

MONEY RESET PRINTABLES

Six pages. A pen. Thirty minutes.

- 1. Print these pages (any printer; thin lines save ink). Letter and A4 versions are both included.**
- 2. Do one page a day, or all in one sitting. Use pencil for numbers you will update.**
- 3. Start with page 2: split one paycheck 50 / 30 / 20. Then audit your subscriptions (page 3).**
- 4. Pages 4 to 6 build your buffer, list your debts, and show your net worth. Update the net worth page every quarter.**

How the rules work

50 / 30 / 20 is a starting guideline, not a law: 50% of take-home pay for needs, 30% for wants, 20% for your future (savings and debt payments). If your needs are over 50%, circle the biggest one. That is next month's project.

A sinking fund is money you set aside monthly for a known future cost, so a big bill is a plan instead of a crisis.

Net worth is what you own minus what you owe. Watching it rise every quarter beats watching any single day's balance.

License: personal use for you and your household. Please do not resell, share or redistribute the files.

50 / 30 / 20 PAYCHECK SPLIT

Write your take-home pay, then give every dollar a job.

Monthly take-home pay \$ _____

NEEDS50% pay x .50 = \$ Rent, food, bills, transport	WANTS30% pay x .30 = \$ Fun, dining out, hobbies	FUTURE20% pay x .20 = \$ Savings, investing, debt
--	--	---

What I actually spend:

Needs \$

Wants \$

Future \$

My biggest need to shrink this month:

One thing I will do about it:

SUBSCRIPTION AUDIT

Open last month's statements. Every recurring charge goes here.

Subscription	Per month	Per year	Keep	Cancel	Last used

Totals: per month \$_____ per year \$_____

Per year = per month x 12. A \$15 a month subscription costs \$1,800 over 10 years. Cancel at least one today.

SINKING FUNDS

Save a little every month for the bills you already know are coming.

Fund (car, gifts, insurance...)	Target \$	Due date	Months left	Set aside / month	Saved so far

Set aside per month = target divided by months left. Example: \$600 due in 6 months is \$100 a month.
Move it on payday so it never feels spent.

DEBT LIST

Highest rate first (avalanche) or smallest balance first (snowball). Pick one.

Debt	Balance \$	Rate %	Minimum \$	Order	Paid off on

Extra I can pay each month on top of minimums: \$_____

My method (circle one): Avalanche Snowball

Never pay only the minimum: it is built to last. Put every extra dollar on the first debt in your order, and when it is gone roll its payment onto the next.

NET WORTH SNAPSHOT

What you own minus what you owe. Update every quarter.

Date: ____ / ____ / ____

I OWN (assets)	
Cash and checking	\$
Savings	\$
Investments and retirement	\$
Home value	\$
Car value	\$
Other	\$
	\$
	\$
TOTAL \$	

I OWE (liabilities)	
Credit cards	\$
Car loan	\$
Student loans	\$
Mortgage	\$
Personal loans	\$
Other	\$
	\$
	\$
TOTAL \$	

NET WORTH = assets - liabilities = \$

Change since last quarter: \$
