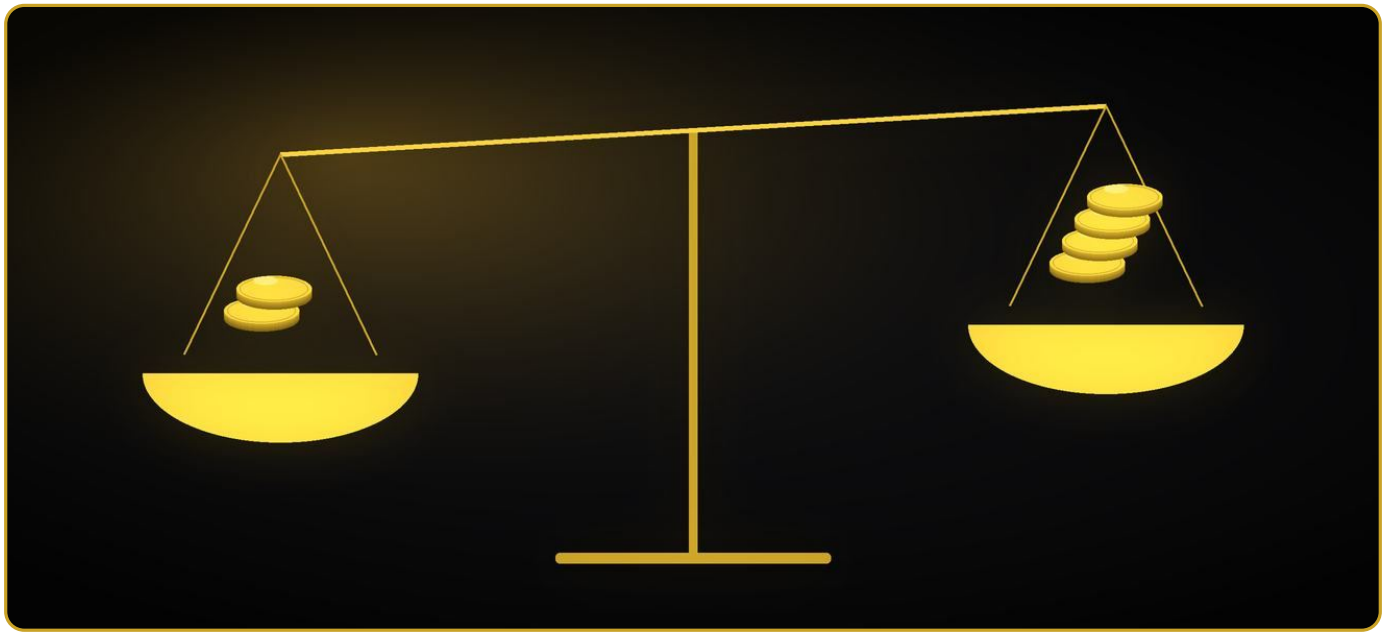

A good case for a raise lists what you did, the results, and what similar roles pay in your market. Specific facts beat feelings.

TRY THIS

Write five things you did in the past year with a number or result for each. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE FEAR OF ASKING

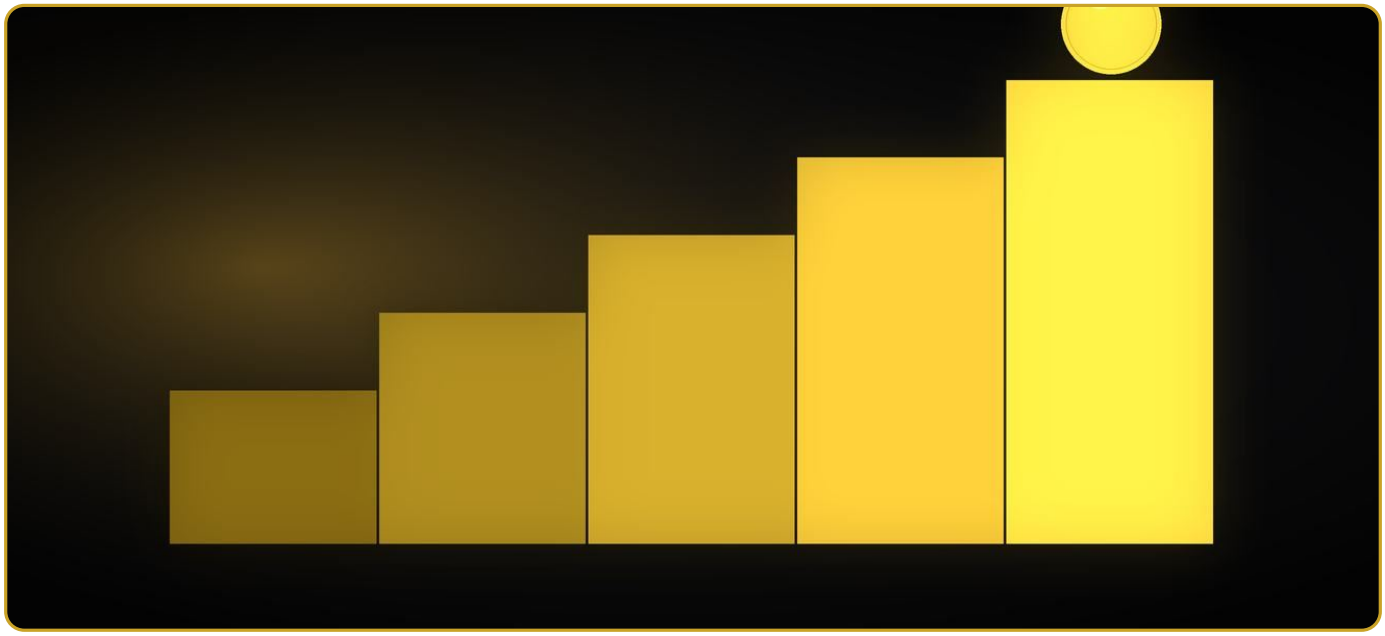

Many people avoid negotiating because it feels risky. Asking politely with evidence usually costs little. The common answer, even if no, can still open a path to a plan.

TRY THIS

Write the script of the first two sentences you would say. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

ASK OR PLAN

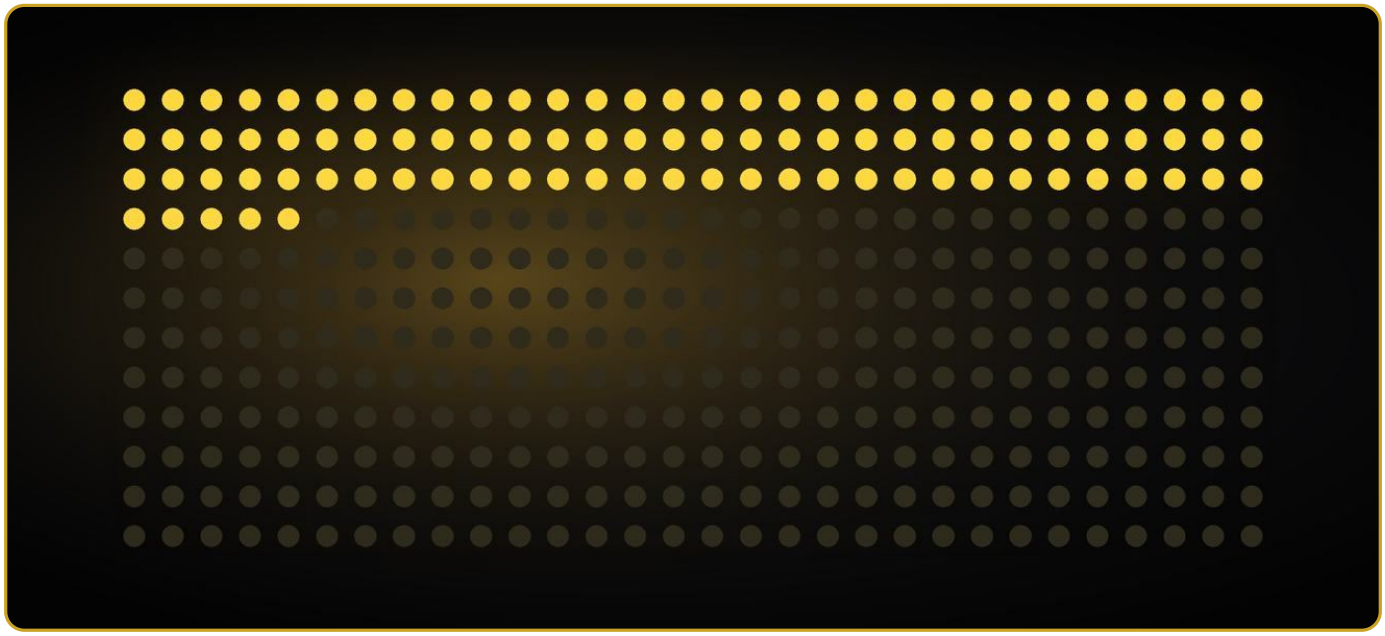

Schedule the conversation or write the date you will be ready to have it.

TRY THIS

Put the date in your calendar and write it here. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

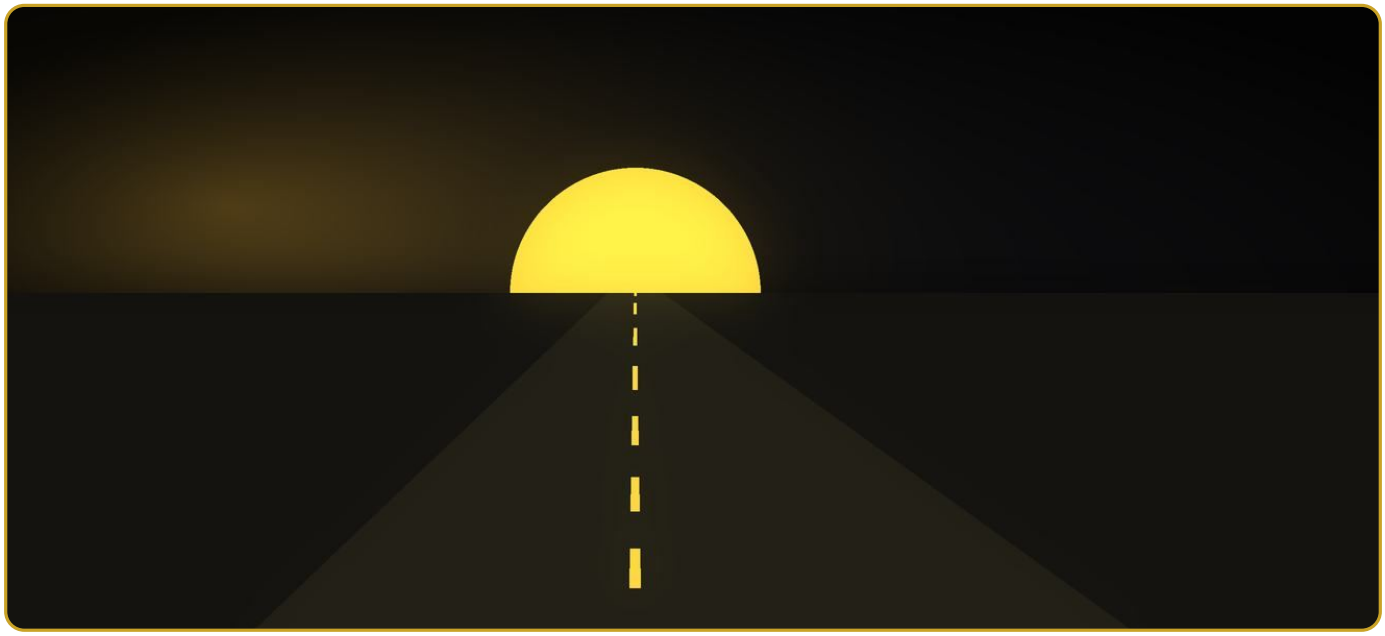

WEEKLY CHECK-IN

What did you do this week that you could use as evidence for your value?

Money in this week $	Spent this week $

Money mood this week (1) (2) (3) (4) (5)

LEARN

A SECOND STREAM

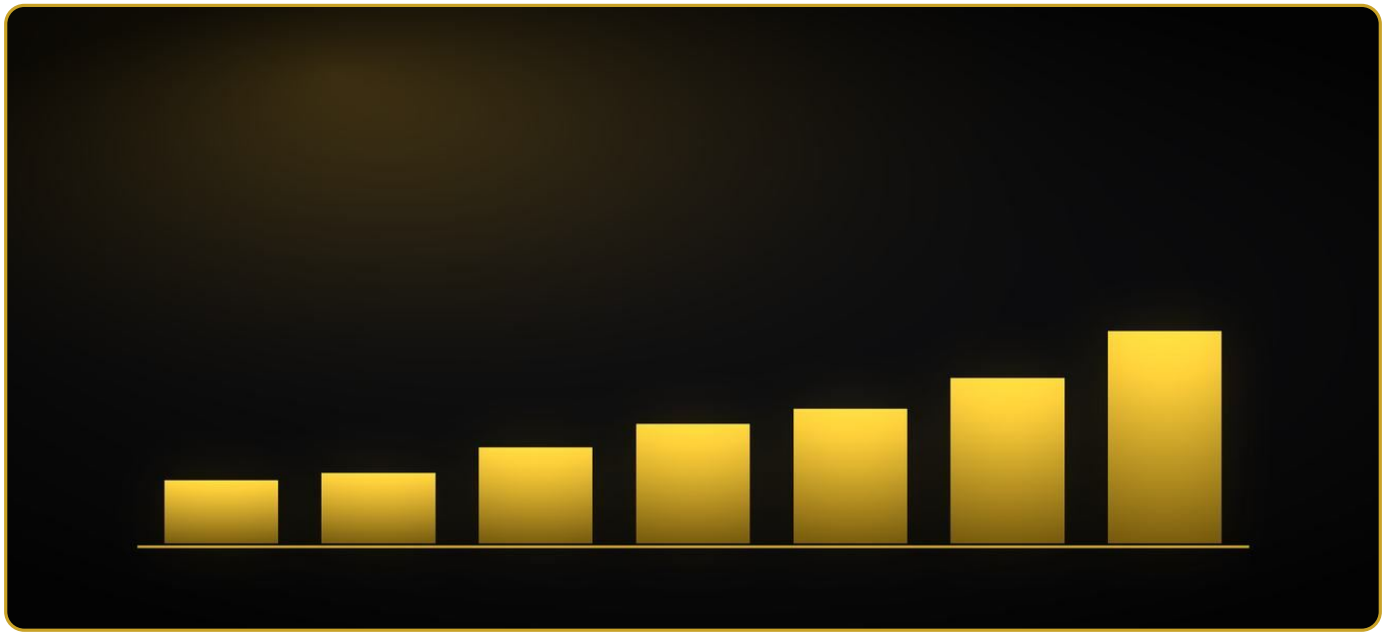

A side income can speed up debt payoff and saving. Common starting places are skills you already have: tutoring, freelance work, repairs, design, writing. Most take time before they pay.

TRY THIS

List five skills you have that someone else might pay for. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

WHERE IT GOES

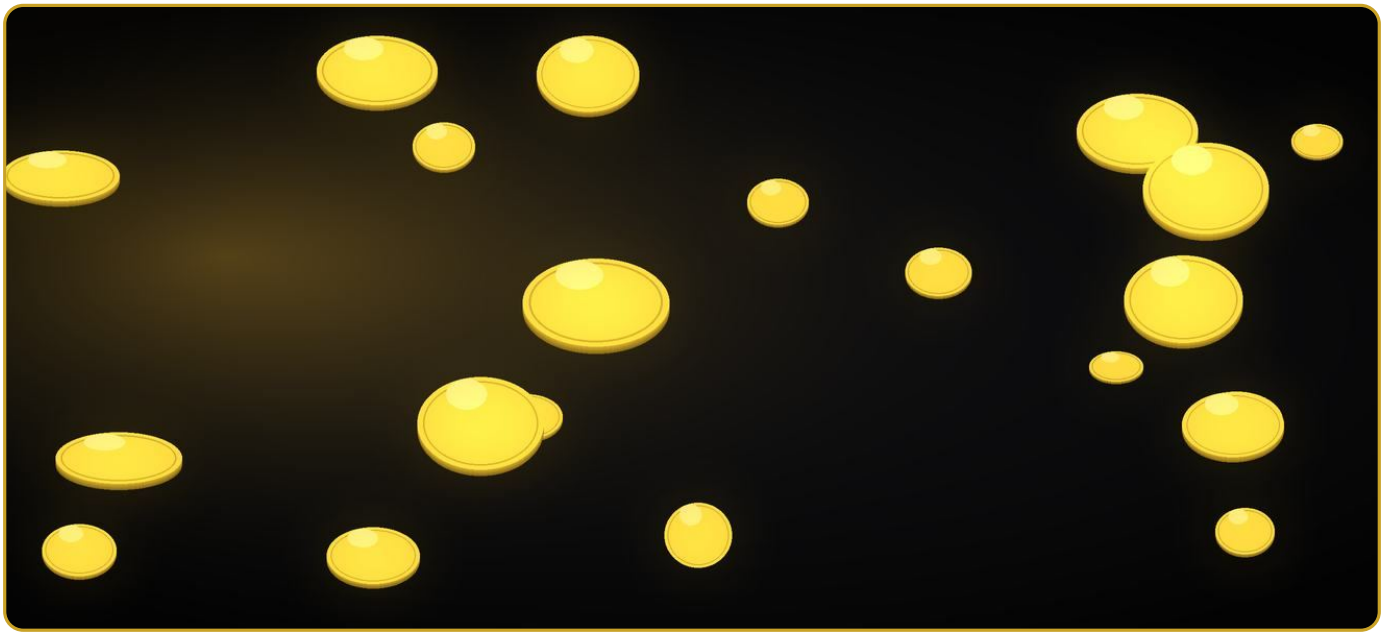

An extra $1,000 a month from a side income, invested at a hypothetical 8% a year for 10 years, becomes $182,946. You put in $120,000. It is only possible if the side income lasts and you save it.

TRY THIS

Write what an extra $300 a month would do for you over a year. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

TEST SMALL

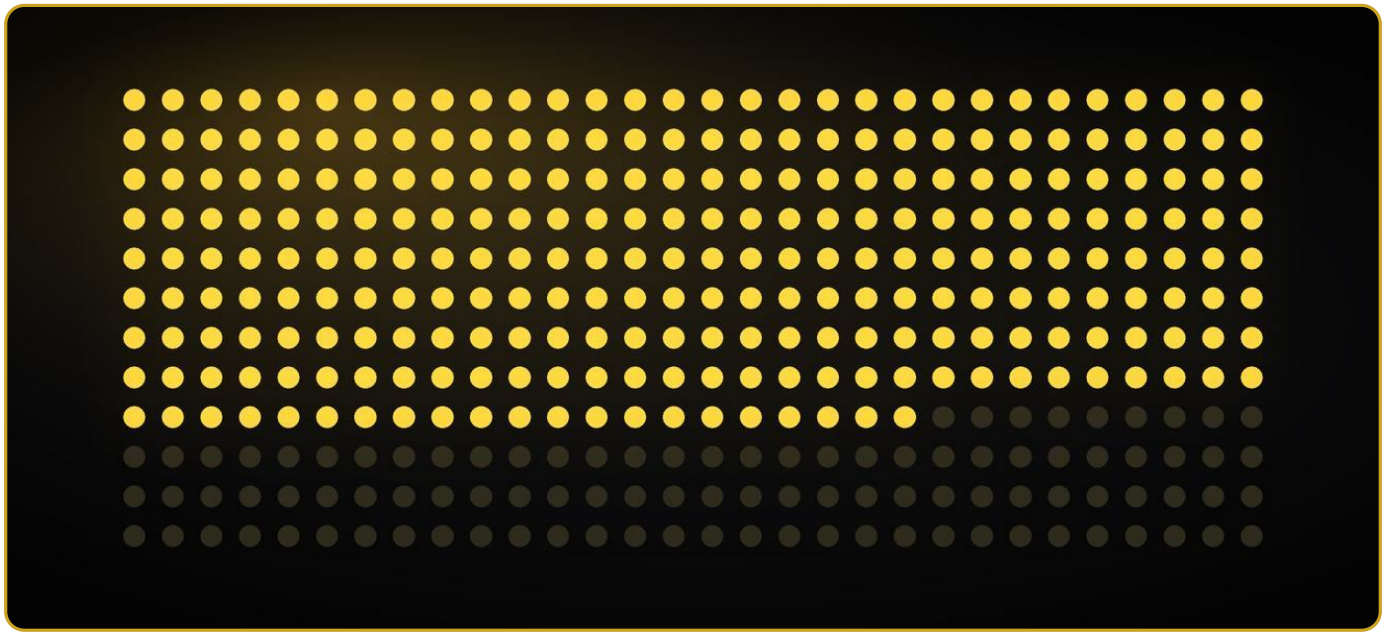

Test an idea for 30 days before you spend money on it. Find one person who would pay and ask. Real customers teach more than plans.

TRY THIS

Write the idea, the person you will ask and the date. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

HONEST ODDS

Most new businesses close. About one in five US businesses close in their first year and close to half by their fifth year, according to the US Bureau of Labor Statistics. A side income is a way to learn with less risk.

TRY THIS

Write what you could lose and what you could learn from a 30-day test. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

TRACK THE HOURS

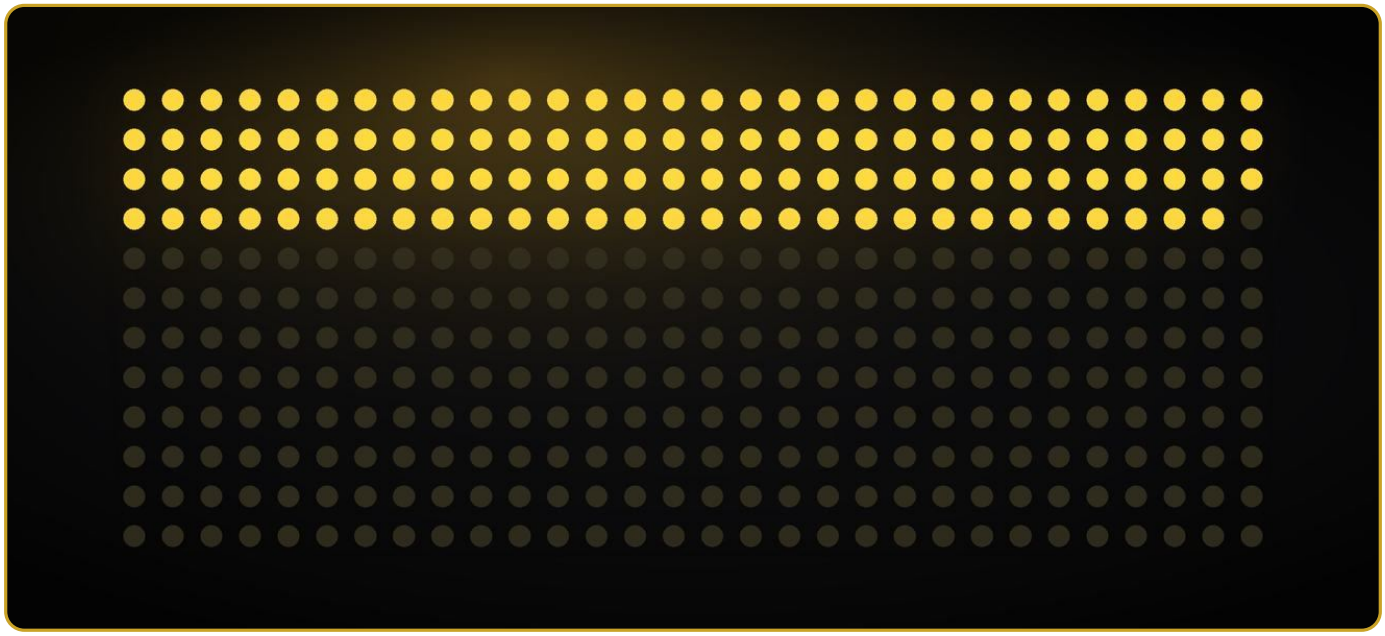

Write down the hours and income of any side work. Tracking tells you whether the effort is worth it.

TRY THIS

Start a simple log: date, hours, income. Fill in this week. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

WHY SOME WORK PAYS MORE

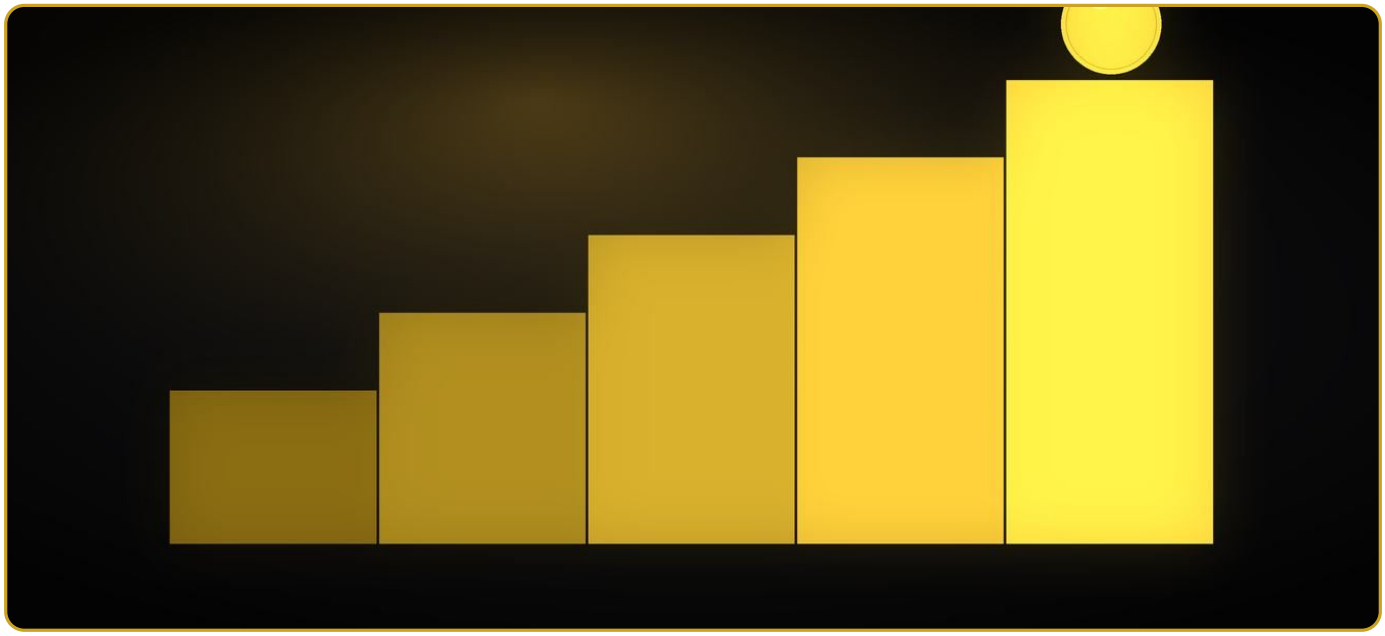

One way to think about value: the bigger the result a customer wants and the more they believe you can deliver, the more they will pay. The less time and effort it takes them, the more they will pay. Raise the top, shrink the bottom.

TRY THIS

Write the dream outcome your work gives someone, in one sentence. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

HOURLY TO VALUE

A freelancer charging $30 an hour for 10 hours earns $300. A fixed price of $500 for the same result also earns $500 but shifts the focus from time to outcome. If they get faster, the effective rate on 5 hours is $100 an hour.

TRY THIS

Write how you could price one of your skills by result instead of by hour. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

SHRINK THE WAIT

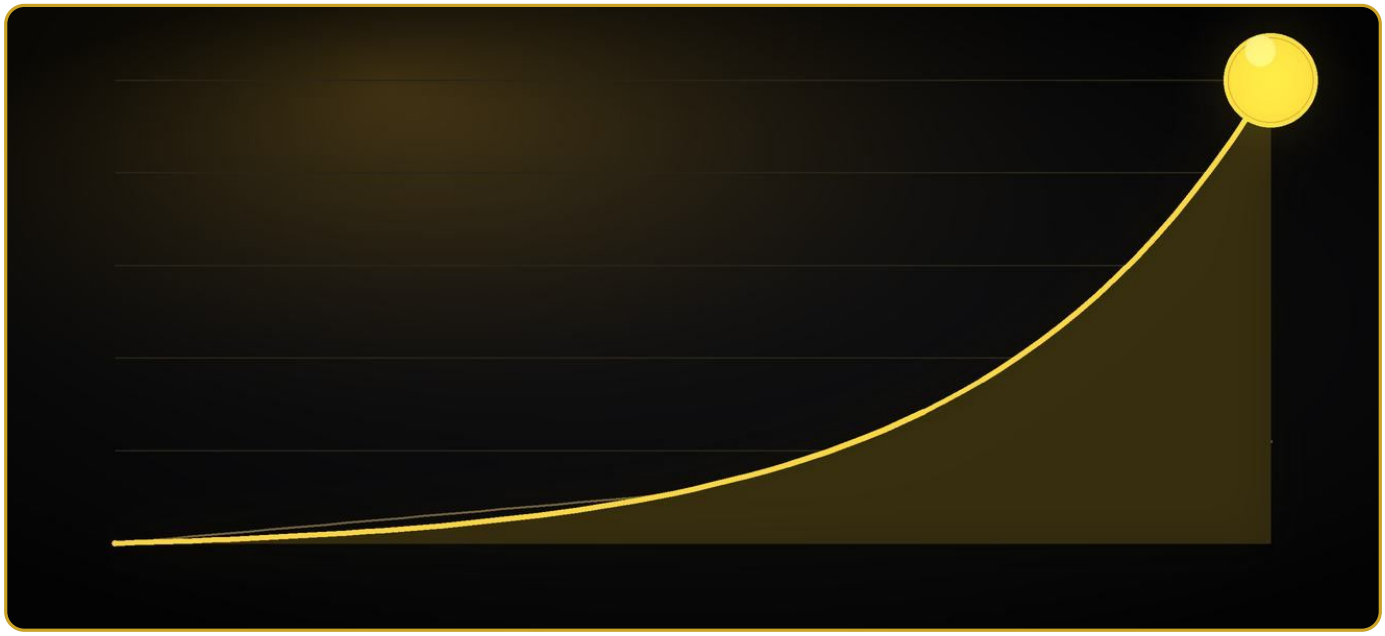

People pay more for speed and simplicity. Look at what makes your work slow or hard for the customer and fix one thing.

TRY THIS

Write one step that makes your service slow or confusing for the customer. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

PROOF BUILDS BELIEF

People believe what they can see: examples, reviews, before-and-after, a clear guarantee you can honour. Never invent proof.

TRY THIS

Write one honest piece of proof you could collect this month. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

LEARN A SKILL

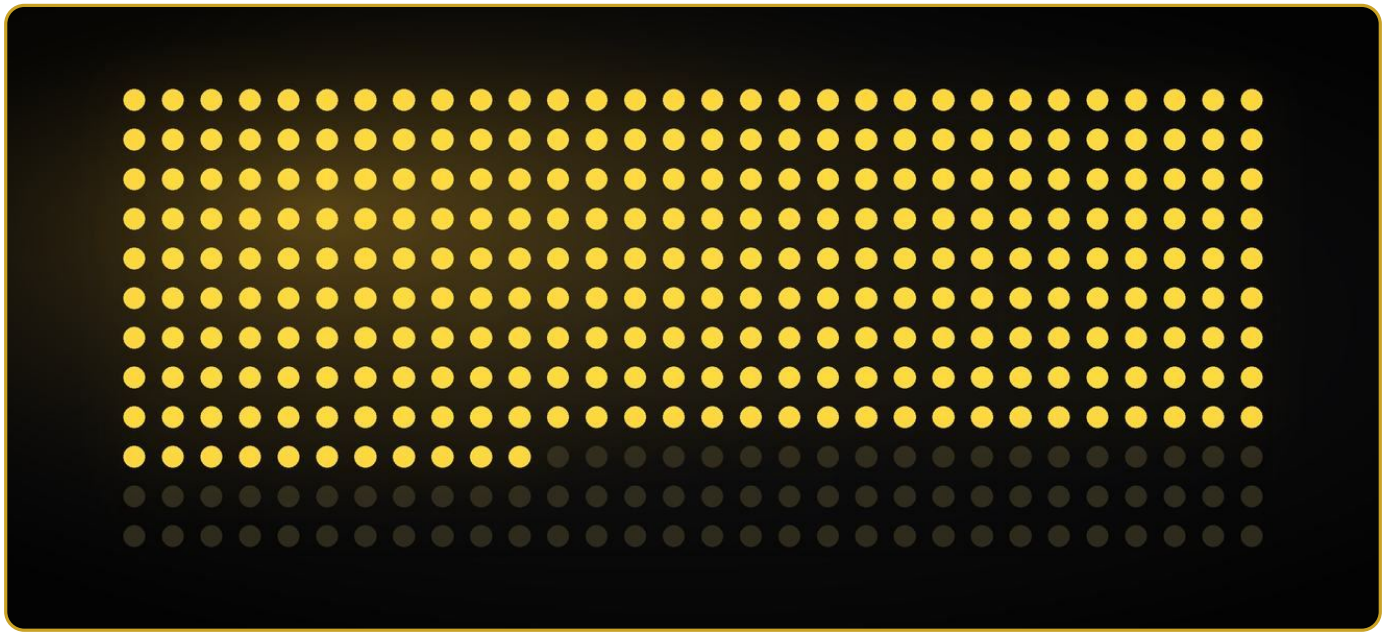

Skills that solve costly problems tend to pay more. Pick one skill that would raise your value and give it 30 minutes.

TRY THIS ☐

Schedule 30 minutes for the next three days on one skill.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE POCKET TEST

One simple definition says an asset puts money in your pocket each month, and a liability takes money out. By that test, a home you live in is a liability while it costs you money each month, even if its value may rise. Not everyone defines it this way.

TRY THIS

Sort everything you own into two columns: puts money in my pocket, takes money out. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

CASH FLOW, NOT VALUE

A rental that earns $1,500 a month and costs $1,200 in loan, tax, repairs and insurance has a positive cash flow of $300 a month. A car that costs $450 a month is a negative cash flow of $450. Cash flow is what your monthly bank balance feels.

TRY THIS

Write the monthly cash flow of one thing you own, positive or negative. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

THE EXPENSE TRAP

The rat race is a cycle: earn, spend more as you earn more, and need the next paycheck. You step out when your passive income covers your monthly expenses.

TRY THIS

Write your monthly expenses and your current passive income. Divide the second by the first. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

GOOD AND BAD DEBT

Debt that buys something that pays you can make sense. Debt that buys something that only costs you rarely does. Both carry risk. The line is thinner than it looks.

TRY THIS

Write one debt you have and decide honestly which side it is on. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

ONE ASSET STEP

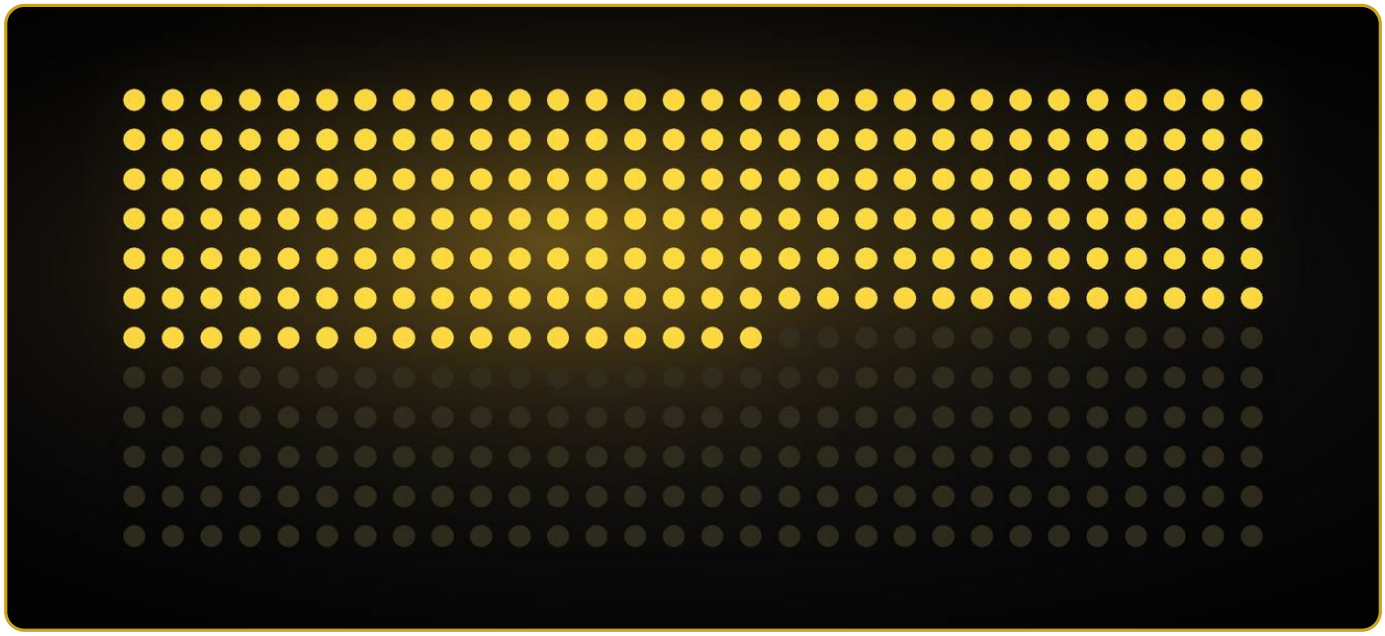

Choose one small step toward owning something that pays you: an index fund purchase, a skill course, a first customer.

TRY THIS ☐

Write the step and the date you will take it.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

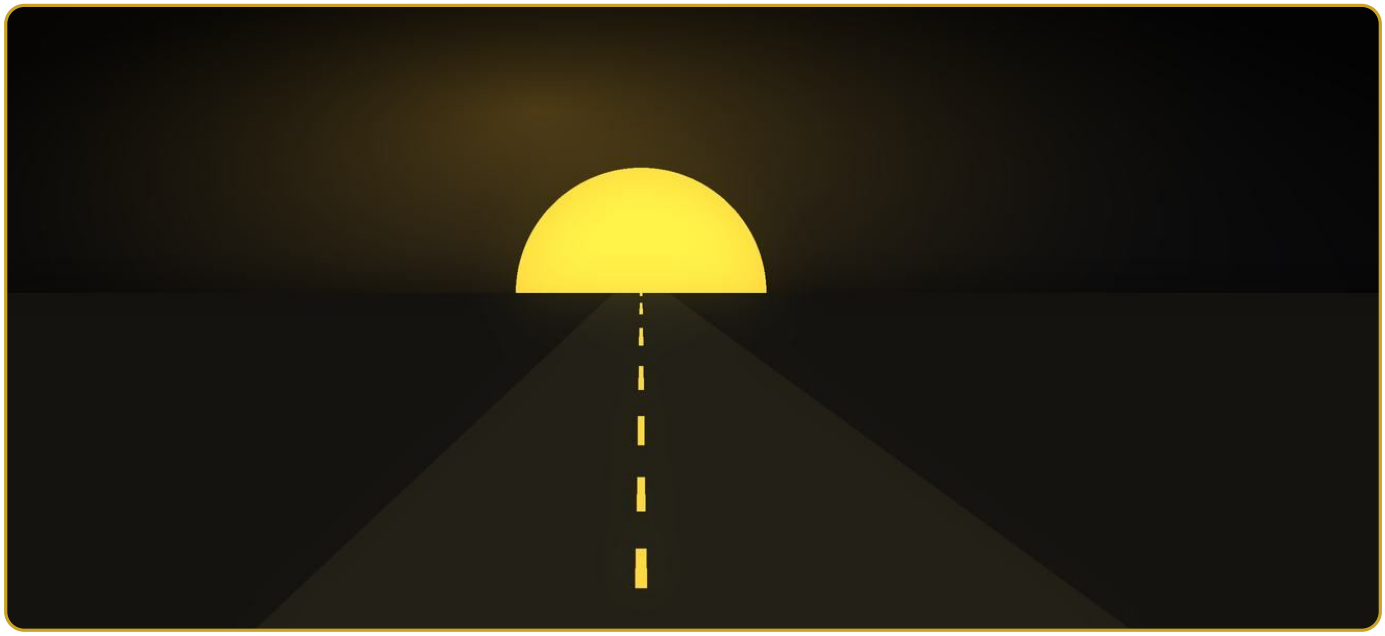

WEEKLY CHECK-IN

Did any money go to something that pays you instead of something that costs you?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

LEARN

VOLUME BEATS HOPE

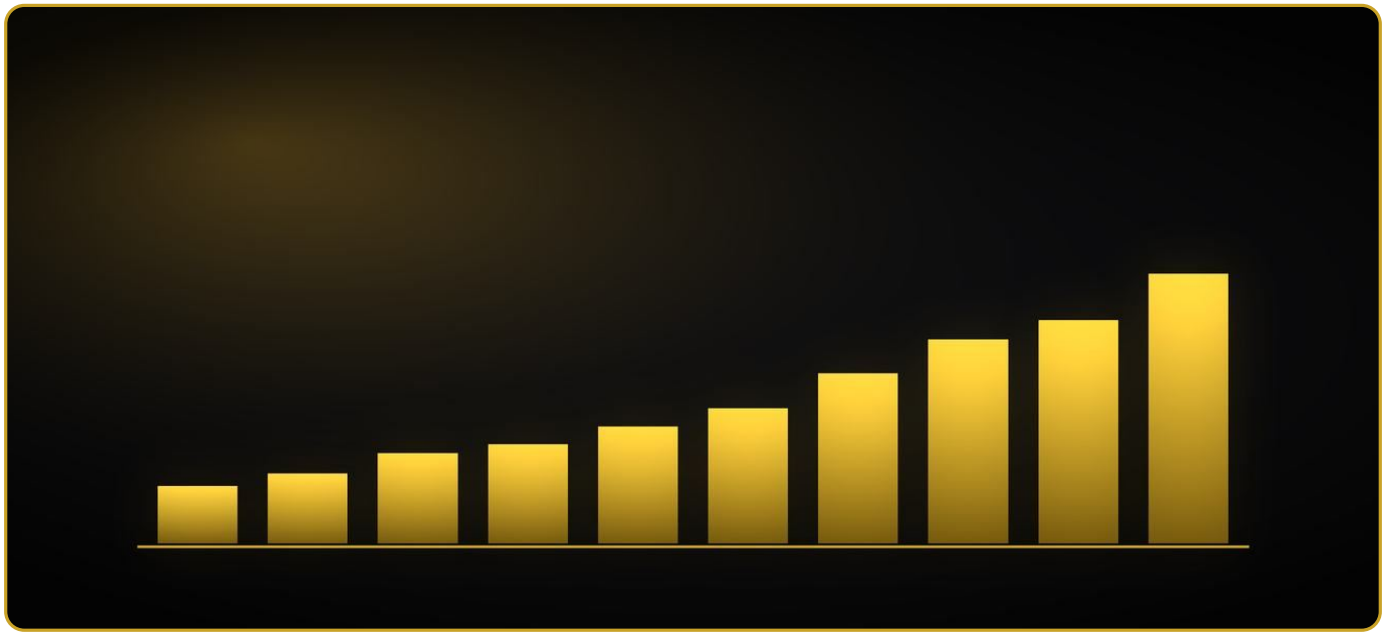

The Rule of 100 is a business habit: do 100 primary actions a day for 100 days, such as 100 outreaches or 100 minutes of making content. It makes effort measurable. It does not promise a result.

TRY THIS

Write the one action you would repeat 100 times a day if you were building income. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

DO THE MATH

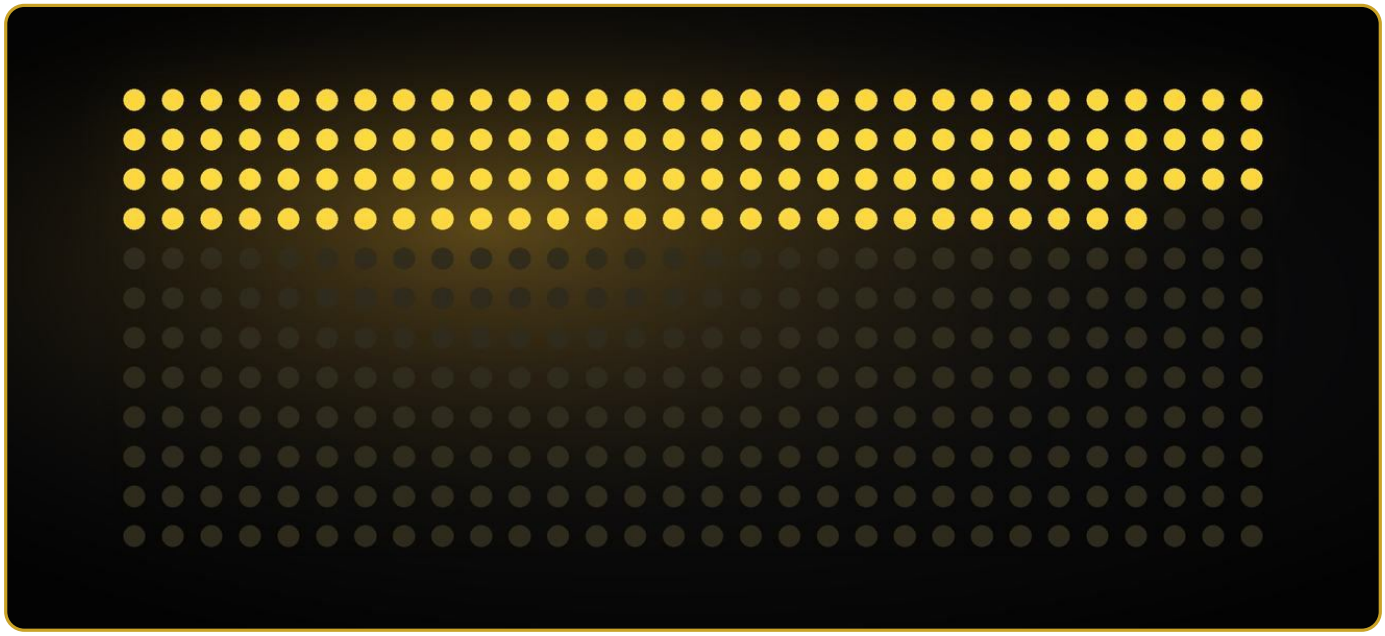

100 outreaches a day for 100 days is 10,000 contacts. If 1% of them said yes, that is 100 customers. The 1% is a hypothetical number: your real rate could be higher, lower or zero.

TRY THIS

Write a yes-rate that you think is fair, and calculate the result for your own plan. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

TRACK THE FUNNEL

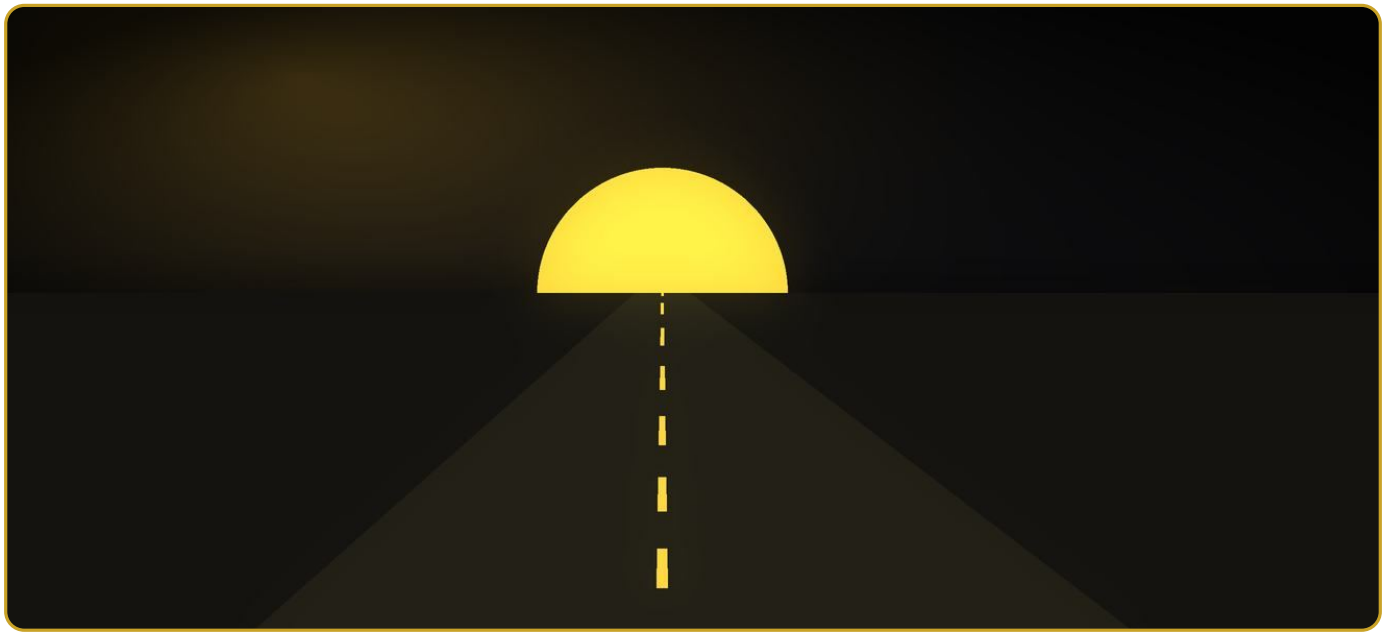

Count how many people you contact, how many reply, how many say yes. Funnel numbers show where the work leaks.

TRY THIS ☐

Make a tally with three columns: contacted, replied, yes. Fill in today.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE HONEST CATCH

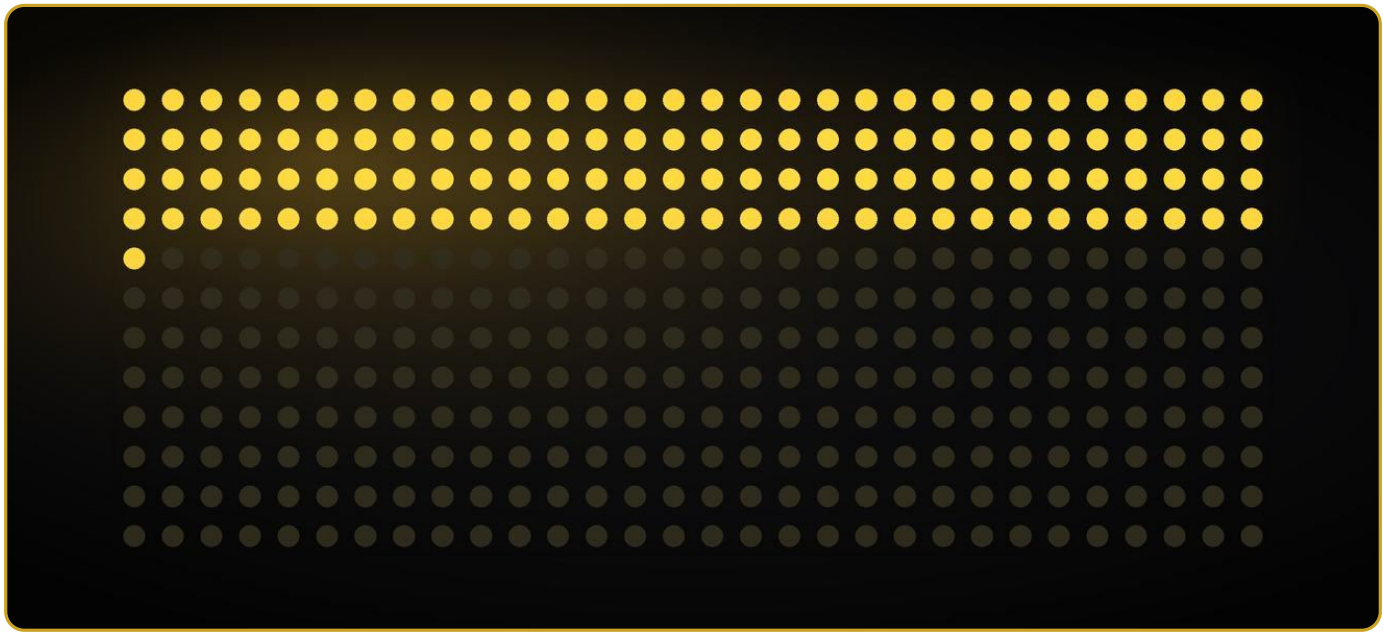

These are methods for building active income first. Most new businesses do not last. The people who teach these methods often worked for years before it paid off.

TRY THIS

Write what you would be willing to try for 100 days and what would tell you to stop. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

START DAY ONE

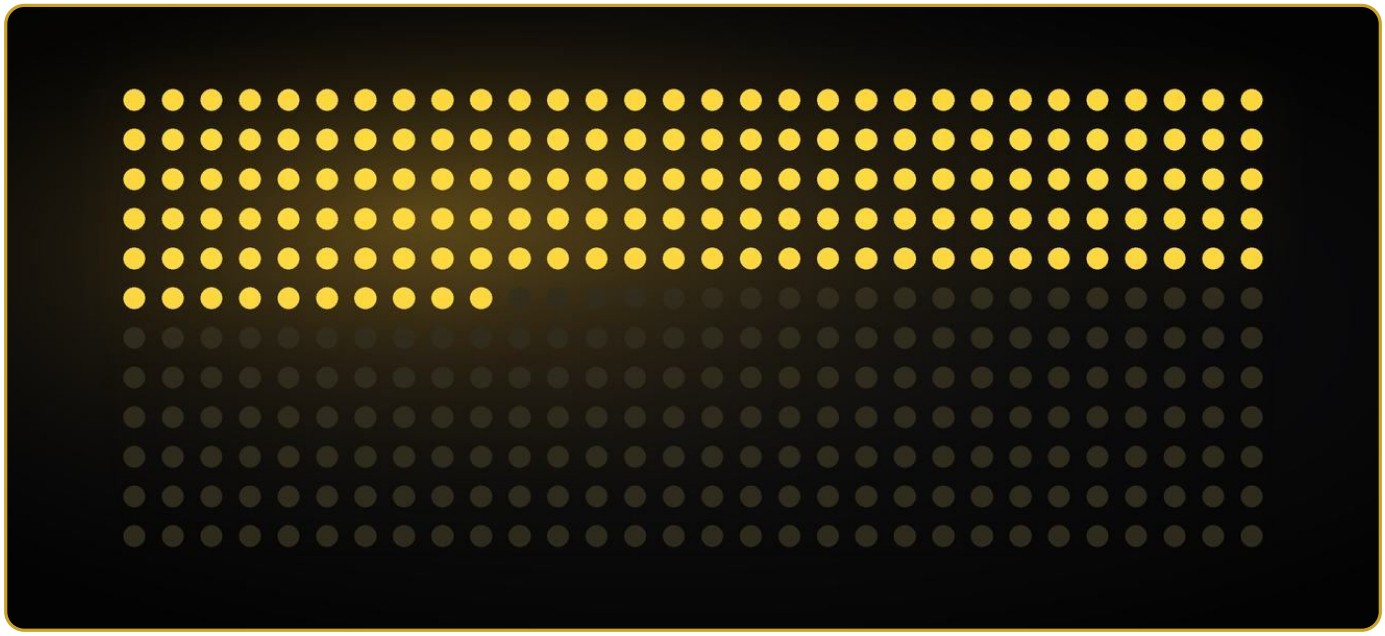

A hundred days is a long time. Today is only one.

TRY THIS

Do your first set of actions today and write the count. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

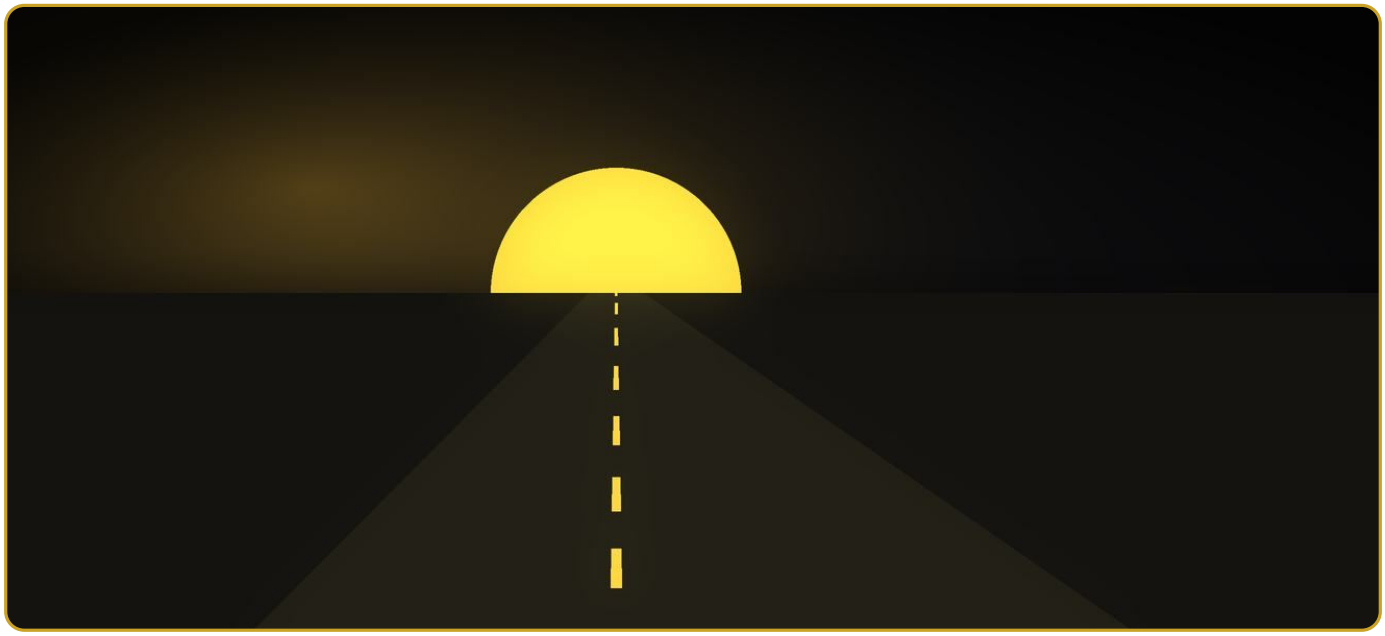

WEEKLY CHECK-IN

Write your contacts, replies and results for the week.

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

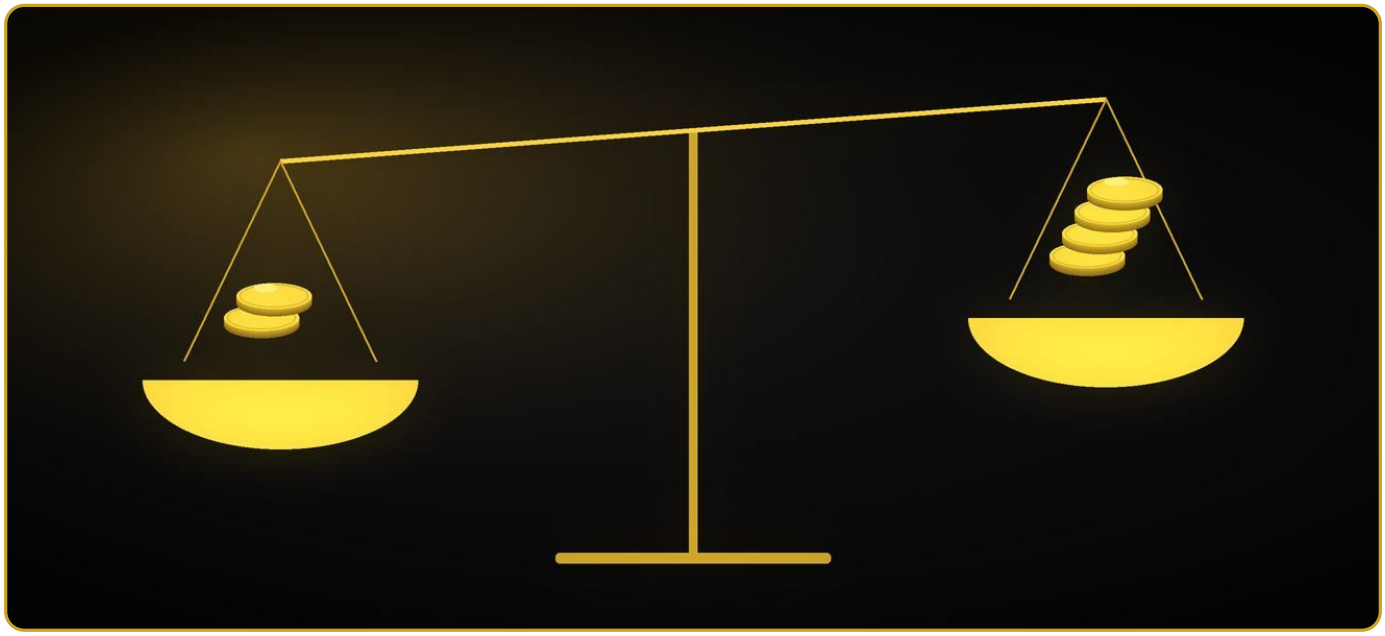

REFLECT AND RESET

What did you learn from the work you did that numbers cannot show?

Next week I will (tick when done)

- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

BORROWED MONEY MAGNIFIES

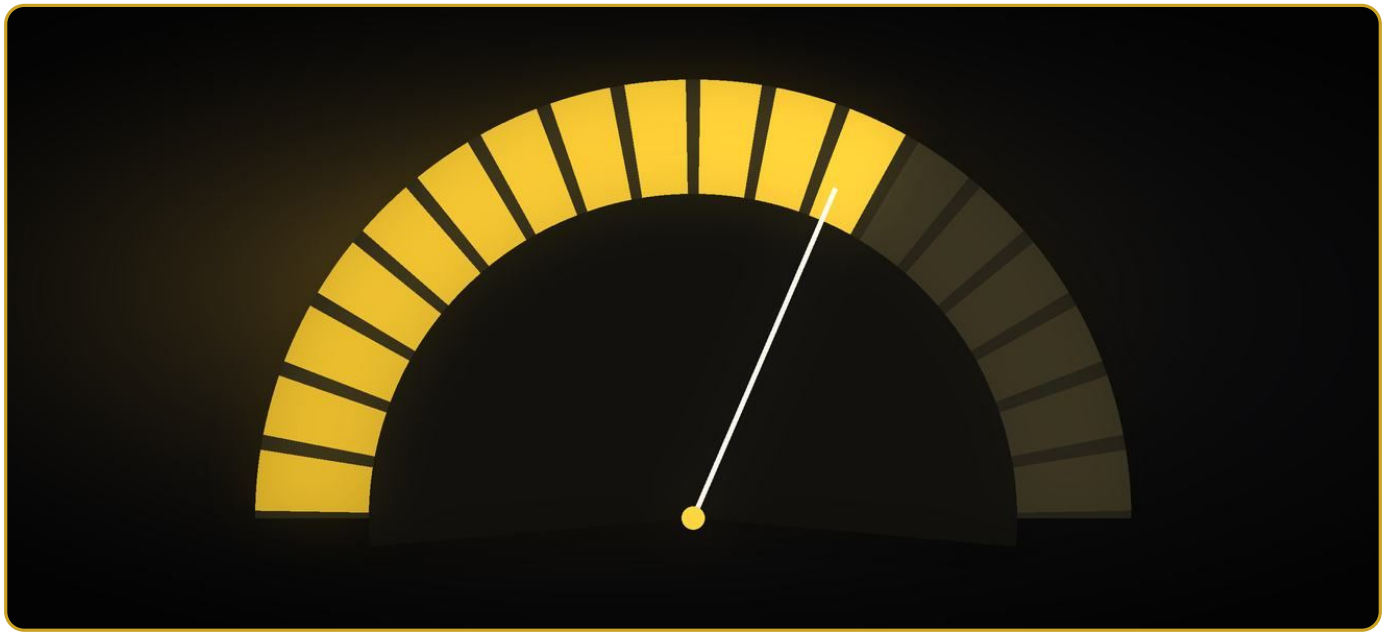

Leverage means using borrowed money to control a larger asset. If the asset rises, your gain is multiplied. If it falls, your loss is too. It can build wealth and it can also wipe it out.

TRY THIS

Write what leverage means in your own words, in one sentence. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 5X HOUSE

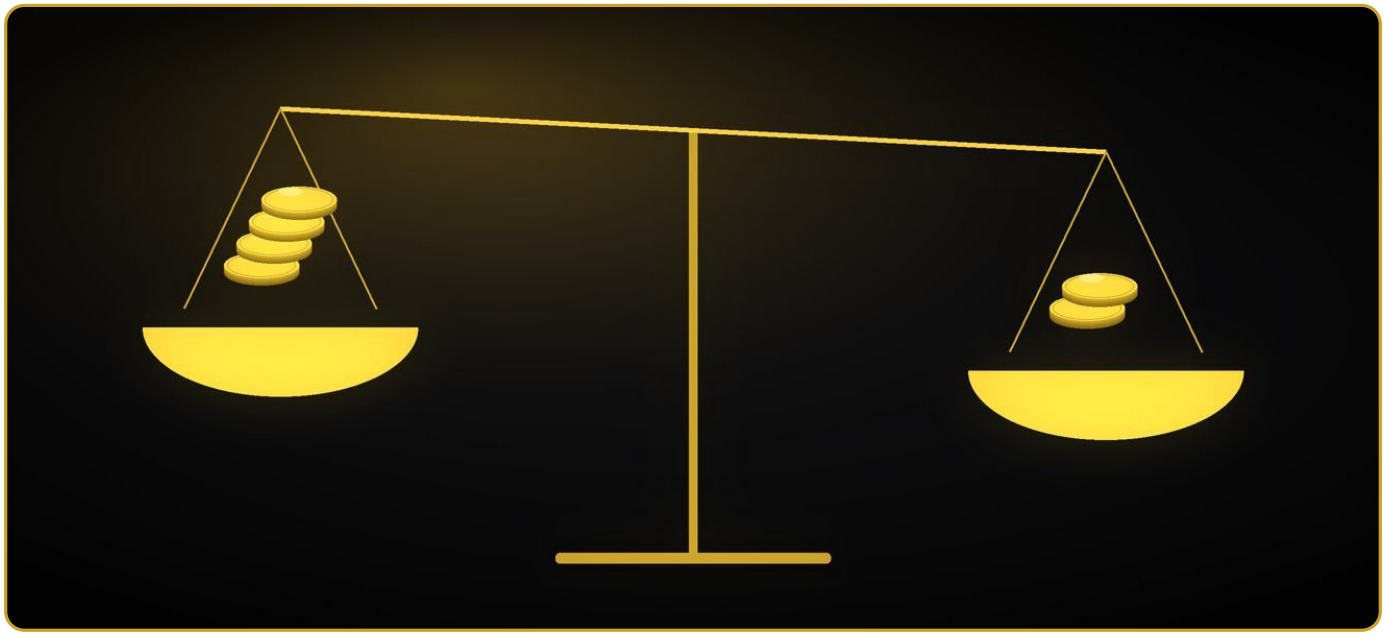

A $100,000 property bought with $20,000 down is 5x leverage. A 20% price rise adds $20,000 to your value, which doubles your $20,000. A 20% fall removes the same amount and wipes out your whole down payment, before costs and interest.

TRY THIS

Write one leveraged purchase you have made or might make and what a 10% drop would do. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

MARGIN FOR ERROR

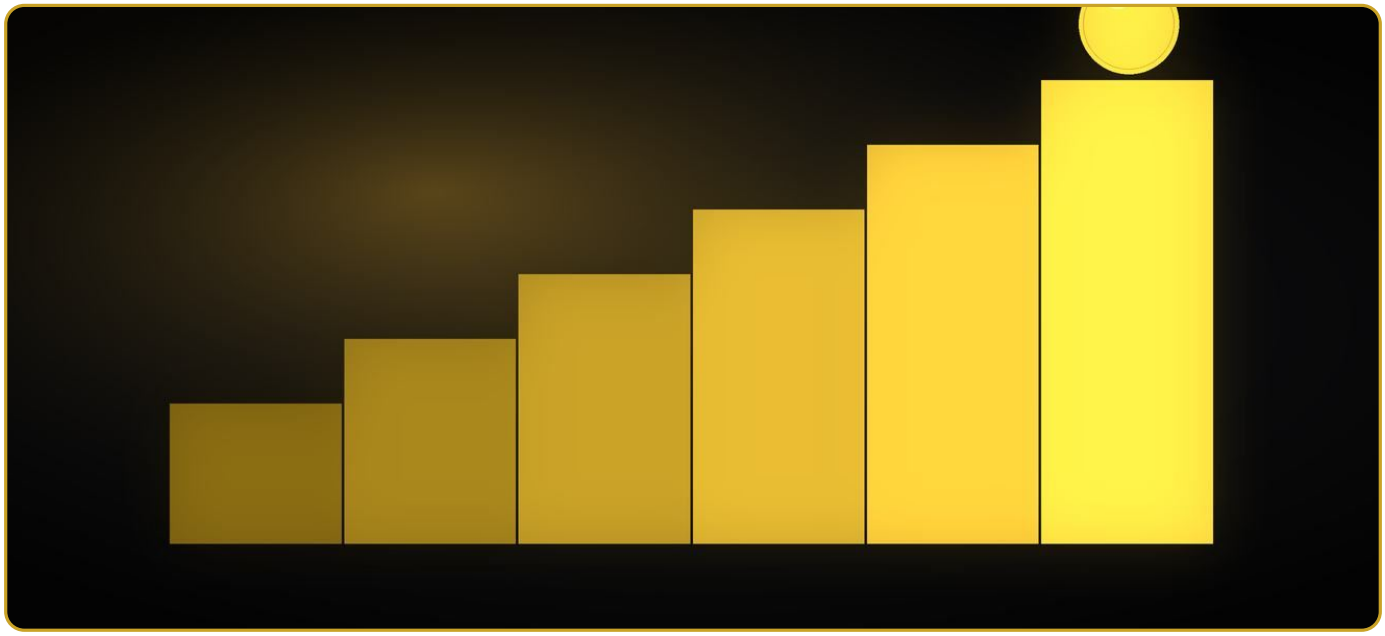

Planners suggest keeping a cushion: cash reserves, a fixed-rate loan and payments you could afford even if income dropped. Write your own margin.

TRY THIS

Write what would have to go wrong for a loan you hold to become unaffordable. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

SURVIVORSHIP

We hear from the people whose leveraged bets worked. We do not hear from those who lost everything. The silent group is large.

TRY THIS

Write a story you have heard where debt worked out and ask: what are the silent cases? ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

STRESS TEST

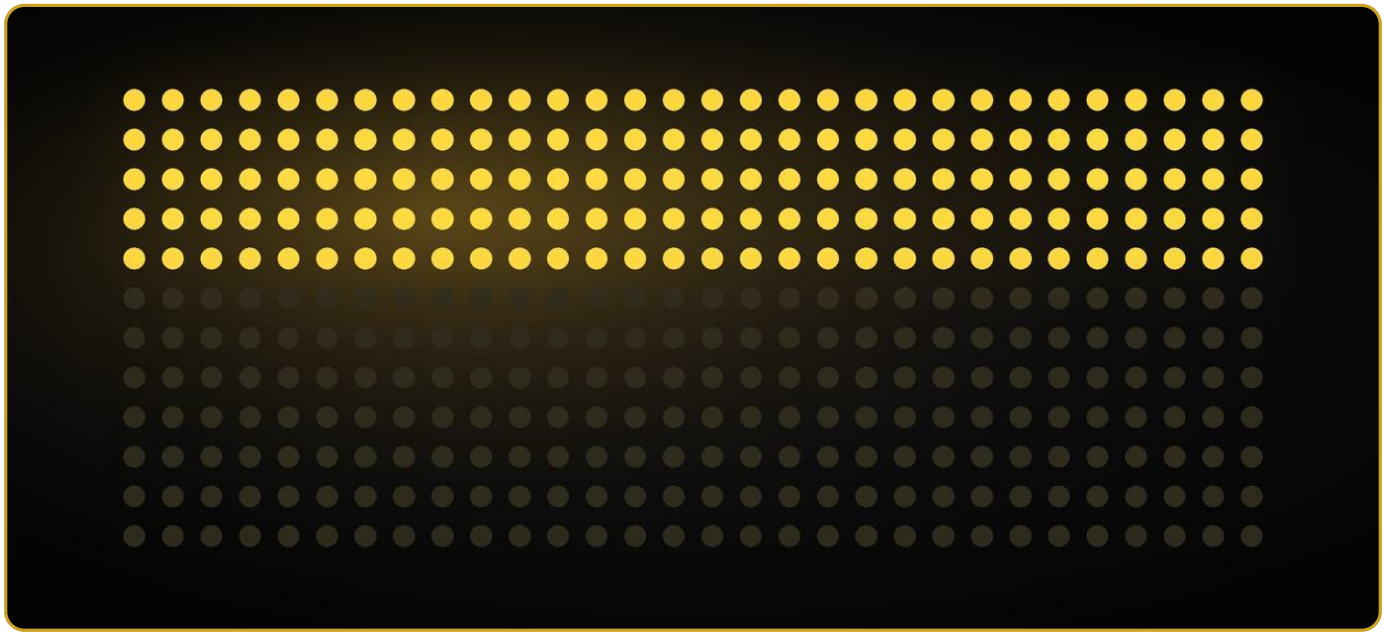

Take a loan you hold. What if your income dropped 20% for six months? Could you cover it?

TRY THIS

Write the answer and one change that would make it safer. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Did any borrowing decision come up this week? What did you ask before you decided?

Money in this week $

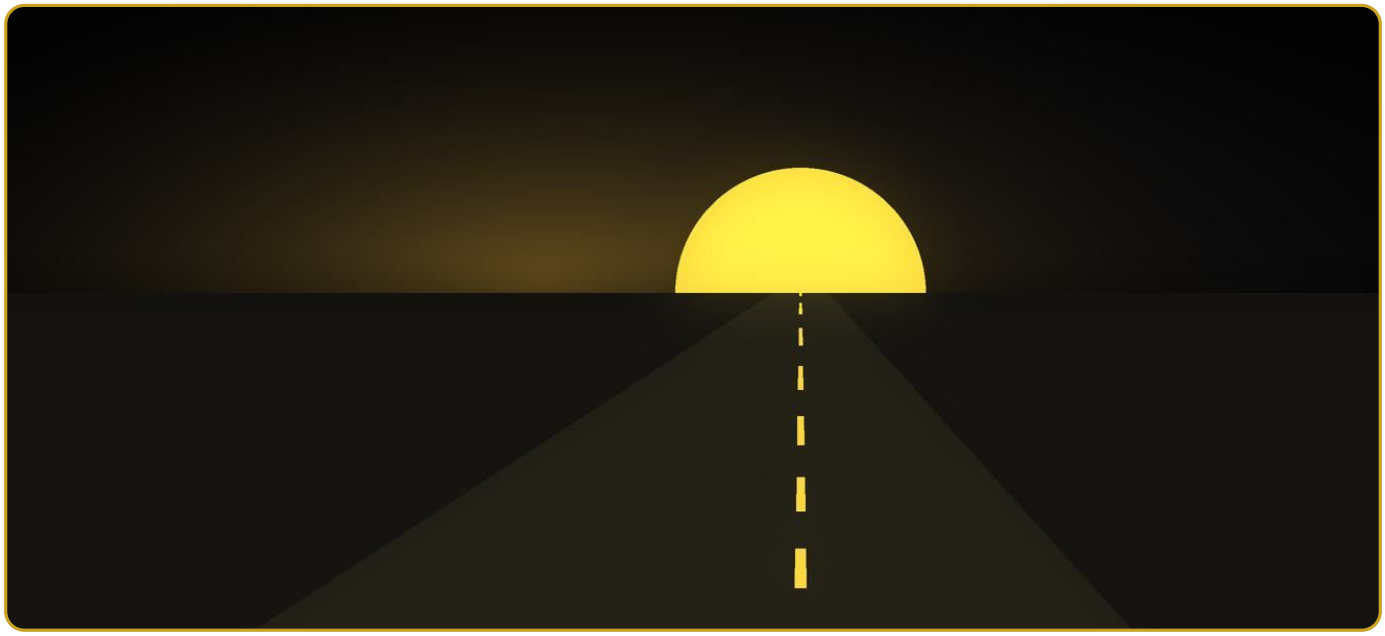

Spent this week $

Saved or invested $

Debt paid $

Money mood this week (1) (2) (3) (4) (5)

LEARN

MARGINAL AND AVERAGE

In many countries, income is taxed in bands: each band has its own rate. Your marginal rate applies only to the last dollars you earn, not all of them. Rules differ by country, so check your own official source.

TRY THIS

Look up your country's tax bands from an official government site. Write them here. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

AN EXAMPLE

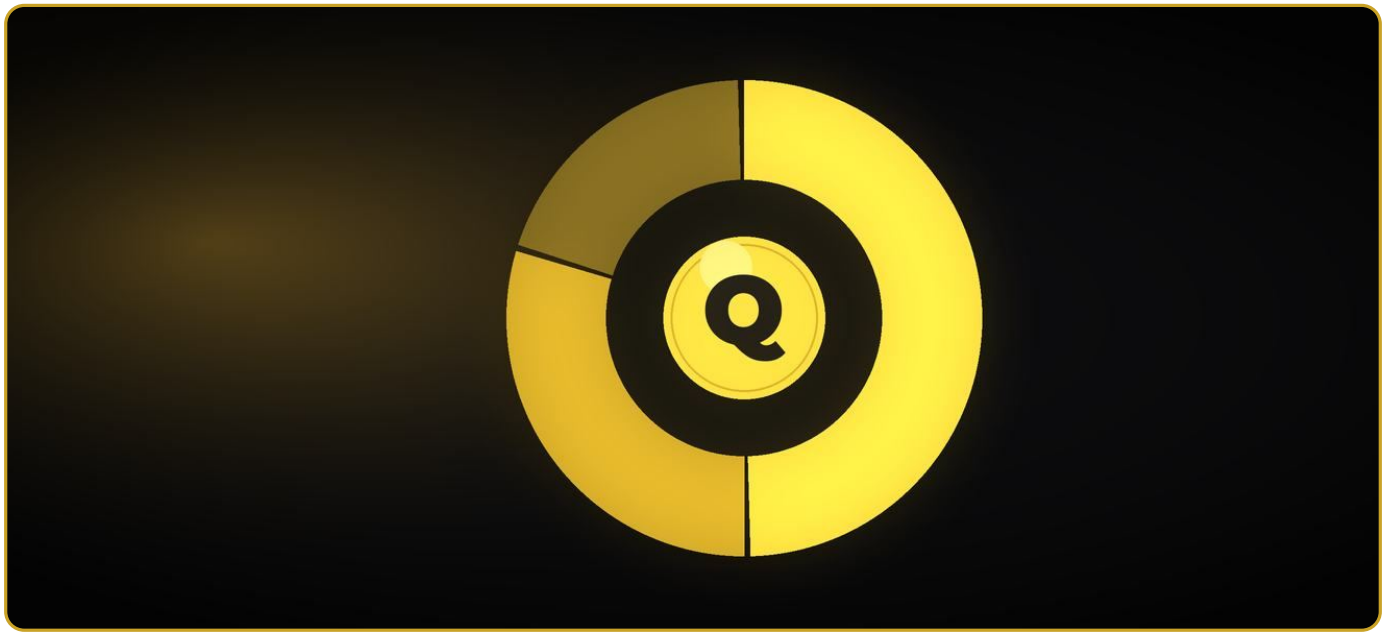

Suppose the first $10,000 is taxed at 10% and everything above it at 20%. On $30,000 of income that is $5,000 of tax, an average rate of 16.7%, not 20%. This is a made-up example, not any real tax system.

TRY THIS

Use the example to calculate the tax on $50,000. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

KNOW WHAT IS DEDUCTIBLE

Tax rules can let you reduce what you owe through allowances, credits or contributions to some accounts. This is general information, not tax advice.

TRY THIS

Write two ways to lower tax that your official source says are available to you. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

RAISE MYTHS

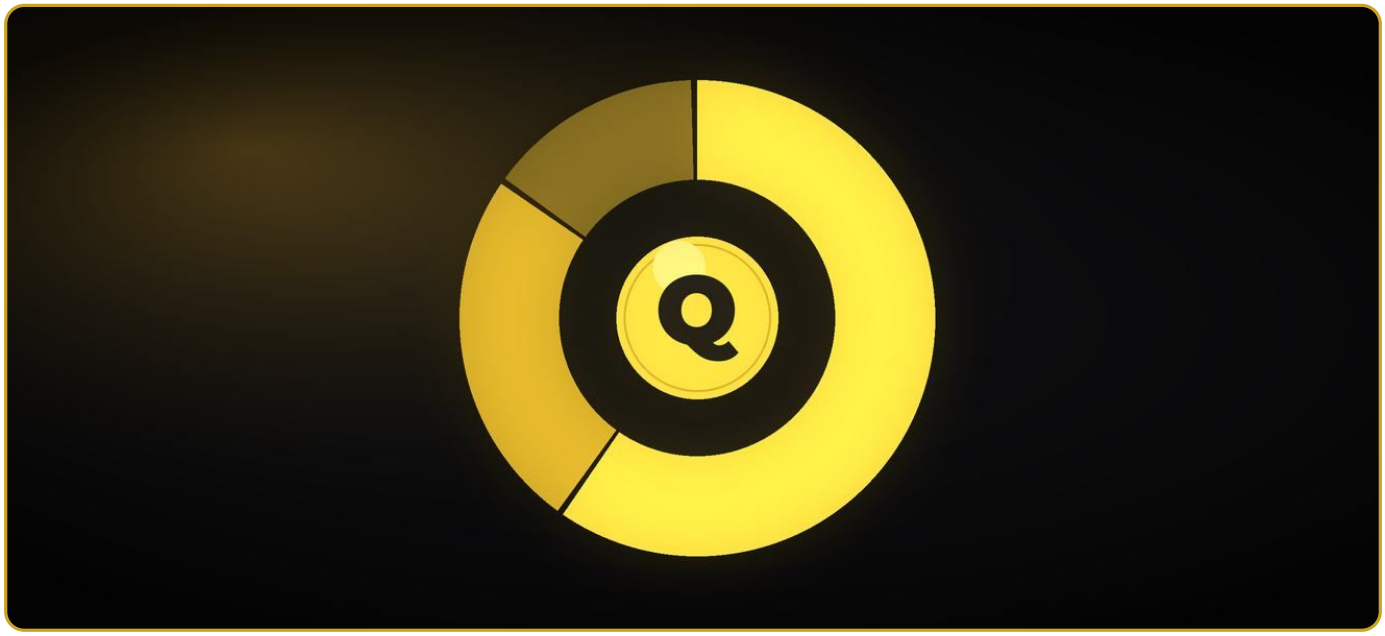

Many people fear a raise will push them into a bracket and reduce their take-home pay. In a banded system, only the extra income is taxed at the higher rate, so a raise should still raise your pay.

TRY THIS

Write one tax belief you have and check it against an official source. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SAVE YOUR RECORDS

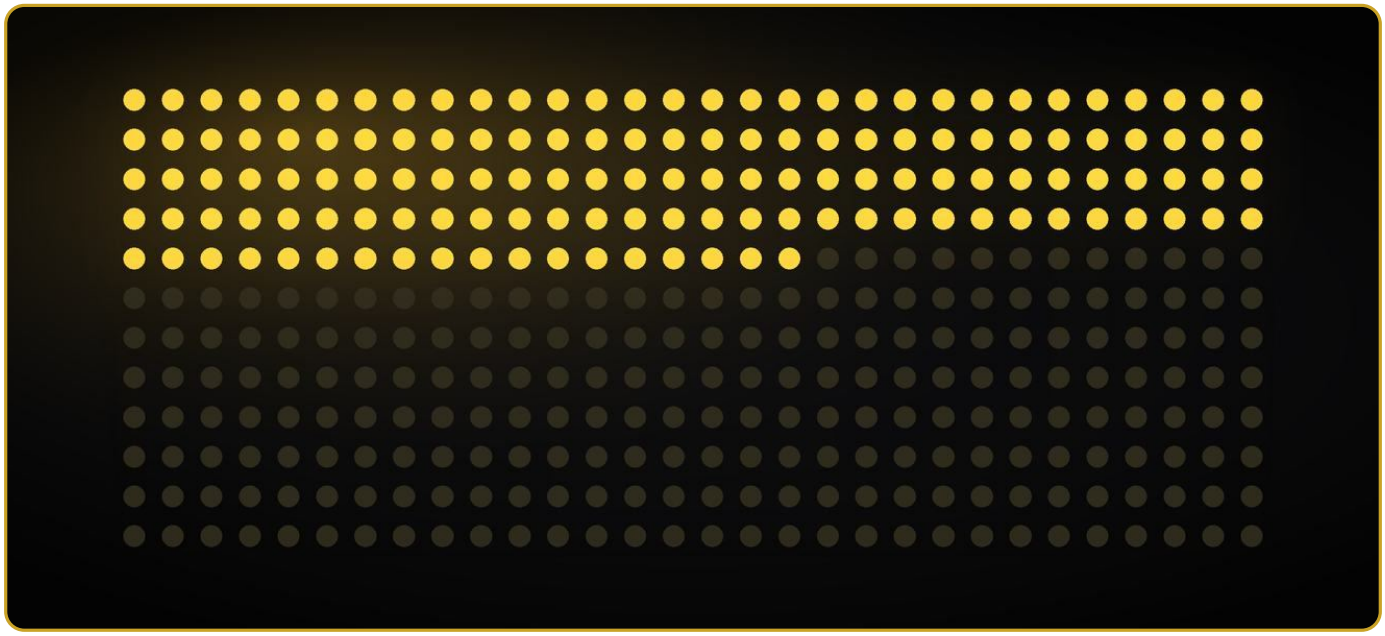

Receipts, statements and a simple folder make tax time shorter. A shoebox is a start.

TRY THIS

Create one folder, paper or digital, for this year's tax records. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

What did you do this week to make the next tax season easier?

Money in this week $

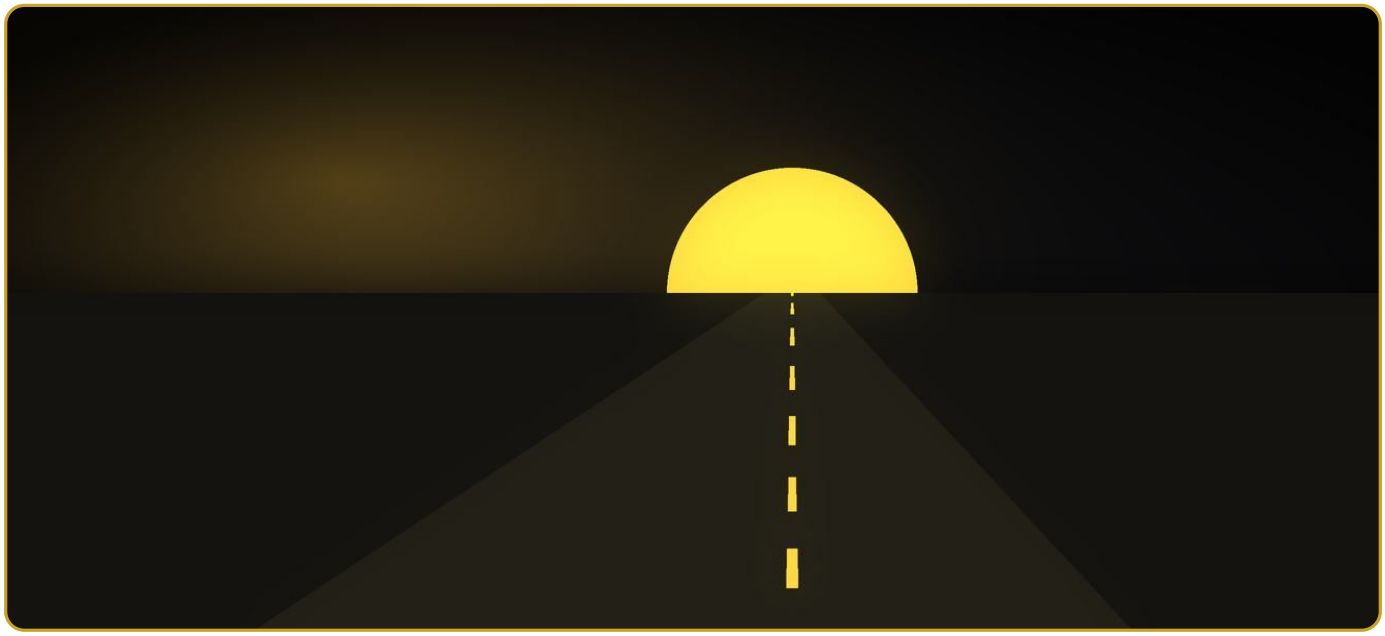

Spent this week $

LEARN

THREE QUARTERS DONE

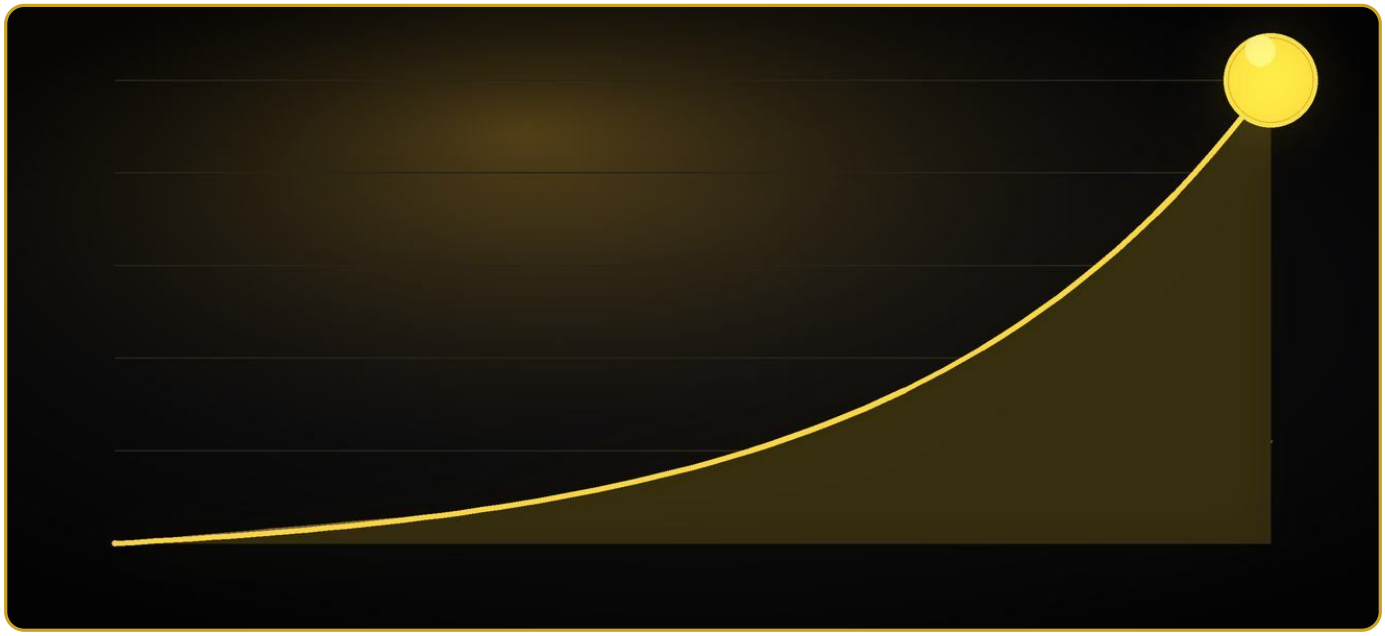

Nine months of weekly effort is a real record. Update your Net Worth Snapshot, compare it with Days 1, 91 and 182, and notice the direction of travel.

TRY THIS

Update the Net Worth Snapshot. Write the three-quarter change. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE RATE OF CHANGE

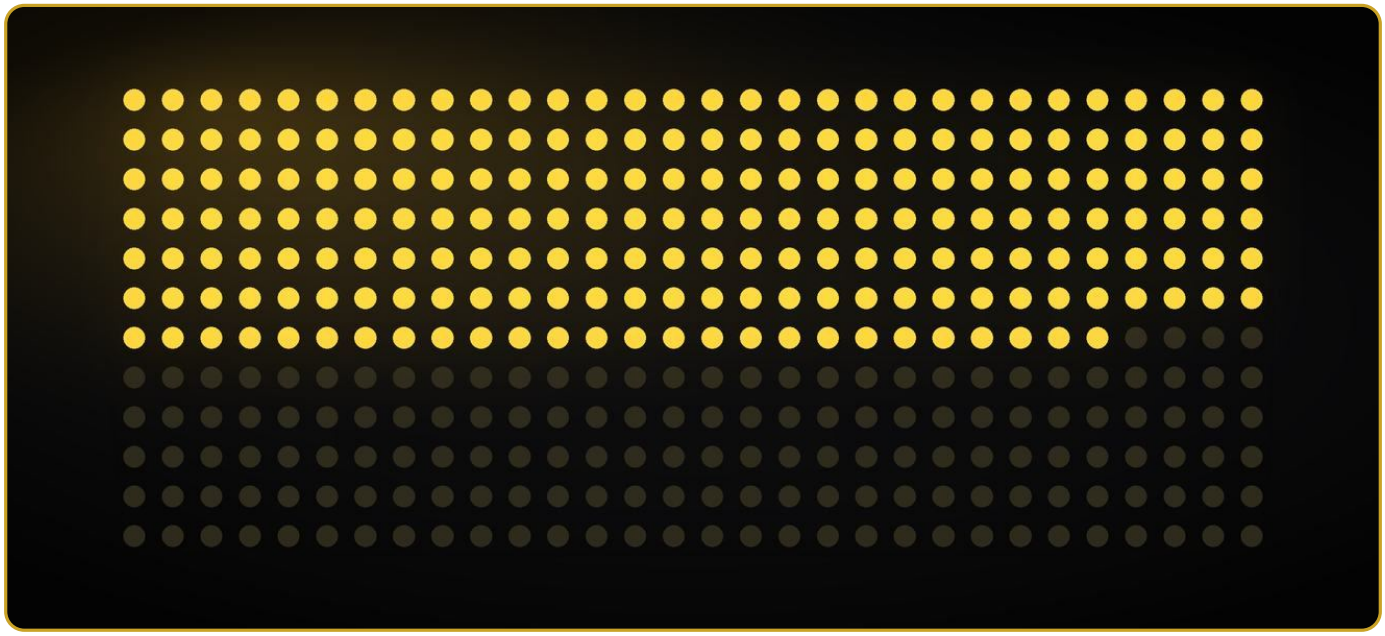

If your net worth grew from $2,000 to $5,000 over nine months, that is 150% growth. Your own growth might be smaller or larger. What matters is the direction and the habits behind it.

TRY THIS

Write your growth in dollars and percent since Day 1. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

HABITS THAT STUCK

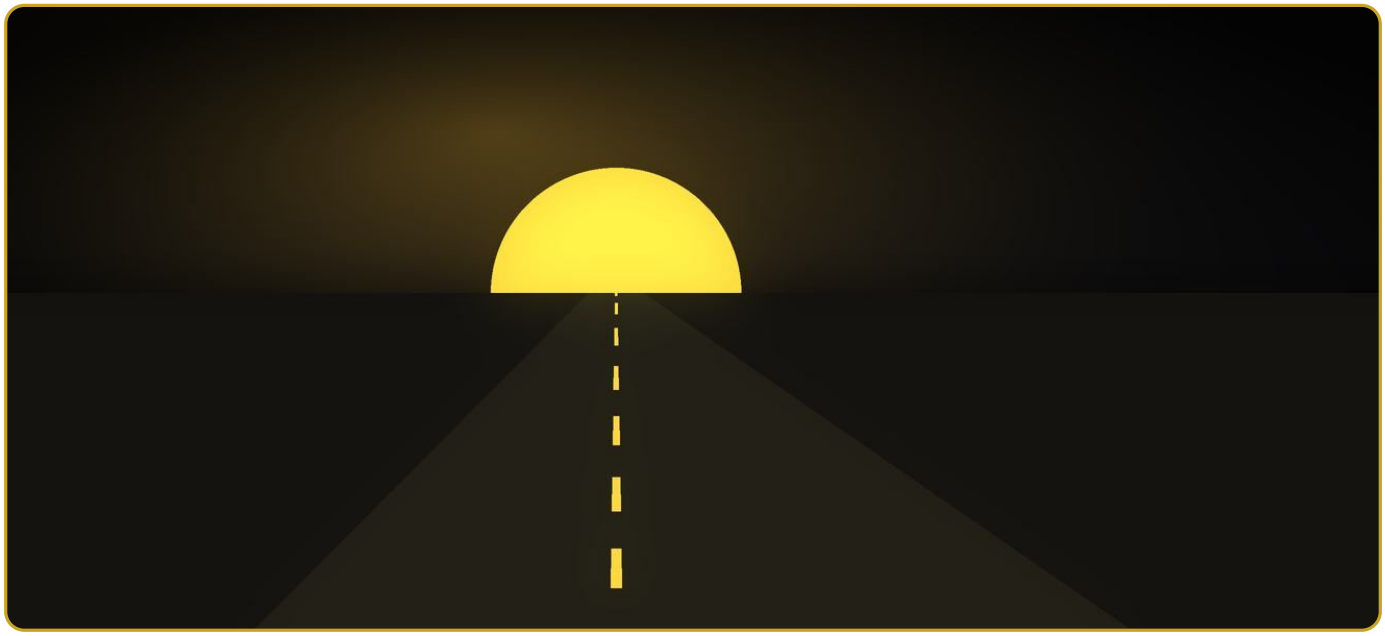

Look through your check-ins from Q3. Which routines are automatic? Which ones still need a reminder?

TRY THIS

List three habits that are automatic and one that still needs a reminder. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

COMPARE WITH YOURSELF

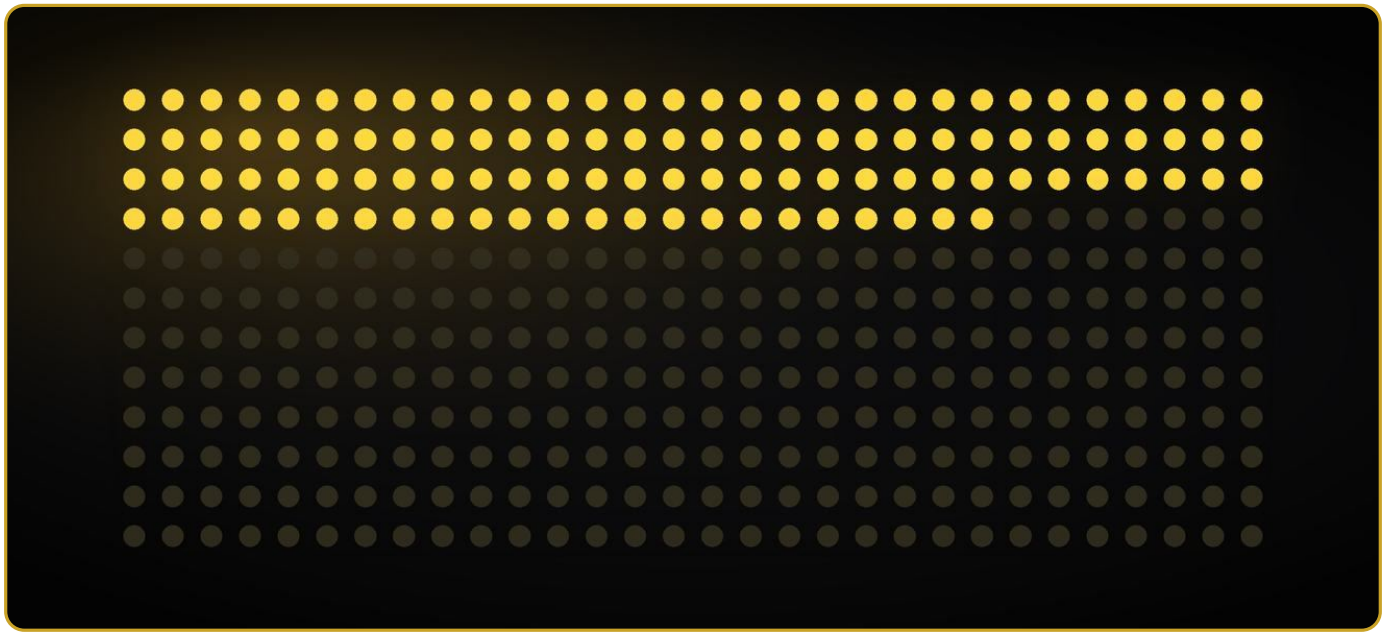

Compare yourself with last year's you, not with other people. Their life and your life are different games.

TRY THIS

Write one way your money life is better than it was nine months ago. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PREPARE FOR THE LAST QUARTER

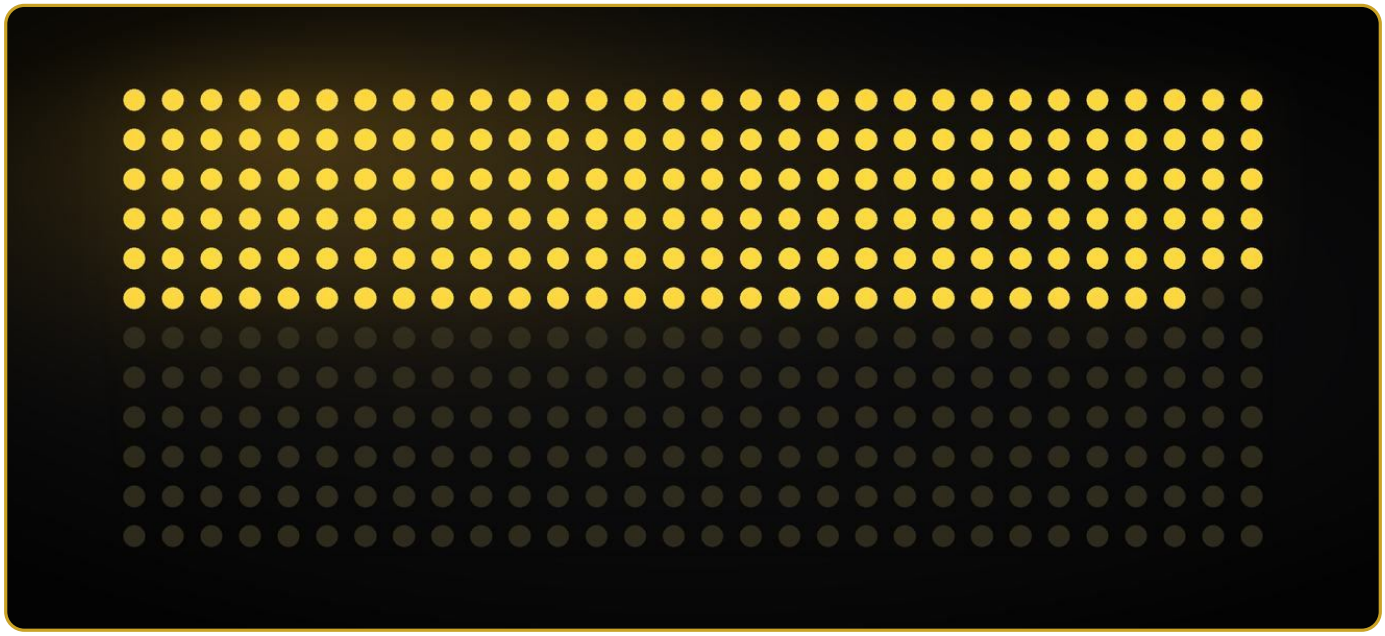

The next quarter is about planning: goals, a freedom number and a system that keeps going without you.

TRY THIS

Write the one outcome you want from the final 13 weeks. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

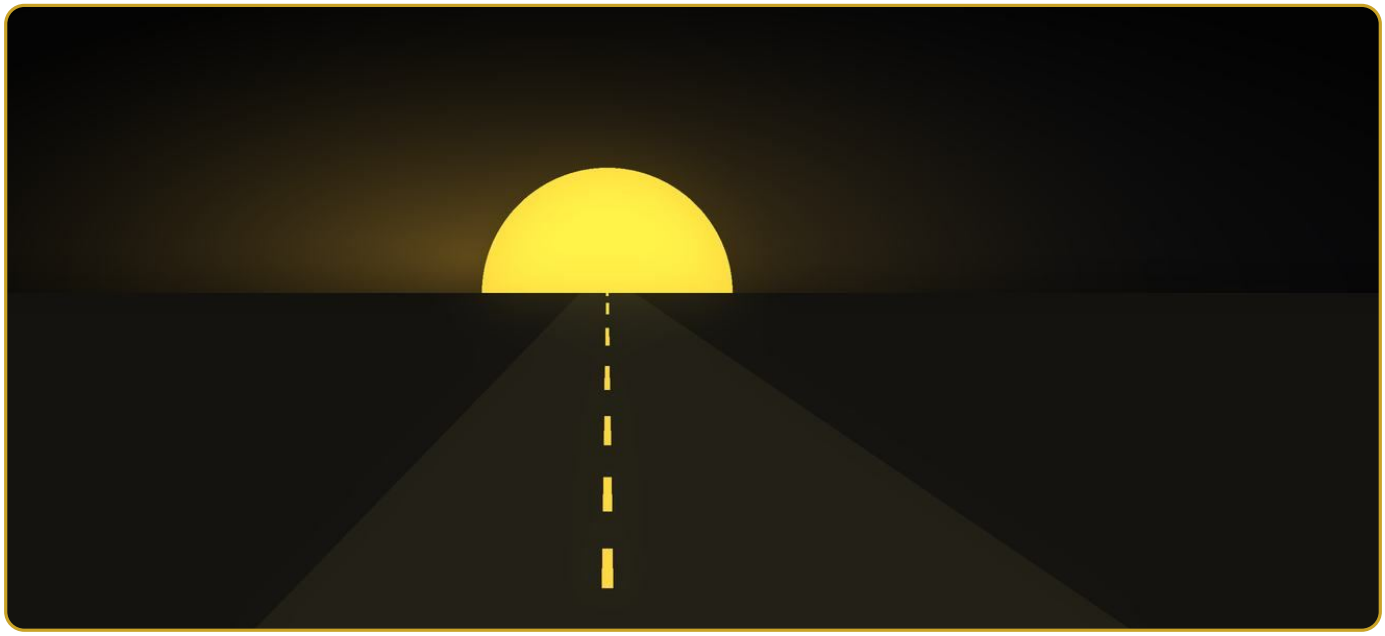

WEEKLY CHECK-IN

Write three things you are proud of from this quarter.

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

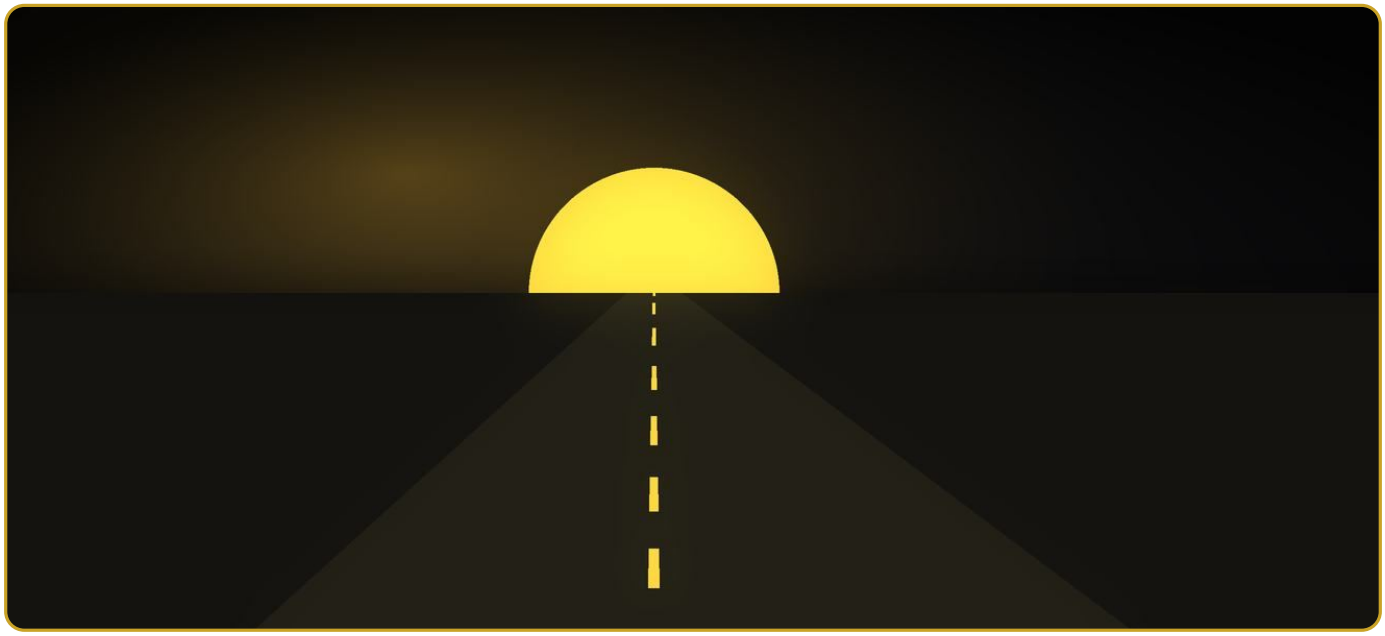

REFLECT AND RESET

What will you do differently in the final quarter?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

NEITHER SIDE WINS AUTOMATICALLY

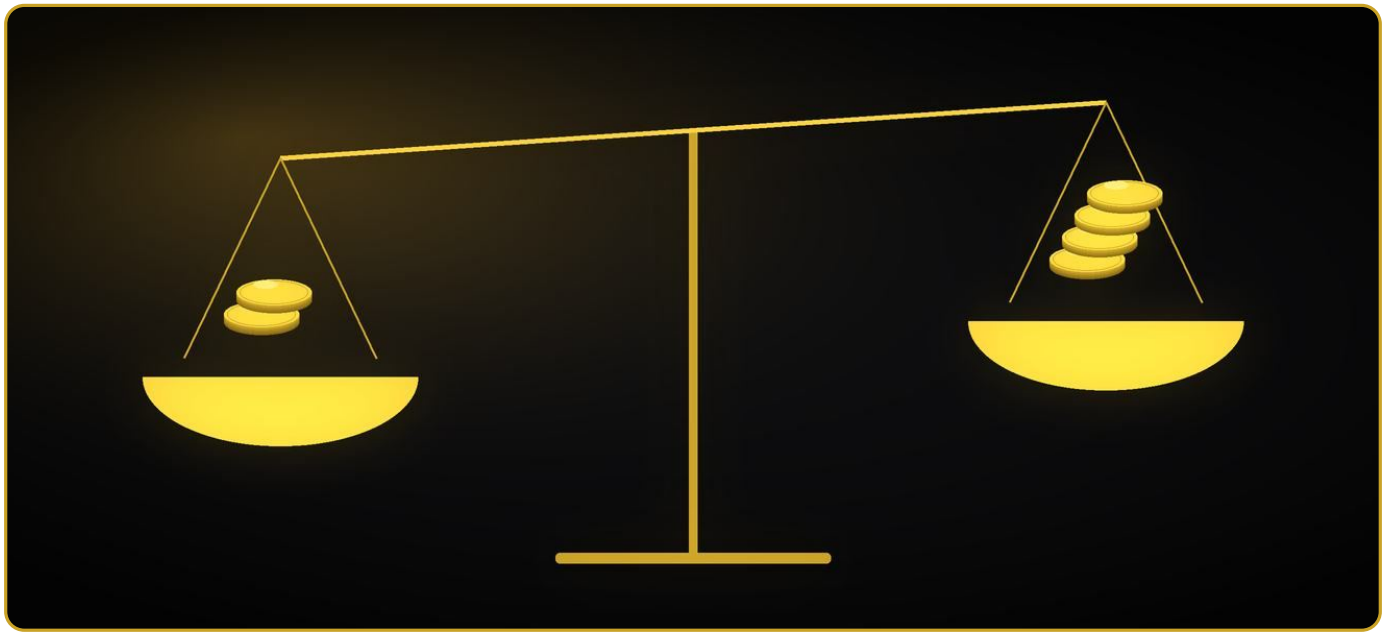

Renting is not always throwing money away and buying is not always building wealth. Owning has costs that do not build equity: interest, property tax, insurance, repairs. Renting buys flexibility. The right answer depends on prices, rates, how long you will stay and your own plans.

TRY THIS

Write how long you expect to live where you are and what would make you move. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE 5% RULE OF THUMB

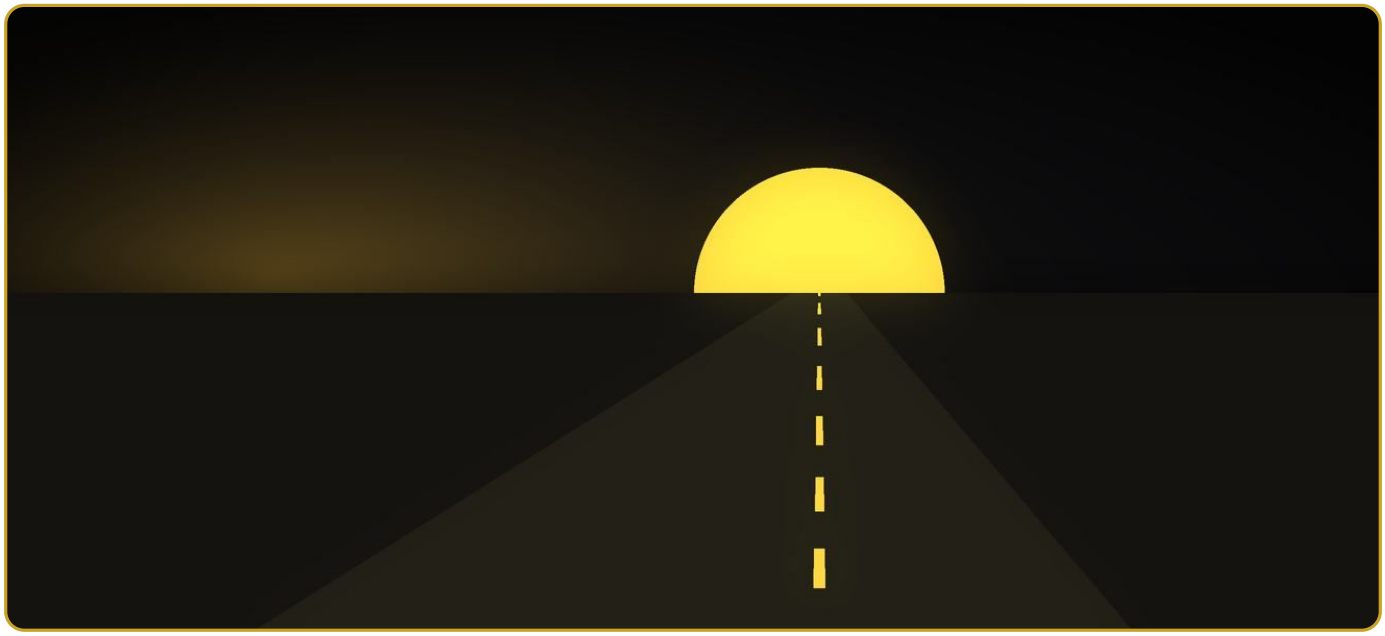

One rough test says the yearly cost of owning a home that does not build equity is about 5% of its price: about 1% for property tax, 1% for maintenance and 3% for the cost of the money tied up. On a $300,000 home that is $15,000 a year, or $1,250 a month. If rent for a similar home is lower, renting may cost less. It is a heuristic, not a verdict.

TRY THIS

Take the price of a home you might buy. Multiply by 5% and divide by 12. Compare with rent. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

HOUSING AS A SHARE

A common guideline is to keep housing costs near 30% of gross income. Many people find it hard in expensive cities. Use it as a check on stretch, not as a rule.

TRY THIS

Write your housing cost and divide it by your gross monthly income. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE DEFAULT DREAM

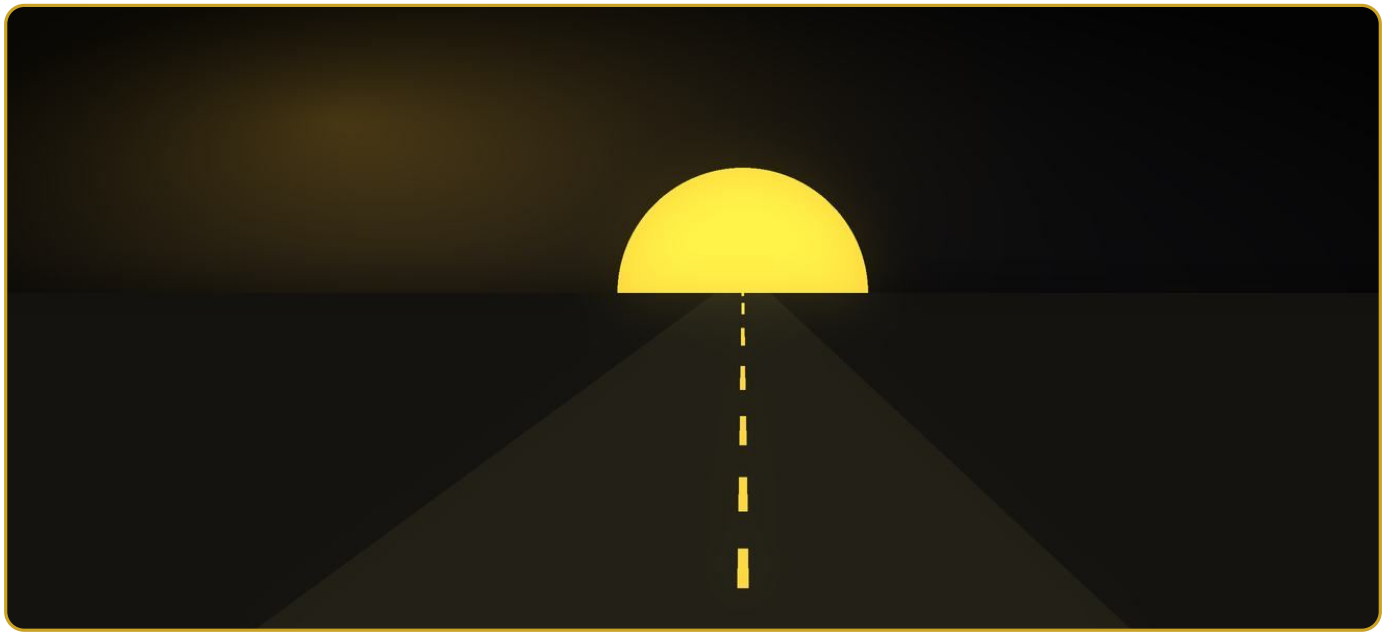

For many people, buying a home is a goal because they were taught it is the next step. It is fine to want it. It is also fine to ask whether you want it for you or because of the story.

TRY THIS

Write why you want to own or why you want to rent. Be honest. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

HIDDEN COSTS

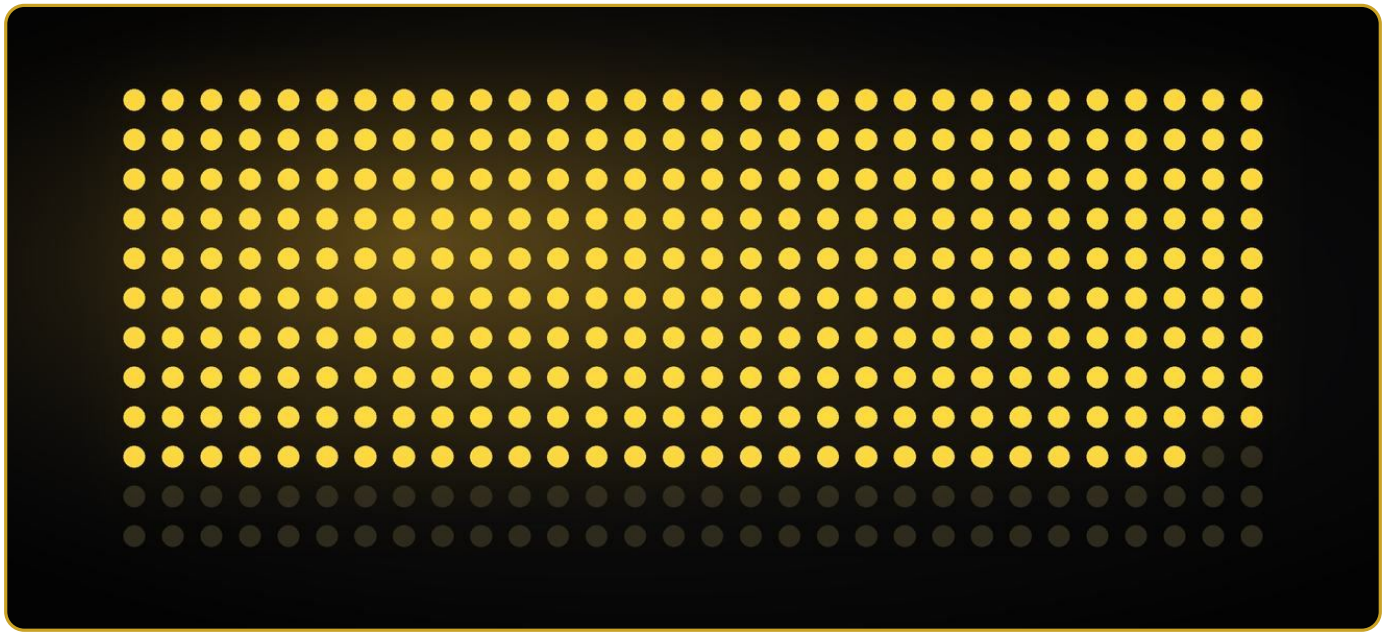

Closing costs, moving costs, furniture, repairs and utilities are the costs people forget. Add 1% of the home price a year for repairs as a starting guess.

TRY THIS

Write three hidden costs of your housing situation that you had not counted. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

Did you learn anything this week that changes how you think about your housing costs?

Money in this week $

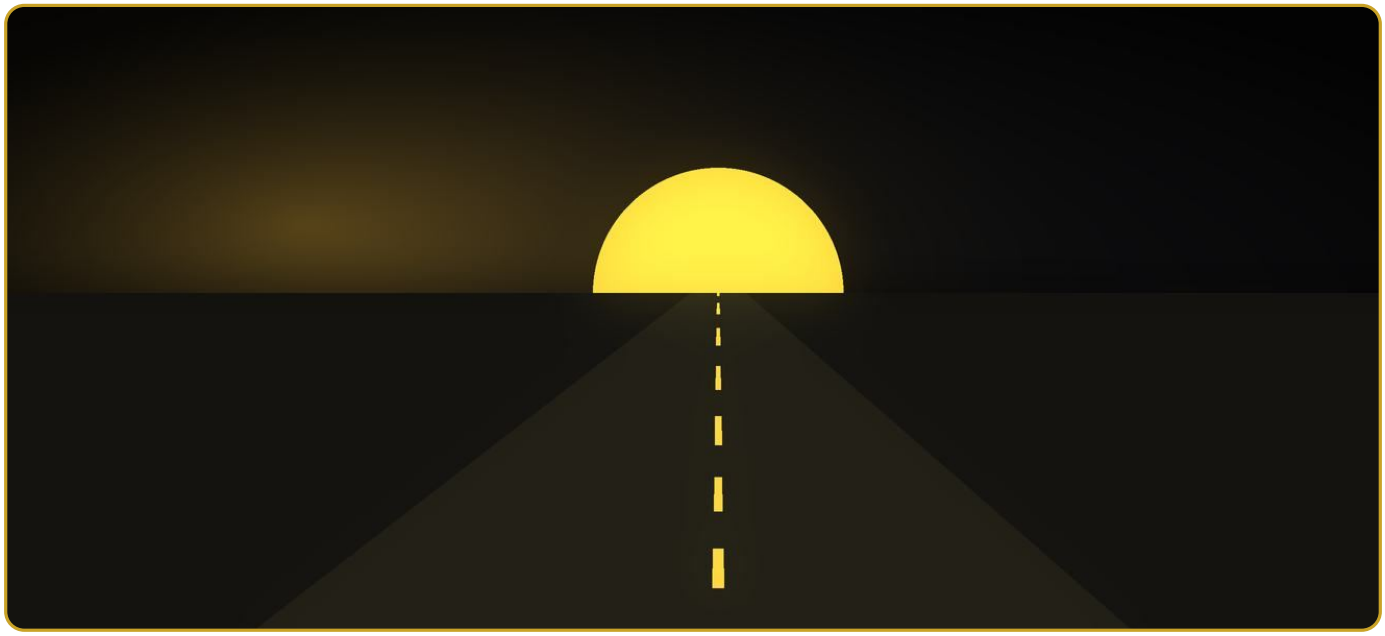

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What does home mean to you, apart from the building?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

PAY A LITTLE TO AVOID A DISASTER

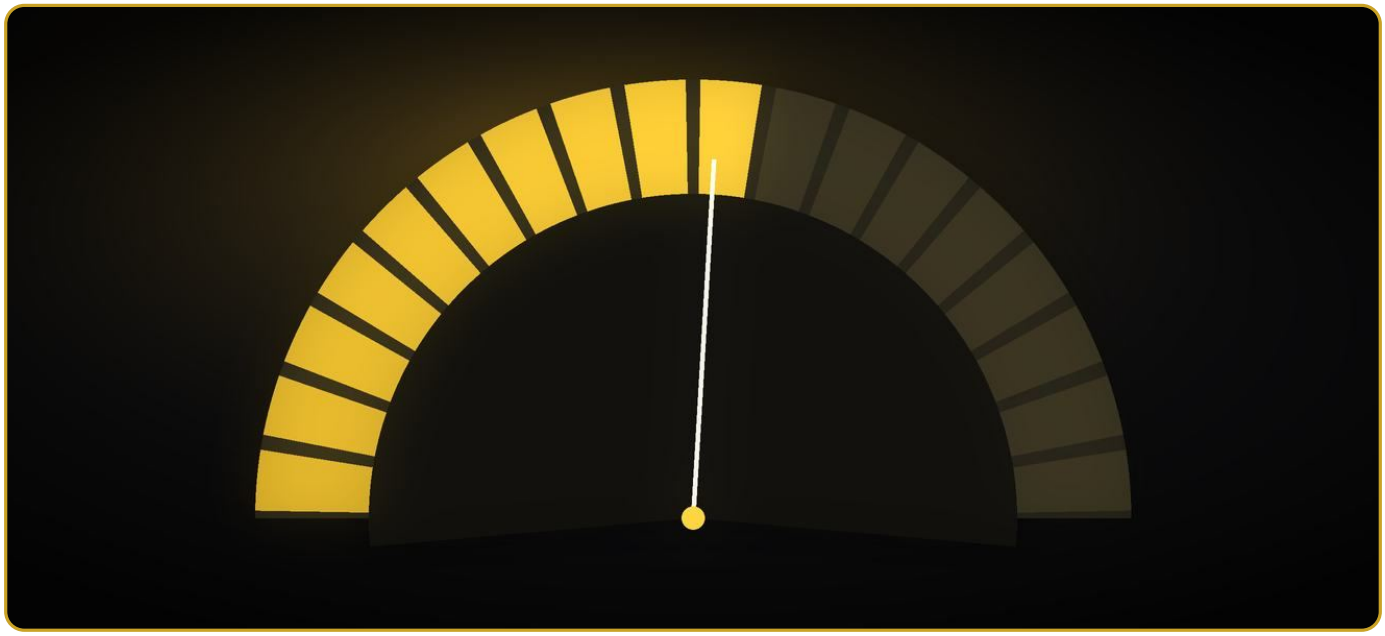

Insurance moves risks that would ruin you onto a company for a small regular fee. It is for events too big to pay from savings. It is not for small, predictable costs.

TRY THIS

List the big risks in your life: health, car, home or rental contents, income loss, liability. Mark which are covered. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE DEDUCTIBLE TRADE

A higher deductible usually means a lower premium. If it saves you $20 a month, that is $240 a year. It only makes sense if you have enough in savings to pay the higher deductible when needed.

TRY THIS

Write your deductible on one policy and what is in savings to cover it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

READ YOUR POLICY

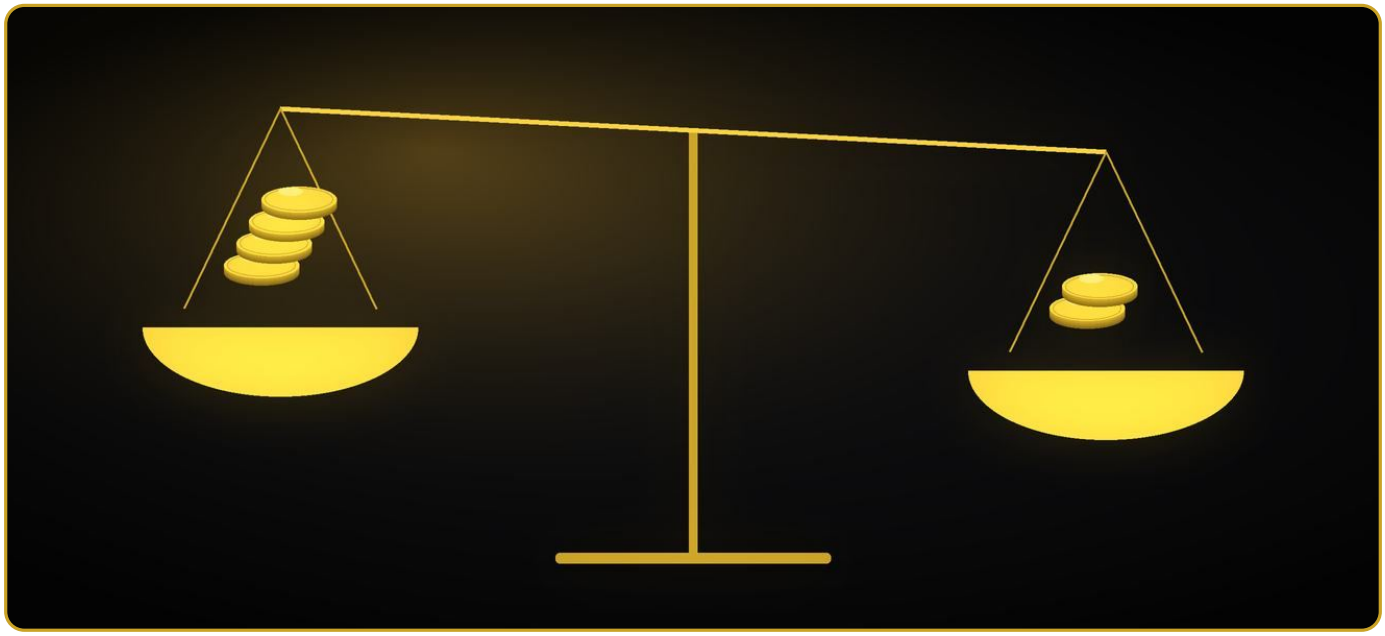

The summary page of an insurance policy lists what is covered, what is not and the limits. Most people have never read it.

TRY THIS

Read the summary of one policy. Write one thing that is not covered. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

UNDERINSURED AND OVERINSURED

Some people carry too little protection for large risks and too much for small ones, such as gadget warranties. Match cover to the size of the risk.

TRY THIS

Write one policy that protects against a risk you could pay yourself. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

CHECK THE BENEFICIARIES

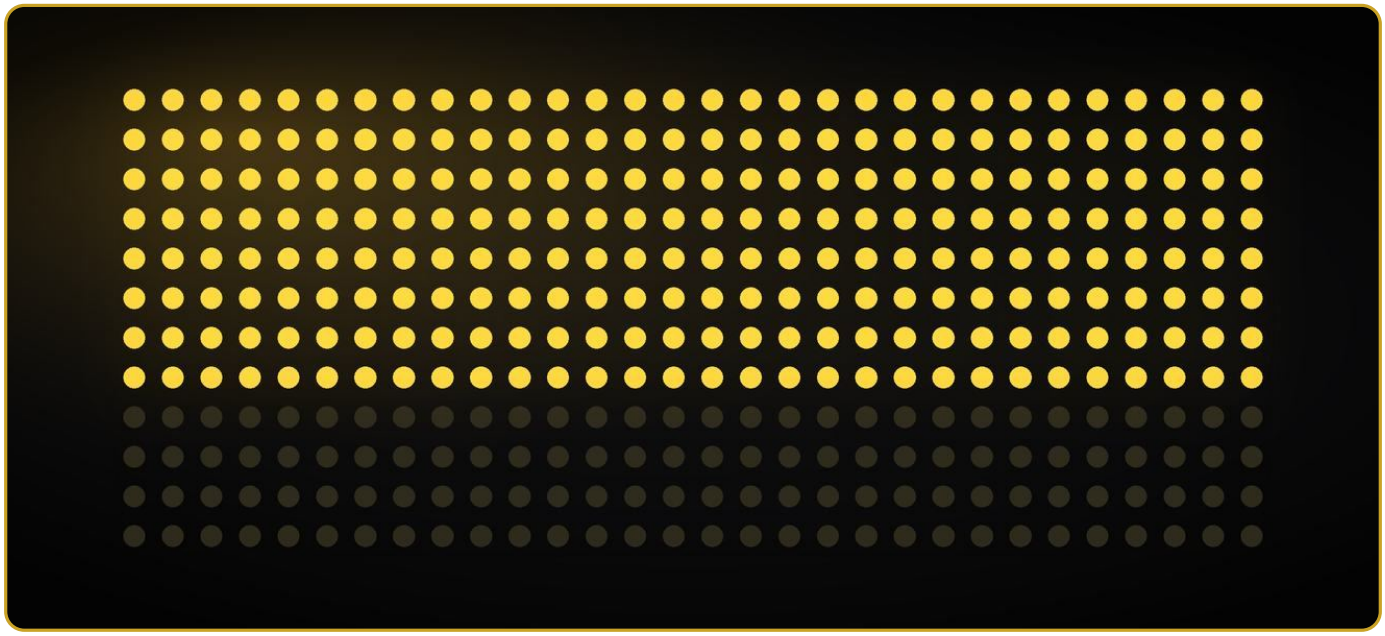

Where you have accounts or policies with beneficiaries, check that the names are current. A form can overrule a will.

TRY THIS

Check one account's beneficiary. Write the date you checked. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

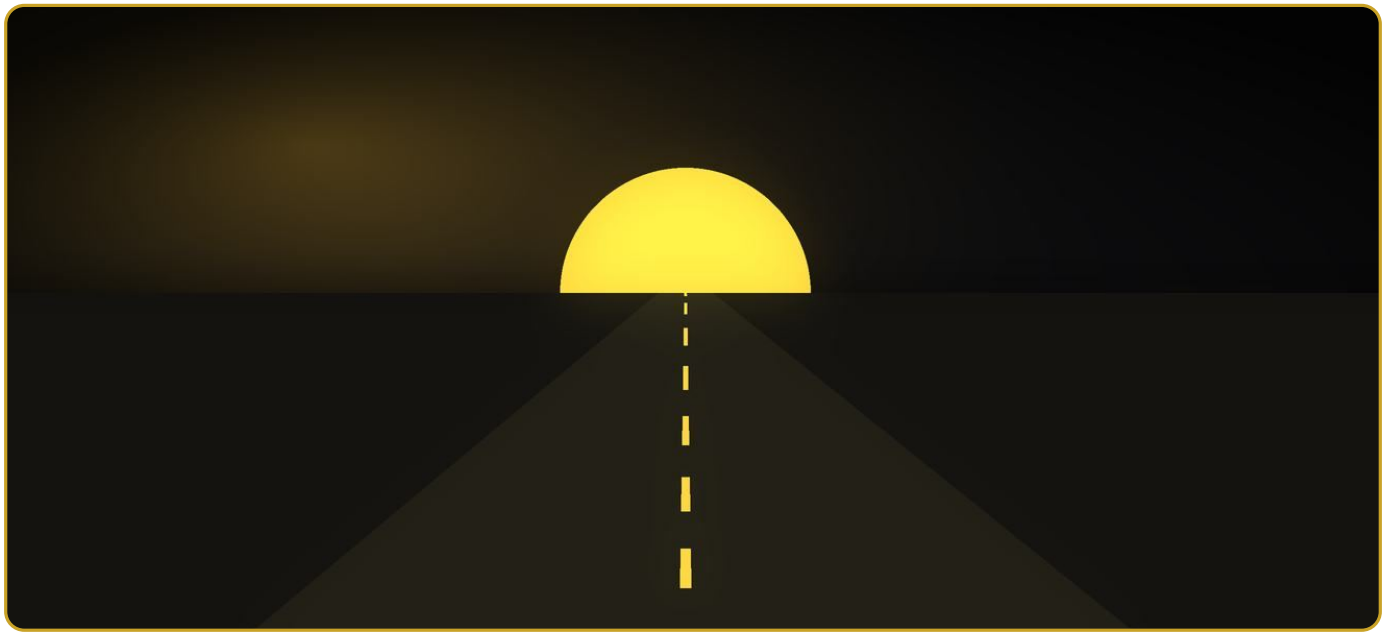

WEEKLY CHECK-IN

What did you learn about the risks in your own life this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

What would you most hate to lose, and is it protected?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

SAVE FIRST, BUY LATER

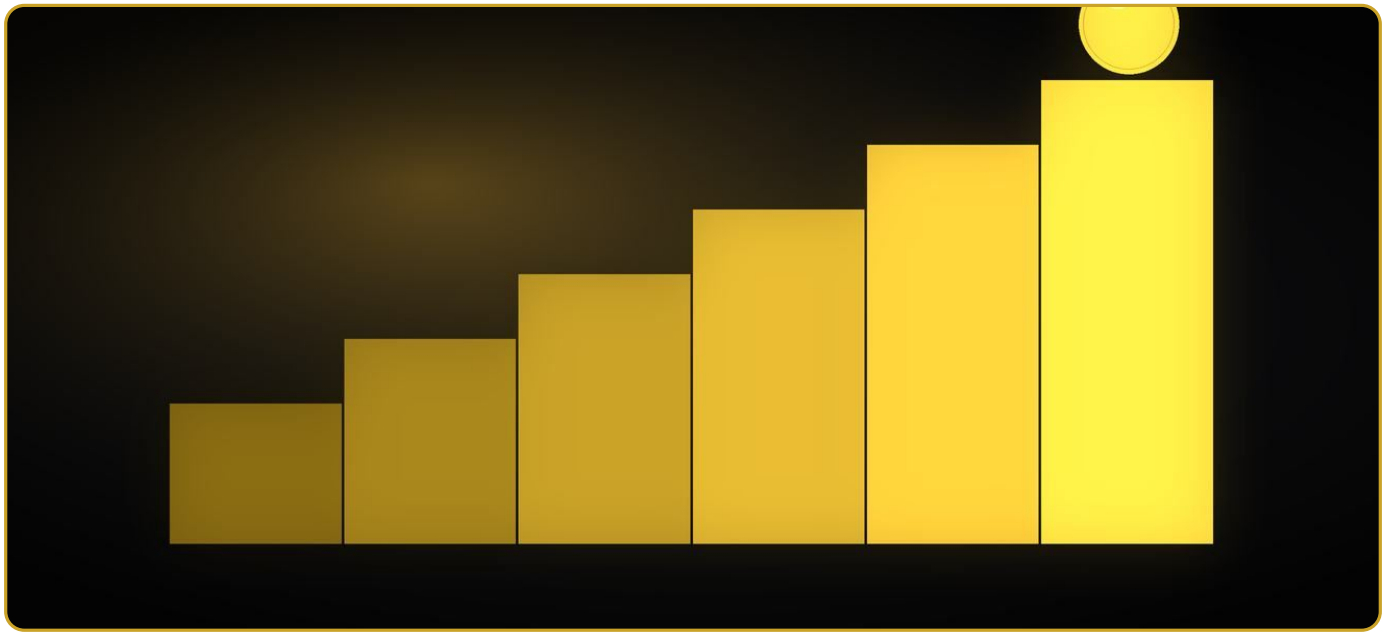

Paying with saved money avoids interest and gives you time to change your mind. A big purchase plan has three parts: the price, the date and the monthly amount.

TRY THIS

Write one big purchase you plan in the next two years, its price and the date. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE MONTHLY AMOUNT

A $2,400 purchase in 12 months needs $200 a month. A $12,000 purchase in 24 months needs $500 a month. Dividing the price by the months turns a wish into a number.

TRY THIS

Divide your own purchase price by the months you have. Write the monthly amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

RESEARCH THE REAL PRICE

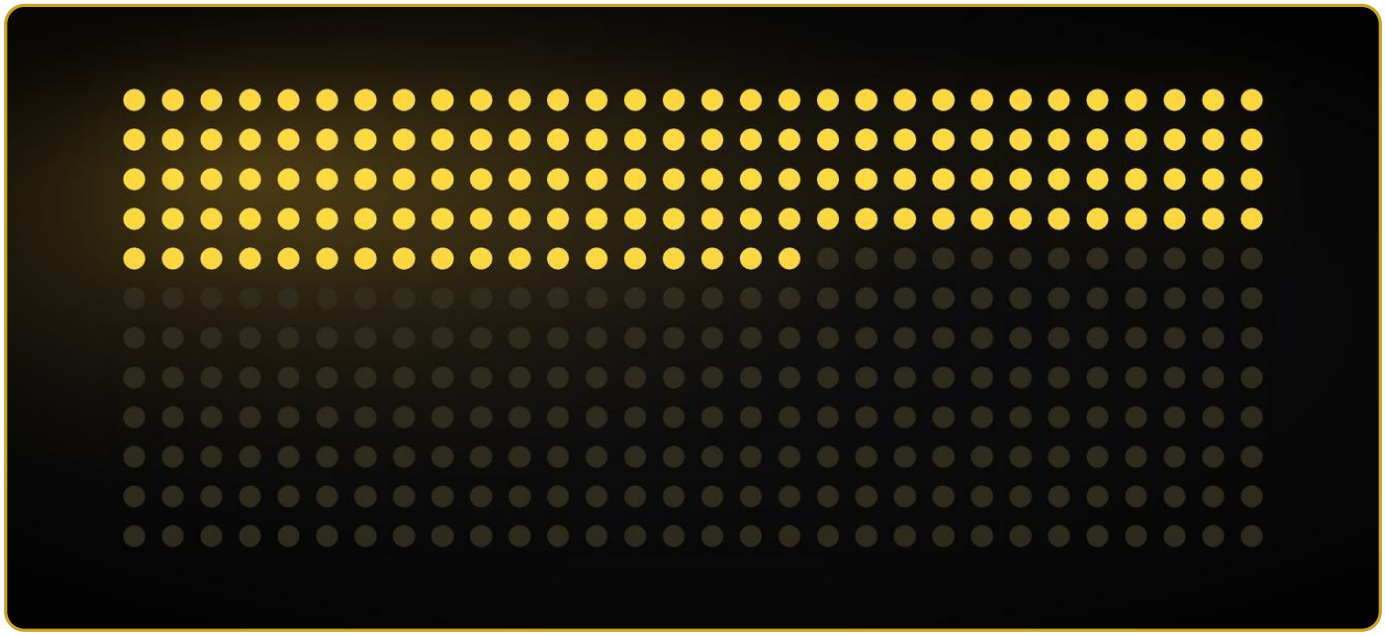

List the total cost: price, tax, delivery, accessories, running costs. Many purchases cost more after the sticker price.

TRY THIS

Write the total cost of ownership for your planned purchase for the first year. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

THE FINANCING OFFER

Offers of 0% financing or low monthly payments can make a large purchase feel small. Check the total, the term and what happens if you miss a payment.

TRY THIS

Write a purchase you financed and the total cost you paid or will pay. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

START THE FUND

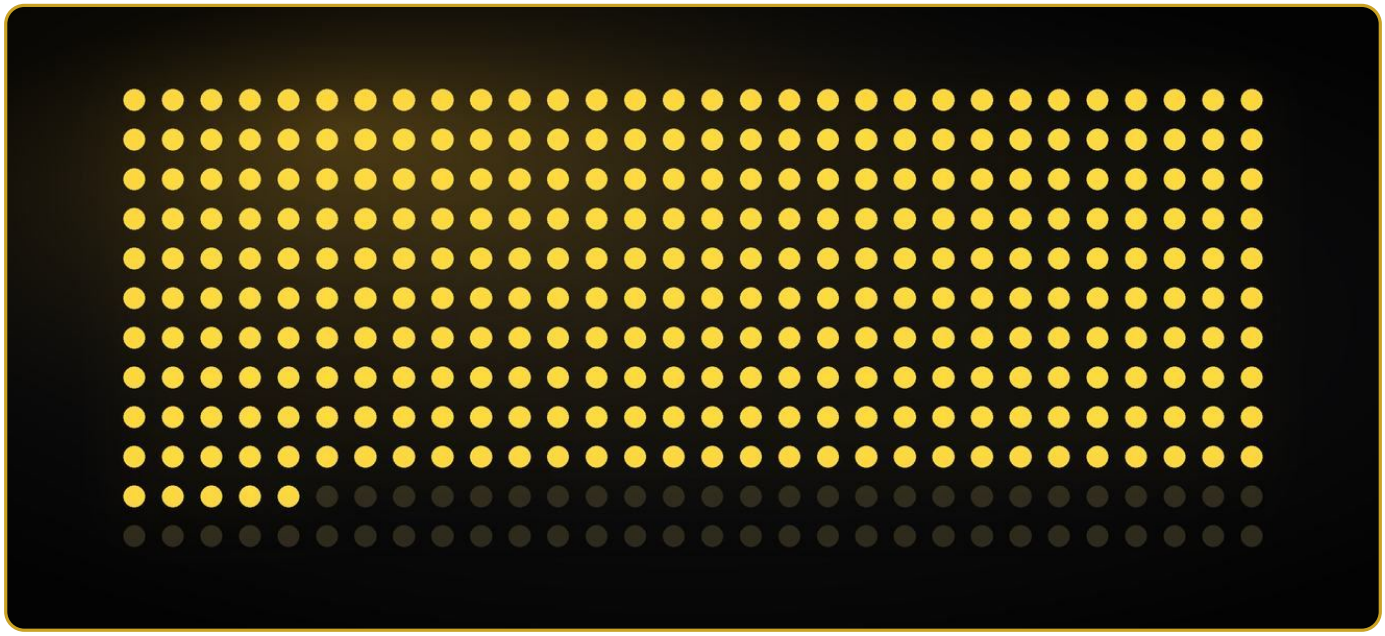

Open or name a sinking fund for the purchase and make the first transfer.

TRY THIS

Write the fund name and today's first transfer. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

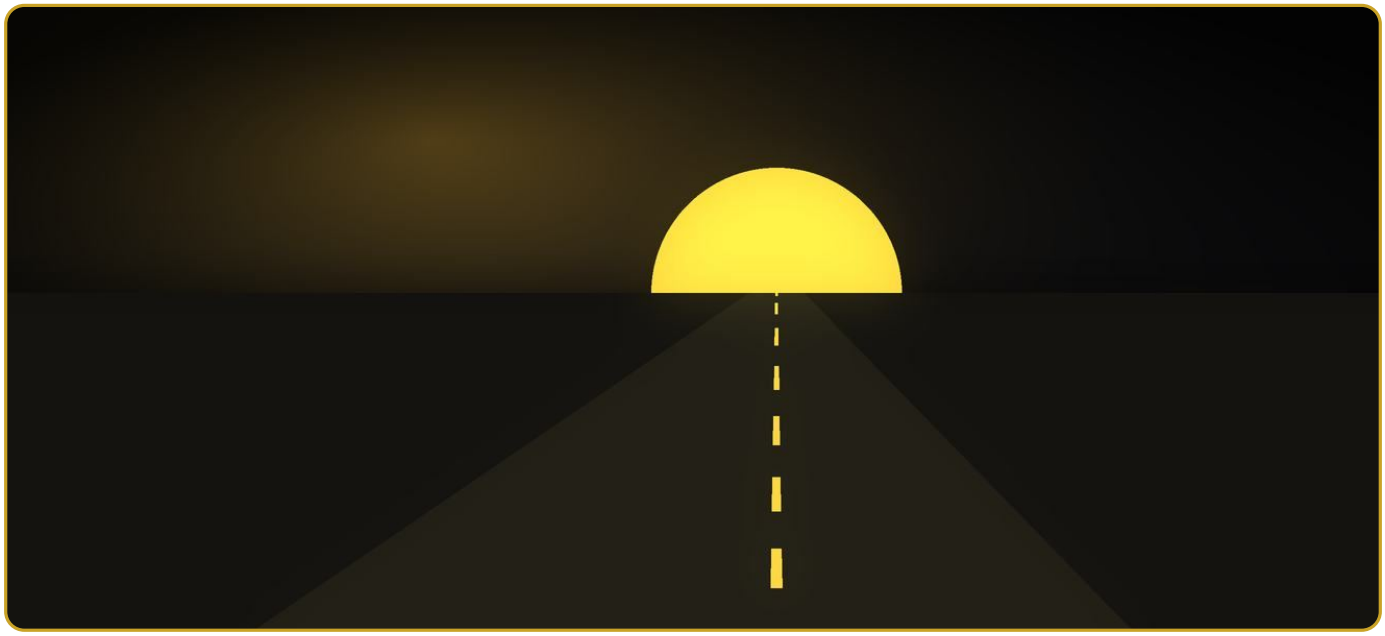

WEEKLY CHECK-IN

How close is your purchase fund to its first milestone?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

Is the thing you are saving for still the thing you want?

- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

THE PREDICTABLE SURPRISE

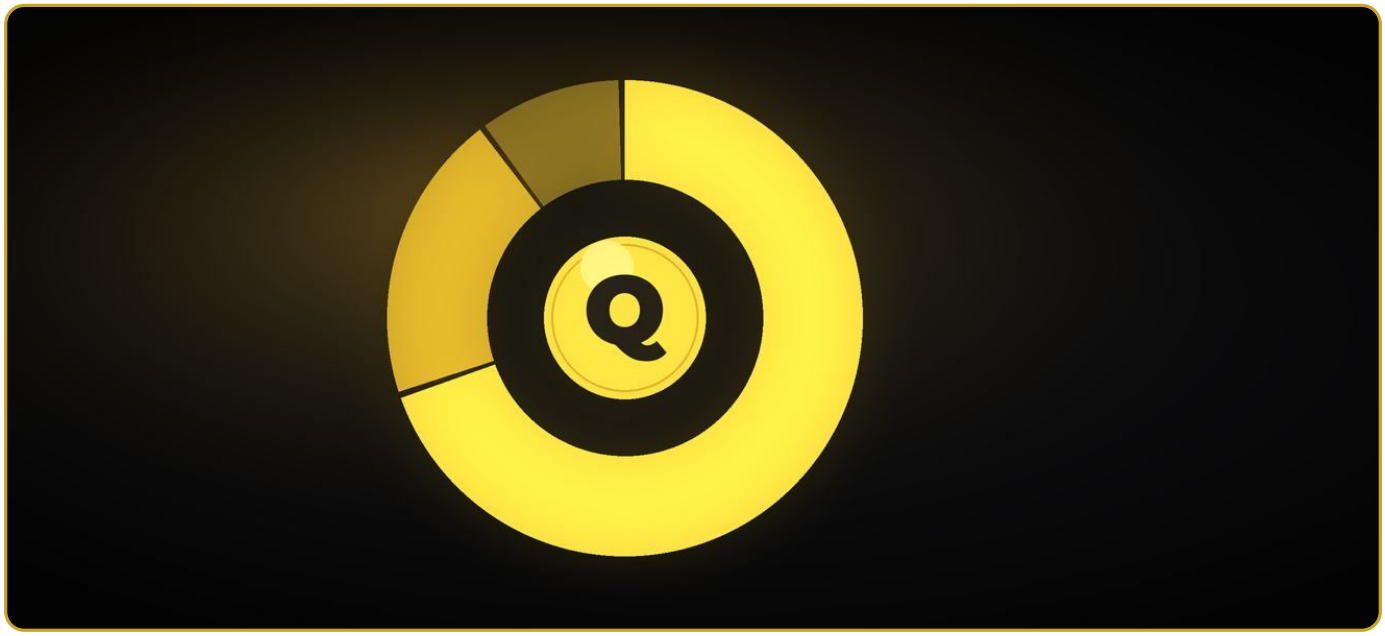

Holidays and birthdays come at the same time every year, yet many people treat them as surprises. A yearly list with a budget turns the season from stress into a plan.

TRY THIS

List every gift occasion this year with a person and an amount. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

TWELVE SMALL PAYMENTS

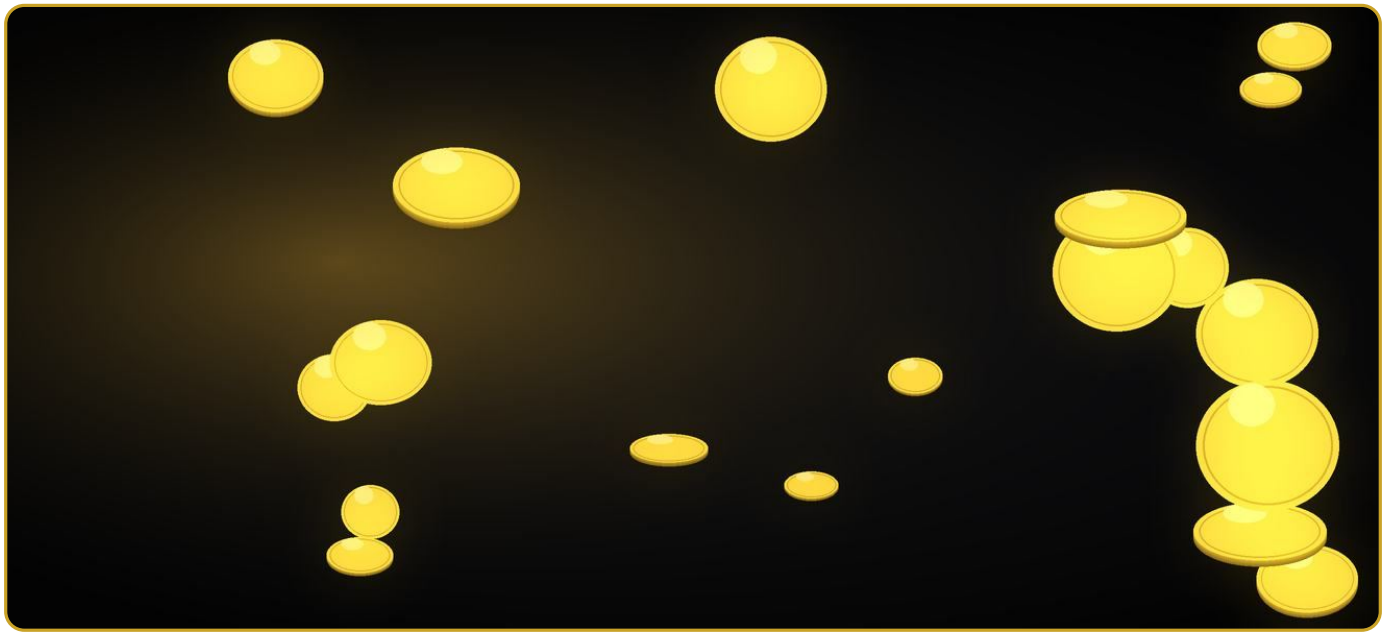

A gift and holiday budget of $600 is $50 a month when it is saved all year. The same $600 spent in one month can mean a credit card balance.

TRY THIS

Add your yearly gift costs and divide by 12. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

GIFTS THAT COST LESS

Thoughtful gifts do not have to be expensive. Experiences, a handwritten note, a favourite meal, time. Agree with friends and family on limits.

TRY THIS

Write three gifts that cost little but mean something to the person. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

SOCIAL PRESSURE

Gift-giving carries expectations. It is acceptable to set a limit or to say you are doing less this year. Most people are relieved.

TRY THIS

Write one tradition you could simplify and how you would say it kindly. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SET ASIDE NOW

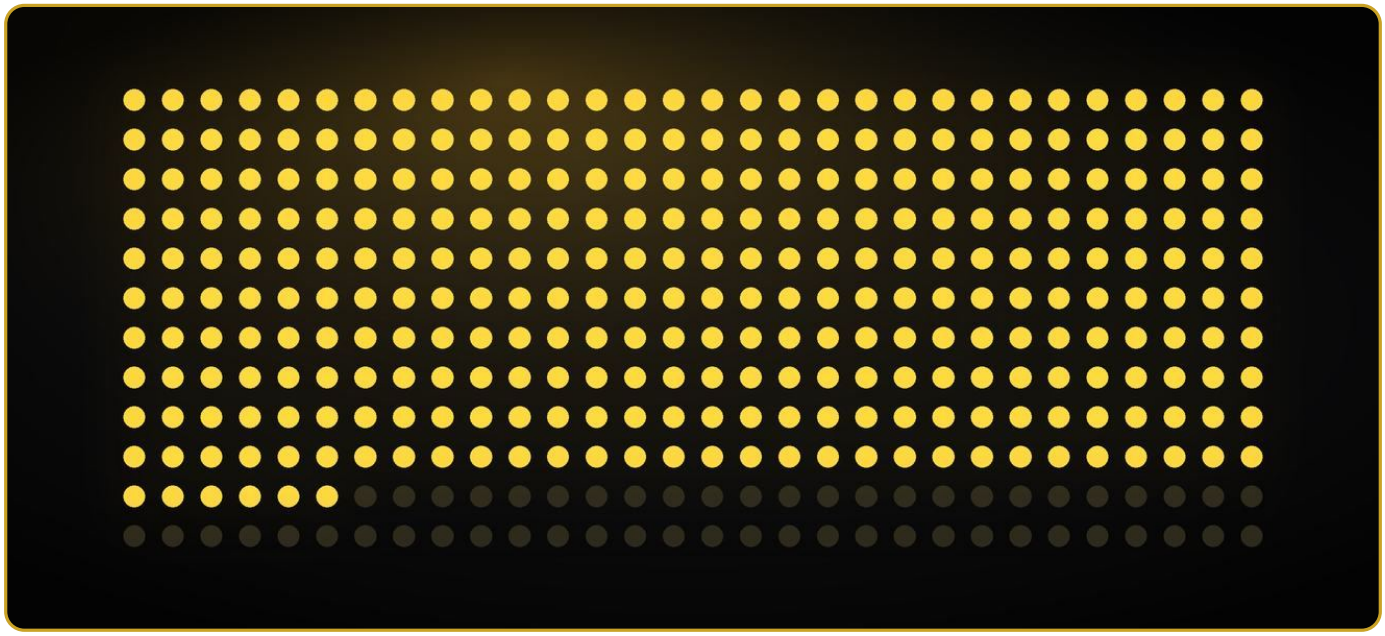

Start the fund now, even if the season is months away.

TRY THIS

Make the first transfer to your gift fund. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

How did you handle any social spending this week?

Money in this week $

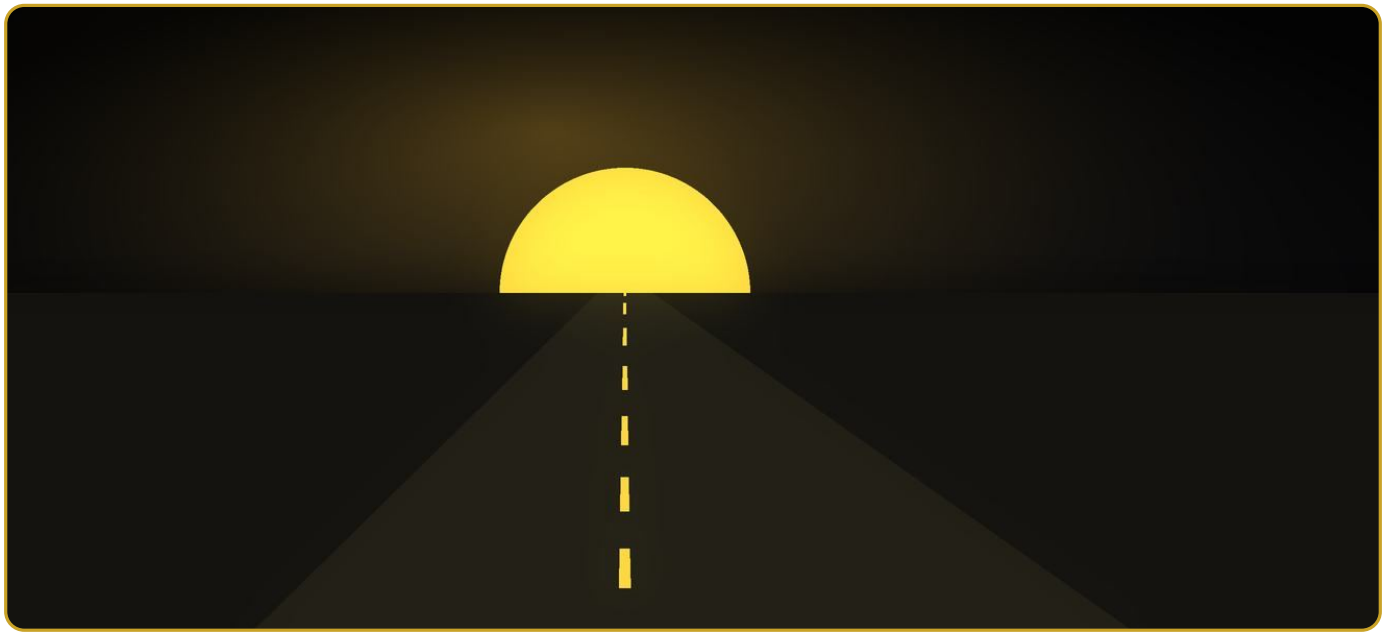

Spent this week $

Saved or invested $

Debt paid $

Three wins (any size)

One thing to fix next week

- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

MONEY IS A TEAM SPORT

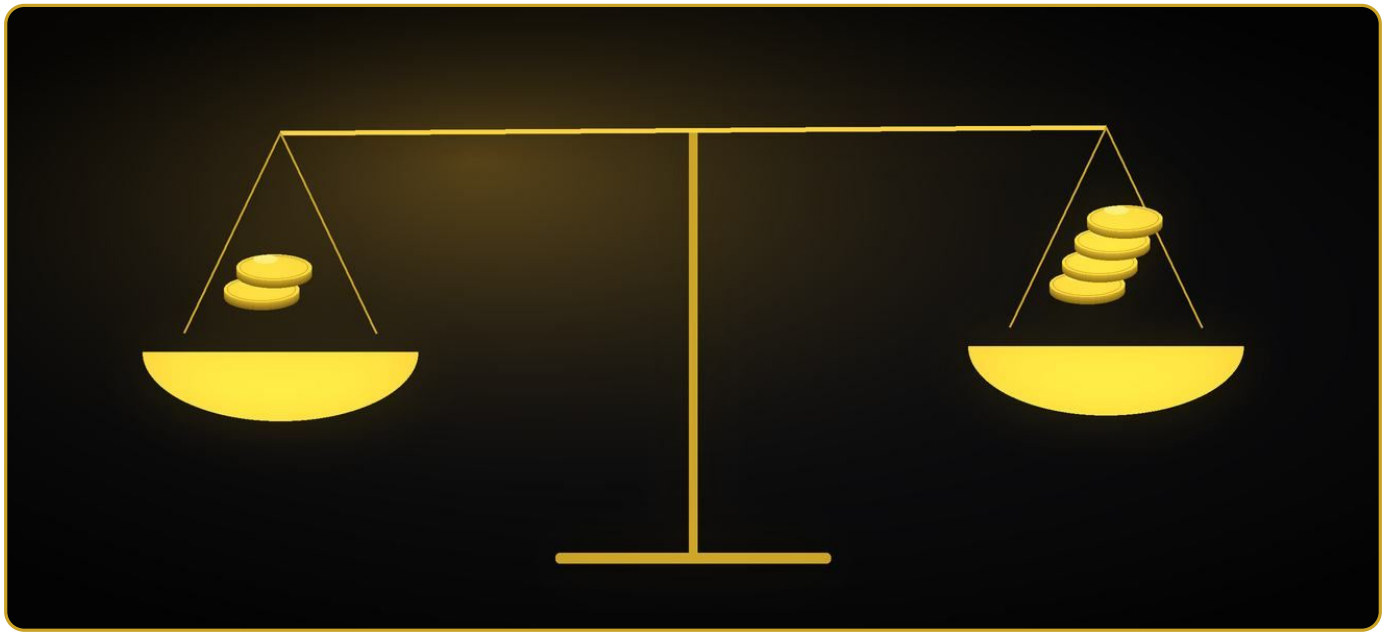

Money is one of the most common sources of stress in relationships. Talking early, calmly and with real numbers helps. Aim to understand each other, not to win.

TRY THIS

Write one money topic you find hard to discuss and who you would need to discuss it with. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE SHARED PICTURE

If two people together spend $4,200 a month, a 10% difference between what each thinks is spent is $420 every month, or $5,040 a year. Seeing the same numbers matters more than agreeing about the rest.

TRY THIS

Write the one number you would both want to see: income, spending or savings. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

A MONEY DATE

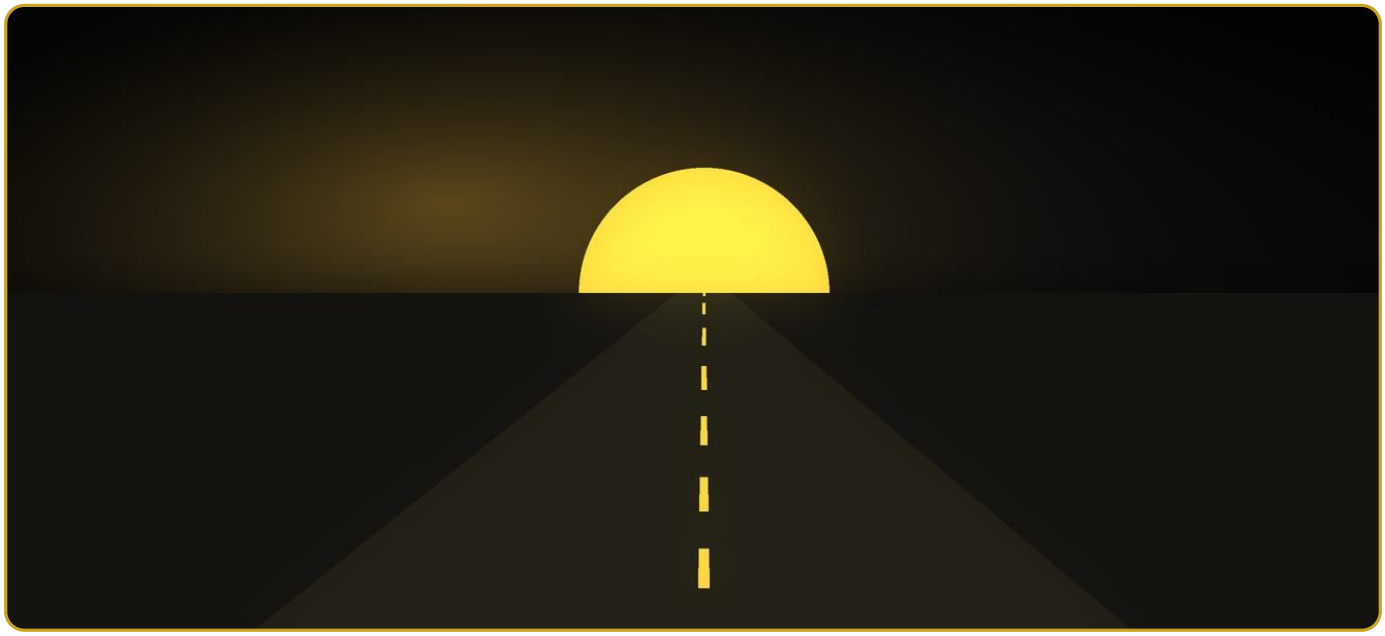

Choose a regular time to look at your money together, keep it short and add something pleasant. Start with wins, then one topic.

TRY THIS

Plan the date and the first topic. Write them here. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

DIFFERENT MONEY STORIES

People learn about money from their childhood. One person's careful is another person's stingy. Asking about where a belief came from changes the conversation.

TRY THIS

Write a belief about money you learned as a child and where it came from. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

AGREE ON A LIMIT

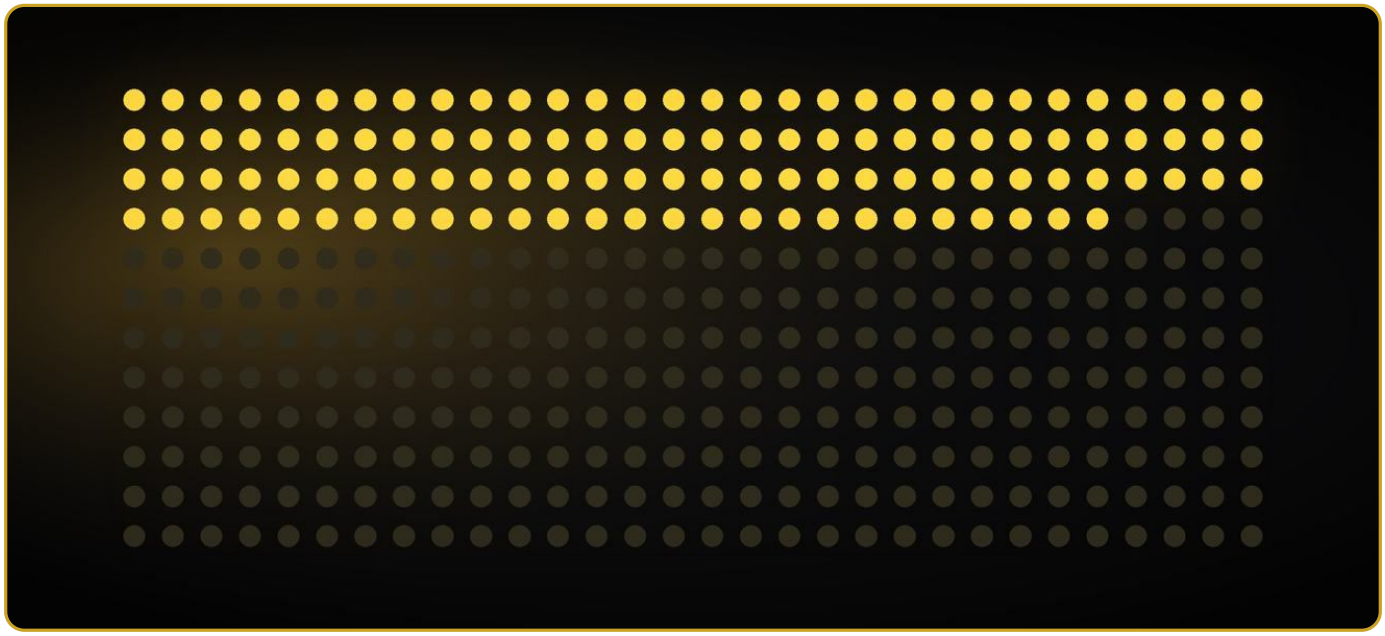

Many couples agree on an amount above which each person talks to the other before spending. The amount is a personal choice.

TRY THIS

Write the amount that fits your life, or ask your partner or friend to do it with you. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

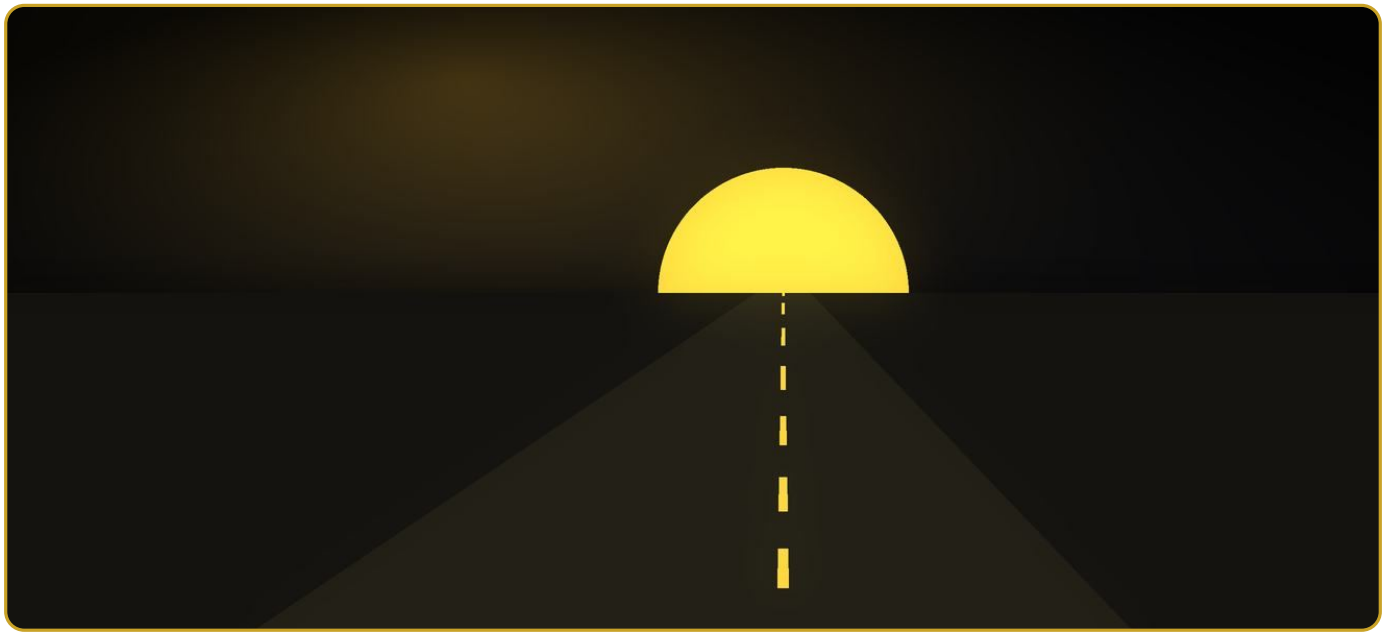

WEEKLY CHECK-IN

How did a money conversation go this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Money mood this week (1) (2) (3) (4) (5)

LEARN

PASS IT ON

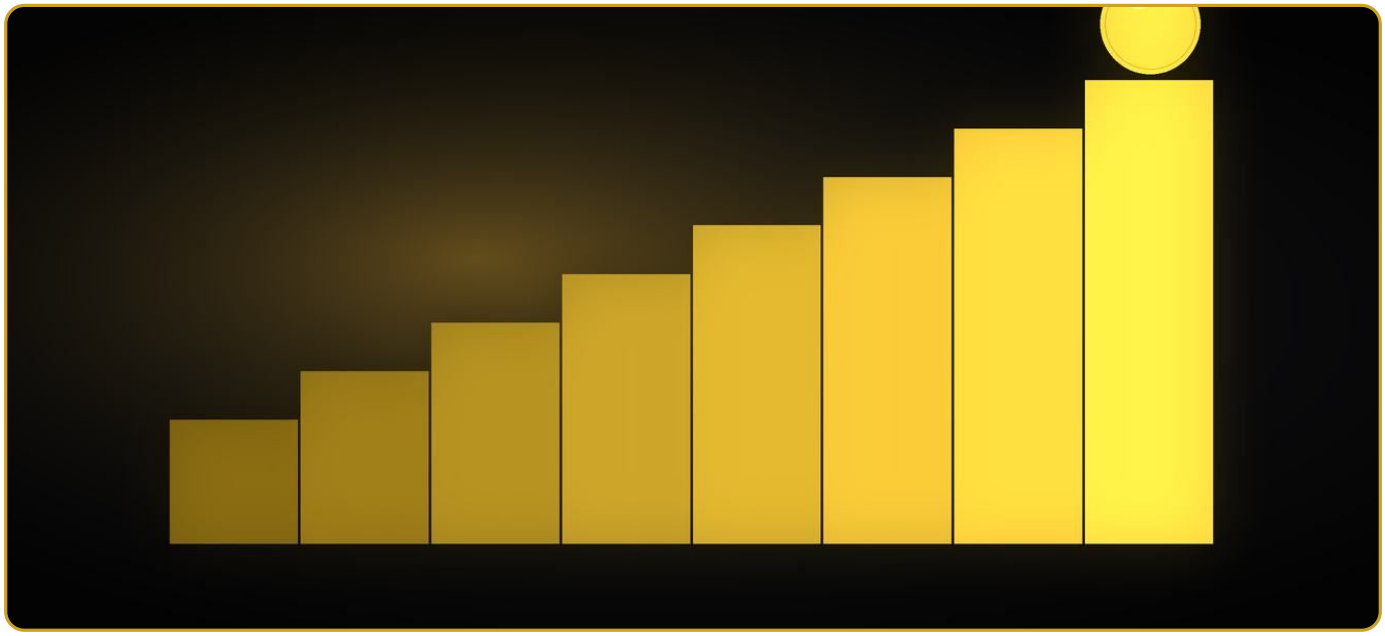

Children learn from what they see. Letting them watch you make money choices, calmly, teaches more than lectures. Giving, even in small amounts, can also be part of a healthy money life.

TRY THIS

Write one money habit you want a child, or a younger person you know, to see you doing. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

SMALL GIFTS, BIG HABITS

A $5 a week allowance split into spend, save and give is $260 a year. A child who saves $2 every week for 17 years at a hypothetical 5% a year has about $2,778.

TRY THIS ☐

Write a simple split for a child or a younger person: spend, save, give.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

MAKE SAVING VISIBLE

Use jars, a drawing of a goal or an app. Children and adults both stay motivated when they can see progress.

TRY THIS

Create one visible tracker for a saving goal. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

GIVING AND GRATITUDE

Many people report that giving to others feels good. It does not need to be a lot or only money. A plan for giving stops it from being an afterthought.

TRY THIS ☐

Write how much of your budget you want to give and where.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

TEACH ONE IDEA

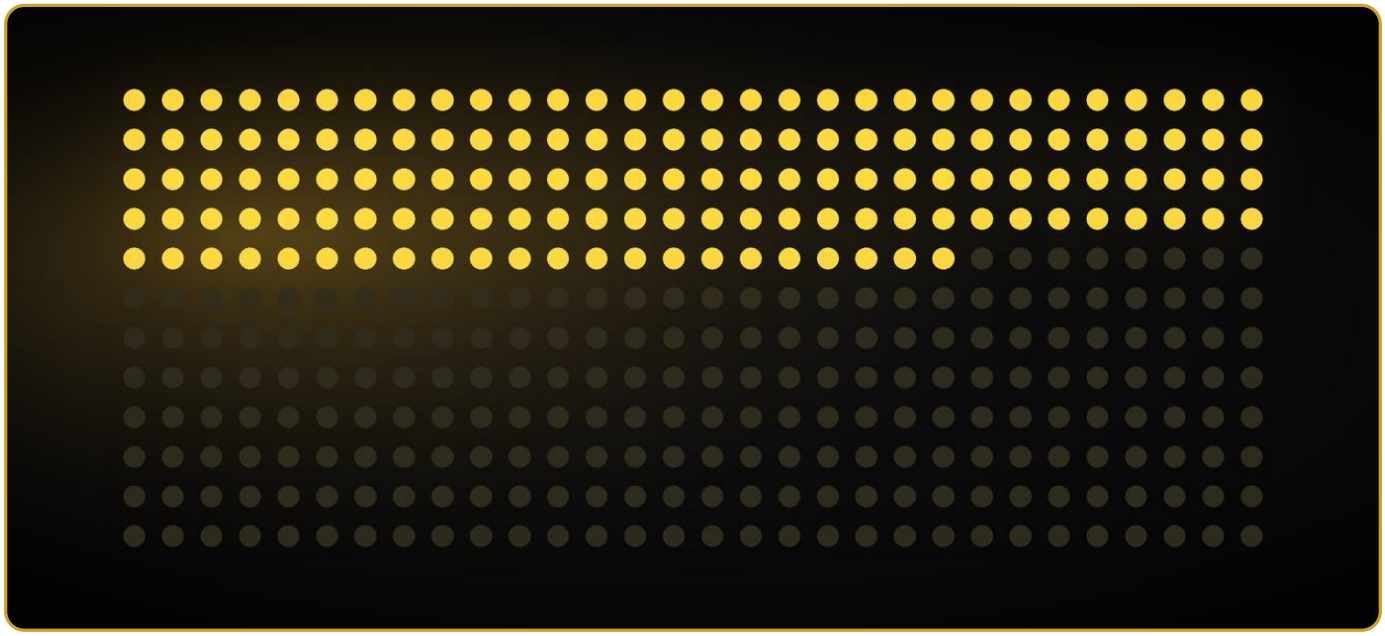

Explain one money idea to someone in plain words. Teaching helps you learn.

TRY THIS

Write the idea you explained and one question you could not answer. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

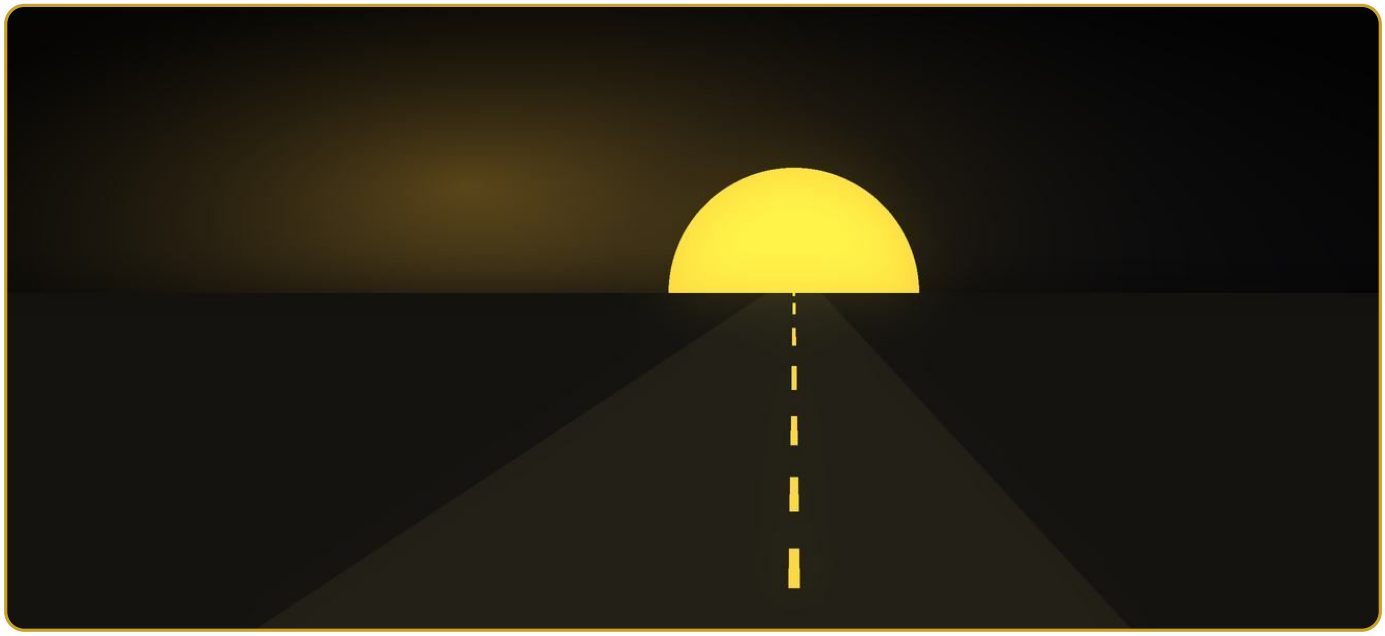

WEEKLY CHECK-IN

What did you teach or share about money this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

LEARN

SLOW DOWN THE FAST

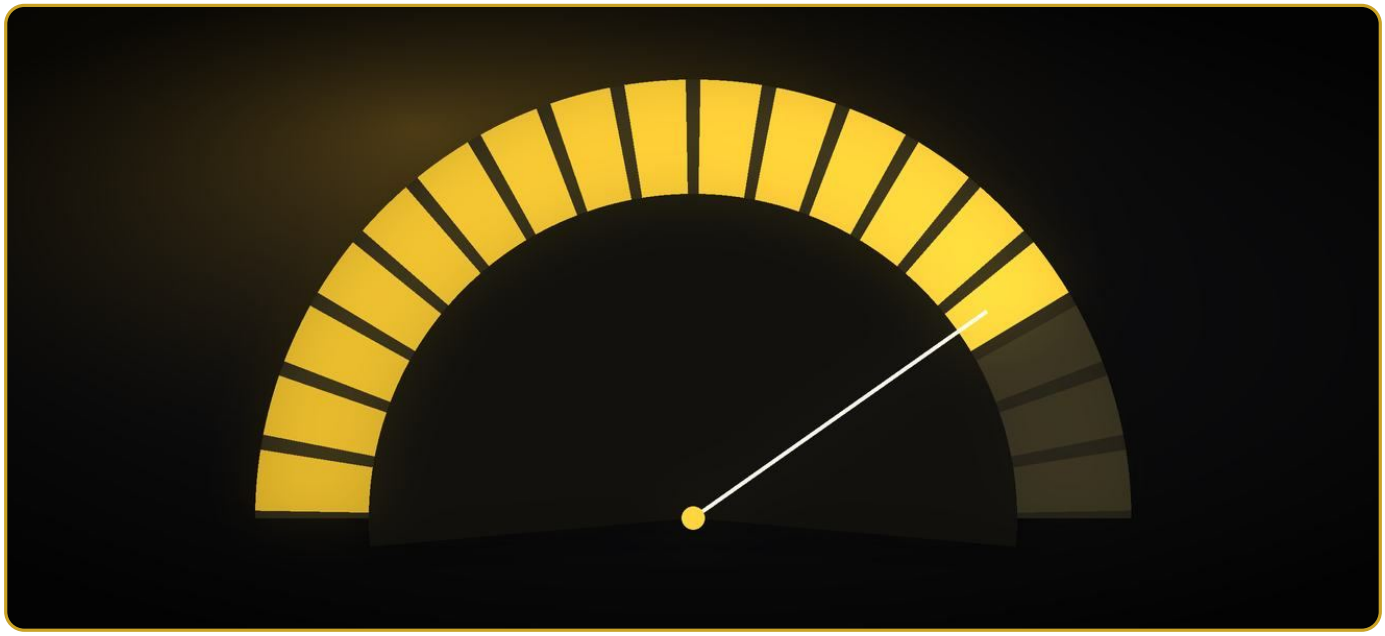

Most scams share the same ingredients: urgency, secrecy, fear or a prize, and a request for money, codes or gift cards. When something is fast and secret, stop.

TRY THIS

Write three signs of a scam that you now recognise. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE TELL

A real bank or agency will not demand payment in gift cards, ask for a one-time code you receive by text or insist on speed. If someone does, hang up and call the official number on the back of your card or the official website.

TRY THIS

Save the official fraud contact number for your bank in your phone. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

LOCK THE DOORS

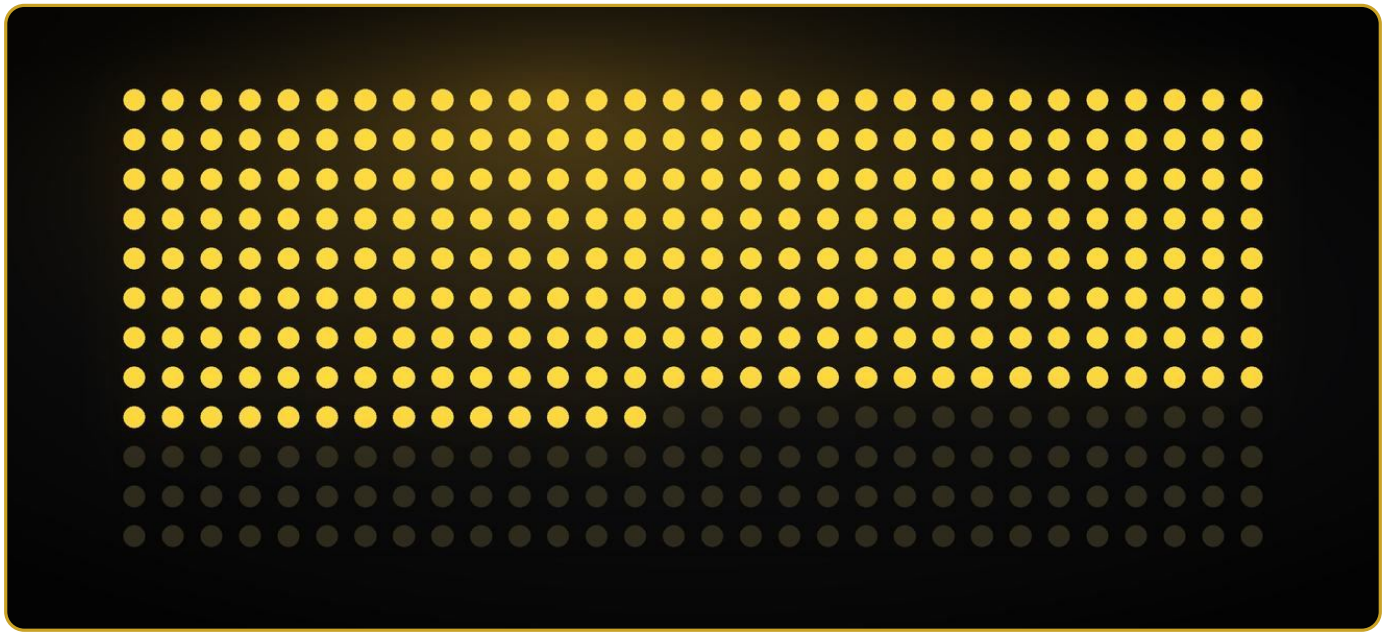

Use unique passwords, a password manager and two-factor authentication on your money accounts. Turn on alerts for sign-ins and transfers.

TRY THIS

Turn on two-factor authentication on your bank and email accounts today. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

WHY SMART PEOPLE GET FOOLED

Scammers use pressure and emotion, not stupidity. Anyone can be caught when tired, rushed or afraid. Having a rule ahead of time works better than relying on being clever.

TRY THIS

Write your own rule, such as I never act on a request in the first hour. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

FREEZE AND MONITOR

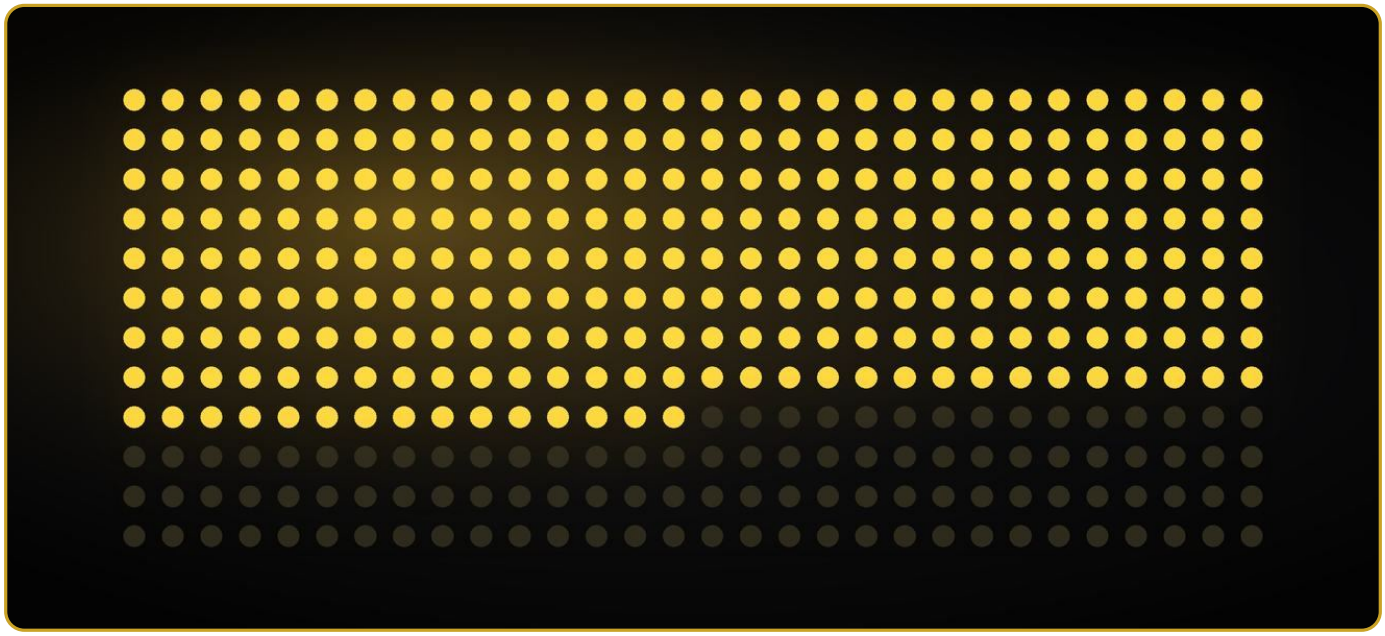

Know how to freeze your credit where you live, and how to check your accounts for activity you did not make.

TRY THIS

Find the steps for a credit freeze in your country and write the page where they are. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

A NUMBER, NOT A FEELING

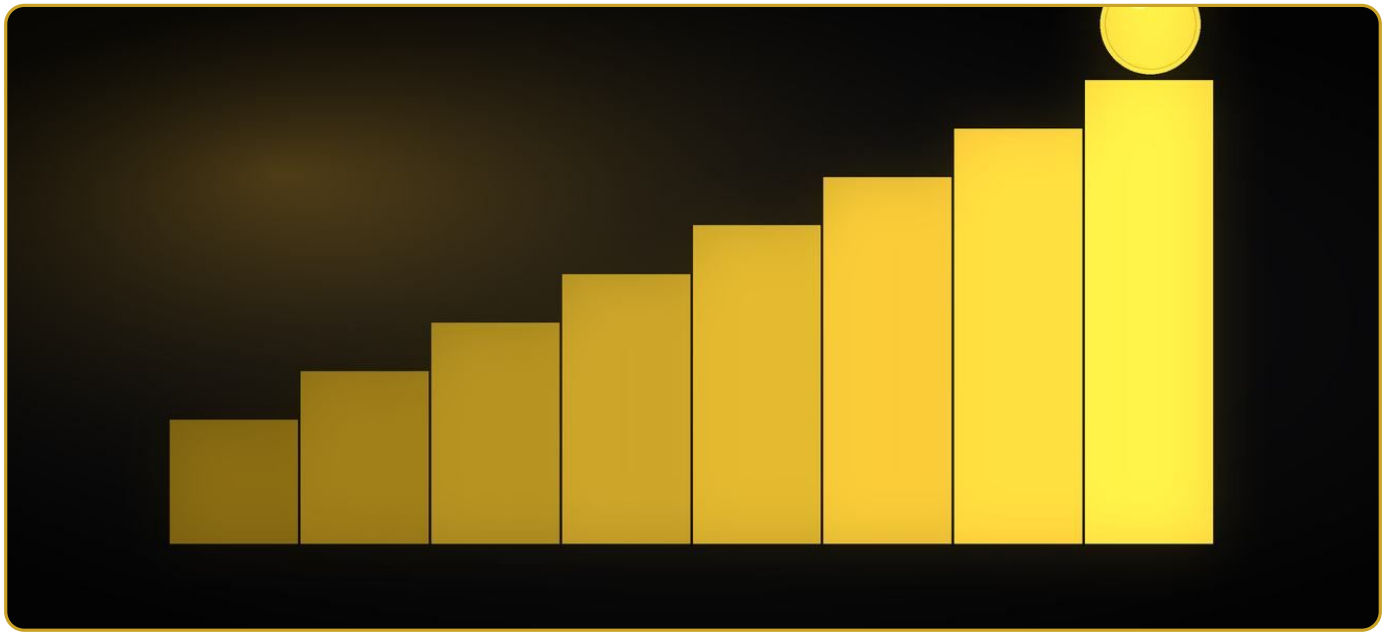

Your freedom number is the amount that could cover your yearly spending using a withdrawal rate such as 4%. Divide your yearly spending by 0.04. It is an estimate for planning, not a promise.

TRY THIS

Write your monthly spending. Multiply by 12. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

COMPUTE IT

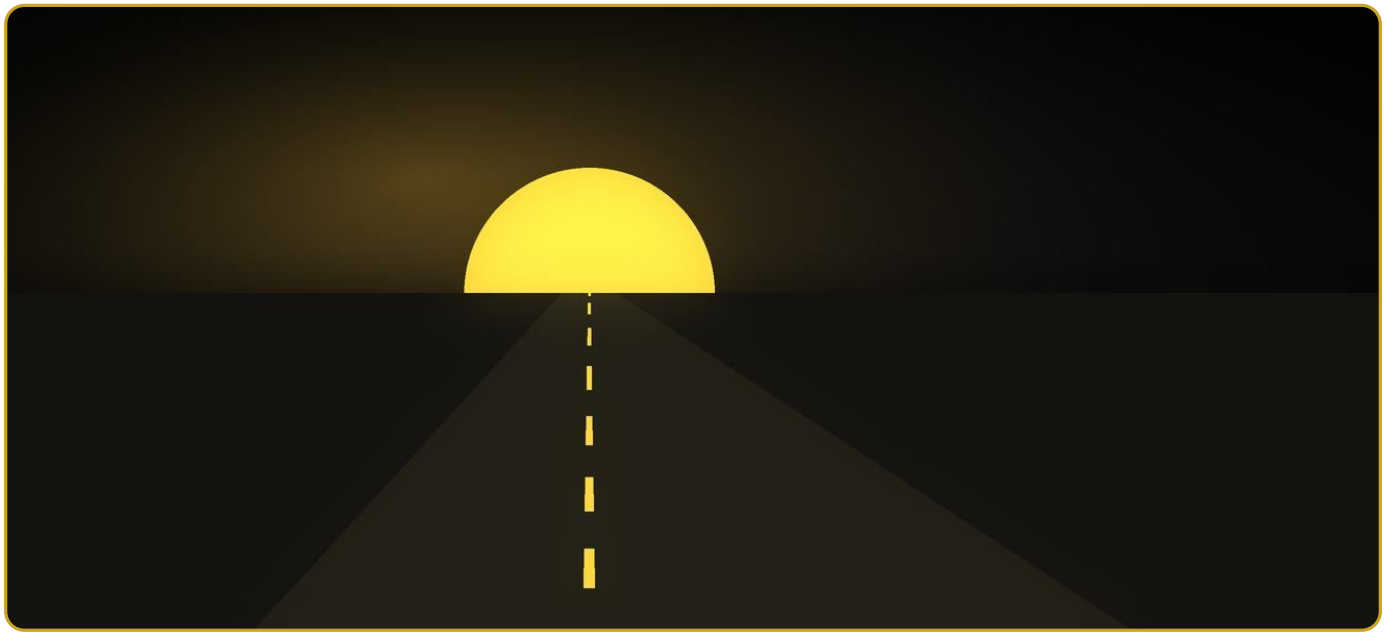

If you spend $3,000 a month, that is $36,000 a year. Divided by 0.04 the freedom number is $900,000. At a hypothetical 8% a year, investing $1,000 a month would take about 24.4 years to get there.

TRY THIS

Calculate your own freedom number. Write it in the box on the summary page. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

LOWER THE BOTTOM

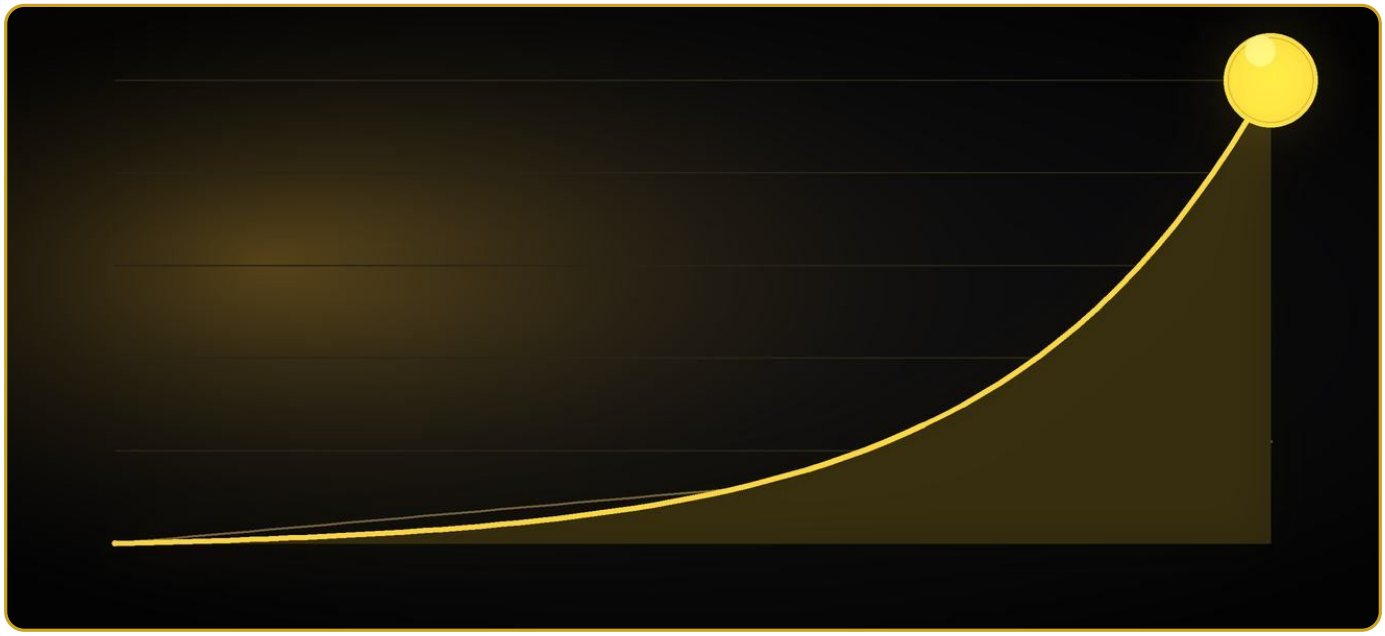

Every $100 you cut from monthly spending lowers the number by $30,000 and is also money you can save. Both sides of the equation move.

TRY THIS

Write one monthly cost you could cut and calculate its effect on your number. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

ENOUGH

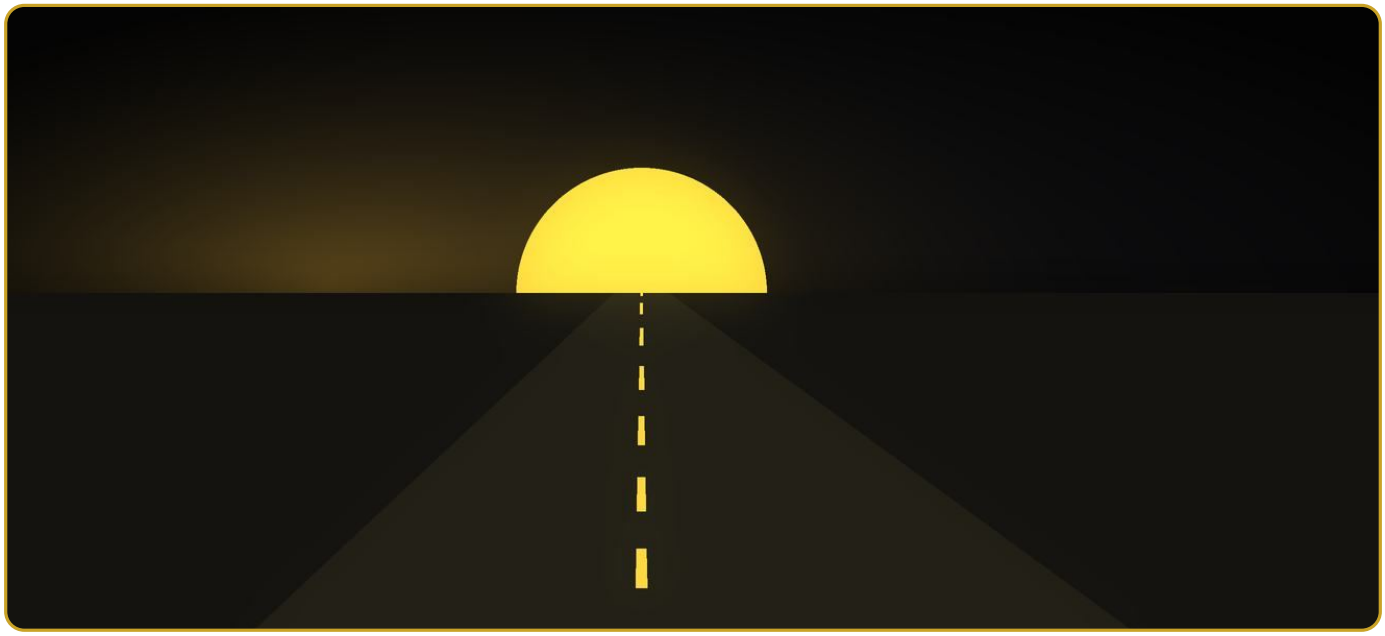

Moving the finish line every time you get near it keeps you running. Decide what enough looks like in your own life, in dollars and in days.

TRY THIS

Write your version of enough in one paragraph. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

SET THE THREE GOALS

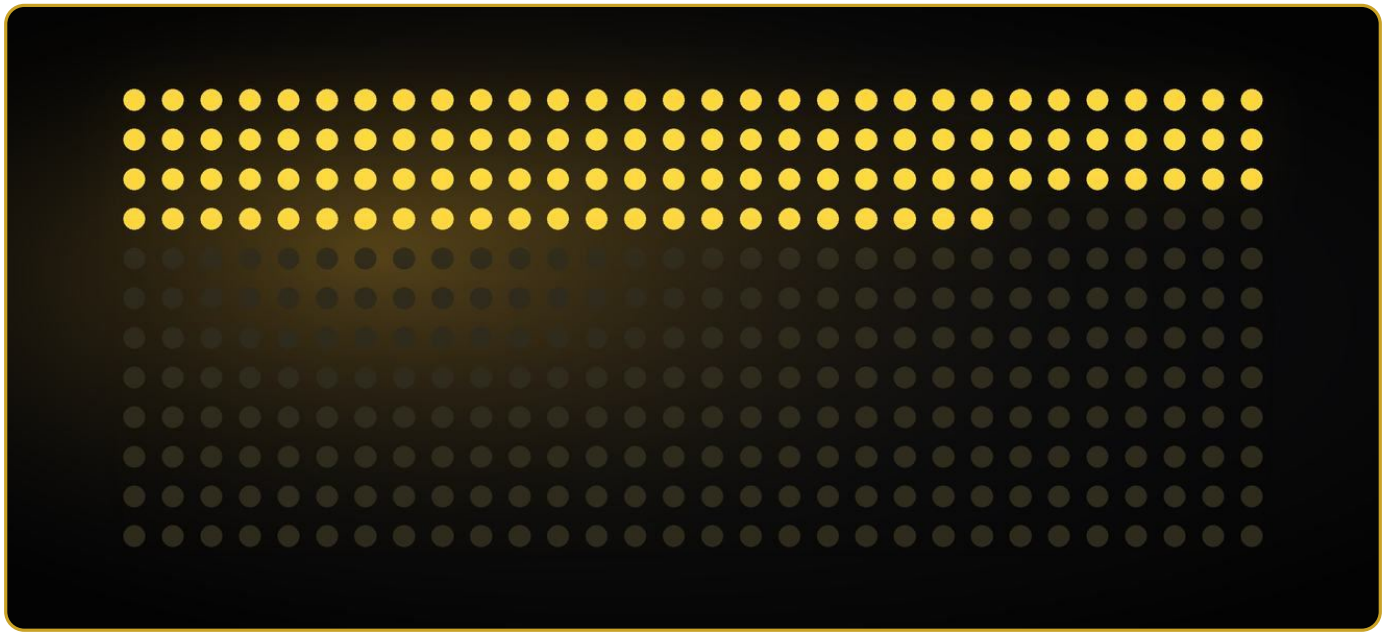

Choose one short goal under 3 months, one medium goal under a year and one long goal of five or more years. Add a number and a date to each.

TRY THIS

Write your three goals with numbers and dates. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

WEEKLY CHECK-IN

How far are you from each of your three goals this week?

Money in this week $

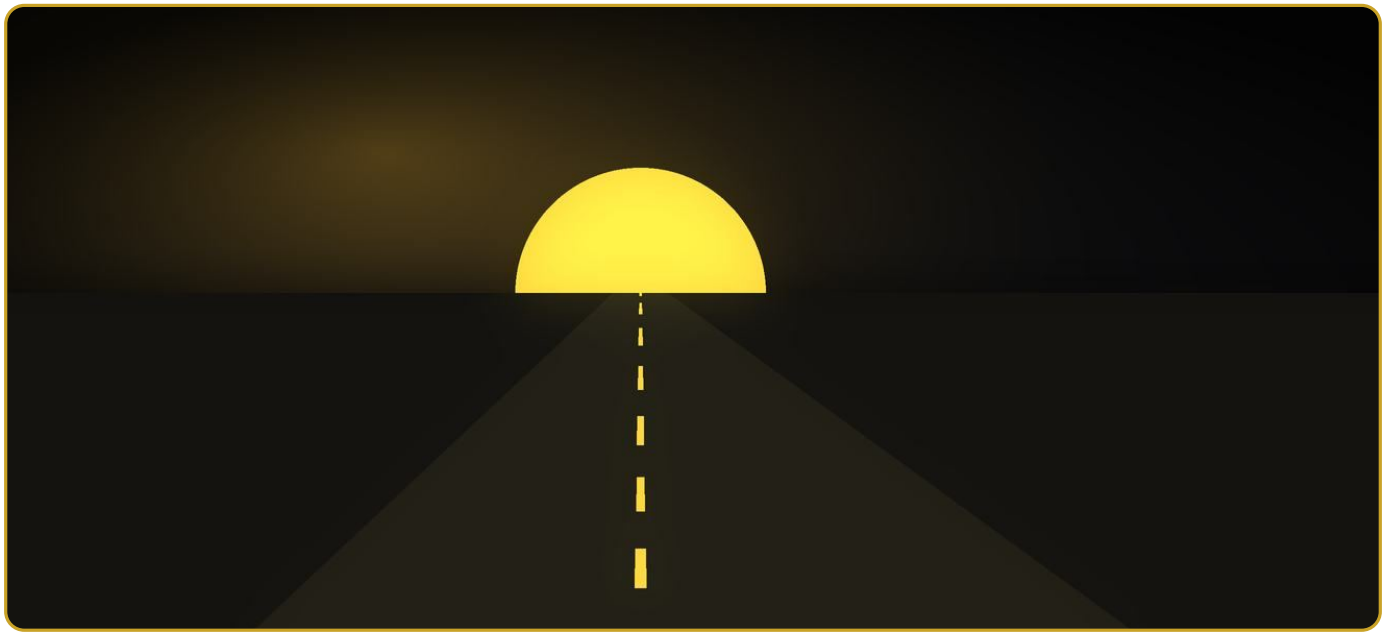

Spent this week $

Saved or invested $

LEARN

SYSTEMS BEAT MOTIVATION

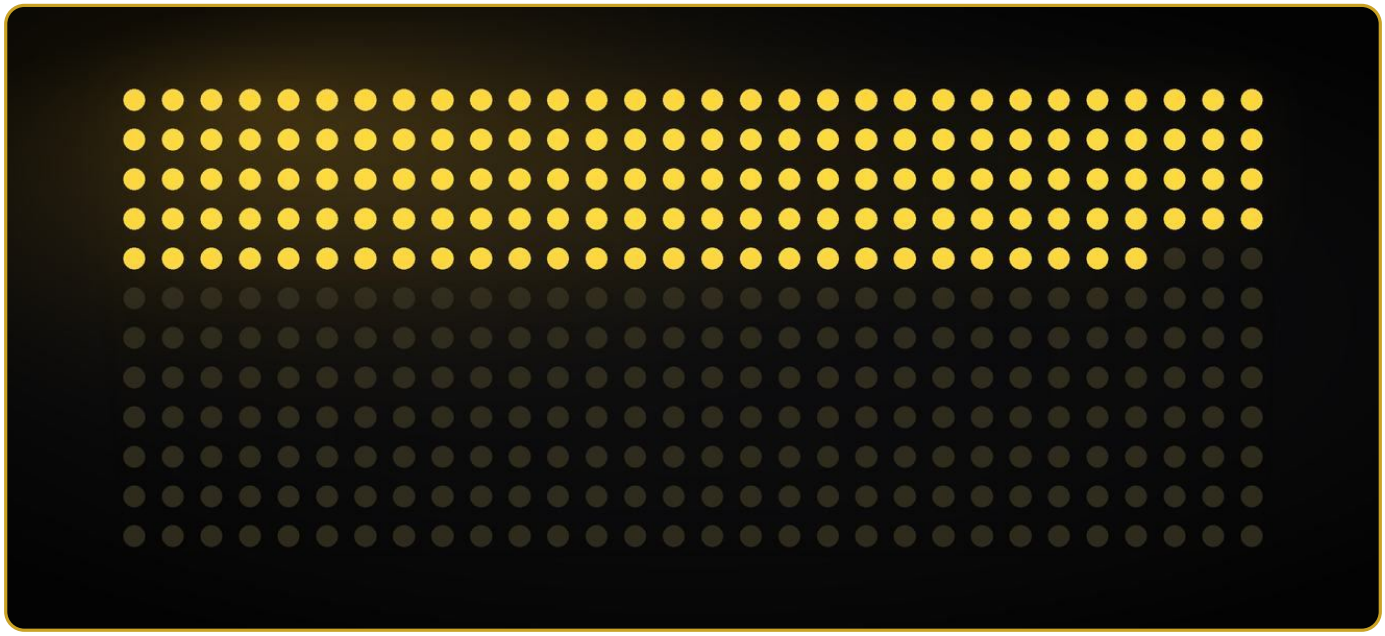

Motivation comes and goes. Systems work on bad days. A money system has four parts: money comes in, bills are paid, savings are moved, and you check in on a schedule.

TRY THIS

Draw your own system as four boxes on this page. Fill in what happens in each box. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

HOURS SAVED

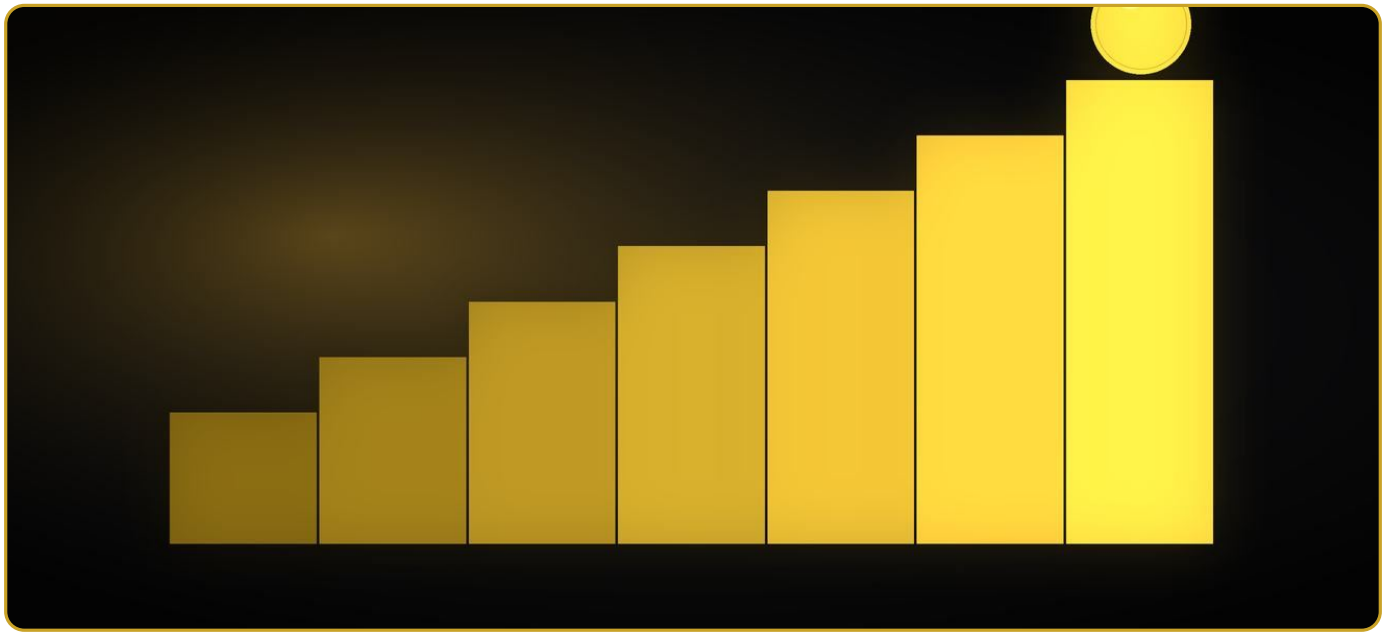

If your money routine takes 30 minutes a week, it is 26 hours a year. Automating bills and savings can bring that down.

TRY THIS

Time your next money check-in. Write the minutes. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

MAKE A MONEY CALENDAR

Put the repeating items on one calendar: payday, bills, transfers, a weekly check-in, a monthly review, a yearly review.

TRY THIS

Fill in your calendar for the next month with every money date. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

REDUCE THE DECISIONS

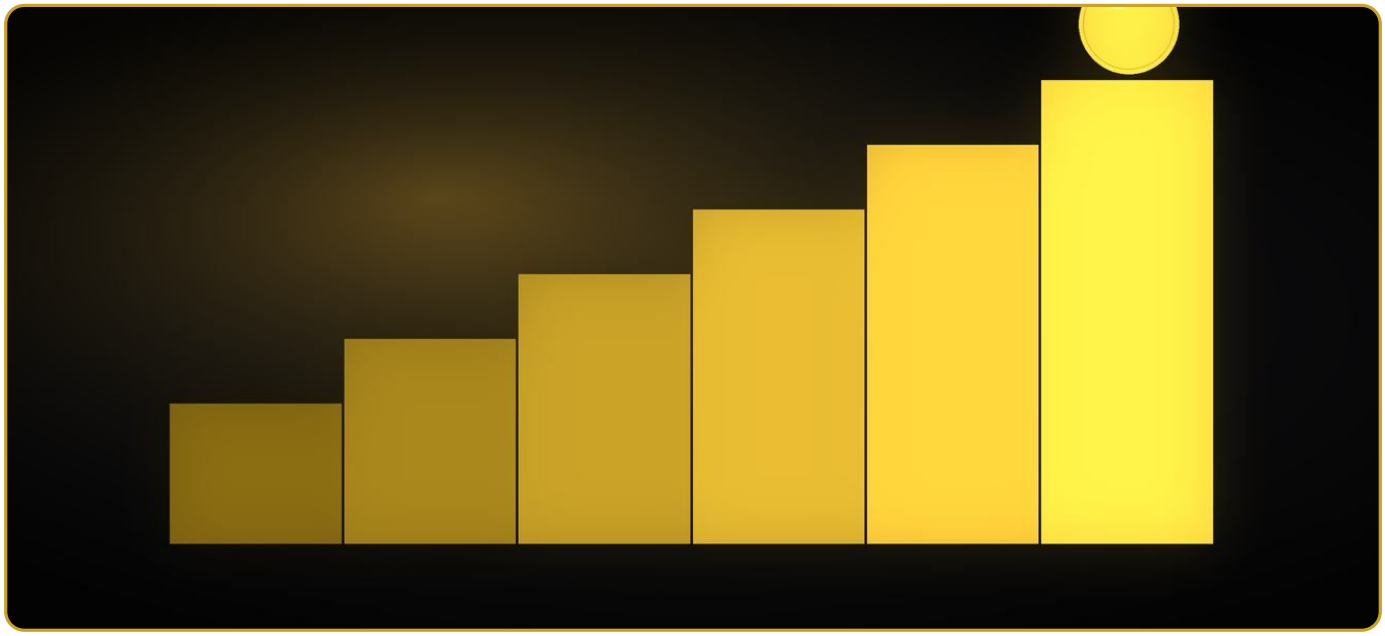

Each decision uses energy. Make the repeating ones automatic so you save your attention for the rare big ones.

TRY THIS

Write three decisions you make every month that you could automate. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

ONE BREAKDOWN TEST

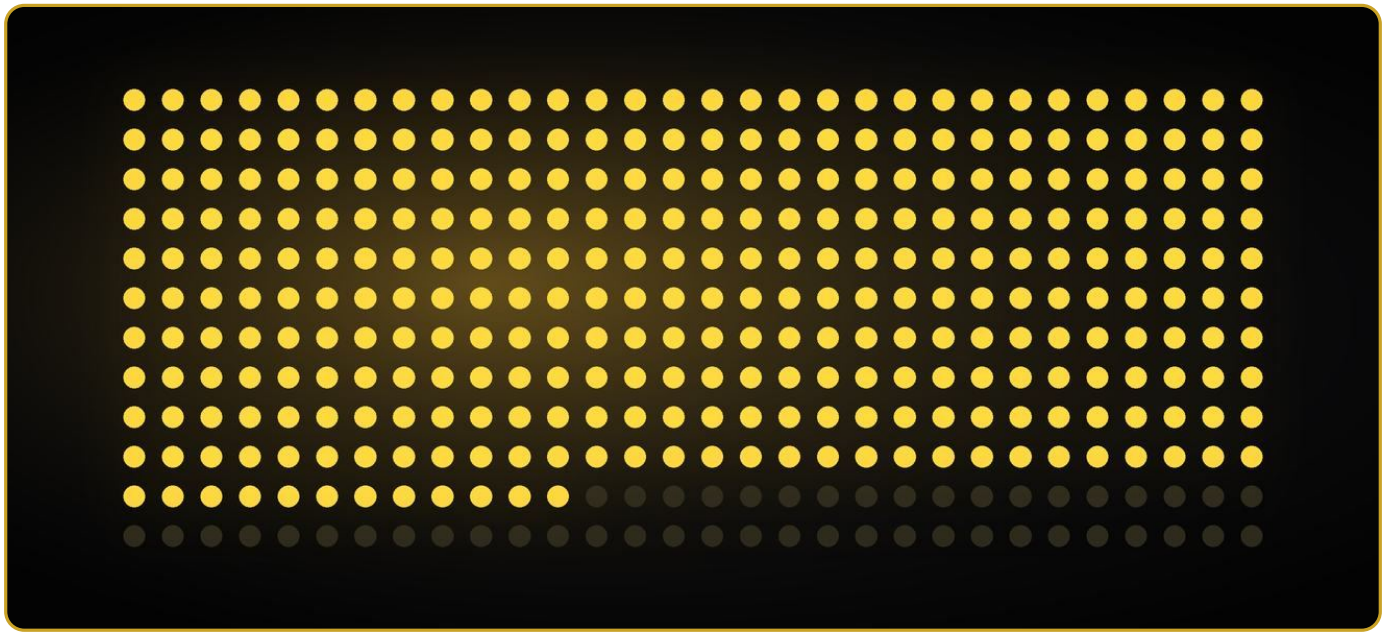

Imagine you were ill for a month. Would your bills still be paid, your savings still move? What would break?

TRY THIS ☐

Write the one point of failure and fix it.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

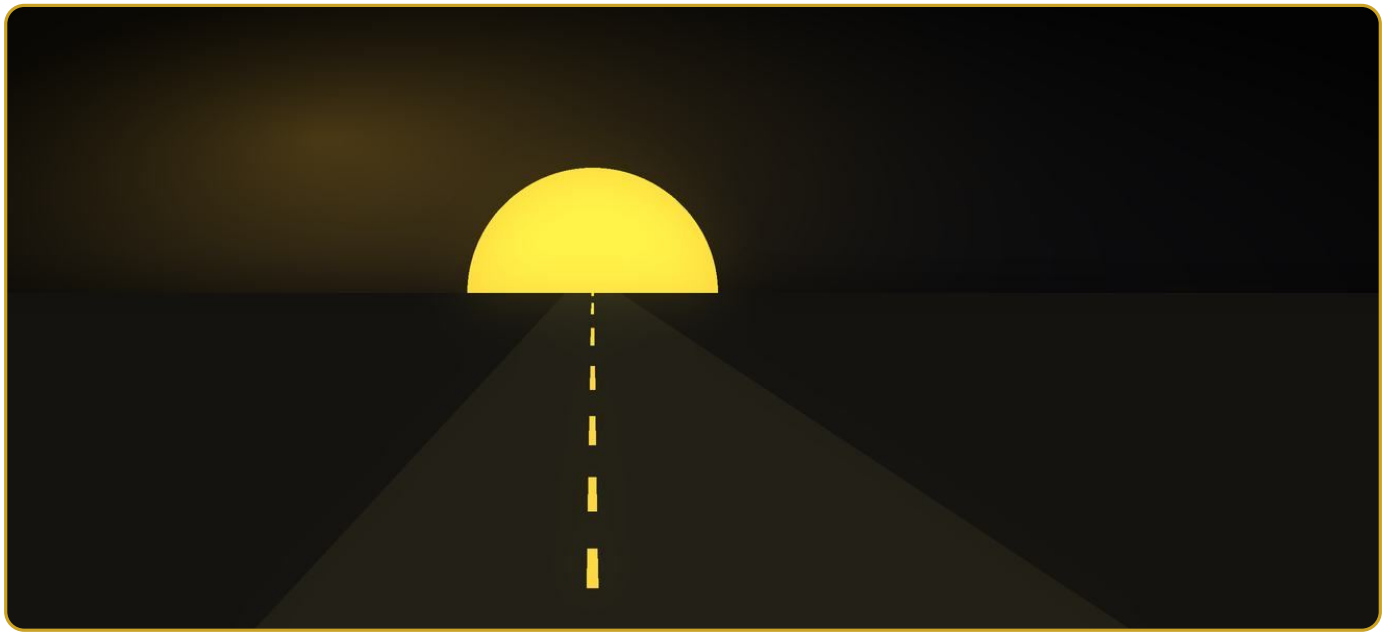

WEEKLY CHECK-IN

How much of your money system worked without you this week?

Money in this week $	Spent this week $

Money mood this week (1) (2) (3) (4) (5)

LEARN

BELIEFS WORTH TESTING

Some money beliefs spread because they are simple, not because they are true. It is worth testing the ones that cost you the most.

TRY THIS

Write three money beliefs you hold. Mark each: true, false, or I have not checked. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

MYTH: DEBT-FREE MEANS RICH

Being free of debt is a great step. But a person with no debt and no savings can still be one emergency away from trouble. A person with a mortgage and large investments may be in a stronger position.

TRY THIS

Write one thing that matters about your situation beyond whether you have debt. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

MYTH: YOU NEED A LOT TO START

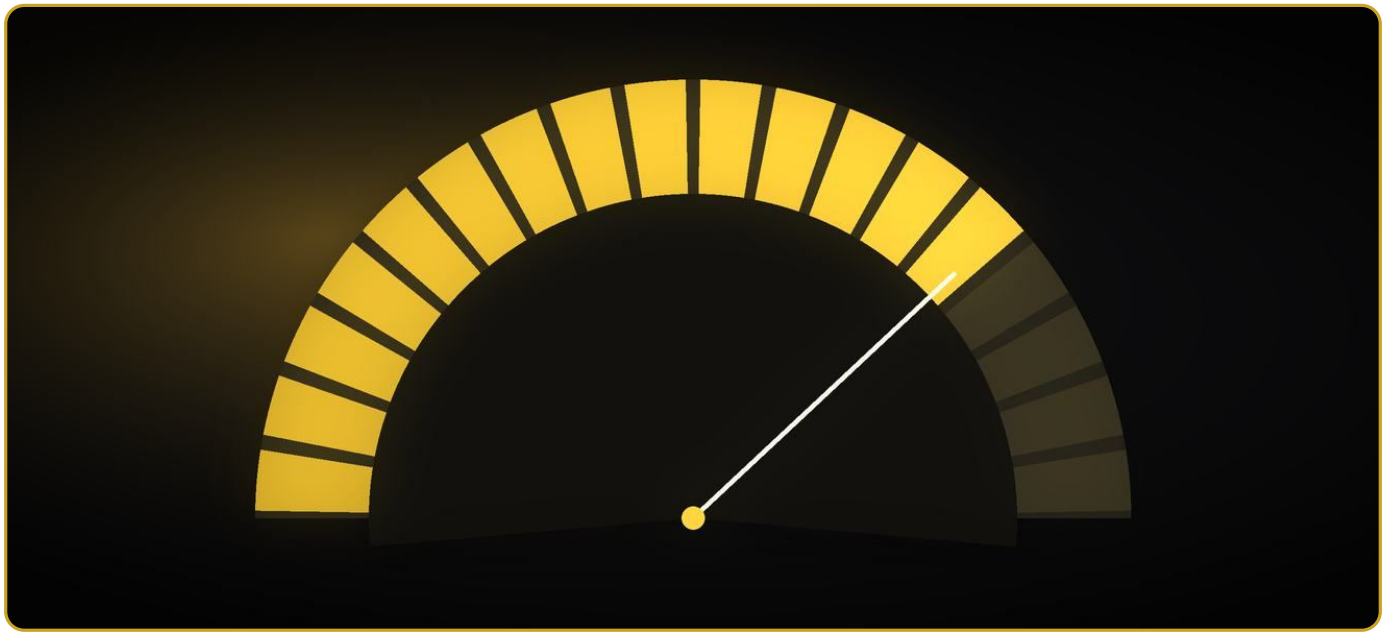

Many platforms let people start investing with small amounts. The habit matters more than the first sum. A monthly $25 for 30 years at a hypothetical 7% a year grows to $30,499.

TRY THIS

Write the smallest amount you could invest regularly and what it would be in 30 years. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

MYTH: BUDGETS ARE RESTRICTIVE

A budget is permission as well as limits. People often find a budget gives them guilt-free spending in the categories they chose.

TRY THIS

Write one thing you could spend on guilt-free if you planned for it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

MYTH: ONLY EXPERTS CAN MANAGE MONEY

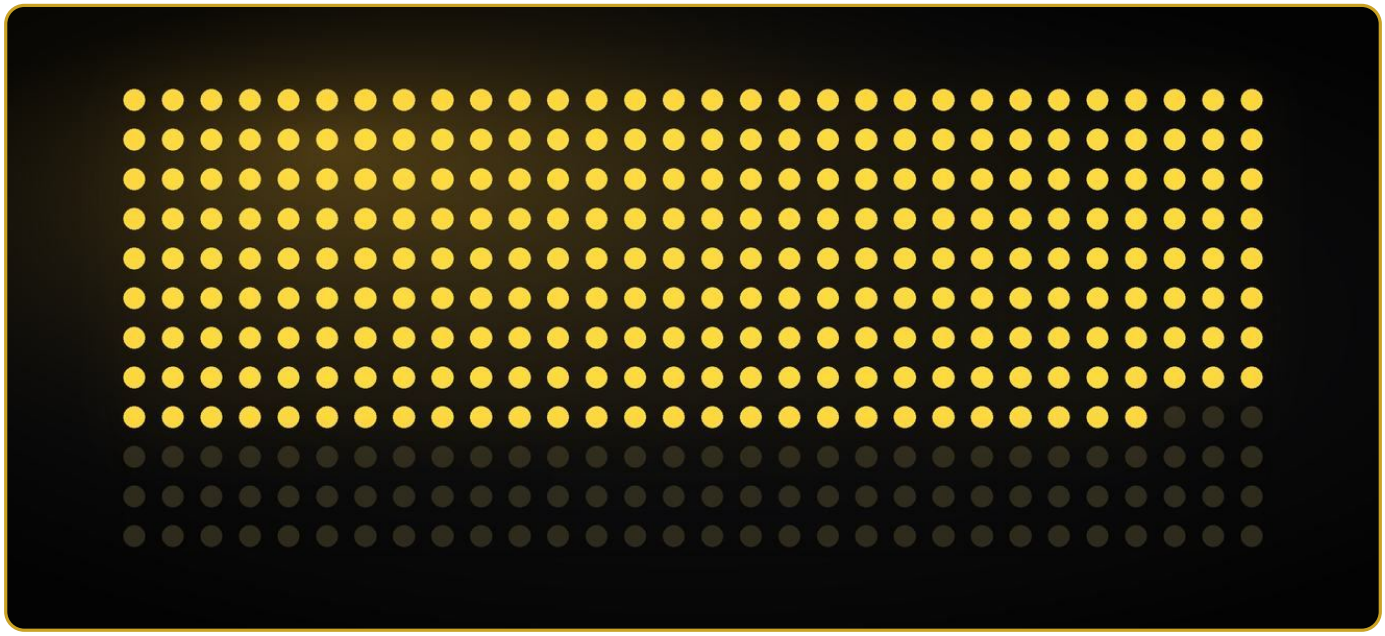

The basics need arithmetic and consistency. Experts help with complex situations, and getting help is smart. It is not a prerequisite for starting.

TRY THIS

Write one question you could ask a qualified professional and the date you will ask it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

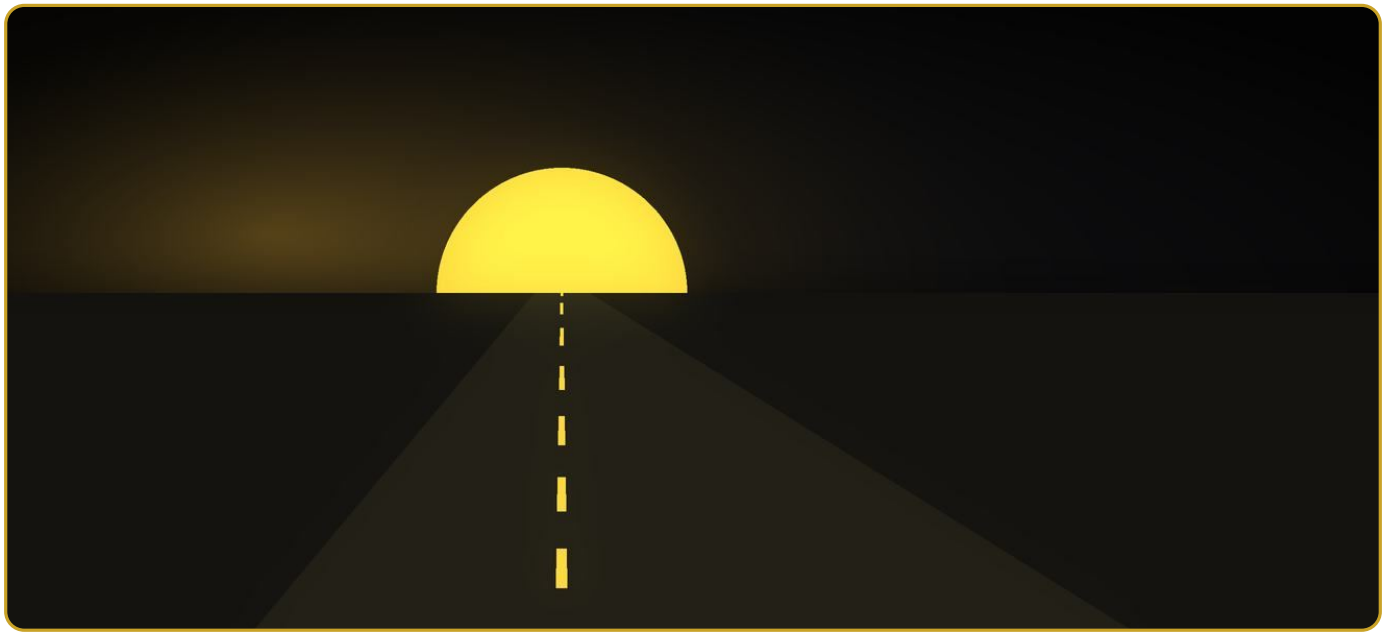

WEEKLY CHECK-IN

Which myth did you change your mind about this week?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

Which belief about money served you once and does not now?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

BUILDING, NOT SHOWING

Quiet wealth is the idea of building security without displaying it. The point of money is the freedom it buys, such as time, choices and calm, not the things people see.

TRY THIS

Write what you want your money to buy that nobody can photograph. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE GAP

Wealth is what you keep, not what you earn. Two people can earn the same and one can keep 20% while the other keeps nothing. Saving $1,500 a month for 10 years adds up to $180,000, a very different life from saving none.

TRY THIS

Write what you keep each month as a percentage of what you earn. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

SPEND ON PURPOSE

Spending is not the enemy. Decide what matters most and spend generously on it, and cut without guilt on the things that do not.

TRY THIS

Write your top three spending priorities and one thing you can cut without missing. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

SILENCE THE SCOREBOARD

Comparison can make you feel poor when you are doing fine. Muting a few accounts that make you spend is a cheap fix.

TRY THIS ☐

Write whose posts make you want to buy things and decide what to do about it.

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

MAKE A RULE OF QUIET

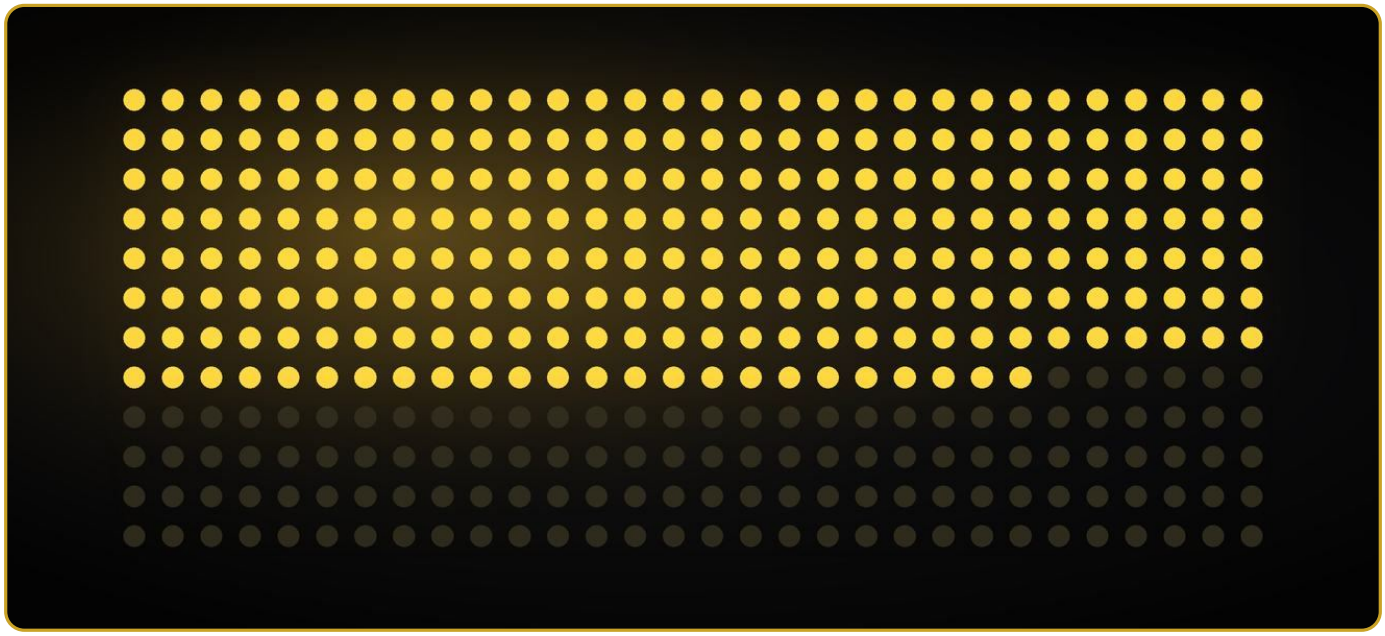

One rule can protect your plan: for instance, I wait a day before any purchase that is not on my list.

TRY THIS

Write your rule and put it where you will see it. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

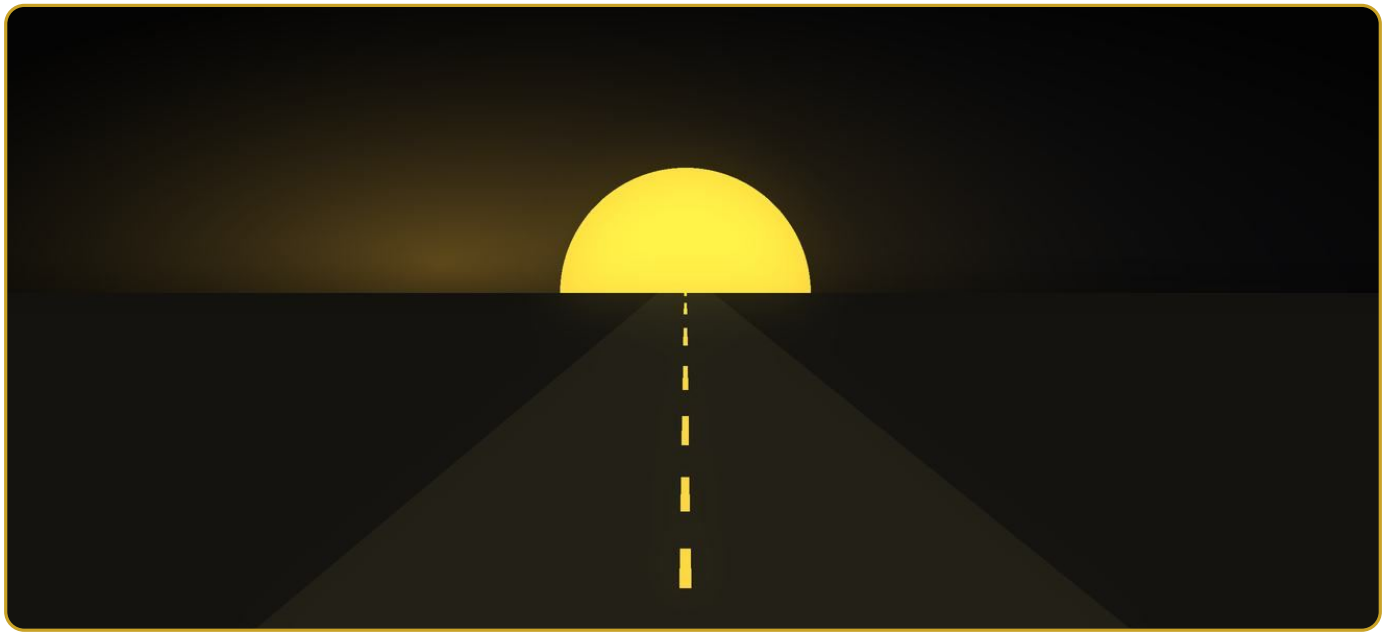

WEEKLY CHECK-IN

What did you do this week that your future self will thank you for?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

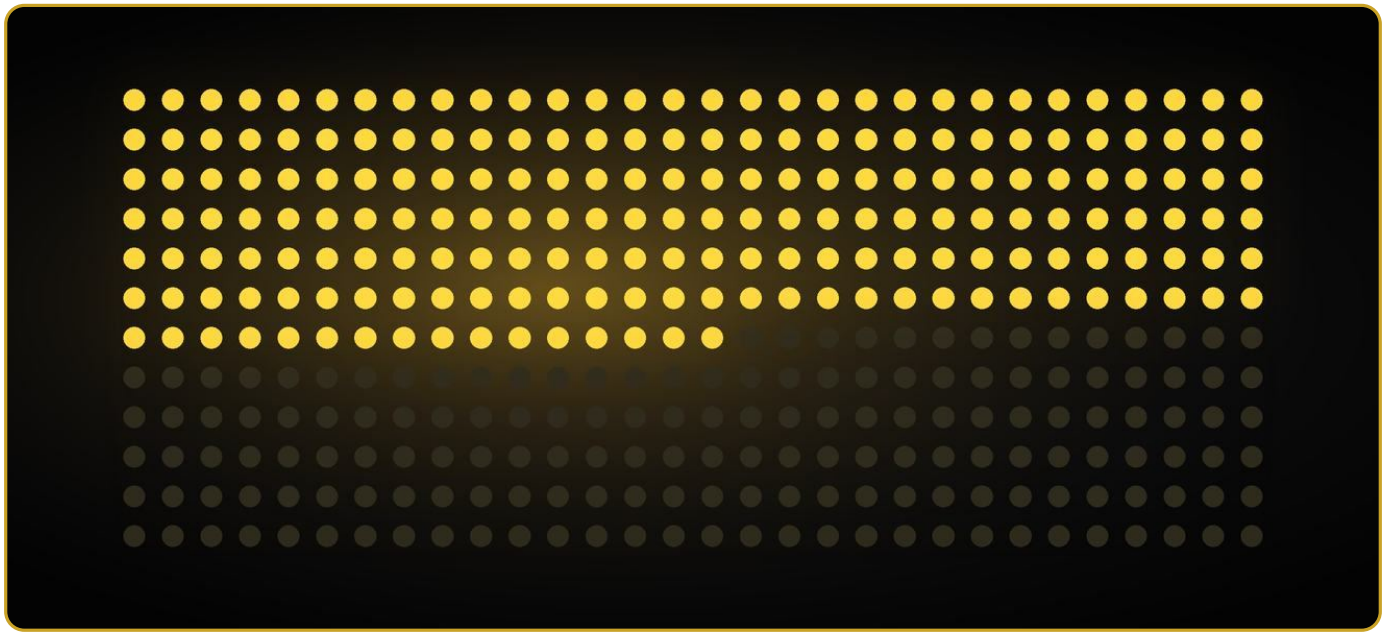

REFLECT AND RESET

What does a quiet, secure life look like for you?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week 1 2 3 4 5

LEARN

LOOK BACK HONESTLY

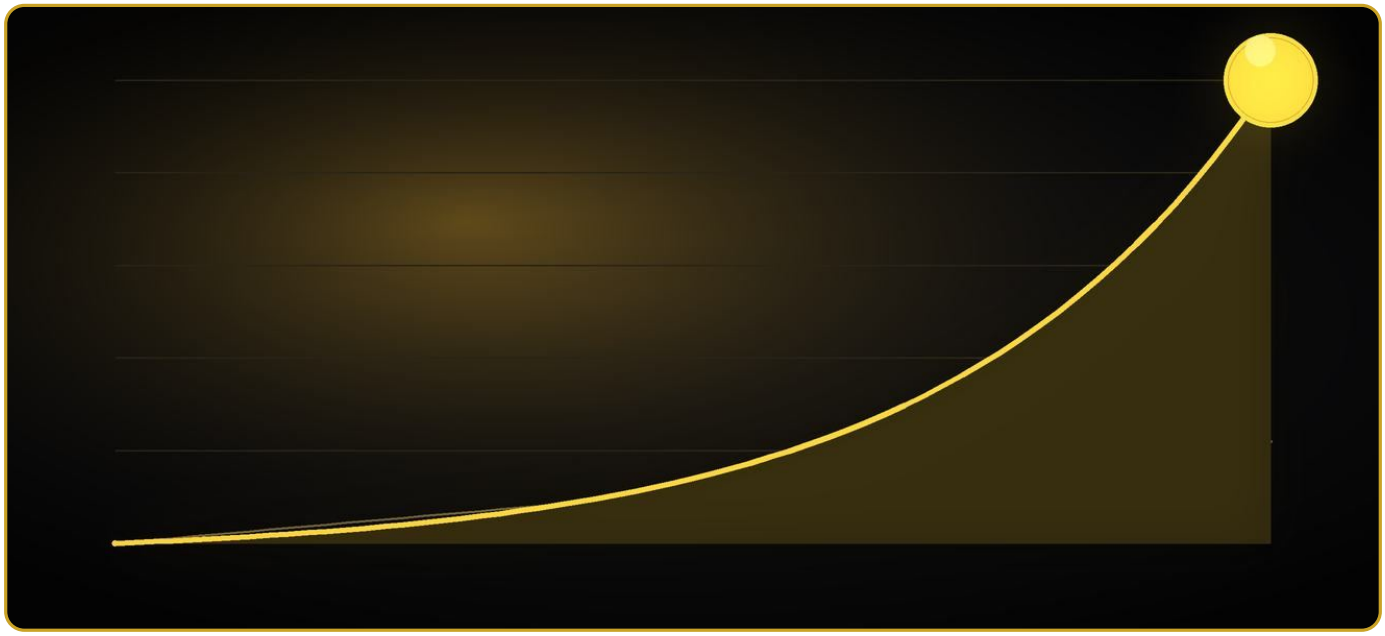

A year of money habits is a real record. Look at the numbers, not the story you tell yourself. Whatever you find, you did the work of looking.

TRY THIS

Update the Net Worth Snapshot. Compare it with Day 1. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

YOUR YEAR IN NUMBERS

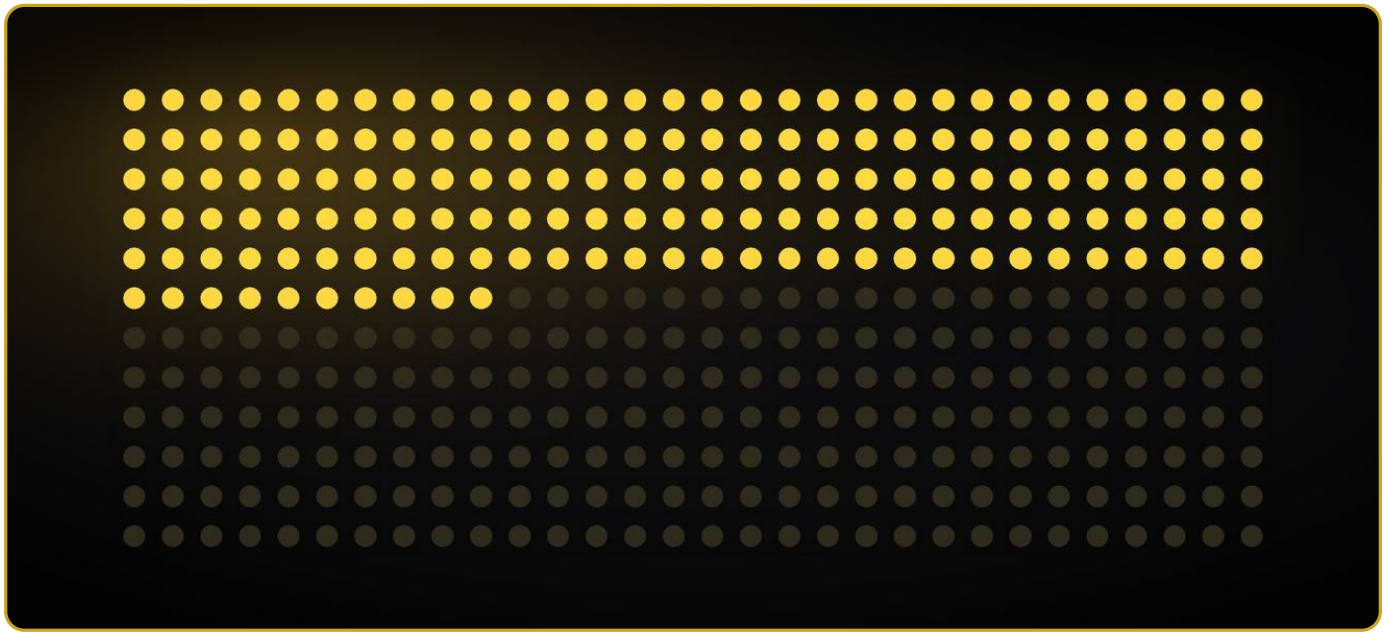

Add up your total saved, total debt paid, and the change in net worth. If you saved $250 a month for the year, that is $3,000. Write your own total.

TRY THIS

Write your year's totals in the table at the back of the book. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

HIGHS AND LOWS

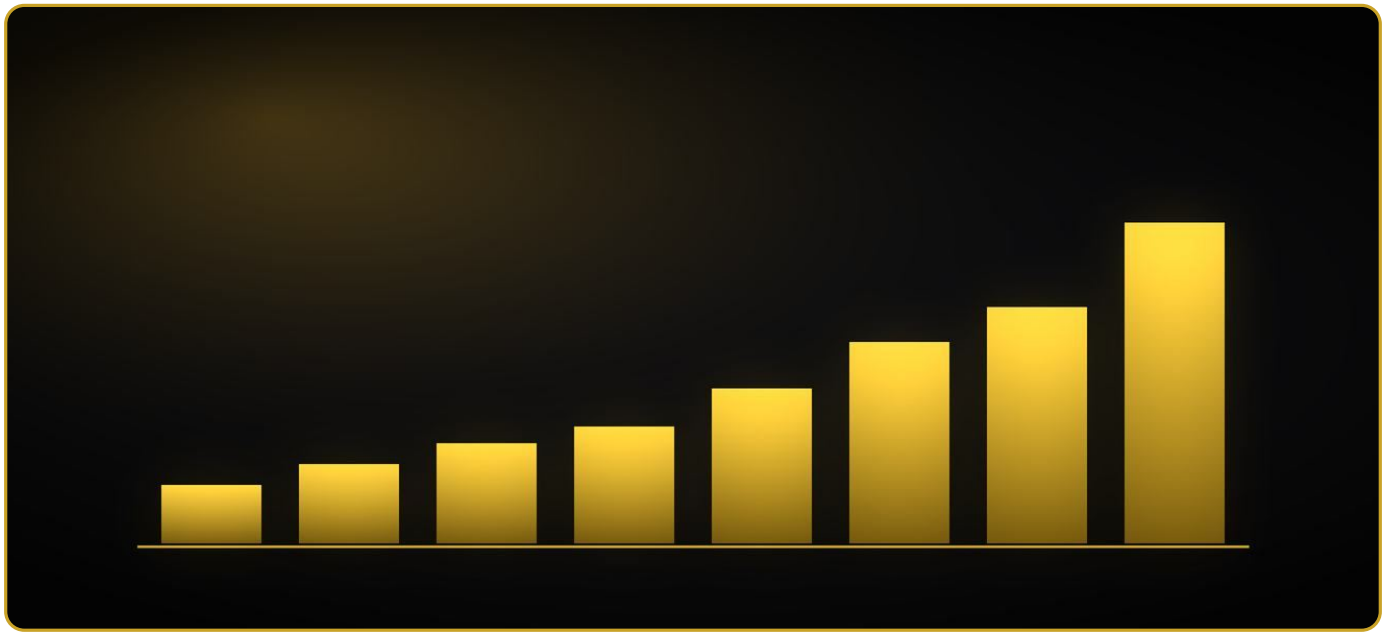

List your best money decision and your costliest mistake from the year. What did each teach you?

TRY THIS

Write one best decision and one costly mistake. Write the lesson from each. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

CREDIT THE EFFORT

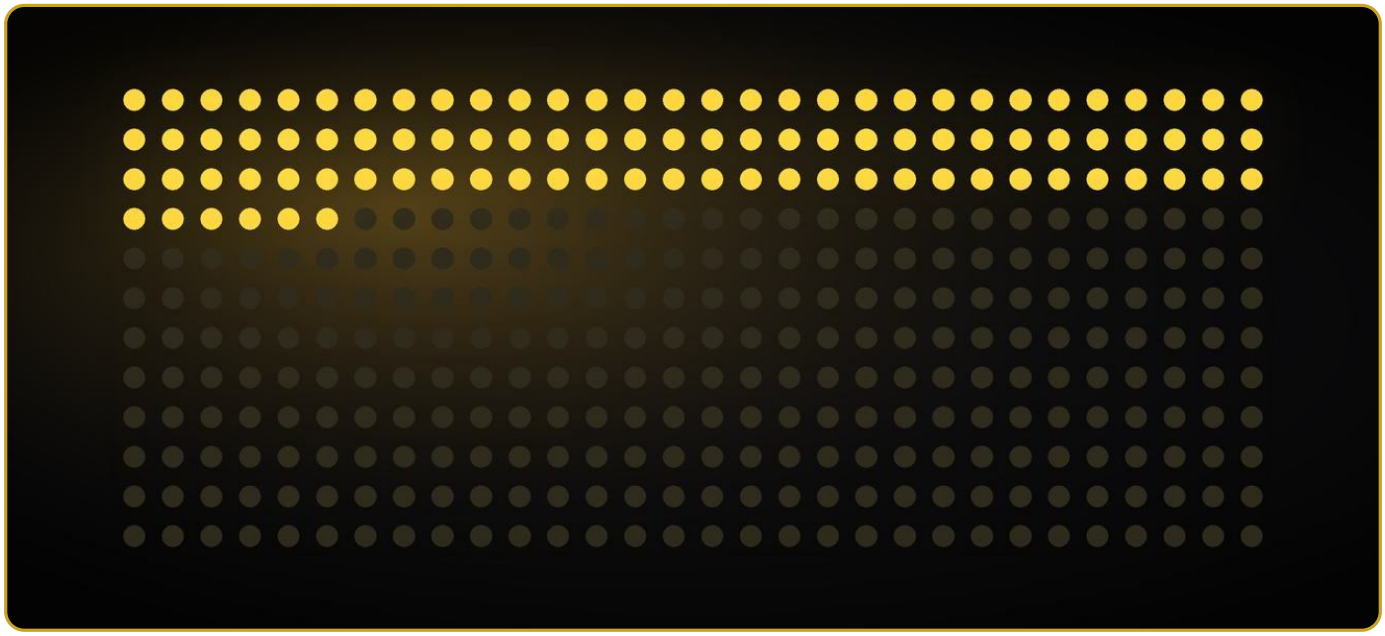

Many people only notice what they did not do. Naming what you did do reinforces habits.

TRY THIS

Write ten things you did with money this year that you are glad about. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

THANK SOMEONE

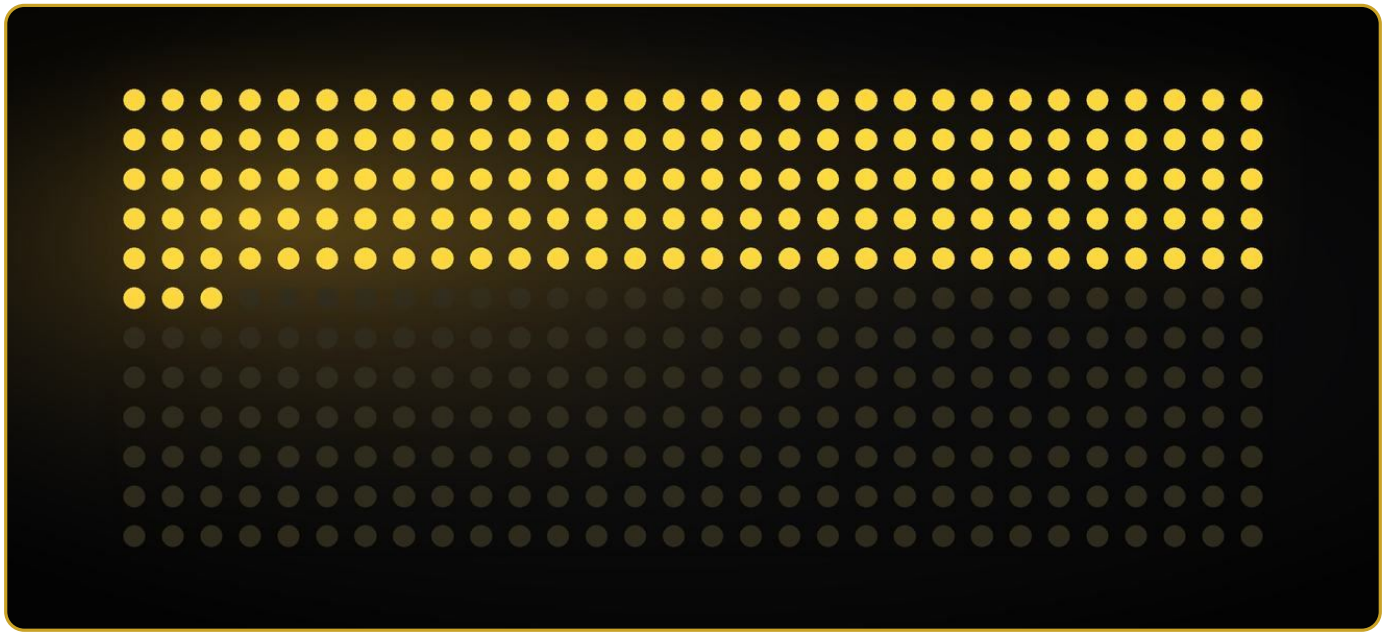

Who helped you with money this year, a friend, a family member, a source? Thank them.

TRY THIS

Write the person's name and send a short message today. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

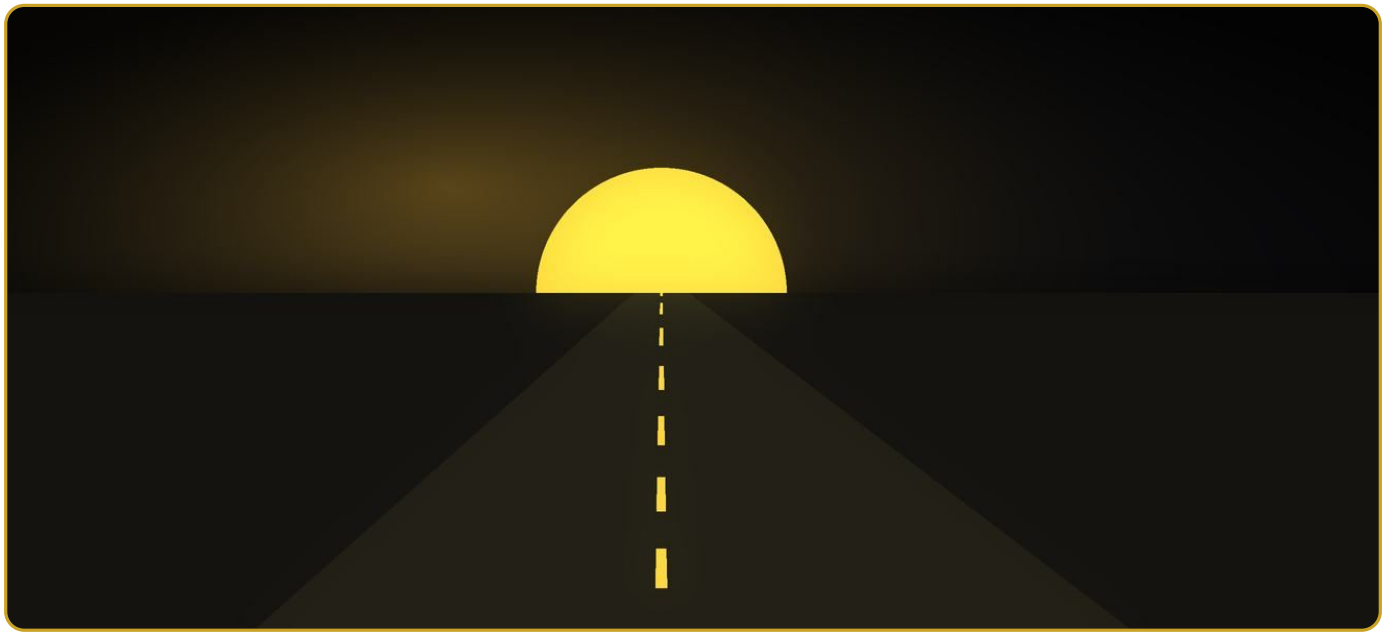

WEEKLY CHECK-IN

Write what you most want to carry into next year.

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

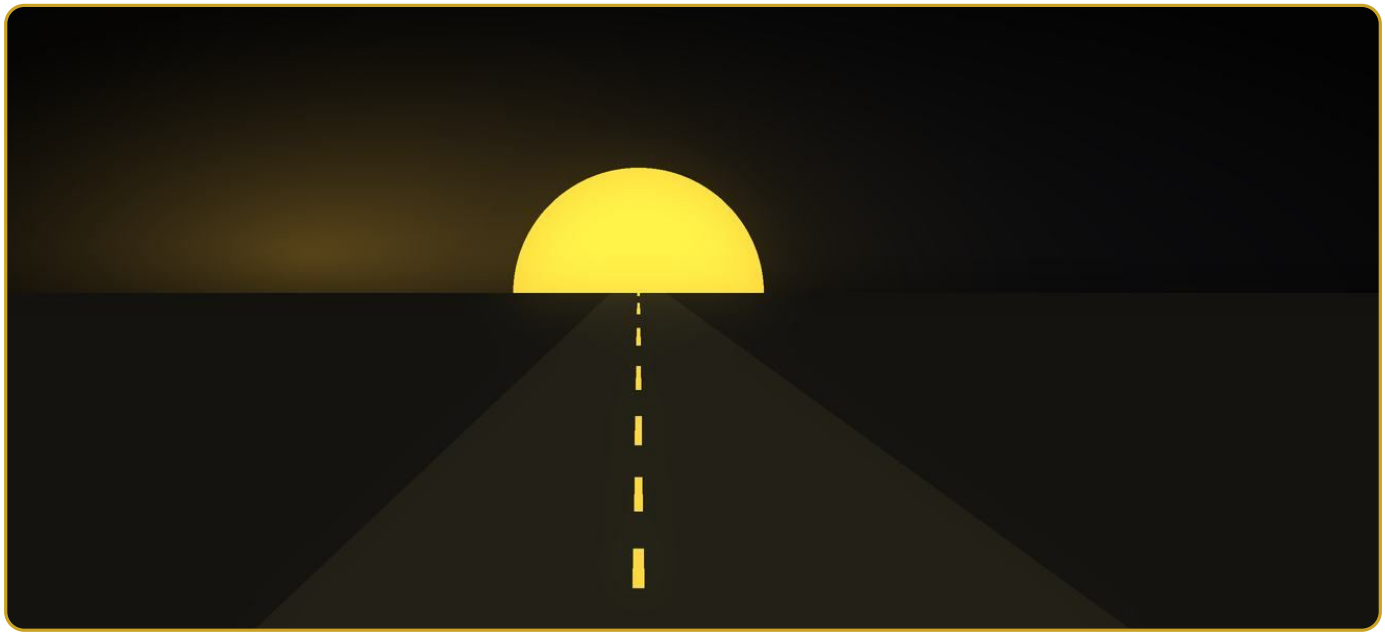

REFLECT AND RESET

What would you tell yourself on Day 1?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

LEARN

SET THE NEXT 12 MONTHS

A good plan for the coming year has three parts: a number to reach, a habit to keep and a risk to cover.

TRY THIS

Write one number, one habit and one risk for next year. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

BY THE NUMBERS

THE NEXT YEAR, IN NUMBERS

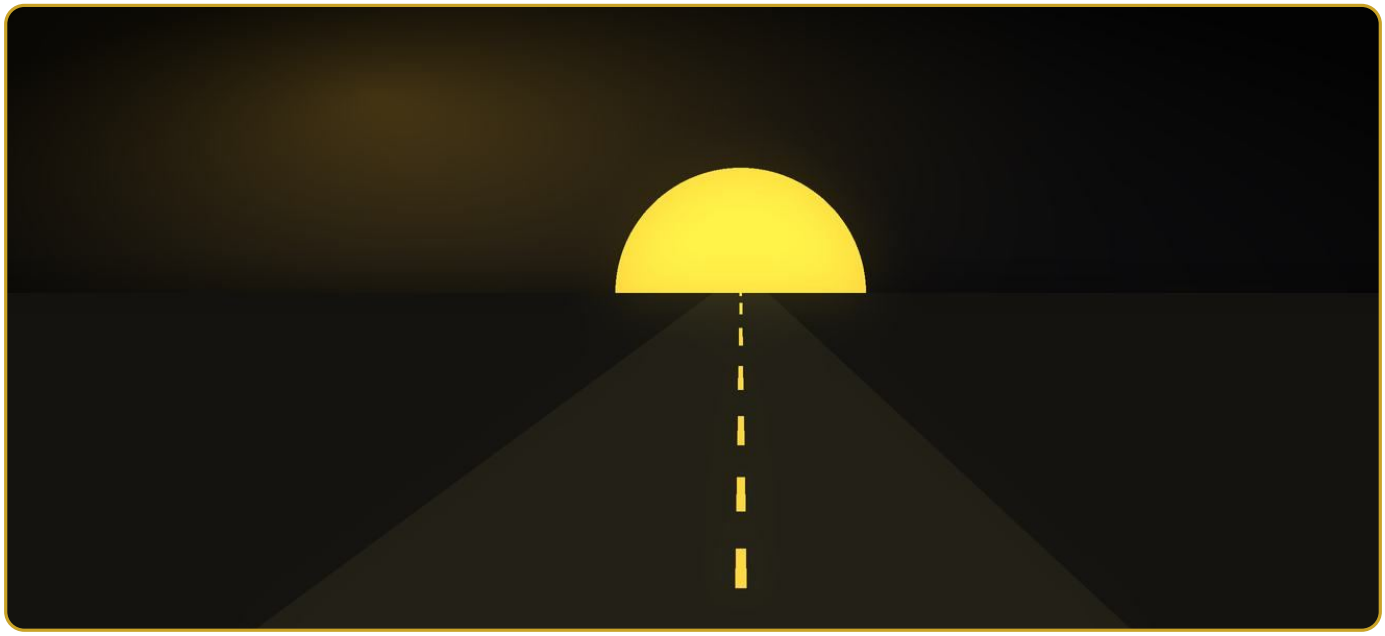

If you saved $300 a month next year, that is $3,600. If you increased that by 10%, it would be $3,960. Small increases are how a plan grows.

TRY THIS

Write your savings goal for next year in monthly and yearly amounts. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

DO IT

CHOOSE YOUR FIRST THREE MOVES

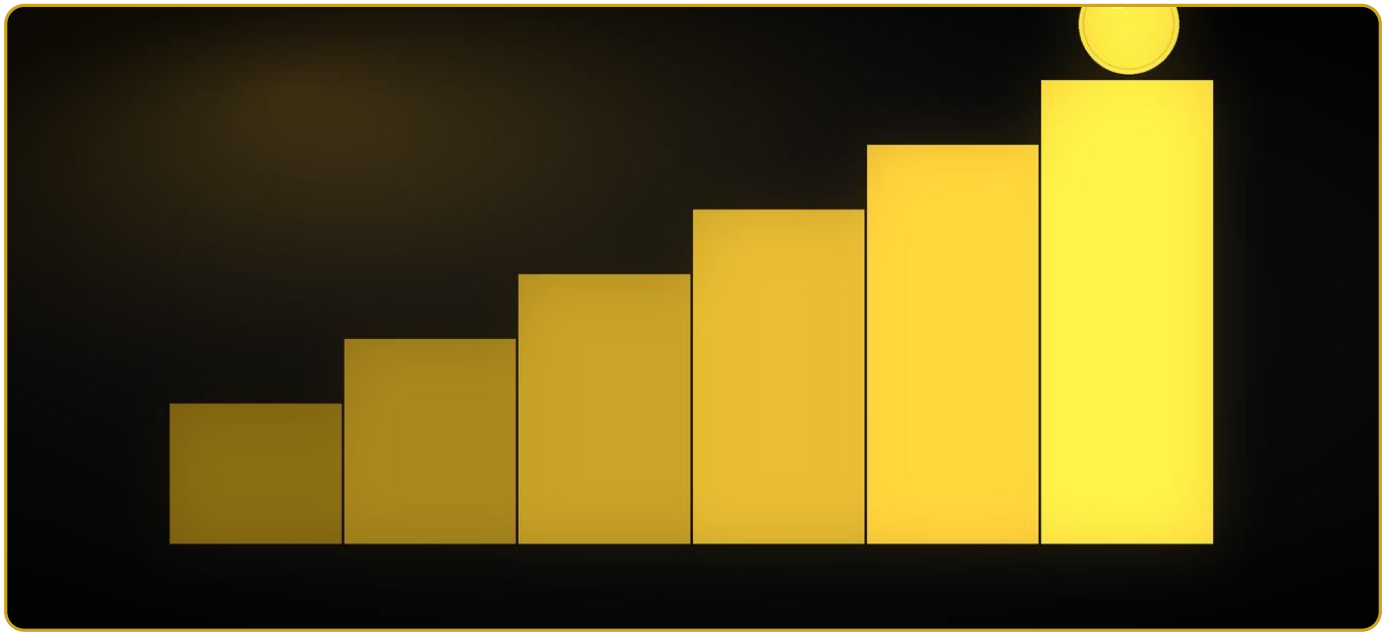

Write the first three actions you will do in January. Specific beats ambitious.

TRY THIS

Write three actions and the date for each. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

MINDSET

DO NOT WAIT FOR JANUARY

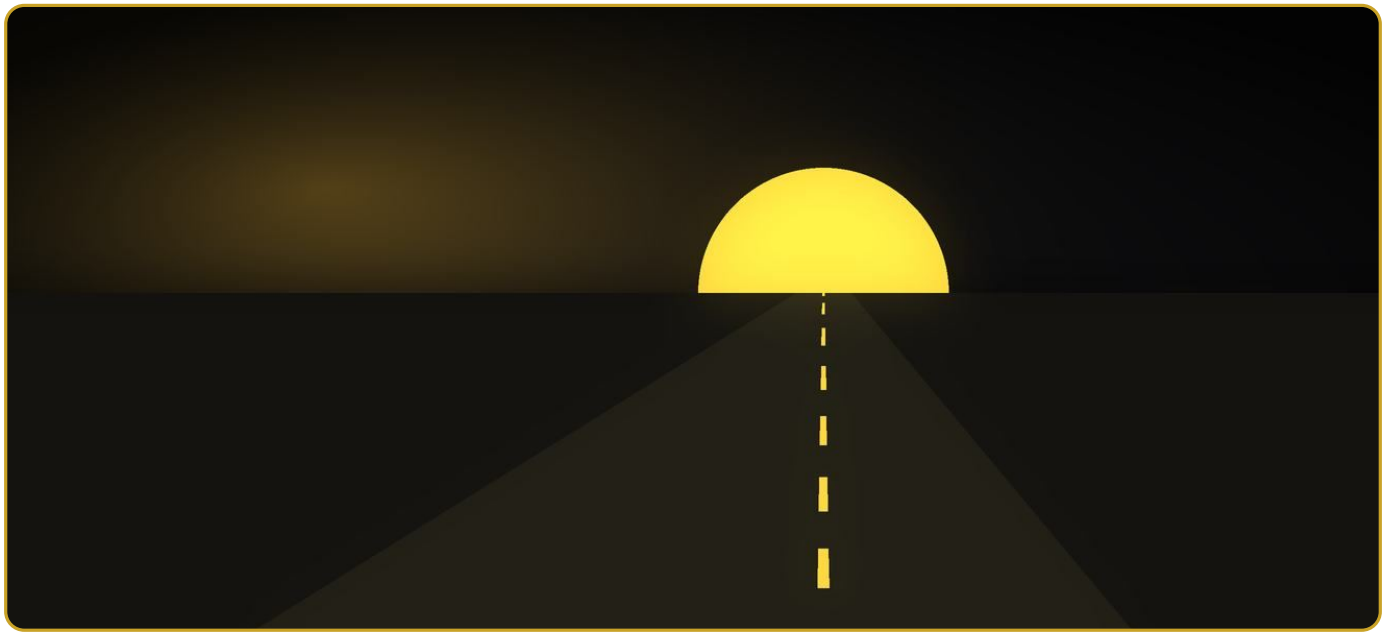

The best time to start a habit is today. A year is a collection of days.

TRY THIS

Pick one habit and start it tonight. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

ACTION

PLAN THE REVIEW

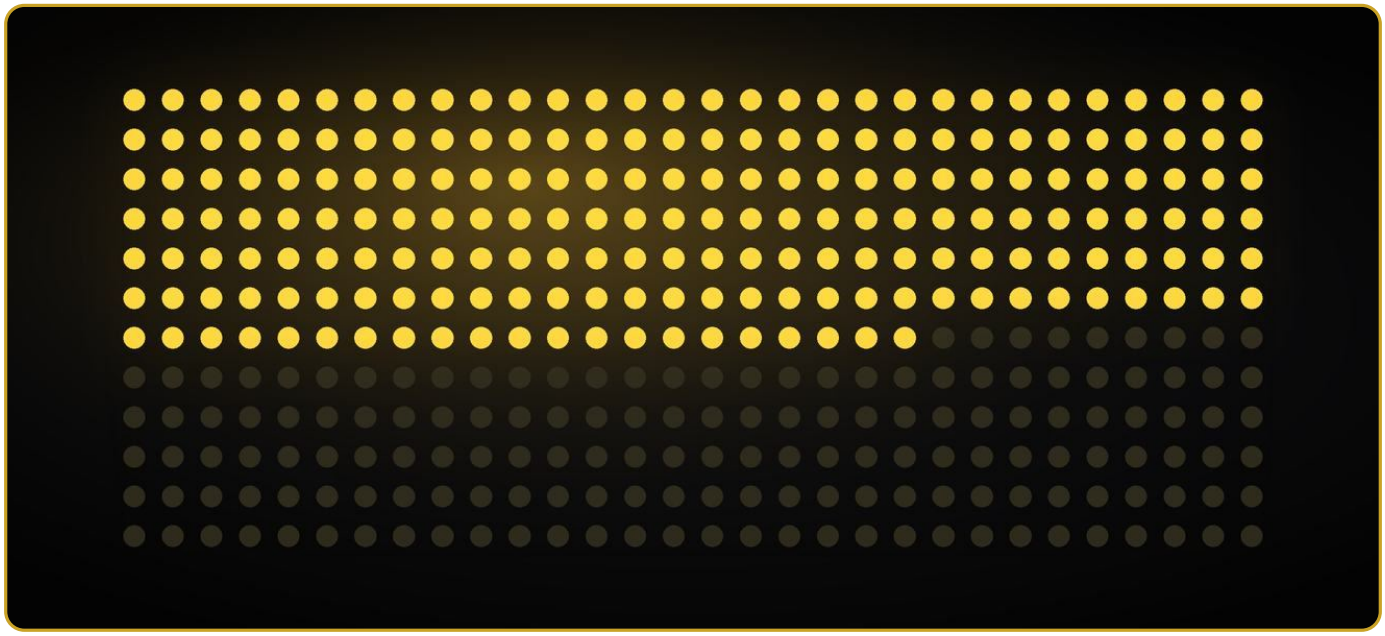

Put a date in your calendar for your next quarterly review.

TRY THIS

Write the dates for next year's four reviews. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

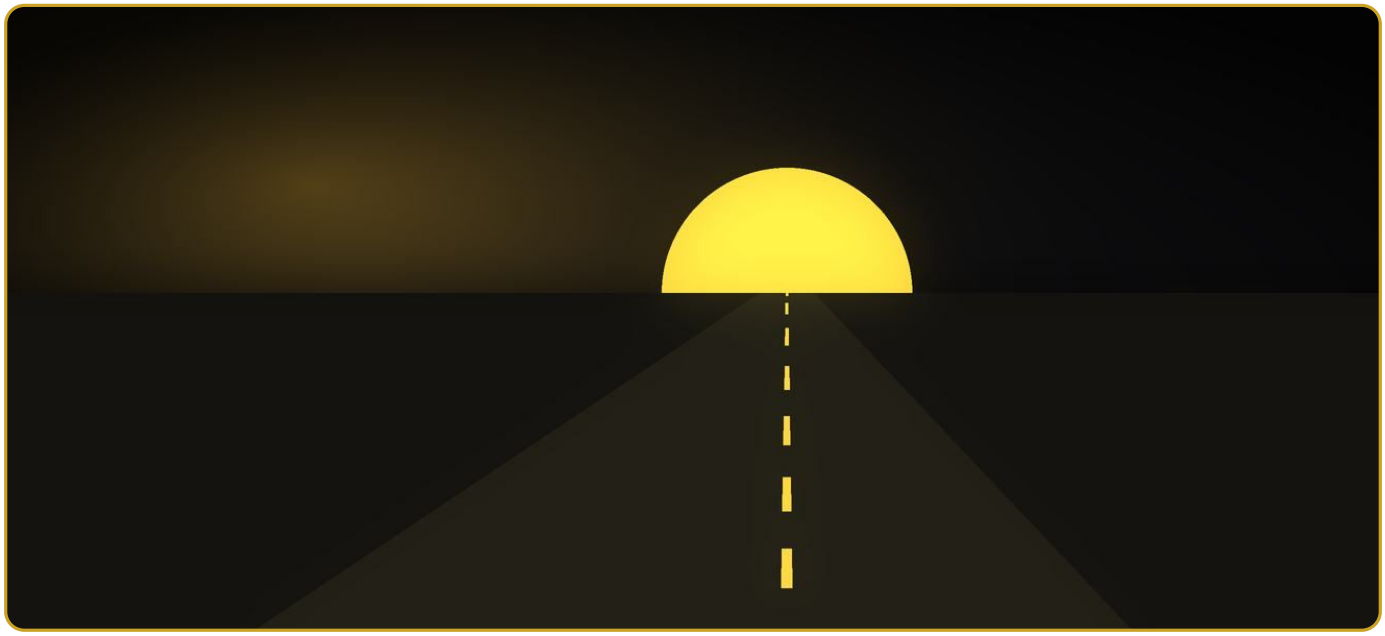

WEEKLY CHECK-IN

What is the one sentence summary of what changed for you this year?

Money in this week $	Spent this week $
Saved or invested $	Debt paid $

Three wins (any size)

One thing to fix next week

REFLECT AND RESET

Looking at the year, what are you proudest of?

Next week I will (tick when done)

- ☐ _____
- ☐ _____
- ☐ _____

Money mood this week (1) (2) (3) (4) (5)

THE LAST PAGE

ONE YEAR. ONE LAST PAGE.

You finished the Quiet Money Daily Planner. Not by being perfect but by coming back. Money is built from small, steady, honest actions repeated over time, and you now know how to do that. This planner is education, not financial advice, and every number in it is an example. Your real numbers are the ones that matter.

TRY THIS

Write one sentence to yourself about the person who started on Day 1 and the person who finished. ☐

My notes

Spent today $	Saved or paid down $	How I feel about money (1-5)

SUMMARY AND GOALS

Fill this in as you reach weeks 47, 51 and 52.

MY FREEDOM NUMBER (yearly spending divided by 0.04)

$ _____

MY THREE GOALS (a number and a date for each)

Under 3 months _____

Under a year _____

Five years or more _____

MY YEAR IN NUMBERS	AMOUNT
Total saved or invested	
Total debt paid	
Change in net worth	
Interest and fees I stopped paying	
Subscriptions cancelled (monthly $)	
Best money decision	
Costliest mistake (and the lesson)	

MONEY WORDS

Plain-English definitions of the terms in this book.

APR	Annual percentage rate: the yearly cost of borrowing, including interest.
ASSET	Something you own that can put money in your pocket (an investment, a business, a rental).
COMPOUND INTEREST	Interest earned on your earlier interest as well as on your original money.
CREDIT UTILISATION	How much of your credit limit you are using, as a percentage.
DEDUCTIBLE	What you pay yourself on an insurance claim before the insurer pays.
DIVERSIFICATION	Spreading money across many investments so one failure does not sink you.
EMERGENCY FUND	Cash set aside for unplanned, necessary costs, often three to six months of essentials.
EXPENSE RATIO	The yearly percentage a fund charges to run itself.
FREEDOM NUMBER	Yearly spending divided by a withdrawal rate such as 4%: an estimate, not a promise.
INDEX FUND	A fund that copies a market index instead of trying to pick winners.
INFLATION	The rise in prices over time, so the same money buys less.
LEVERAGE	Using borrowed money to control a bigger asset. It magnifies gains and losses.
LIABILITY	Something that takes money out of your pocket each month.
NET WORTH	What you own minus what you owe.
PASSIVE INCOME	Income from assets rather than hours, which usually takes capital or years of work first.
RULE OF 72	Divide 72 by a yearly rate to estimate the years it takes money to double.
SINKING FUND	Money set aside monthly for a cost you know is coming.
SNOWBALL AND AVALANCHE	Two ways to pay debt: smallest balance first, or highest rate first.

NOTES

NOTES

ABOUT THIS PLANNER

EDUCATION, NOT ADVICE

The Quiet Money Daily Planner is an educational tool. It is not financial, tax, legal or investment advice and it never recommends a particular product. Examples use made-up numbers and stated assumptions. Returns are never guaranteed and past results do not predict the future. Talk to a qualified professional about your own situation.

MADE WITH AI ASSISTANCE

Designed by Quiet Money with AI assistance. The lessons were written and fact-checked with the Quiet Money studio's tools, and every computed figure comes from one shared set of math functions that is tested. The pictures are original artwork drawn in code or made with AI tools.

LICENCE

Personal use for you and your household. Please do not resell, share or redistribute the files. One purchase covers printing as many copies as you need for yourself and your household.

QUESTIONS OR MISTAKES

If you find an error, reply to the message where you bought this. It gets fixed and you get the update.
